A. The foreign currency fluctuations appropriation was established to eliminate losses or gains to programs caused by fluctuation of specified foreign currency exchange rates from those used in the budget. (Working Capital Fund (WCF) foreign currency fluctuations are absorbed by the incurring WCF business area, not the foreign currency account.) Contractual obligations or other obligations payable in the specified foreign currencies may not be adjusted until disbursements are made from the appropriation account involved.

B. When foreign currencies not specified in the foreign currency fluctuations appropriation account are involved, any adjustments at the time of payment shall be supplemented with adjustments made at yearend and may be made at any other time a significant change occurs in order to avoid overobligation of an allotment.

081111. Security Guard and Firefighting Services

A. Title 10, United States Code, section 2465, prohibits the obligation or expenditure of appropriated funds for the purpose of entering into a contract for the performance of firefighting or security guard functions at any military installation or facility in the United States, including Alaska and Hawaii. This prohibition does not apply to (1) a contract that is to be performed in the commonwealths, territories, or possessions of the United States, or other locations outside the United States, when members of the Armed Forces otherwise would have to be used for the performance of firefighting or security guard services at the expense of unit readiness; (2) a contract to be carried out on a government-owned, contractor-operated (GOCO) installation; or (3) a contract (or renewal of a contract) for the performance of a function that was under contract on September 24, 1983.

B. Section 204(b) of the Defense Authorization Amendments and Base Closure and Realignment Act (P.L. 100-526), as amended by section 2905 (b)(8) of the Defense Base Closure and Realignment Act of 1990 (P.L. 100-510), as amended, authorizes special procedures for providing security guard (or firefighting) services 180 days before an installation closes under the Base Realignment and Closure initiative.

0812. APPROVAL OF ADJUSTMENTS IN EXPIRED APPROPRIATION ACCOUNTS

No automatic upward obligation adjustments in excess of \$1,000,000 that involve any individual action or contract shall be accomplished to expired appropriation accounts. Instead, such adjustments shall be submitted to, and approved by, the Head of the DoD Component. There shall be no “netting” of upward adjustments against downward adjustments to avoid this prior approval requirement. The prior approval authority may be delegated; however, a report of approvals must be submitted by the delegee to the Component Head since he or she ultimately is responsible for such approvals. This report to the Component Head shall be submitted no less frequently than annually prior to submission of the Year-End Closing Statement, TFS Form 2108 (see Volume 6, Chapter 4 of this Regulation). The Component Head shall confirm the actions taken by the delegee and evidence of the conflation shall be retained for audit.

CHAPTER 9

STATUS OF PRIOR YEAR CONSTRUCTION ACCOUNTS

0901 FUNDING REVIEW OF PRIOR YEAR PROGRAM EXECUTION

090101. Purpose

This chapter provides guidance for the submission of status reports concerning all prior year Military Construction and Family Housing Accounts. The intent is to adjust these accounts annually, during the August/September timeframe, to reflect the latest estimate of funding requirements for these programs.

090102. Reporting Requirements

Annually, by August 1, each DoD Component holding Military Construction and Family Housing funding authorities shall submit recommendations in the format of Exhibit MC-4 (see Appendix A) for financial adjustments to these authorities based on current cost estimates. Unobligated balances will be withdrawn unless supported by firm requirements. In all cases where unobligated balances for programs more than two years old are not being made available for withhold, a statement shall be transmitted to identify the status of each project and efforts made to complete the financing. Exhibits shall be submitted in duplicate to the ODC(P/B)MilCon.

Separate Exhibits MC-4 shall be prepared and submitted for the five active program years, categorized by budget activity. Instructions for the completion of the MC-4 exhibits are contained in Appendix A.

APPENDIX A

MILITARY CONSTRUCTION _____
 FUNDING REVIEW
 BUDGET ACTIVITY (SPECIFY)
 FISCAL YEAR _____

(1) Project & Location	(2) Current Estimate	(3) Obligational Authority Issued	(4) Cumulative Obligations as of the Past June 30	(5) + or - Authority Required for Completion	(6) Remarks
	<u>1/</u>	<u>2/</u>		<u>3/</u>	

1/ Enter the best estimate of the total amount this project will cost when complete.

2/ Enter the amount of obligational authority issued. This amount should agree with the amounts provided by project on the OSD funding documents. In certain cases funds may be realigned between the various projects in accordance with prescribed programming procedures. However, in no case should the total of the projects shown in this column for a given fiscal year exceed the amount provided on the OSD obligational authority document.

3/ Enter the amount of authority required to complete the project. If the total of this column for a fiscal year program is negative those funds will be withdrawn unless a justification is provided why they should not be withdrawn. If the total of this column for a fiscal year is positive, an explanation should be provided why the additional funds are required.

CHAPTER 10

ACCOUNTING REQUIREMENTS FOR EXPIRED AND CANCELED ACCOUNTS1001 INTRODUCTION

100101. Purpose. This chapter implements within the Department certain provisions of Title 31, United States Code, relating to expired and canceled accounts. The governmentwide amendments to Title 31 are contained in Title XIV of the National Defense Authorization Act for FY 1991 (Public Law 101-510, dated November 5, 1990).

100102. Terminology. Terms associated with accounting for expired and closed or canceled accounts are included in the definitions section (Appendix C) to this chapter.

1002 POLICY AND PROCEDURES100201. Implementation of Permanent Provisions

A. For 5 years after the time an appropriation expires for incurring new obligations, both the obligated and unobligated balances of that appropriation shall be available for adjusting and liquidating obligations properly chargeable to that account.

B. Certain appropriations are available for obligation for a specific period, i.e., annual and multi-year appropriations. Both the obligated and unobligated balances of such appropriations shall be canceled, and will no longer be available for obligation or expenditure for any purpose, on September 30th of the 5th fiscal year after an appropriation's period of availability for incurring new obligations expires (31 U.S.C. 1553(a)).

C. Certain appropriations are available for an indefinite period. Obligated and unobligated balances in such appropriations shall be canceled when (1) no disbursements have been made from the indefinite appropriation for a period of 2 years and (2) the President, the Secretary of Defense or his designee determines the purposes for which the appropriation was made have been carried out (31 U.S.C. 1555).

D. Before an account cancels, the affected DoD Component shall identify valid unliquidated obligations subject to cancellation to determine if (1) appropriations are available for future adjustments or payments against such obligations, or (2) other provisions for adequate resources have been made to pay for such obligations that will cancel with an account.

E. Following cancellation of an appropriation, should it become necessary to adjust an obligation which would otherwise have been properly chargeable (both as to purpose and amount) to an appropriation before cancellation, then the obligation shall be charged to an appropriation currently available for the same purpose, subject to certain limitations discussed in paragraph 100201.F., below.

F. When a currently available appropriation is used to pay an obligation, which otherwise would have been properly chargeable (both as to purpose and amount) to a canceled appropriation, the total of all such payments by that current appropriation may not exceed the lesser of:

1. The unexpended balance of the canceled appropriation (the unexpended balance is the sum of the unobligated balance plus the unpaid obligations of an appropriation at the time of cancellation, adjusted for obligations and payments which are incurred or made subsequent to cancellation, and which would otherwise have been properly charged to the appropriation except for the cancellation of the appropriation); or

2. The unexpired unobligated balance of the currently available appropriation; or

3. One percent of the total original amount appropriated to the current appropriation being charged.

- a. For annual accounts, the 1 percent limitation is of the annual appropriation for the applicable account--not total budgetary resources (e.g., reimbursable authority).

- b. For multi-year accounts, the 1 percent limitation applies to the total amount of the appropriation. As an example, if a multi-year account enacted for FY 1992 through FY 1994 is \$100 million, then the 1 percent limitation in FY 1992 would be \$1 million. If, at the end of FY 1992, \$650,000 was used for payment of obligations of canceled accounts, then the amount available to be used for such payments in FY 1993 would be \$350,000 (\$1,000,000 minus \$650,000).

- c. For contract changes (as specified in subsection 100202, below), charges made to currently available appropriations will have no impact on the 1 percent limitation rule. That is, the 1 percent (of the currently available appropriation) amount will not be decreased by the charges made to current appropriations for contract changes.

G. In order to prevent overpayments and ensure that applicable limitations are not exceeded, DoD Components shall:

1. Identify the unobligated balance and unpaid obligations of all expired appropriations at the time they expire.

2. Identify the unobligated balance and unpaid obligations of all canceled appropriations at the time they are canceled.

3. Identify to canceled accounts all obligations and payments charged to currently available appropriations, which otherwise would have been properly chargeable

(both as to purpose and amount) to a canceled appropriation (as provided for in paragraph 100201.F., above).

4. Maintain identification of the amount for which it is permissible to charge current appropriations for obligations and payments which otherwise would have been properly chargeable (both as to purpose and amount) to a canceled appropriation. This amount is determined by subtracting, from the unexpended balance of the appropriation at the time it was canceled, all subsequent obligations and payments made as indicated in subparagraph 100201.G.3., above.

5. Maintain proper general ledger controls for valid unpaid obligations and receivables pertaining to canceled accounts. General ledger controls shall be perpetuated until all obligations are paid and accounts receivable collected. (This will ensure that valid liabilities continue to be tracked until satisfied, even though the accounts are canceled.)

100202. Implementation of Contract Change Provisions Within the Department of Defense

A. Public Law 101-510 defines a “contract change” as a change under which a contractor is required to perform additional work. Subsections 100204 and 100205, below, contain procedures for requesting approval of certain obligation adjustments for contract changes.

B. Obligation adjustments, such as incentive or award fees and price inflation (escalation or economic price adjustments), are not considered contract changes for purposes of paragraph 100202.A., above. To the extent otherwise appropriate, such amounts maybe charged to applicable accounts which otherwise have expired for incurring new obligation (but have not yet been canceled). Such charges or adjustments shall be supported by comprehensive written documentation containing a statement that the charges do not require, involve, or result in additional work or changes in scope. This statement shall explain the circumstances, contingencies, or management practices that necessitated the adjustment.

C. Title 10, United States Code, section 7313(b), and applicable appropriation language, permit expired appropriations available to the Department to be used for new obligations of appropriations for specific purposes. Those include payment to a Working Capital Fund activity and payment to a contractor for unusual cost overruns and changes in the scope of work for ship overhaul, maintenance, and repair.

1. While expired appropriations may be used in certain instances for new obligations, these appropriations are not available beyond the end of the fifth fiscal year following their expiration.

2. DoD appropriations--primarily Operation and Maintenance, Navy appropriations--covered by 10 U.S.C. 7313(b) expire and are canceled at the same time as other appropriations. These appropriations shall not be available for the payment of changes in the

scope of work for ship overhaul, maintenance, and repair beyond the end of the fifth fiscal year following the expiration of such appropriations for other purposes.

100203. Shipbuilding and Conversion (SCN). Navy Appropriation.

A. The period of availability to incur obligations in the SCN appropriations for all purposes normally is 5 years. However, for limited purposes, SCN finds are available for obligation after the 5-year period has ended. Appropriation language for the SCN appropriation often contains a provision to the effect that additional obligations for engineering services, tests, evaluations, and other such budgeted work that must be performed in the final stage of ship construction may be incurred after the appropriation otherwise would expire for obligation. This additional period allowed for incurring new obligations for such purposes is called “extended availability.”

B. The Department of Defense and the Department of the Treasury employ special procedures to establish extended availability authority for the SCN appropriations because not all work required to induct a ship into the fleet can be completed within the first 5 years of availability of an SCN appropriation. The procedures are summarized as follows:

1. The fiscal year of the latest obligation work limiting date (OWLD) for the last vessel financed by a particular SCN appropriation will represent the period of availability for obligation. After such date, the appropriation enters an expired status for 5 years and the balances are available only for obligational adjustments and payments.

2. An SCN appropriation is canceled/closed on September 30 of the fifth year following the year of the last OWLD. Before the end of each fiscal year, the Department of Defense notifies the Department of the Treasury of the last OWLD for the SCN appropriation that will be expiring on September 30 of that fiscal year. By the ninth workday of November of each year, the unobligated and obligated balances of that SCN appropriation are transferred by an SF 1151, “Non-Expenditure Transfer Authorization” to the new Treasury fiscal year symbol.

3. For example, on September 18, 1995, the Navy notified the Department of the Treasury that the last OWLD for the FY 1991/1995 SCN appropriation was September 30, 2001. Before November 14, 1995, the balances of that SCN appropriation were transferred to the FY 1991/2001 SCN appropriation with a cancellation date 5 years later--September 30, 2006.

C. The obligated and unobligated balances of the merged SCN account are not available for adjusting and disbursing purposes after September 30, 1993.

100204. Obligation Adjustments for a Contract Change in Excess of \$4 Million.

An obligation adjustment for a contract change under which a contractor is required to perform additional work, may be incurred only if the obligation has been approved by the USD(C), as designee of the Secretary of Defense. Approval shall be sought when the amount of the

obligation would cause the total amount of charges in any fiscal year for a single program, project, or activity to exceed \$4 million and the account being used to fund the obligations is no longer available for new obligation.

A. Requests for approval, if necessary, shall be submitted by the applicable DoD Component to the ODC(P/B).

B. Requests for approval shall include the following documentation:

1. The amount to be obligated,
2. The purpose for which the finds are to be obligated, and
3. An explanation of the obligation adjustment including the reason for the adjustment and the contingencies or management practices which caused the need for the adjustment.

C. Supporting documentation shall be retained for future reference.

100205. Obligation Adjustments for a Contract Change of \$25 Million or More. Special handling is required to process any obligation adjustment to an expired appropriation for a contract change, under which a contractor is required to perform additional work for amounts in any fiscal year of \$25 million or more. Such adjustments may be made only after the USD(C), as designee of the Secretary of Defense, submits a notice of intention to make the obligation--along with the legal basis and policy reasons for the obligation--to the Armed Services and Appropriation Committees of the Senate and National Security and Appropriations Committees of the House of Representatives.

A. After 30 days have elapsed following submission of the notice, the proposed obligation may be recorded (unless any cognizant congressional committee notifies the USD(C) of its disapproval).

B. Such charges or adjustments shall be supported by a written comprehensive statement concerning the reason for the adjustment. This statement should explain the circumstances, contingencies, or management practices which caused the need for the adjustment.

C. When notification to the Congress is necessary, the applicable DoD Component shall submit the required documentation (including letters to the appropriate congressional committees for the USD(C) signature) to the ODC(P/B).

100206. Reprocurements. Expired funds also may be used to fund a replacement action--replacement contract--under certain conditions. When a reprocurement action will result in a replacement contract, it may be funded from expired funds if all of the conditions in para-

graphs 100206.A.-D., below, are met. (If all of the conditions cannot be met, current year funds shall be used to fund the requested action.)

A. The DoD Component has a continuing bonafide need for the goods or services involved.

B. The original contract was made in good faith.

C. The original contract was terminated for default or for the convenience of the government. If the original contract was terminated for the convenience of the government, the termination shall have been the result of a:

1. Court order;

2. Determination by a contracting officer that the contract award was improper due to explicit evidence that the award was erroneous and when the determination is documented with appropriate findings of fact and of law; or

3. Determination by other competent authority (e.g., a Board of Contract Appeals) that the contract award was improper.

D. A repurchase contract is used to obtain the goods or services that originally had been ordered under another contract that was terminated either for default or convenience of the government. The replacement contract is:

1. Substantially of the same size and scope as the original contract and

2. Executed without undue delay after the original contract is terminated.

E. If a repurchase action will result in an obligation which exceeds \$4 million, such action shall be submitted to the USD(C) for approval.

F. If a repurchase action will result in an obligation that exceeds \$25 million, a notice of intention (as discussed in subsection 100205., above), shall be submitted to the congressional committees at least 30 days in advance. After 30 days have elapsed following submission of the notice, the proposed obligation may be recorded unless one of the cognizant congressional committees notifies the USD(C) of its disapproval.

100207. Obligation Adjustments or Payments from Current Appropriations for Canceled Accounts

A. When making payments from a current appropriation account for obligations of a canceled account, DoD Components must request a “subclass” account from the

Department of the Treasury, Requests for subclass accounts must be submitted in writing to the Treasury Department, through the Defense Finance and Accounting Service, and include the purpose for the payment. The address to which requests should be sent is listed in Treasury Bulletin No. 91-03. These subclass accounts will be used to record applicable payments on the books of the Treasury Department. Such payments shall be reported monthly on each Component's Statement of Transactions.

B. Amounts for obligations that otherwise would have been properly chargeable to a canceled account, but are required to be charged to current accounts, shall be recorded only in the current account when payment is imminent during the current fiscal year. Therefore, amounts for such obligations shall not be reported on the year-end FMS Form 2108 unless payment has been made. However, if at year-end, such amounts for obligations are known to be payable in the coming fiscal year, this information should be footnoted on the year-end FMS Form 2108.

C. Current year obligation adjustments required due to canceled balances shall be entered against specific applicable line items in column k of DD Form 1416, "Report of Programs," as a negative amount. If these adjustments cause the line item to exceed current year reprogramming thresholds, the amount in column k will be footnoted to indicate that the amount is "applicable to canceled account adjustments." No reprogramming action will be required. In addition, the total of all canceled account adjustments charged to the applicable appropriation will be entered in column k as a separate line item titled "Reduction to Finance canceled Account Adjustments." This amount shall be shown as a positive number.

100208. Use of Current Year Funds When Sufficient Obligational Authority Does Not Exist in a Expired Appropriations. Section 1004 of the National Defense Authorization Act for FY 1993 permits current year funds to be used when sufficient obligational authority does not exist in expired appropriations for Fiscal Years before 1992 whose availability for new obligations expired at the end of FY 1985 through FY 1992, and which are not canceled. That authority contains the following restrictions:

A. The amount charged to a current account may not exceed an amount equal to 1 percent of the total amount of the current appropriation being charged, or 1 percent of the total amount of the appropriation of the expired account, whichever is less. (The 1 percent limitation under section 1004 is in addition to the 1 percent limitation under Public Law 101-510 (see paragraph 100201.F., above) that applies to charges that can be made to a current account when the account that should have been charged has been canceled.)

B. The appropriate expired account shall be charged for obligations that are properly chargeable to an expired account whenever sufficient resources exist to find the obligation in the applicable expired account. There should be no charges against a current account if there is a sufficient balance remaining in an expired account.

C. Obligations that otherwise would be properly chargeable to an expired account, except that insufficient resources exist in the expired account to fund the applicable

obligation, should not be charged against a current account unless all of the following conditions have been met:

1. The obligation is charged to an appropriation available for the same purpose as the applicable expired account and is otherwise properly chargeable (except as to amount) to the applicable expired account before cancellation of the expired account.

2. The Military Department Assistant Secretary for Financial Management and Comptroller or the Comptroller of a Defense Agency has determined that sufficient obligational authority does not exist in the applicable expired account to fund the applicable obligation.

3. The obligation is not otherwise properly chargeable to any Department of Defense current appropriation.

4. The USD(C) has approved the charge to the applicable appropriation and notified the Congress of the proposed obligation, and 30 days have elapsed.

D. The Department must notify the Congress 30 days in advance of incurring such obligations. Therefore, DoD Components shall prepare, and submit to the USD(C) for subsequent transmittal to the Congress, notification of any proposed obligations against a current account for obligations that otherwise would be properly chargeable (except as to amount) to an expired account, except that insufficient resources exist to fund the obligation in the applicable expired account. As a minimum, such notifications shall:

1. Identify the amount to be charged,
2. Identify the purpose for which the funds are to be obligated, and
3. Include a summary of all relevant facts justifying the proposed obligation.

E. Within 60 days after the date of a request to charge an obligation is submitted to the Congress, DoD Components shall submit a report to the USD(C), for subsequent transmission to the Congress and the President, providing the status of an investigation of an Antideficiency Act violation when:

1. An obligation is charged against a current account when the obligation otherwise would be properly chargeable (except as to amount) to an expired account.

2. Insufficient resources exist to fund the obligation in the applicable expired account.

100209. Crediting of Collections After an Account is Canceled

A. Valid accounts receivable shall not be written off as a result of cancellations of appropriations with negative unliquidated obligations. Proprietary accounts must be maintained until settled by the debtor.

B. When collections that are authorized or required to be credited to an account are received after the cancellation of an account, those collections should be deposited in the departmental receipt account 3200, Collection of Receivables from Canceled Accounts. Accounting entries for crediting of collections after an account is canceled are contained in Appendix A.

100210. Exceptions to Periods of Availability of Accounts for Adjusting and Liquidating Obligations

A. Requirements applicable to the cancellation of appropriations apply to all appropriation accounts unless specifically exempted by statute. A provision of an appropriations act may exempt an appropriation from the provisions of the new requirements for the closing of accounts and may fix the period for which an appropriation remains available for expenditure (31 U.S.C. 1557). Additionally, an appropriations act applies only to a specific fiscal year's appropriation. However, in order to preclude application to an appropriation of the limitations on expenditure provided in the new provisions of Title 31, the statute must:

1. Identify the appropriation account for which the availability for expenditure is to be extended.
2. Provide that the appropriation account shall be available for adjusting and liquidating obligations properly chargeable to the account, and
3. Extend the availability for expenditure of the obligated balances.

B. The availability for expenditure of specific accounts maybe changed only through specific legislation. This authority shall be requested only when payment of old balances from unexpired funds (based on historical outlay data) regularly would exceed the 1 percent limitation or would severely impact the current program.

1. When the nature of a DoD Component's program requires disbursements beyond the 5-year period, the DoD Component shall submit proposed changes in appropriation language to the ODC(P/B). The ODC(P/B) shall submit the proposed changes to the Office of Management and Budget for approval.

2. Absent specific authority, DoD Components, through the ODC(P/B), may seek reappropriations of canceled balances and defer payment until the

appropriation is available. Receiving a reappropriation will be treated as adding new budget authority.

100211. Antideficiency Act Violations. DoD Components are required to investigate and report violations of the Antideficiency Act when certain limitations are exceeded in Public Law 101-510 and section 1004 of Public Law 102-484 as well as specific provisions in a number of sections of Title 31 of the United States Code. Explicit guidance is provided in Volume 14 of this Regulation.

100212. Control, Reporting, and Certification Requirements. Title 31, United States Code, sections 1554 and 1556, as amended, contains permanent audit, control and reporting requirements pertaining to the liquidation of obligations.

A. Control Requirements

1. Section 1554(a) stipulates that any audit requirement, limitation on obligations, or reporting requirement applicable to an appropriation will continue to apply to that appropriation following expiration of the period of availability for new obligation of that appropriation. Thus, if an appropriation act contains a limitation on the obligation of funds for a program, project or activity, or other purpose, then that limitation will continue to apply during the 5-year period following the period of availability for obligation of that appropriation. Additionally, the limitation will continue after the appropriation has been canceled.

2. DoD Components shall establish internal controls to ensure that an adequate review of obligated balances is performed to support the certification.

3. Proper general ledger controls shall be maintained for canceled valid unpaid obligations and accounts receivable in canceled accounts. Although balances in unexpired accounts may be used to fire canceled obligations, canceled obligated balances shall not be posted to unexpired accounts solely because the purposes may be related. Canceled obligations shall be posted to unexpired accounts only when a disbursement will be paid during the current year.

B. Reporting and Certification Requirements

1. Section 1554. Under the provisions of 31 U.S.C. 1554, the Secretary of Defense, or his designee, is required to submit a report to the President and the Secretary of the Treasury concerning the unliquidated obligations, unobligated balances, canceled balances and adjustments made to appropriation accounts during the preceding fiscal year.

a. Due Date. This report is due not later than 15 days after the President submits his budget to the Congress. The first report was due in 1992 for FY 1991 balances and transactions.

b. Distribution Requirements. A copy of the report is required to be submitted to the Speaker of the House of Representatives and to the Committee on Appropriations, the Committee on Governmental Affairs, and other appropriate oversight and authorizing committees of the Senate (such as the Armed Services Committee).

c. Contents. Section 1554(b) requires that these reports shall contain:

(1) An itemization of related appropriation accounts, identified by fiscal year and the balances identified in each account. This itemization is reported on the fiscal year-end FMS Form 2108.

(2) A listing of each current and expired appropriation. This list is included in the fiscal year-end FMS Form 2108.

(3) Identification of payments made from each currently applicable appropriation account with respect to those amounts which would have been otherwise properly chargeable to another account, both as to purpose and amount, except that the other account has been canceled (31 U.S.C. 1553). These payments are reported on the DoD Components' Statement of Transactions.

(4) Separate identification of obligation adjustments made to each currently applicable appropriation account that otherwise would have been properly chargeable to another account, both as to purpose and amount, except that the other account has been canceled. These amounts are reported on the fiscal year-end FMS Form 2108.

(5) Identification of all balances canceled on September 30th of the fifth year following the expiration of an appropriation account's availability for incurring new obligations (31 U.S.C. 1552(a)). These balances are reported on the fiscal year-end FMS Form 2108.

(6) Identification of those appropriation accounts available for an indefinite period that have been canceled because (a) no disbursements have been made from the account for a period of 2 years and (b) the President or the Secretary of Defense has determined that the purposes for which the appropriation was made have been carried out (31 U.S.C. 1555).

(7) A certification by the DoD Components that the obligated balances in each appropriation account of the Department reflect properly existing obligations and that expenditures made from each account since the time of submission of the prior report were supported by a proper obligation of funds and otherwise were proper.

100213. Other Procedures. The following paragraphs provide detailed information about other review, accounting, and correction procedures regarding current and expired accounts.

A. Apportionment Procedures. The apportionment schedules (DD Form 1105) will reflect the following footnote: “Up to one percent of the original amount of the appropriation (\$ xxx.xx), or the unobligated balance, whichever is less, may be utilized for the purpose of obligation adjustments and payments, which would otherwise have been properly chargeable (both to purpose and amount) to a canceled appropriation.” To the extent that supplemental appropriations are enacted, reapportionment of the initial “one percent” amount may be requested.

B. Unliquidated Obligations. DoD Components shall review remaining unliquidated balances in expired accounts, and prior to cancellation, deobligate all amounts not supported by documentary evidence.

C. Payments After Cancellation of Appropriations. Amounts presented for payment that cite appropriations that have been canceled (appropriations beyond the end of the fifth year following the expiration of their availability for incurring new obligations) shall not be paid until the disbursing office has obtained a currently available appropriation fund cite from the funding activity.

D. Unmatched Disbursements for Canceled Accounts. When a disbursement is made properly before the cancellation of the appropriation to which an obligation was charged, but is not identified and matched with the proper obligation until after the cancellation of the appropriation, that disbursement shall be charged to the canceled appropriation. Appropriate corrections to accounting records and reports shall be made as necessary. See paragraph 100212.J., below, if an error is discovered in a canceled account for a disbursement made prior to the cancellation of that account.

E. Negative Unliquidated Obligations. Negative unliquidated obligation balances generally occur in an account when valid disbursements are incorrectly matched with obligations and the disbursements exceed the obligations. Negative balances represent error conditions which should be researched and corrected as quickly as possible. For additional guidance regarding negative unliquidated obligations, see chapter 11 of this volume.

F. Line Item Detail. The level of detail required to be maintained for expired accounts is the same as that required to be maintained for current accounts. The level of detail should facilitate cost determinations and program assessment and evaluation, while maintaining an appropriate level of visibility over expired accounts, providing an appropriate audit trail, and meeting the objectives of the closing accounts legislation.

G. Uncollectible Accounts Receivable. Appendix A contains appropriate entries to account for uncollectible accounts receivable in canceled accounts. A write-off of an uncollectible reimbursement receivable does not change total obligations within budgetary

accounts. However, such write-off would result in a reclassification, to a direct program obligation, of an obligation previously incurred.

H. Closing an Account with a Negative Balance. Existence of a negative balance does not excuse an account from being canceled. Such accounts should be canceled in accordance with applicable valid requirements and a receivable established for the amount of the negative balance.

1. Informational accounting reports (i.e., FMS 2108, SF 133, and SF 220-9) shall continue to be submitted for the applicable account until the negative balance is resolved. As appropriate, these informational reports should (a) indicate that the account is canceled, (b) show the amount of the negative balance at the time the account was canceled, and (c) show the current amount of the applicable receivable.

2. A negative balance may be liquidated by receiving offsetting collections. Collections of overpayments shall be deposited to Treasury account 3200. An account with a negative balance may indicate that a violation of the Antideficiency Act has occurred. A formal investigation should be initiated immediately. Additional information on Antideficiency Act violations may be found in Volume 14 of this Regulation.

I. Accounting for Uncollectible Accounts Receivable in Canceled Accounts. Budgetary accounts corresponding to accounts receivable shall be closed when an account is canceled. Total obligations within budgetary accounts should not change when the budgetary accounts are closed. The write-off of an uncollectible reimbursement receivable would result in a reclassification, to a direct program obligation, of an obligation previously incurred under the reimbursable program.

1. For refunds receivable, budgetary accounts established to track the status of obligational authority (i.e., undelivered orders, unpaid accrued expenditures and refunds due) shall not be closed since their continued identity is necessary to assure that cumulative payments, even though paid from a current account do not exceed the original appropriation of the closed account.

2. Propriety accounts established for accounts receivable and refunds receivable applicable to canceled accounts shall be reclassified as Accounts Receivable--Canceled Accounts. The subsequent collections of such amounts for this account shall be deposited to the Treasury Miscellaneous Receipts Account.

3. If, after compliance with established collection procedures, it is determined that an account is uncollectible, the account should be written off by charging a bad debts account. The write-off of an uncollectible account or refund receivable applicable to the reimbursable program should result in a reclassification, to a direct program obligation, of obligations previously incurred under the reimbursable program.

J. Correction of Reporting Errors in Expired Accounts. Treasury Bulletin 94-04, "Account Closing Provisions of the FY 1991 National Defense Authorization Act" contains procedures for requesting a correction to an expired account that is now closed.

1. Corrections may be requested for two categories of errors: (a) clerical errors such as misplaced decimals, transposed digits, or transcribing errors resulting in inadvertent cancellations of budget authority and (b) errors made in classifying a payment made prior to the closing of an account, but not discovered until after the account was closed.

a. For clerical errors, the request must include the appropriation account number, the reason for the restoration, and convincing evidence of the clerical error to justify the restoration required to make the correction. At a minimum, this includes the original accounting record from which the incorrect posting was made and a record showing the incorrect amount.

b. For classification errors, the Treasury Department will accept reporting to (1) correctly classify payments previously reported to suspense/clearing accounts or (2) correct classification errors between current and closed accounts, when submitted by the deadline below.

2. Requests for the correction of errors must be received by the Treasury Department by March 31 of the year after the account in question was closed. For example, if an expired account was closed in FY 1996, a request for any corrections to that account must be received by the Treasury Department before March 31, 1997.

a. Requests for correction of a clerical error should be sent to the following address:

Finance Management Branch
Financial Management Service
Department of the Treasury
Liberty Center (UCP 723)
Washington, DC 20227

b. Requests for reporting to be allowed against a closed account shall be submitted, along with a hardcopy Statement of Transactions report, to the following address:

Budget Reports Branch
Financial Management Semite
Department of the Treasury
Liberty Center (UCP 749)
Washington, DC 20227

3. If a request for the correction of errors affects another DoD Component, such requests must be coordinated with the affected DoD Component and submitted to the Defense Finance and Accounting Service (DFAS), Deputy Director for Accounting, 1931 Jefferson Davis Highway, Arlington, VA 22240-5291. The DFAS will submit the requests to the Treasury Department after completion of its review.

4. Comptroller General Decision B-251287.3, dated November 1, 1995, stated support for Treasury Department adjustment of DoD canceled appropriation account balances, without regard to administratively established timeframes (contained in Treasury Bulletin 94-04, which is discussed above), to reflect disbursements made before cancellation of the accounts. The CG decision requires that any adjustment made by the Department of Defense be supported by documentary evidence and be able to withstand audit scrutiny. To implement this decision, the USD(C) had issued procedures on June 30, 1995, mandating the research and correction of unmatched disbursements and negative unliquidated obligation transactions and processing the resulting adjustments to the Treasury Department. For further information, see chapter 11 of this volume.

100214. Processing Invoices Involving Canceled Fiscal Year Funds. Appendix B, “Questions and Answers Pertaining to Recessing Invoices from Canceled Fiscal Year Funds,” provides detailed procedures for processing such invoices.

APPENDIX A

ACCOUNTING ENTRIES FOR CREDITING OF COLLECTIONS

1. Public Law 101-510, Section 1405 (31 U.S.C. 1552), "Procedure for appropriation accounts available for definite periods," stipulates the following:

"a. On September 30th of the 5th fiscal year after the period of availability for obligation of a fixed appropriation account ends, the account shall be closed and any remaining balance (whether obligated or unobligated) in the account shall be canceled and thereafter shall not be available for obligation or expenditure for any purpose."

"b. Collections authorized or required to be credited to an appropriation account, but not received before closing of the account under subsection (a) or under section 1555 of this title, shall be deposited in the Treasury as miscellaneous receipts."

2. As noted above, P.L. 101-510 requires that all balances are closed and any collections received after closing are deposited to the Treasury Miscellaneous Receipts Account following the end of the 5th year after expiration of an account. Thus, the following procedures are applicable to accounts receivable and refunds receivable. Accounts receivable are amounts due from others for goods furnished and services rendered. Refunds receivable are requested returns of advances or recoveries of erroneous disbursements that are directly related to, and reductions of, previously recorded payments from the accounts.

3. Budgetary Accounting Entries

a. Accounts Receivable. Budgetary accounts corresponding to accounts receivable shall be closed as follows:

Dr 4222 Customer Orders Accepted
Cr 4252 Reimbursements Earned - Uncollected

Total obligations within budgetary accounts should not change as a result of the above entry. However, the write-off of an uncollectible reimbursement receivable would result in a reclassification, to a direct program obligation, of an obligation previously incurred under the reimbursable program.

b. Refunds Receivable. Refunds receivable applicable to a direct program are recorded in general ledger account 4932, "Accrued Expenditures - Refunds Due - Direct Program." Refunds receivable applicable to the reimbursable program are recorded in general ledger account 4942, "Accrued Expenditures - Refunds Due - Reimbursable Program." These accounts represent amounts due to be returned from previously made liquidated obligations (Accrued Expenditures - Paid). Budgetary accounts established to track the status of obligational authority (i.e., undelivered orders, unpaid accrued expenditures and refunds due) shall not be

closed since their continued identity is necessary to assure that cumulative payments, even though paid from a current account, do not exceed the original appropriation of the closed account.

4. Proprietary Accounting Entries

Proprietary accounts established for "Accounts Receivable" and "Refunds Receivable" applicable to canceled accounts shall be reclassified as "Accounts Receivable - Canceled Accounts." The subsequent collections of such amounts should be deposited to the Treasury Miscellaneous Receipts Account. Until other formal accounting entries are published, the following entries should be used:

- a. To reclassify accounts receivable upon cancellation of the account and recognize the liability to deposit collections into the Treasury Miscellaneous Receipts Account.

Dr 1310X Accounts Receivable - Canceled Accounts 1/
Cr 1311-14 Accounts Receivable
Cr 1315-16 Refunds Receivable

and

Dr 3610 Uncollected Revenue - General Fund - Miscellaneous Receipts
Cr 2411 Deposit Fund Liabilities

1/ The "X" following account number 1310 indicates that a formal account for this purpose does not currently exist in the DoD Uniform Chart of Accounts.

- b. To record collection of canceled accounts receivable.

Dr 1011 Funds Collected
Cr 1310X Accounts Receivable - Canceled Accounts

- c. To record deposit after collection, of accounts receivable - canceled accounts to the Treasury Miscellaneous Receipts Account.

Dr 2411 Deposit Fund Liabilities
Cr 1012 Funds Disbursed

and

Dr 3620 Funds Returned to General Fund Miscellaneous Receipts
Cr 3610 Uncollected Revenue - General Fund -
Miscellaneous Receipts

5. If, after compliance with established collection procedures, it is determined that an account is uncollectible, the following entries should be made:

Dr 6129 Bad Debts
 Cr 1310X Accounts Receivable - Canceled Accounts

and

Dr 2411 Deposit Fund Liabilities
 Cr 3610 Uncollected Revenue - General Fund - Miscellaneous
 Receipts

The write-off of an uncollectible account or refund receivable applicable to the reimbursable program should result in a reclassification, to a direct program obligation, of obligations previously incurred under the reimbursable program. (The write-off of an uncollectible refund receivable applicable to the direct program does not require reclassification.) The reclassification of an uncollectible account or refund receivable applicable to the reimbursable program may be accomplished through the following two entries:

a. To eliminate unliquidated reimbursable program obligations, the following entries should be made. (Note: Liquidated reimbursable program obligations previously should have been eliminated through the account closing process.)

Dr 4820 Undelivered Orders - Reimbursable Program
Dr 4920 Accrued Expenditures - Unpaid - Reimbursable Program
Dr 4942 Accrued Expenditures - Refunds Due - Reimbursable Program
 Cr 4582 Allotted Reimbursable Program

b. To reclassify the canceled reimbursable program unliquidated and liquidated obligations as canceled direct program obligations, the following entries should be made.

Dr 4611 Uncommitted/Unobligated Allotments - Direct Program
 Cr 4810 Undelivered Orders - Direct Program
 Cr 4910 Accrued Expenditures - Unpaid - Direct program
 Cr 4931 Accrued Expenditures - Paid - Direct program

6. It should be observed that a write-off of uncollectible accounts receivable does not increase total obligation balances in budgetary accounts. However, as noted previously, the write-off of a receivable would result in a reclassification of obligations from the reimbursable to the direct program.

7. A reimbursable order provides obligation authority. Obligation authority is provided by (a) the acceptance of a reimbursable order from other Federal Government accounts that represent obligations of the ordering account and (b) orders from the public, including state and local governments, to the extent accompanied by an advance. This obligation authority is used

(obligated) by the performing activity in fulfilling the accepted order. Fund resources to liquidate reimbursable obligations in the performing activity's account are obtained through payments from the ordering account. Payments may be in the form of advances, progress payments, or final payment upon completion of the order. In the absence of such a payment fund resources are paid from the direct program authority of the performing account.

8. To the extent that (a) obligations, due to the reclassification of reimbursable program obligations, are in excess of direct program obligation authority, or (b) expenditures (liquidation of obligations) are in excess of appropriated funds plus reimbursements expected to be earned and collected, there is a violation of the Antideficiency Act. For additional guidance on violations, see Volume 14 of this Regulation.

9. The status of obligated and unobligated balances in direct and reimbursable programs, even in an account which has been closed, must be continuously maintained. If direct program unobligated balances in a closed account are sufficient to absorb the reclassification of reimbursable program obligations, the charging of write-offs of uncollectible receivables to current year accounts does not appear necessary.

a. The presence of a sufficient existing unobligated balance in a closed account in a direct program is determined by deducting from the unobligated balance at the time of cancellation all amounts charged to current appropriations which otherwise would have been chargeable to the closed account, both as to purpose and in amount, except that the account was canceled. Thus, if obligations and/or expenditures are incurred against a reimbursable order, and if that reimbursable order later is declared uncollectible, then a violation would exist to the extent that appropriated (direct program) resources existing in a closed account are not sufficient to absorb those obligations and/or expenditures.

b. Thus, to avoid a violation of the Antideficiency Act, the presence of a sufficient unobligated balance in an existing direct program must exist in a closed account to absorb the reclassification of uncollectible reimbursable program receivables. However, in accordance with closing account legislation, the actual payment of an amount originally obligated in an account that has since closed shall be made from a current account available for the same purpose subject to the 1 percent limitation.

APPENDIX B

QUESTIONS AND ANSWERS PERTAINING TO PROCESSING INVOICES FROM
CANCELED FISCAL YEAR FUNDS

1. Should contract modifications be issued to obligate current year funds?

Answer: Contract modifications citing current year funds for unpaid amounts are not required simply because previous valid obligations were from appropriations subsequently canceled. The document providing the chargeable fund cite to the disbursing officer should be used as the obligation document at the time of payment. Additionally, applicable contracts should be annotated to indicate the appropriation from which the payment was made.

2. Are there invoice submission cut-offs for subsequent expiration dates?

Answer: Cut-off dates involving expired account transactions should be no different than for other transactions. However, special efforts should be made to ensure that all valid invoices citing accounts subject to cancellation are processed before the account is canceled. The official cancellation date is September 30. Therefore, all valid invoices dated as of September 30 may be charged against an account before it is canceled.

3. Are there any prohibitions against reallocating previous payments to oldest year funds in the contract?

Answer: The Department's current policy provides for progress payments to be identified to the appropriate contract line/fiscal year. Only when such an identification is not feasible should the amounts be allocated to contract lines or fiscal years. In the absence of contractor or program management identification, current guidance permits such allocations to be made to the oldest fiscal year. For previous allocations, if the benefiting fiscal year is known, the applicable amounts should have been charged to the benefiting fiscal year. However, if the benefiting fiscal year is unknown and amounts already have been allocated, there is little basis for reallocating those funds to the oldest fiscal year.

4. What is the definition of payment adjustments as they relate to Public Law 101-510?

Answer: Payment adjustments may result from escalation or economic price adjustments, or from final audit and settlement. Payment adjustments exclude contract changes and changes in scope as well as any other change that results in additional contractor billable costs.

5. How should adjustment billings submitted by a contractor as a result of definitization of a contract be handled?

Answer: If the definitization of a contract results in an additional amount due to the contractor, and the additional amount would be chargeable to a canceled appropriation, then

current year funds must be requested. If the definitization results in an amount due from the contractor which would have been credited to a canceled appropriation, that amount must be credited to miscellaneous receipts account 3210. However, amounts due to expired, but not yet canceled, appropriations should be credited to the expired appropriation.

6. What is the process for the payment office to request current year funds to pay an invoice in-house?

Answer: Within 48 hours after receipt of an invoice payable from canceled funds, the disbursing officer shall: (a) identify the budget office funding the contract by contacting the fiscal office and (b) notify the head of the office, installation, or activity in which the budget office is located of the need for funds. Only the net amount required (total amount less progress payments paid) shall be requested. Notification should be by message, express mail or facsimile and should include identification of the contract, contractor, invoice date, invoice amount, and payment due date (including DoD required payment data for progress payments and interim vouchers). The disbursing officer shall provide copies to the procurement contracting officer.

The office, installation, or activity funding the contract should notify the disbursing officer or replacement funds chargeable to an appropriation currently available for the same purpose. This notification should be transmitted by message, express mail or facsimile as soon as possible, but no later than 15 calendar days from the date of the disbursing officer's request. If replacement funds cannot be provided within 15 calendar days, an estimate should be provided as to when the funds are expected to be available.

APPENDIX C

DEFINITIONS

1. Adjustments to Expired or Closed Accounts. Increases or decreases to commitments, obligations, or expenditures. Adjustments include recording commitments, obligations, or expenditures that were made or incurred during the period prior to expiration or cancellation of the account but not recorded.
2. Closed/Canceled Accounts. Accounts with balances that have been canceled under Title 31, United States Code, sections 1552, 1555, or 1557. Once balances are canceled, the amounts are not available for obligation or expenditure for any purpose.
3. Expired Accounts. Appropriation or fund accounts in which the balances no longer are available for incurring new obligations because the time available for incurring such obligations has expired. There are various types of expired accounts:
 - a. Expired Accounts Established Under P.L. 101-510. Expired accounts that (1) contain unliquidated obligated and unobligated balances, (2) maintain their fiscal year identity for five years, and (3) are available for recording, adjusting, and liquidating obligations properly chargeable to that account. These accounts began with balances that expired on September 30, 1991.
 - b. Expired Accounts (established before November 5, 1990) that were not Transferred to the "M" Accounts or Canceled. Accounts that (1) contain obligated balances that expired on September 30, 1989, and September 30, 1990; (2) contain unobligated balances that were restored from surplus funds; and (3) maintain their fiscal year identity until their balances are canceled on September 30, 1994, and September 30, 1995, respectively.
 - c. "M" Accounts (Established before November 5, 1990). Expired accounts that (1) contain unliquidated obligated balances and (2) have been merged with unliquidated obligated balances from prior years. "M" accounts generally are established by appropriation title (e.g., Operation and Maintenance, Procurement, Research and Development) for the same general purpose. No new "M" accounts will be established; all such accounts were canceled on September 30, 1993.
 - d. Merged Surplus Authority (Established before November 5, 1990). Expired accounts with (1) balances that were available for upward adjustments to prior obligations that were previously incurred and (2) were canceled on December 5, 1990. These were obligated balances withdrawn by the Treasury Department for accounts which have been expired for more than two years.

4. Fixed Accounts. Appropriation or fund accounts with balances that are available for a definite period of time. The fixed accounts are comprised of annual and multi-year accounts. The universe of appropriation or fund accounts is made up of fixed accounts and no-year accounts.

5. Section 1004 Obligations. For purposes of implementing the provisions of section 1004 of P. L. 102-484, the term “obligation” means any binding agreement properly chargeable to a fiscal year that is expected to result in an outlay. An obligation includes, but is not limited to, an upward obligation adjustment or a reobligation.

6. Unexpired Accounts. Appropriation or fund accounts in which the balances are available for incurring obligations because the time available for incurring such obligations has not yet expired. Audit requirements, limitations on obligations, and reporting requirements applicable to unexpired accounts shall continue to apply after the end of the period of availability for obligation or expenditure of that account.

7. Unrecorded Obligations. Obligations that were incurred legitimately during the period of fund availability, but were not recorded in the Component’s records prior to expiration of the appropriation or fund. For purposes of this guidance, “unrecorded” obligations are included in obligation adjustments. Current accounts may be used to pay previously unrecorded obligations chargeable to a closed account.

(This page intentionally left blank.)

APPENDIX A

ACCOUNTING ENTRIES FOR CREDITING OF COLLECTIONS

1. Public Law 101-510, Section 1405 (31 U.S.C. 1552), "Procedure for appropriation accounts available for definite periods," stipulates the following:

"a. On September 30th of the 5th fiscal year after the period of availability for obligation of a fixed appropriation account ends, the account shall be closed and any remaining balance (whether obligated or unobligated) in the account shall be canceled and thereafter shall not be available for obligation or expenditure for any purpose."

"b. Collections authorized or required to be credited to an appropriation account, but not received before closing of the account under subsection (a) or under section 1555 of this title, shall be deposited in the Treasury as miscellaneous receipts."

2. As noted above, P.L. 101-510 requires that all balances are closed and any collections received after closing are deposited to the Treasury Miscellaneous Receipts Account following the end of the 5th year after expiration of an account. Thus, the following procedures are applicable to accounts receivable and refunds receivable. Accounts receivable are amounts due from others for goods furnished and services rendered. Refunds receivable are requested returns of advances or recoveries of erroneous disbursements that are directly related to, and reductions of, previously recorded payments from the accounts.

3. Budgetary Accounting Entries

a. Accounts Receivable. Budgetary accounts corresponding to accounts receivable shall be closed as follows:

Dr 4222	Customer Orders Accepted
Cr 4252	Reimbursements Earned - Uncollected

Total obligations within budgetary accounts should not change as a result of the above entry. However, the write-off of an uncollectible reimbursement receivable would result in a reclassification, to a direct program obligation, of an obligation previously incurred under the reimbursable program.

b. Refunds Receivable. Refunds receivable applicable to a direct program are recorded in general ledger account 4932, "Accrued Expenditures - Refunds Due - Direct Program." Refunds receivable applicable to the reimbursable program are recorded in general ledger account 4942, "Accrued Expenditures - Refunds Due - Reimbursable Program." These accounts represent amounts due to be returned from previously made liquidated obligations (Accrued Expenditures - Paid). Budgetary accounts established to track the status of obligational authority (i.e., undelivered orders, unpaid accrued expenditures and refunds due) shall not be

closed since their continued identity is necessary to assure that cumulative payments, even though paid from a current account, do not exceed the original appropriation of the closed account.

4. Proprietary Accounting Entries

Proprietary accounts established for “Accounts Receivable” and “Refunds Receivable” applicable to canceled accounts shall be reclassified as “Accounts Receivable - Canceled Accounts.” The subsequent collections of such amounts should be deposited to the Treasury Miscellaneous Receipts Account. Until other formal accounting entries are published, the following entries should be used:

- a. To reclassify accounts receivable upon cancellation of the account and recognize the liability to deposit collections into the Treasury Miscellaneous Receipts Account.

Dr 1310X	Accounts Receivable - Canceled Accounts	<u>1/</u>
Cr 1311-14	Accounts Receivable	
Cr 1315-16	Refunds Receivable	

and

Dr 3610	Uncollected Revenue - General Fund - Miscellaneous Receipts
Cr 2411	Deposit Fund Liabilities

1/ The “X” following account number 1310 indicates that a formal account for this purpose does not currently exist in the DoD Uniform Chart of Accounts.

- b. To record collection of canceled accounts receivable.

Dr 1011	Funds Collected
Cr 1310X	Accounts Receivable - Canceled Accounts

- c. To record deposit, after collection, of accounts receivable - canceled accounts to the Treasury Miscellaneous Receipts Account.

Dr 2411	Deposit Fund Liabilities
Cr 1012	Funds Disbursed

and

Dr 3620	Funds Returned to General Fund Miscellaneous Receipts
Cr 3610	Uncollected Revenue - General Fund - Miscellaneous Receipts

5. If, after compliance with established collection procedures, it is determined that an account is uncollectible, the following entries should be made:

Dr 6129 Bad Debts
 Cr 1310X Accounts Receivable - Canceled Accounts

and

Dr 2411 Deposit Fund Liabilities
 Cr 3610 Uncollected Revenue - General Fund - Miscellaneous
 Receipts

The write-off of an uncollectible account or refund receivable applicable to the reimbursable program should result in a reclassification, to a direct program obligation, of obligations previously incurred under the reimbursable program. (The write-off of an uncollectible refund receivable applicable to the direct program does not require reclassification.) The reclassification of an uncollectible account or refund receivable applicable to the reimbursable program may be accomplished through the following two entries:

a. To eliminate unliquidated reimbursable program obligations, the following entries should be made. (Note: Liquidated reimbursable program obligations previously should have been eliminated through the account closing process.)

Dr 4820 Undelivered Orders - Reimbursable Program
Dr 4920 Accrued Expenditures - Unpaid - Reimbursable Program
Dr 4942 Accrued Expenditures - Refunds Due - Reimbursable Program
 Cr 4582 Allotted Reimbursable Program

b. To reclassify the canceled reimbursable program unliquidated and liquidated obligations as canceled direct program obligations, the following entries should be made.

Dr 4611 Uncommitted/Unobligated Allotments - Direct Program
 Cr 4810 Undelivered Orders - Direct Program
 Cr 4910 Accrued Expenditures - Unpaid - Direct Program
 Cr 4931 Accrued Expenditures - Paid - Direct Program

6. It should be observed that a write-off of uncollectible accounts receivable does not increase total obligation balances in budgetary accounts. However, as noted previously, the write-off of a receivable would result in a reclassification of obligations from the reimbursable to the direct program.

7. A reimbursable order provides obligation authority. Obligation authority is provided by (a) the acceptance of a reimbursable order from other Federal Government accounts that represent obligations of the ordering account and (b) orders from the public, including state and local governments, to the extent accompanied by an advance. This obligation authority is used (obligated) by the performing activity in fulfilling the accepted order. Fund resources to liquidate reimbursable obligations in the performing activity's account are obtained through payments from

the ordering account. Payments may be in the form of advances, progress payments, or final payment upon completion of the order. In the absence of such a payment, fund resources are paid from the direct program authority of the performing account.

8. To the extent that (a) obligations, due to the reclassification of reimbursable program obligations, are in excess of direct program obligation authority, or (b) expenditures (liquidation of obligations) are in excess of appropriated funds plus reimbursements expected to be earned and collected, there is a violation of the Antideficiency Act. For additional guidance on violations, see Volume 14 of this Regulation.

9. The status of obligated and unobligated balances in direct and reimbursable programs, even in an account which has been closed, must be continuously maintained. If direct program unobligated balances in a closed account are sufficient to absorb the reclassification of reimbursable program obligations, the charging of write-offs of uncollectible receivables to current year accounts does not appear necessary.

a. The presence of a sufficient existing unobligated balance in a closed account in a direct program is determined by deducting from the unobligated balance at the time of cancellation all amounts charged to current appropriations which otherwise would have been chargeable to the closed account, both as to purpose and in amount, except that the account was canceled. Thus, if obligations and/or expenditures are incurred against a reimbursable order, and if that reimbursable order later is declared uncollectible, then a violation would exist to the extent that appropriated (direct program) resources existing in a closed account are not sufficient to absorb those obligations and/or expenditures.

b. Thus, to avoid a violation of the Antideficiency Act, the presence of a sufficient unobligated balance in an existing direct program must exist in a closed account to absorb the reclassification of uncollectible reimbursable program receivables. However, in accordance with closing account legislation, the actual payment of an amount originally obligated in an account that has since closed shall be made from a current account available for the same purpose subject to the 1 percent limitation.

APPENDIX B

QUESTIONS AND ANSWERS PERTAINING TO PROCESSING INVOICES FROM
CANCELED FISCAL YEAR FUNDS

1. Should contract modifications be issued to obligate current year funds?

Answer: Contract modifications citing current year funds for unpaid amounts are not required simply because previous valid obligations were from appropriations subsequently canceled. The document providing the chargeable fund cite to the disbursing officer should be used as the obligation document at the time of payment. Additionally, applicable contracts should be annotated to indicate the appropriation from which the payment was made.

2. Are there invoice submission cut-offs for subsequent expiration dates?

Answer: Cut-off dates involving expired account transactions should be no different than for other transactions. However, special efforts should be made to ensure that all valid invoices citing accounts subject to cancellation are processed before the account is canceled. The official cancellation date is September 30. Therefore, all valid invoices dated as of September 30 may be charged against an account before it is canceled.

3. Are there any prohibitions against reallocating previous payments to oldest year funds in the contract?

Answer: The Department's current policy provides for progress payments to be identified to the appropriate contract line/fiscal year. Only when such an identification is not feasible should the amounts be allocated to contract lines or fiscal years. In the absence of contractor or program management identification, current guidance permits such allocations to be made to the oldest fiscal year. For previous allocations, if the benefiting fiscal year is known, the applicable amounts should have been charged to the benefiting fiscal year. However, if the benefiting fiscal year is unknown and amounts already have been allocated, there is little basis for reallocating those funds to the oldest fiscal year.

4. What is the definition of payment adjustments as they relate to Public Law 101-510?

Answer: Payment adjustments may result from escalation or economic price adjustments, or from final audit and settlement. Payment adjustments exclude contract changes and changes in scope as well as any other change that results in additional contractor billable costs.

5. How should adjustment billings submitted by a contractor as a result of definitization of a contract be handled?

Answer: If the definitization of a contract results in an additional amount due to the contractor, and the additional amount would be chargeable to a canceled appropriation, then

current year funds must be requested. If the definitization results in an amount due from the contractor which would have been credited to a canceled appropriation, that amount must be credited to miscellaneous receipts account 3210. However, amounts due to expired, but not yet canceled, appropriations should be credited to the expired appropriation.

6. What is the process for the payment office to request current year funds to pay an invoice in-house?

Answer: Within 48 hours after receipt of an invoice payable from canceled funds, the disbursing officer shall: (a) identify the budget office funding the contract by contacting the fiscal office and (b) notify the head of the office, installation, or activity in which the budget office is located of the need for funds. Only the net amount required (total amount less progress payments paid) shall be requested. Notification should be by message, express mail or facsimile and should include identification of the contract, contractor, invoice date, invoice amount, and payment due date (including DoD required payment data for progress payments and interim vouchers). The disbursing officer shall provide copies to the procurement contracting officer.

The office, installation, or activity funding the contract should notify the disbursing officer or replacement funds chargeable to an appropriation currently available for the same purpose. This notification should be transmitted by message, express mail or facsimile as soon as possible, but no later than 15 calendar days from the date of the disbursing officer's request. If replacement funds cannot be provided within 15 calendar days, an estimate should be provided as to when the funds are expected to be available.

APPENDIX C

DEFINITIONS

1. Adjustments to Expired or Closed Accounts. Increases or decreases to commitments, obligations, or expenditures. Adjustments include recording commitments, obligations, or expenditures that were made or incurred during the period prior to expiration or cancellation of the account but not recorded.
2. Closed/Canceled Accounts. Accounts with balances that have been canceled under Title 31, United States Code, sections 1552, 1555, or 1557. Once balances are canceled, the amounts are not available for obligation or expenditure for any purpose.
3. Expired Accounts. Appropriation or fund accounts in which the balances no longer are available for incurring new obligations because the time available for incurring such obligations has expired. There are various types of expired accounts:
 - a. Expired Accounts Established Under P.L. 101-510. Expired accounts that (1) contain unliquidated obligated and unobligated balances, (2) maintain their fiscal year identity for five years, and (3) are available for recording, adjusting, and liquidating obligations properly chargeable to that account. These accounts began with balances that expired on September 30, 1991.
 - b. Expired Accounts (established before November 5, 1990) that were not Transferred to the “M” Accounts or Canceled. Accounts that (1) contain obligated balances that expired on September 30, 1989, and September 30, 1990; (2) contain unobligated balances that were restored from surplus funds; and (3) maintain their fiscal year identity until their balances are canceled on September 30, 1994, and September 30, 1995, respectively.
 - c. “M” Accounts (Established before November 5, 1990). Expired accounts that (1) contain unliquidated obligated balances and (2) have been merged with unliquidated obligated balances from prior years. “M” accounts generally are established by appropriation title (e.g., Operation and Maintenance, Procurement, Research and Development) for the same general purpose. No new “M” accounts will be established; all such accounts were canceled on September 30, 1993.
 - d. Merged Surplus Authority (Established before November 5, 1990). Expired accounts with (1) balances that were available for upward adjustments to prior obligations that were previously incurred and (2) were canceled on December 5, 1990. These were obligated balances withdrawn by the Treasury Department for accounts which have been expired for more than two years.

4. Fixed Accounts. Appropriation or fund accounts with balances that are available for a definite period of time. The fixed accounts are comprised of annual and multi-year accounts. The universe of appropriation or fund accounts is made up of fixed accounts and no-year accounts.
5. Section 1004 Obligations. For purposes of implementing the provisions of section 1004 of P. L. 102-484, the term “obligation” means any binding agreement properly chargeable to a fiscal year that is expected to result in an outlay. An obligation includes, but is not limited to, an upward obligation adjustment or a reobligation.
6. Unexpired Accounts. Appropriation or fund accounts in which the balances are available for incurring obligations because the time available for incurring such obligations has not yet expired. Audit requirements, limitations on obligations, and reporting requirements applicable to unexpired accounts shall continue to apply after the end of the period of availability for obligation or expenditure of that account.
7. Unrecorded Obligations. Obligations that were incurred legitimately during the period of fund availability, but were not recorded in the Component’s records prior to expiration of the appropriation or fund. For purposes of this guidance, “unrecorded” obligations are included in obligation adjustments. Current accounts may be used to pay previously unrecorded obligations chargeable to a closed account.

CHAPTER 11

CASH, UNMATCHED DISBURSEMENTS, AND
NEGATIVE UNLIQUIDATED OBLIGATIONS1101 GENERAL

110101. Purpose. This chapter prescribes the accounting standards and related management requirements necessary to establish and maintain financial control over disbursement, collection and adjustment transactions affecting the fund balances with the U. S. Treasury and cash resources not part of the fund balance with the U. S. Treasury. The applicable general ledger accounts are included in the DoD Uniform Chart of Accounts and their use is illustrated in Volume 4, chapter 2, of this Regulation. This chapter also prescribes the requirements for researching and correcting negative unliquidated obligations, unmatched disbursements, disbursements in suspense accounts, and disbursements in-transit.

1102 DEFINITIONS

A. Canceled Appropriation. An appropriation that has been canceled in accordance with the provisions of Public Law 101-510. This term also applies to appropriations that otherwise would have been canceled, but have not been closed by the Treasury Department because the appropriation has a negative balance.

B. Chargeable Account. The appropriation (Department Code, Fiscal Year, and Appropriation symbol) contained in the line of accounting cited on the obligation document that is the basis for a particular payment.

C. Currently Available Appropriation. An appropriation or fund against which new obligations may be incurred and recorded (as contrasted with an expired or canceled appropriation against which new obligations may not be incurred).

D. Disbursement In-Transit. A disbursement transaction that has been transmitted by a disbursing office to an accounting office, but has not yet been received by the accounting office.

E. Disbursement in Suspense Account. A disbursement transaction that (1) has been reported to the Treasury Department, (2) has not been identified to a specific fund holder or (3) is placed in a suspense account while research efforts are underway.

F. Disbursement Not Sent. A disbursement transaction that has been reported to the Treasury Department by a disbursing office, but has not yet been transmitted to the accounting office.

G. Expired Appropriation. An appropriation or fund that is not available for new obligation, but is available for disbursements, collections, and obligation adjustments as it has not yet been canceled.

H. Fund Holder. An individual holding an administrative subdivision of funds or an operating target, who is responsible for incurring obligations against the administrative subdivision or target and for managing the use of such funds.

I. Funding Account. The appropriation (Department Code, Fiscal Year, and Appropriation symbol) contained in the line of accounting cited on the obligation document provided to fund a disbursement that otherwise would have been chargeable to a canceled appropriation.

J. Negative Unobligated Balance. An appropriation or fund in which the amount of obligations exceeds the amount of obligational authority. (In canceled appropriations the available obligational authority is equal to the unobligated balance.)

K. Negative Unliquidated Obligation (NULO). A disbursement transaction that has been matched to the cited detail obligation, but the total disbursement(s) exceeds the amount of that obligation.

L. Overaged Disbursement In-Transit. A disbursement that is not matched to the correct obligation within 180 days after the first indication that the disbursement cannot be routed to the correct installation level accounting office.

M. Unexpended Balance. The sum of the unobligated balance and the unliquidated obligation balance of an appropriation.

N. Unliquidated Obligation Balance. The amount of obligations that have not been liquidated by payments (disbursements).

O. Unmatched Disbursement (UMD). A disbursement transaction that has been received and accepted by an accounting office, but has not been matched to the correct detail obligation. This includes transactions that have been rejected back to the paying office or central disbursement clearing organization by an accounting office.

P. Unobligated Balance. The difference between the total appropriation availability and the total obligations. (In canceled appropriations, the unobligated balance is determined by reducing the unobligated balance at the time of cancellation by obligations/obligation adjustments that otherwise are properly chargeable to the canceled appropriation except that it is canceled.)

1103 DISBURSEMENT POSTING POLICY

110301. It is the Department's policy that all disbursements must be posted promptly to the correct obligation in the official accounting records. In addition, transaction research and corrections are to begin as soon as it is apparent that a disbursement transaction has

resulted in a NULO, a UMD, a disbursement not sent, a disbursement in a suspense account or a disbursement in-transit.

A. Negative unliquidated obligations, and unmatched disbursements must be researched and corrected within 180 days of the date of disbursement. An additional 120 days is permitted for researching and resolving cross disbursement transactions and interfund billings. Similarly, an additional 60 days is permitted for researching and resolving all other in-transit disbursements. All transactions exceeding these timeframes are considered overaged problem disbursements.

B. Obligations, obligation adjustments, or reductions in unobligated balances must be recorded for all NULOs that are not resolved and UMDs that are not matched to the correct obligation within the timeframes stated in paragraph 110301.A., above.

C. In addition to the above, and irrespective of the timeframes stated in paragraph 110301.A. above, obligations must be established by June 30 for all NULOs, UMDs, and in-transit transactions in appropriations scheduled to close (become canceled) at the end of the current fiscal year.

1104 TREATMENT OF OVERAGED PROBLEM DISBURSEMENTS

110401 Current and Expired Accounts

A. DoD Components are required to obligate funds for the amount of overaged, NULOs and UMDs (those over 180 days old--see paragraph 110301.A., above)--up to the amount of any unobligated balances remaining in the applicable account.

B. Unobligated overaged NULOs and UMDs have the first claim to the unobligated balances in any of these accounts. New obligations, or new upward obligation adjustments, may be executed only when, and to the extent that there is an unobligated balance remaining in an account after all overaged NULOs and UMDs have been obligated. Thus, no new obligations or obligation adjustments may be incurred in the account to the extent that unobligated balances in such accounts are zero, or overaged problem disbursements--if they are obligated--when added to obligated balances, would exceed the availability in such accounts.

C. If the overaged NULOs and UMDs requiring obligation equal or exceed the unobligated balance of an account, the appropriation manager shall ensure that further obligations are not incurred until there is an unobligated balance, over and above any unobligated, overaged NULOs and UMDs. One possible method for achieving this control is to withdraw any unobligated balances below the appropriation level and obligate such amounts at the appropriation level to cover the overaged NULOs and UMDs. Once problem disbursements have been resolved to the point there is an unobligated balance over and above the amount obligated to cover all overaged NULOs and UMDs, the remaining unobligated balance then could be redistributed.

D. Except as provided for in paragraphs 110401.E. through G., below, DoD Components may continue to research overaged problem disbursements without the need to initiate an investigation of a potential violation of the Antideficiency Act.

E. Should an account be obligated fully--but not overobligated--and have unresolved overaged NULOs and UMDs that, if obligated, would exceed the availability in an account, payments to vendors and others may continue, provided that the account is not in danger of being overdisbursed. However, in no case may disbursements exceed the unexpended balance of an account. Should the account become overdisbursed, payments from the account shall stop immediately, and the DoD Component involved shall report a potential violation of the Antideficiency Act. The DoD Component also shall initiate an investigation of the potential violation in accordance with Volume 14 of this Regulation.

F. Should a new obligation or obligation adjustment be incurred in an account that has been obligated fully as a result of unresolved, overaged NULOs or UMDs, such an obligation shall be recorded even though it will result in recorded obligations in excess of available resources. Additionally, the DoD Component involved shall report a potential violation of the Antideficiency Act and initiate an investigation of a potential violation in accordance with Volume 14 of this Regulation.

G. No guidance in this chapter should be construed as authorizing a delay in (1) the recording of an executed obligation that would result in an overobligation or (2) the requirement to conduct an investigation of a potential violation of the Antideficiency Act that results from any action other than the sole requirement to obligate amounts for problem disbursements.

110402. Canceled Accounts and Accounts Scheduled to Cancel at the End of the Current Fiscal Year

A. Obligations must be established by June 30 for all NULOs, UMDs, and in-transit transactions in appropriations scheduled to close (become canceled) at the end of the current fiscal year.

B. If such obligations result in obligations in excess of available funds, the DoD Components are permitted 6 months from the scheduled date of cancellation of the account to resolve the negative balance.

C. If the account is not returned to a positive balance within 6 months of the scheduled date of cancellation of the appropriation, the DoD Component involved shall report a potential violation of the Antideficiency Act and initiate an investigation in accordance with Volume 14 of this Regulation.

D. Each administrative subdivision of an appropriation carries with it the responsibility for any potential or actual violation of the Antideficiency Act that might be incurred. A DoD Component has the right to modify the number or level of administrative

subdivisions within an appropriation before the cancellation of an appropriation. However, once an appropriation cancels, no further modification or change may be made in the number or level of administrative subdivisions.

E. A new cash disbursement, which would be chargeable (both as to purpose and amount) to an appropriation except that the appropriation is canceled, must be paid from an appropriation that currently is available for the same purpose. However, a proposed payment may not exceed the:

1. Unexpended balance of the canceled appropriation.
2. Unobligated balance of the currently available appropriation charged.
3. One percent limitation, discussed in paragraph 110402.F.

F. The cumulative amount of payments charged to a currently available appropriation, because the original appropriation(s) that otherwise would have been charged has been canceled, may not exceed 1 percent of the total amount appropriated to the currently available appropriation being charged.

G. A payment shall not be made if it exceeds the amounts stipulated in either paragraphs 110402.E.1. or 110402.E.2., above. Instead, the office funding the proposed payment (contract) shall contact the Military Department Assistant Secretary for Financial Management and Comptroller or Defense Agency Comptroller for referral to the USD(C) for appropriate disposition.

H. Corrections of payments involving canceled appropriations shall be processed as inter- and intra-appropriation adjustments. Such corrections generally do not require the obligation of currently available funds or deposits to the miscellaneous receipts account if the payment occurred before the cancellation of the applicable appropriation, or appropriations available for new obligation already have been charged properly.

I. Inter- and intra-appropriation adjustments to correct accounting records shall not be accomplished by using a cash disbursement or cash collection.

J. A potential violation of the Antideficiency Act shall be reported and a preliminary review of an Antideficiency Act violation initiated if posting an adjustment to a current, expired or canceled appropriation would result in either (1) a negative unobligated balance or (2) disbursements that are in excess of the amount appropriated, at either the appropriation level or a portion thereof that has been subdivided for Antideficiency Act purposes.

K. Perpetual balances of unobligated amounts, and unliquidated amounts, shall be maintained for each canceled appropriation. Should the unobligated balance in a canceled appropriation be negative, or should the unexpended balance be negative, then a

potential violation of the Antideficiency Act would have occurred, and must be reported and investigated.

L. All disbursements or collections, or adjustments to disbursements and collections, involving current, expired, or canceled appropriations, shall be reported to the Treasury Department.

110403. Expenditure Controls

The DoD Components shall work with the Defense Finance and Accounting Service to implement effective controls to prevent overexpenditures in accounts that may be in an overobligated position or that have problem disbursement balances that exceed the unobligated balance in the account. This action is necessary because normal controls for determining expenditure availability are based on the unexpended balance of the detail obligations.

1105 RESPONSIBILITIES

110501. The Defense Finance and Accounting Service (DFAS) and Other Non-DFAS Accounting Stations

A. When an appropriation does not have sufficient unobligated balances available that equal, or exceed, the amount by which disbursements exceed recorded obligations, the cognizant accounting office must:

1. Begin research efforts to determine the cause of the condition and correct any accounting and/or disbursing errors identified.

2. Notify the appropriation manager that funds are required to be reserved, committed or obligated until the condition is satisfactorily resolved, to the extent that any availability exists in such appropriation.

3. If, at the end of 180 days from the date of discovery of the condition, research efforts fail to result in the correction and elimination of the condition, immediately notify the appropriation manager that:

a. Funds are required to be obligated within 5 days--to the extent that any availability exists in the appropriation--and the obligation shall remain until such time as the condition is satisfactorily resolved.

b. An obligation funding document is to be provided to the DFAS or applicable accounting station.

c. A potential violation of the Antideficiency Act shall be reported and an investigation initiated, if one already is not underway.

B. When the fund holder has sufficient unobligated balances available that equal, or exceed, the amount by which disbursements exceed recorded obligations at the appropriation/ fund holder level, the accounting office must:

1. Immediately begin research efforts to determine the cause of the condition and correct any accounting and/or disbursing errors identified.

2. Immediately notify the fund holder that the fund holder is required to reserve, commit or obligate funds in an amount equal to the amount of disbursements in excess of obligations and retain such amounts in the fund holder's account until such time as the condition is satisfactorily resolved. This may involve withdrawing funds already allotted or reserving unallotted amounts at higher command levels.

3. Notify the appropriation manager immediately with a copy to the fund holder if, at the end of 180 days from the date of discovery of the condition, research efforts fail to result in the correction and elimination of the condition. The fund holder must:

a. Obligate, within 5 days, funds in an amount equal to the amount of disbursements in excess of obligations or the unobligated balance available at the appropriation level, whichever is less, and retain such amounts in the fund holder's account until such time as the condition is satisfactorily resolved. This may involve withdrawing funds already allotted or reserving unallotted amounts at higher command levels.

b. Provide an obligation funding document to the DFAS or applicable accounting station.

4. Record an obligation after the receipt of a funding document from the applicable DoD Component.

C. When disbursements exceed obligations at the obligation level, the accounting office must:

1. Immediately begin research efforts to determine the cause of the condition.

2. Immediately notify the fund holder that disbursements exceed obligations at the obligation level if, at the end of 120 days from date of discovery of the condition, research effort fails to result in the correction and elimination of the condition.

3. If, at the end of 60 days from the date of the notification, further research efforts of the fund holder fail to result in the correction and elimination of the condition, the fund holder is required to immediately:

a. Obligate funds sufficient to cover the disbursement in excess of the obligation up to the amount of the unobligated balance of the account at the appropriation level.

b. Provide the cognizant accounting station an obligation finding document.

c. Maintain that obligation until such time as the condition is satisfactorily resolved. This may involve withdrawing funds already allotted or reserving unallotted amounts at higher command levels.

D. When a disbursement transaction is cross-disbursed, the accounting office shall, under the following conditions, initiate a correction document to charge the proper obligation, fund holder, appropriation or DoD Component if:

1. The cognizant accounting station that received the disbursement transaction agrees that the disbursement is a valid charge to the obligation, fund holder, appropriation or DoD Component.

2. The cognizant accounting station that received the disbursement transaction and the disbursing station that made the payment agree that the disbursement is not a valid charge to the obligation, fund holder, appropriation or DoD Component charged and also agree as to the proper obligation, fund holder, appropriation or DoD Component to be charged.

E. Shall maintain the official accounting records for all adjustments to the balances of canceled appropriations and funds, if the organization is serviced by DFAS.

F. Shall establish appropriate control over canceled appropriations by initiating the following actions:

1. Centralizing accounting for canceled appropriations, or portion thereof, at a single accounting office supporting the office responsible for violations of the Antideficiency Act. All adjustments for each canceled appropriation, or portion thereof, shall be transmitted to the applicable accounting office for posting.

2. Developing and implementing procedures to ensure that all detail transactions affecting canceled appropriation unobligated and unliquidated balances are provided to the appropriate accounting offices responsible for maintaining the unobligated and unliquidated obligation balances.

3. Ensuring that the beginning unobligated and unliquidated balances of each canceled appropriation accurately reflect the official U. S. Treasury balance of the appropriation on the date of cancellation.

4. Performing a one-time review of each canceled appropriation to ensure that the beginning unliquidated and unobligated balances of each canceled appropriation reflect accurately the balances on the Acct Rpt(M)1176 or SF 133 as of the date of cancellation.

5. Developing and implementing standard procedures for determining the timeframes and procedures for records retention applicable to detail accounting transaction records for canceled appropriations. These procedures shall ensure that required unobligated and unliquidated balances of each appropriation are accurately maintained while minimizing the cost associated with maintaining large databases or record files of completed transactions for records which no longer are required

6. Ensuring that an adequate audit trail is maintained for all adjustments affecting canceled appropriations, including the associated adjustments to current or expired appropriations.

G. Shall adjust the detailed contract records to reflect accounting corrections when contract records are still being maintained for contract payment purposes.

H. Shall record the corrections and complete the following actions for unmatched disbursements, negative unliquidated obligations, and disbursements in-transit transactions for which research actions have been completed and correcting accounting adjustments have been identified and submitted by a DoD Component:

1. Record such corrections within 30 days of receipt.

2. Except as provided for in subparagraph 110501.H.3., immediately below, do not delay the recording of corrections received from DoD Components pending the completion of contract reconciliations or other related actions.

3. Reject a proposed correction only if the proposed correction is in error, or otherwise inappropriate. (A proposed correction may not be rejected solely because a contract has not been reconciled fully or other actions have not been completed.)

4. Give a DoD Component 5 days to correct an error in the event that a proposed correction is rejected. If the error is not corrected within 5 days, the transaction shall be subject to such research and obligation requirements that otherwise would apply as a result of the disbursement (a) being over or under 180 days old; (b) being charged to an account that is closed (canceled); or (c) is scheduled to close, by operation of law, on September 30 of the current fiscal year.

110502. The Deputy Comptroller (Program/Budget), OUSD(C), shall ensure the following actions are taken when (a) funds in a particular Defense-wide account are allocated to a number of fund holders (limits) and (b) disbursements exceed obligations at the appropriation level, but not at a fund holder's level:

- A. The applicable DoD Component(s) reserves, commits, or obligates appropriate amounts against the fund holders' accounts.
- B. A report of potential violation is submitted to the USD(C), when applicable.
- C. An investigation of a potential violation of the Antideficiency Act is initiated.
- D. Corrective actions are taken by fund holders and the DFAS or applicable accounting station, as appropriate.

110503. The Deputy Comptroller Program/Budget) (ODC(P/B)), the Military Department Assistant Secretaries (Financial Management and Comptroller), Comptrollers of the Defense Agencies and DoD Field Activities and other Fund Holders shall:

- A. Designate an appropriation manager to receive, process and take actions on notifications from the DFAS or other accounting stations, and to take other appropriate action(s) regarding the stoppage of payments, the obligation of disbursement transactions within prescribed timeframes allotted for such action(s), and other actions provided for in this chapter.
- B. Reserve, commit, or obligate funds after the receipt of an initial notification from the cognizant accounting station that
 - 1. A disbursement exceeds an obligation at the appropriation/fund holder level.
 - 2. Sufficient unobligated balances are available that equal, or exceed, the amount by which the disbursements exceed recorded obligations at that level.
- C. Forward to the cognizant accounting station a commitment or obligation funding document, as appropriate, to cover the amount of the disbursement that exceeds the obligation.
- D. Obligate funds within 5 days after the receipt of a 120-day notification from the cognizant accounting station that a disbursement exceeds an obligation at the appropriation/fund holder level and:
 - 1. Initiate, immediately, a review of the circumstances to determine whether an investigation of a potential violation of the Antideficiency Act is warranted.
 - 2. Notify the OUSD(C), through appropriate funding channels, when an apparent/potential violation of the Antideficiency Act has occurred.

3. Initiate an investigation of an apparent violation of the Antideficiency Act when such investigation is deemed appropriate.

4. Provide the cognizant accounting station an obligation funding document to cover the amount of the disbursement that exceeds the obligation.

E. Forward to the cognizant accounting station an obligation funding document (to the extent that funds are available in the appropriation) to cover the amount of the disbursement that exceeds the obligation, within 60 days from the date of a 120-day notification from the cognizant accounting station that:

1. A disbursement exceeds an obligation at the obligation level, and
2. The condition has not been corrected.

F. Request a realignment of funds within an account or between accounts, a reprogramming of funds, a deficiency supplemental, or other acceptable funding solution, as applicable and appropriate, to the extent sufficient availability does not exist in the appropriation. Also forward supplemental funding documents to the cognizant accounting station to cover any funding shortfalls.

G. Initiate a review, immediately, of the circumstances to determine whether an investigation of a potential Antideficiency Act is warranted and, as appropriate, notify the USD(C) of the following conditions:

1. A fund holder may not have sufficient unobligated balances available that equal, or exceed, the amount by which disbursements exceed recorded obligations, and
2. A potential violation of the Antideficiency Act may have occurred.

H. Submit a report of violation in accordance with Volume 14 of this Regulation if the investigation reveals that an Antideficiency Act violation has occurred.

I. Advise the cognizant accounting station to correct any error(s) when applicable reviews or investigations identify these error(s) as the cause of the condition.

110505. DoD Components shall maintain detail and summary records of adjustments made in accordance with this chapter to ensure an adequate audit trail and to respond to inquiries from both inside and outside the Department.

110506. DoD Fund Holders shall obligate amounts to fund NULOs, UMDs, and any other type of problem disbursement transaction in accordance with the policies and procedures provided for in this chapter.

1106 PRIORITIES

The following priorities are established for researching and correcting all disbursement transactions that have not been properly matched to the correct obligation:

110601. First priority. Appropriations or funds specifically requested by the Office of the USD(C).

110602. Second priority. Appropriations or funds in an over-expended or overobligated status, regardless of whether the appropriation is in a current, expired or canceled status, as well as other appropriations, funds or transactions that have caused, or are anticipated to cause, stop payment orders or create a negative balance “condition” within the next 60 days.

110603. Third Priority. All other appropriations and funds, whether in a current, expired, or canceled status.

110604. Secondary Priorities. Within each priority group, appropriations or funds with the highest negative balance/amount of UMDs generally shall be researched ahead of appropriations or funds with lower balances/amounts. Within each appropriation or fund, prioritize transactions and documents beginning with the highest dollar value and continue to work the transactions and documents within that appropriation.

A. Continue this priority until all applicable transactions in the appropriation or fund are researched and corrected and the account is restored to a positive balance, NULO balances are eliminated and/or UMDs are matched, as applicable.

B. Not all transactions in an account must be matched or resolved before beginning research efforts in another account.

110605. Posting Procedures. Necessary corrections to transactions and accounts should be made in accordance with sections 1109 through 1112, below.

1107 MINIMUM RESEARCH EFFORTS REQUIRED FOR ALL OTHER DISBURSEMENTS

110701. General. The following research actions are the minimum steps required for all UMD and NULO transactions.

110702. Contracts

A. Accounting Office Actions

1. Select contract(s) for review based either on large individual UMD transaction or NULO condition and/or large aggregate total UMD transactions or NULO conditions.
2. Obtain the accounting system transaction history maintained in the accounting office and the payment transaction history from the disbursing office, or the output of obligation and payment differences from an accounting system/payment system comparison program if there are numerous unmatched disbursements showing incompatibility with the funds or amounts on the contract.
3. Review the output of a comparison program of the accounting and payment systems, when available. This can substitute for transaction histories from either system, and will reveal obligation modifications recorded in one system but not the other, as well as potentially omitted modifications.
4. Review obligation transactions recorded in the accounting system to determine that all contract modifications have been recorded.
5. Follow up with the contracting office and contract administration office to verify that all modifications have been recorded, and request that any contract modification errors and omissions be corrected or recorded when a missing contract modification is suspected.
6. Determine indicated error condition of each unmatched disbursement (e.g., wrong appropriation or insufficient funds) to guide further research.
7. For a UMD, make a systems inquiry, or request the accounting system closed contract history if there is no contract on the active accounting system records. If the contract is in the closed history file, take action to reopen the contract and record the transaction.
8. Review unmatched transactions for indications of specific error conditions. Such conditions include omitted progress payment recoupments for a contract having progress payments, inappropriate appropriation data configurations, or duplicate submission of payment data.
9. Report corrections made to transactions for accounting system recording, (e.g., changes to the appropriation data configuration) to the disbursing office for correction of its records.
10. Reject, back to the disbursing office for correction or recovery, those transactions that cannot be corrected, such as wrong accounting office or suspected overpayments. Take related required central reporting system actions.

11. Request selected voucher copies and supporting information when a centrally-administered contract is still open on the DFAS-Columbus Center's payment records and reconciliation cannot be accomplished between the accounting system transaction history and payment system transaction history.

B. Disbursing Office Actions

1. When a request for information on payment transactions is made by an accounting office, search the files for payment vouchers and, if available, provide a copy to the requesting office. If the payment records and files cannot be found due to age or apparent loss, respond as promptly as possible regarding these facts.

2. Review contract payment files promptly and verify whether the reported reject reason is correct when a disbursement transaction is rejected back from an accounting office with evidence that it was misrouted or is a duplicate or overpayment. If the rejection is valid, initiate a correction or recovery of funds for the duplicate or overpayment and respond as to the action taken.

110703. Reimbursable Orders/Military Interdepartmental Purchase Requests (MIPRs). The accounting office shall:

A. Check the UMD for error reason codes, such as insufficient funds or unmatched document number.

B. Refer the transaction for review to the ordering office or ordering command fund manager, as indicated by the obligation document number.

C. Record the transaction, when the ordering office or command validates the transaction and authorizes the obligation action.

D. Allow the ordering office up to 180 days from the date of disbursement to resolve and/or fund (obligate) the order/MIPR when the ordering office gives intent to do further research to resolve costs billed.

E. Refer the transaction to the disbursing office for additional information or correction when the ordering office cannot validate the transaction. -

110704. Travel Orders. The accounting office (unless otherwise indicated) shall:

A. Determine if a payment for personnel TDY, which results in a UMD transaction, identifies the traveler or is traceable to a separate travel system record.

B. Determine if the original obligation has been recorded in the accounting records when travel system records indicate closure of the travel order record with proper deduction of advances.

C. Record the amount of obligation (the initiating travel office) and record any UMDs (accounting office) when evidence shows that an obligation has not been recorded in the accounting system.

D. Request a copy of the travel settlement voucher from the disbursing office to support the transaction if travel system records do not indicate how a payment was used to liquidate a travel order record.

110705. MILSTRIP Requisitions. The accounting office shall:

A. Review transactions for discrepancy report and billing adjustment status. Submit billing adjustment requests, when required, in accordance with DoD 4000.25-7-M. Any billing adjustment request must be submitted within 1 year of the billing date (2 years for Foreign Military Sales).

B. Submit a follow-up request if a billing adjustment request previously has been made.

C. In accordance with MILSBILLS, DoD 4000.25-7-M, chapters 3 and 4, accept the transaction if a billing adjustment has not been requested, and the time period has expired.

110706. Unidentified Document Numbers. The accounting office shall:

A. Review the unmatched transaction for a disbursing station number, and other data to ascertain the source of the obligation, e.g., the voucher number and code.

B. If there is a valid disbursing station number, refer the transaction to that disbursing office for verification and the furnishing of supporting documentation.

C. Refer the transaction to the applicable office or command if there is an indication of the source of the obligation, even though the transaction has no disbursing station number or the disbursing station cannot identify the transaction.

D. Record the transaction when the disbursing station or obligating office can identify a properly recorded obligation document.

E. Record an obligation transaction when the obligating office can identify the obligation document, but there is no current open obligation.

110707. Other Transactions

A. Accounting Office Actions

1. Review transactions to determine their purpose and nature; for example, supplemental payroll payment, express or other transportation services or hearing officer examination reporting services.

2. Request the disbursing office to furnish missing documentation or any other material that would indicate the source of an obligation or basis for the payment when payment voucher support is missing or is incomplete.

3. Forward, to the funding office, transactions that have no matching accounting records, but have an indication of an obligation, such as an order number. Include an explanation of the apparent nature and purpose of the expenditure, request research of the circumstances of the unrecorded obligation and obtain support to show that the payment was not improper.

4. If there is no indication of an obligation, review the supporting documentation for any indication that the disbursement may have been incorrectly coded or other errors may have been made.

B. Funding Office Actions

1. Record a transaction when it can be matched to a prior unliquidated obligation.

2. If a transaction does not match, continue research efforts, including trying to identify erroneous document numbers, etc.

1108 REQUESTS TO DISCONTINUE UNSUCCESSFUL RESEARCH EFFORTS

110801. General. Notwithstanding the obligation of funds after 180 days, as required by paragraph 110301.B. and section 1104., above, UMDs and NULOs must continue to be researched and corrected unless written approval to discontinue research efforts is obtained from the Military Department Assistant Secretary for Financial Management and Comptroller, the Comptroller of a Defense Agency or DoD Field Activity in accordance with the provisions of subsection 110802 below. This responsibility may not be redelegate.

110802. Minimum criteria for requesting approval to discontinue further research efforts for disbursement and collection transactions are as follows:

A. There is no indication that an overpayment or a duplicate has been made and not fully collected.

B. For contracts closed by DFAS:

1. A preclosing payment review has been completed.

2. Unmatched disbursement(s) or negative unliquidated obligation conditions, which cannot be resolved, will not exceed the contract total if recorded.

C. For erroneous document numbers when neither the disbursing office, or indicated obligating office, can furnish information or support the disbursement.

D. For travel orders when an unmatched transaction contains insufficient information for research and cannot be traced due to age.

E. Requests to discontinue further research efforts may be forwarded when the research steps listed in section 1107, above, cannot be completed because of missing or insufficient documentation, and steps to request or obtain the missing documentation or clarification of the insufficient documentation were taken as specified but have not produced results, and further efforts appear fruitless and not cost-effective.

F. The following information shall be submitted in support of each request to discontinue research:

1. A separate report listing the individual transactions for each appropriation, by responsible accounting office, shall be provided.

2. A summary of research efforts and other steps taken to obtain missing documents or additional support for insufficient documentation shall be provided. As a minimum, the summary report shall include statements advising that the following actions were taken:

a. When applicable, transaction histories of the respective accounting and payment systems were obtained, reviewed, and compared for omitted transactions and other differences.

b. For omitted documents or noted differences, a request to obtain the documents or other clarifying evidence was made to the appropriate funding or contracting office for obligation documents and payment office for payment supporting documents.

c. Information regarding the research success achieved, as reported by the office to which requests were made, that the request for documentation and supporting information could not be accomplished due to invalid document number references, lost or misfiled documents, or inadequate data for searching files.

d. Sufficient actions were taken during the research efforts to provide reasonable assurance that no duplicate payments or other overpayments remain outstanding and no fraud has occurred involving the disbursement transactions for which research efforts are requested to be discontinued.

G. Requests to discontinue research must be coordinated with, and approved by, the DFAS, before the submission of such requests to the approving official.

1109 CORRECTIONS AND POSTINGS OF PRIOR DISBURSEMENTS INVOLVING APPROPRIATED FUNDS

110901. General. This section cites general procedures for recording corrections of prior disbursements erroneously charged to the wrong obligation or otherwise erroneously posted. The procedures are stated in general terms in recognition of the numerous accounting systems, each of which has specific transaction identifiers and processing requirements. The procedures in this section apply to disbursement transactions that have been or should have been charged to direct appropriations.

110902. Corrections of Prior Disbursements or Posting Errors when the Correct Obligation has been Identified and the Appropriation that should have been Chained is an Appropriation that is in a Current or Expired Status

A. To properly record a disbursement in an appropriation that should have been charged, adjust the records of the current or expired appropriation by taking one of the following two actions as appropriate:

1. If a disbursement exceeds a prior obligation (that is, if it has created a NULO), an adjustment to the prior obligation is required; therefore, increase the amount of obligation previously recorded to eliminate the negative unliquidated obligation.

2. If a disbursement was made for which an obligation previously was not recorded, or otherwise has not been identified, an obligation is required; therefore, record an obligation and match the disbursement to the obligation.

B. To correct the improper charge to a current or expired appropriation that was charged previously in error, adjust the records of the appropriation by taking one of the following two actions:

1. If a recoupment applies to a disbursement that either was matched erroneously to an obligation or remains unmatched, record a recoupment reversing the prior disbursement.

2. If the recoupment applies to a previously UMD, NULO, or disbursement in-transit for which, after 180 days, an obligation or obligation adjustment was established in accordance with subsection 110905, below, record the recoupment as an offset to the obligation or obligation adjustment and reverse the obligation or obligation adjustment.

110903. Corrections of Prior Disbursements or Posting Errors When the Correct Obligation has been Identified and the Appropriation that should have been Charged Is a

Canceled Appropriation and the Disbursement Occurred Before Cancellation of the Correct Chargeable Appropriation

A. To reflect the charge properly to the canceled appropriation that should have been charged initially (before it was canceled), process a memorandum charge to the canceled appropriation.

1. Adjust the records of the canceled appropriation to reflect the previous disbursement by taking one of the following two actions, as appropriate.

a. If the correct detail obligation was recorded in the canceled appropriation (prior to the cancellation of the appropriation), match the prior charge (disbursement) to the appropriate prior obligation in the canceled appropriation and reduce the unliquidated balance of the canceled appropriation. (There should be no change in the unobligated balance of the canceled appropriation.)

b. If the correct detail obligation was not recorded in the canceled appropriation (prior to the cancellation of the appropriation) or otherwise has not been identified, make a memorandum record of the disbursement and reduce the unobligated balance of the canceled appropriation. (There should be no change in the unliquidated obligation balance of the canceled appropriation.)

2. If the adjustment required by subparagraphs 110903.A. 1.a. or b. above, would exceed the unexpended balance or unobligated balance of the canceled appropriation, or any administrative subdivision thereof, or if upon reducing the unobligated balance in accordance with subparagraph 110903.A.1 b., above, the unobligated balance is exceeded at the level of Antideficiency Act violation responsibility, report a potential violation of the Antideficiency Act and initiate a preliminary review.

B. To reverse the erroneous charge, take the actions addressed in subparagraph 110903.B.1., below, if the disbursement was erroneously charged to an appropriation that is now current or expired. If the disbursement was erroneously charged to an appropriation that is now canceled, take the actions addressed in subparagraph 110903.B.2., below.

1. To correct an improper charge to a current or expired appropriation that previously was charged in error, adjust the records of the current or expired appropriation by taking one of the following two actions, as appropriate:

a. If a recoupment applies to a disbursement that either was matched erroneously to an obligation or remained unmatched, record a recoupment reversing the prior disbursement.

b. If the recoupment applies to a previous UMD, NULO, or disbursement in-transit for which, after 180 days, an obligation or obligation adjustment was

established in accordance with subsection 110905, below, record the recoupment as an offset to the obligation or obligation adjustment and reverse the obligation or obligation adjustment.

2. To correct an improper charge to a canceled appropriation that previously was charged in error, process a memorandum recoupment reversing the erroneous charge to the canceled appropriation. Adjust the records of the canceled appropriation to reflect the recoupment by taking one of the following two actions as appropriate.

a. If the recoupment applies to a disbursement that either was matched erroneously to the wrong obligation or remained unmatched (prior to the cancellation of the appropriation), record a memorandum recoupment to offset the disbursement and increase the unliquidated obligation balance of the canceled appropriation.

b. If the recoupment applies to a UMD, NULO, or disbursement in-transit for which, after 180 days, the unobligated balance of the canceled appropriation was reduced in accordance with subsection 110905, below, record the memorandum recoupment as an offset to the previous decrease in the unobligated balance and increase the unobligated balance of the canceled appropriation.

110904. Corrections Of Prior Disbursements or Posting Errors when the Correct Obligation has been Identified and the Appropriation that should have been Charged is a Canceled Appropriation and the Disbursement Occurred after Cancellation of the Correct Chargeable Appropriation

A. Availability of Funds at Time of Original Disbursement. Disbursements occurring after the cancellation of a chargeable appropriation must be funded from a current appropriation available for the same purpose as the chargeable appropriation that is canceled. This current appropriation, referred to in this chapter as the “funding appropriation,” must be, or have been, available for incurring new obligations at the time of the disbursement.

1. When corrections involve disbursements that occurred after the cancellation of the correct chargeable appropriation, care must be taken to ensure that a correction, if required, also is made to the funding appropriation that was charged, and/or should have been charged, in addition to the canceled chargeable appropriation.

2. For example, to correct a disbursement that was charged erroneously to an appropriation that was expired at the time of the disbursement, but that should have been charged to an appropriation that was canceled at the time of the disbursement, reduce the balance of the correct chargeable canceled appropriation, as well as charge the funding appropriation that was current at the time of the disbursement, and that should have been charged.

B. Charge the Correct Funding Account. To reflect the charge properly to the correct funding appropriation--that was current at the time of the original disbursement and available for the same purpose as the chargeable canceled appropriation that otherwise would

have been charged except that it was canceled--adjust the records of the funding appropriation by taking the following action:

1. Establish an obligation in the correct finding appropriation and record the disbursement against the obligation.

2. If the adjustment exceeds either the unexpended balance or the unobligated balance of the funding appropriation, or any administrative subdivision thereof, report a potential violation of the Antideficiency Act and initiate a preliminary review.

C. Charge the Correct Chargeable Canceled Account. To reflect the charge properly to the canceled appropriation that should have been charged initially except that it was canceled, process a memorandum charge to the canceled appropriation.

1. Adjust the records of the canceled appropriation by taking one of the following two actions, as appropriate.

- a. If the correct detail obligation was recorded in the canceled appropriation (prior to the cancellation of the appropriation), match the prior charge (disbursement) to the appropriate prior obligation in the canceled appropriation and reduce the unliquidated balance of the canceled appropriation. (There should be no change in the unobligated balance of the canceled appropriation.)

- b. If the correct detail obligation was not recorded in the canceled appropriation (before the cancellation of the appropriation), or otherwise has not been identified, make a memorandum record of the disbursement and reduce the unobligated balance of the canceled appropriation. (There should be no change in the unliquidated obligation balance of the canceled appropriation.)

2. If the adjustment would exceed the unexpended balance or the unobligated balance of the canceled appropriation, or any administrative subdivision thereof, report a potential violation of the Antideficiency Act and initiate a preliminary review.

D. Reverse the Erroneous Charge. To reverse the erroneous charge, take the actions addressed in subparagraph 110904.D.1., below, if the disbursement was erroneously charged to an appropriation that is now current or expired. If the disbursement was erroneously charged to an appropriation that is now canceled, take the actions addressed in subparagraph 110904.D.2.b., below.

1. To correct an improper charge to the current or expired appropriation that previously was charged in error, adjust the records of the current or expired appropriation by taking one of the following two actions:

a. If a recoupment applies to a disbursement that either was matched erroneously to an obligation or remained unmatched, record a recoupment reversing the prior disbursement.

b. If the recoupment applies to a previous UMD, NULO, or disbursement in-transit for which, after 180 days, an obligation or obligation adjustment was established in accordance with subsection 110905, record the recoupment as an offset to the obligation or obligation adjustment and reverse the obligation or obligation adjustment.

2. To correct the improper charge to a canceled appropriation that previously was charged in error, process a recoupment reversing the erroneous charge to the canceled appropriation. Adjust the records of the canceled appropriation by taking one of the following two actions, as appropriate.

a. If the recoupment applies to a disbursement that either was matched erroneously to the wrong obligation or remained unmatched in the accounting records (prior to the cancellation of the appropriation), record a memorandum recoupment offsetting the disbursement and increase the unliquidated obligation balance of the canceled appropriation.

b. If the recoupment applies to a UMD, NULO, or disbursement in-transit for which, after 180 days, the unobligated balance of the canceled appropriation was reduced in accordance with subsection 110904. E., record the memorandum recoupment as an offset to the previous decrease in the unobligated balance and increase the unobligated balance of the canceled appropriation.

110905 Posting Procedures when the Correct Obligation has not been Identified within 180 Days. As stated in section 1104., obligations are to be established/adjusted, and/or unobligated balances reduced, as appropriate, for disbursements that have not been matched to the correct obligation within 180 days. These actions are to be taken consistent with the procedures described below.

A. Transactions in Canceled Accounts

1. Unmatched Disbursements

a. Charge the canceled appropriation in which the UMD resides by reducing the unobligated balance. Unobligated balances may be reduced either at the detail (individual) transaction or summary level.

(1) If the summary method is used, the summary memorandum unobligated balance adjustments must be fully substantiated by detail transaction listings of each UMD making up the summary amount.

(2) If posted at the detail level, record a memorandum unobligated balance adjustment in the accounting records for each UMD being cleared.

b. Also increase the unliquidated obligation balance of the canceled appropriation by memorandum entry.

c. If, upon reducing the unobligated balance, the unobligated balance is exceeded at the level of Antideficiency Act violation responsibility, report a potential violation of the Antideficiency Act and initiate a preliminary investigation.

2. Negative Unliquidated Obligations

a. Charge the canceled appropriation in which the NULO resides by reducing the unobligated balance. Unobligated balances may be reduced either at the detail (individual) transaction or summary level.

(1) If the summary method is used, the summary memorandum unobligated balance adjustments must be fully substantiated by detail transaction listings of each NULO making up the summary amount.

(2) If posted at the detail level, record a memorandum unobligated balance adjustment in the accounting records for each NULO being cleared.

b. Also increase the unliquidated obligation balance of the canceled appropriation by memorandum entry.

c. If, upon reducing the unobligated balance, the unobligated balance is exceeded at the level of Antideficiency Act violation responsibility, report a potential violation of the Antideficiency Act and initiate a preliminary investigation.

3. Disbursements In-Transit

a. The unobligated balance of the cited canceled appropriation shall be reduced for disbursements in-transit. Disbursements in-transit shall be charged in the same manner as unmatched disbursements as provided for in subparagraph 110905A.1., above.

b. If a disbursement transaction identifies a specific finds holder, that funds holder must provide the supporting accounting office with a memorandum obligation document. If the finds holder did not hold funds for the fiscal year charged, or a funds holder was not identified in the transaction record, the appropriation manager shall designate a specific funds holder to take those actions required in subparagraph 110905A.1., above.

B. Transactions in Current and Expired Accounts

1. Unmatched Disbursements

a. Charge the current or expired appropriation in which the UMD resides by establishing a formal obligation for the UMD(s) in the appropriation. The impact should be a reduction of the unobligated balance. Obligations may be posted either at the detail (individual) transaction or summary level.

(1) If the summary obligation method is used, such summary obligation amounts must be fully substantiated by detail transaction listings of each UMD making up the summary amount.

(2) If posted at the document level, record an obligation adjustment in the accounting records. Post the UMD being cleared against the adjusted obligation.

b. Also increase the unliquidated obligation balance of the current or expired appropriation.

c. If, upon recording the obligation, the obligated balance exceeds the funds available, at the level of Antideficiency Act violation responsibility, report a potential violation of the Antideficiency Act and initiate a preliminary investigation.

2. Negative Unliquidated Obligations

a. Charge the current or expired appropriation in which the NULO resides by establishing a formal obligation adjustment for the NULO in the appropriation. The impact should be a reduction of the unobligated balance. Obligations may be posted either at the detail (individual) transaction or summary level.

(1) If the summary obligation method is used, such summary obligation amounts must be fully substantiated by detail transaction listings of each negative unliquidated obligation making up the summary amount.

(2) If posted at the document level, increase the amount of the previously recorded obligation that the NULO matches by recording a obligation adjustment in the accounting records.

b. Also increase the unliquidated obligation balance of the current or expired appropriation.

c. If, upon recording the obligation adjustment; the obligated balance exceeds the funds available at the level of Antideficiency Act violation responsibility, report a potential violation of the Antideficiency Act and initiate a preliminary investigation.

3. Disbursements In-Transit

a. Obligations must be established by June 30 for all in-transit transactions in appropriations scheduled to close (become canceled) at the end of the current fiscal year. Obligations for unresolved in-transit transactions shall be recorded in the same manner as UMDs as provided for in subparagraph 110905A.1., above.

b. If a disbursement transaction identifies a specific funds holder, that funds holder must provide the supporting accounting office with an obligation document. If the funds holder did not hold funds for the fiscal year charged, or if a funds holder was not identified in the transaction record, the appropriation manager shall designate a specific funds holder to take those actions required in subparagraph 110905A.1. and 2., above.

C. Continue Research Efforts. The requirement to establish obligations for unresolved overaged UMDs, and NULOs and in-transit disbursements does not eliminate the need to complete the research and post the disbursement to the correct obligation. Research efforts must be continued until the transaction is matched or approval to discontinue research is obtained in accordance with the procedures in section 1108.

D. Reporting Requirements when the Correct Obligation has not been Identified within 180 Days. When obligations are established in accordance with the procedures addressed in subsection 110905, above, the applicable transactions shall not be identified as closed out on monthly UMD and NULO status reports. Establishment of obligations for transactions addressed in subsection 110905 does not diminish or eliminate the need to match these transactions to the proper obligation. The DFAS will establish procedures to be used in identifying these transactions and amounts on the monthly problem disbursements reports.

110906. Posting Procedures when Required Research is Unsuccessful and Discontinuance of Further Research is Approved. The procedures addressed in paragraphs 110906A.-C., below, shall be applied when the actions stated in section 1107 have been completed and a request to discontinue further research has been submitted and approved in accordance with section 1108.

A. Approval Before the Expiration of the 180-Day Period. If approval to discontinue further research occurs before the expiration of the 180-day period, as discussed in subsection 110905, above, and amounts have not been obligated in accordance with the provisions of that section, obligations must be established in accordance with the provisions of that section. Additionally, such obligations must be reported in accordance with paragraph 110906. C., below.

B. Approval After the Expiration of the 180-Day Period. If approval to discontinue further research occurs after the expiration of the 180-day period discussed in subsection 110905, above, and amounts have been obligated in accordance with the provisions of that section, no further obligation action is required. However, such amounts are required to be reported in accordance with paragraph 110906. C., below.

C. Reporting Requirements when Required Research Was Unsuccessful and Discontinuance of Further Research is Approved. Transactions cleared in accordance with the procedures addressed in paragraphs 110906.A. and B., above, must be identified separately from those cleared through the normal research and matching process. Therefore, upon completion of the actions described in the two paragraphs cited above, the applicable transactions shall be identified and reported in monthly UMD and NULO status reports. Such amounts shall be reported separately from all other amounts/corrections, and reported separately as UMDs, NULOs, and disbursements in-transit.

1110 CORRECTIONS AND POSTINGS OF DISBURSEMENTS INVOLVING THE WORKING CAPITAL FUNDS

111001. General. Corrections and postings of disbursements in the Working Capital Funds may require adjustments to both disbursements and expenses. This section cites general procedures for recording corrections of prior disbursements erroneously charged to the wrong obligation or otherwise erroneously posted. The procedures are stated in general terms in recognition of the numerous accounting systems, each of which has specific transaction identifiers and processing requirements.

111002. Corrections of Prior Disbursements or Posting Errors when the Correct Obligation has been Identified

A. To record a disbursement properly against an activity that should have been charged, adjust the records of the applicable activity by making one of the budgetary account adjustments as well as one of the propriety account adjustments. These adjustments are addressed in paragraphs 111002.A.1. and 2., below:

1. Budgetary Account Adjustments

a. If a disbursement exceeds a prior obligation (that is, if it created a NULO), an adjustment to the prior obligation is required; therefore, increase the obligation previously recorded.

b. If a disbursement was made for which an obligation was not recorded previously, or otherwise has not been identified, an obligation is required; therefore, record an obligation and match the disbursement to the obligation.

2. Proprietary Account Adjustments

a. If it has been demonstrated that the correct proprietary account was charged previously in the correct amount, no further proprietary account adjustment is required.

b. If the disbursement occurred in the current fiscal year, and the proprietary account adjustment(s) to charge the correct proprietary account properly in the correct amount is known, then make the required proprietary account adjustment(s).

c. If the disbursement occurred in a prior fiscal year, and a real property or depreciable property proprietary asset account should be adjusted to charge the correct proprietary account properly in the correct amount, then make the required proprietary account adjustment(s).

d. If none of the provisions of subparagraphs 111002.A.2.a. through c., above, apply, charge the “extraordinary loss” proprietary account in an amount that is equal to the amount of the obligation or obligation adjustment provided for in subparagraphs 111002.A.1.a. or b., above, as applicable. This “extraordinary loss” should be recorded in the fiscal year that is current at the time that the obligation or obligation adjustment addressed in subparagraphs 111002.A.1.a. or b., above, is made, irrespective of when the disbursement occurred. Exceptions to the requirements of this paragraph may be approved by the Director for Accounting Policy in the Office of the USD(C). Such exceptions must be in writing.

B. To correct the improper charge that was charged previously in error, adjust the records of the applicable activity by making one of the budgetary account adjustments addressed in subparagraph 111002.B.1., below, as well as one of the proprietary account adjustments addressed in subparagraph 111002.B.2., below:

1. Budget Account Adjustments

a. If a recoupment applies to a disbursement that either was matched erroneously to an obligation or remained unmatched, record a recoupment reversing the prior disbursement.

b. If the recoupment applies to a previous UMD, NULO, or disbursement in-transit for which, after 180 days, an obligation or obligation adjustment was established in accordance with subsection 111003, below, record the recoupment as an offset to the obligation or obligation adjustment and reverse the obligation or obligation adjustment.

2. Proprietary Account Adjustments

a. If it has been demonstrated that the correct proprietary account was charged previously in the correct amount, no further proprietary account adjustment(s) is required.

b. If the disbursement occurred in the current fiscal year, and the proprietary account adjustment(s) to relieve the incorrect proprietary account properly for the amount charged is known, then make the required proprietary account adjustment(s).

c. If the disbursement occurred in a prior fiscal year, and a real property or depreciable property proprietary asset account was charged (but should not have been charged and now should be adjusted to relieve the incorrect charge), then make the required proprietary account adjustment(s).

d. If none of the provisions of subparagraphs 111002.B.2.a. through c., above, apply, record an “extraordinary gain” in the proprietary account in an amount that is equal to the amount of the obligation/obligation adjustment provided for in subparagraphs 111002.B.1.a. or b., above, as applicable. This “extraordinary gain” should be recorded in the fiscal year that is current at the time that the obligation/obligation adjustment is made as addressed in subparagraphs 111002.B.1.a. or b., above, irrespective of when the disbursement occurred. Exceptions to the requirements of this paragraph may be approved by the Director for Accounting Policy in the OUSD(C). Such exceptions must be in writing.

111003. Posting Procedures when the Correct Obligation has not been Identified within 180 days. Except as provided for in paragraphs 111008.E. and F., above, obligations or adjustments to obligations, as well as expenses, are to be established for disbursements that have not been matched to the correct obligation within 180 days. These obligations or obligation adjustments and expenses are to be processed and recorded consistent with the procedures provided for in subparagraphs 111003.A.1. through 3., below.

A. Budget Account Adjustment

1. Unmatched Disbursements

a. Unmatched disbursements must be obligated and expensed against the Working Capital Fund activity where the UMD resides. (If a UMD has not been identified to a specific activity, it must be so assigned.)

b. Charge the activity in which the UMD resides by establishing a formal obligation. Obligations may be posted either at the detail (individual) transaction or summary level.

(1) If the summary obligation method is used, the summary obligation amounts must be fully substantiated by detail transaction listings of each UMD making up the summary amount.

(2) If posted at the document level, record a obligation adjustment in the accounting records. Post the UMD being cleared against the adjusted obligation.

c. If, upon recording the obligation, the obligated balance exceeds the budgetary resources available, at the level of Antideficiency Act violation responsibility, report a potential violation of the Antideficiency Act and initiate a preliminary investigation.

d. Record an “extraordinary loss” in the proprietary accounts in an amount equal to the amount of the UMD. This “extraordinary loss” should be recorded in the fiscal year that is current at the time that the obligation is made as addressed in subparagraph 111003.A. 1., above, irrespective of when the disbursement occurred.

2. Negative Unliquidated Obligations

a. Negative unliquidated obligations must be obligated and expensed against the Working Capital Fund activity where the NULOs reside.

b. Charge the activity in which the NULO resides by establishing a formal obligation adjustment. Obligations may be posted either at the detail (individual) transaction or summary level.

(1) If the summary obligation method is used, the summary obligation amounts must be fully substantiated by detail transaction listings of each NULO making up the summary amount.

(2) If posted at the document level, increase the amount of the previously recorded obligation that the NULO matches by recording a obligation adjustment in the accounting records.

c. If, upon recording the obligation adjustment, the obligated balance exceeds the budgetary resources available at the level of Antideficiency Act violation responsibility, report a potential violation of the Antideficiency Act and initiate a preliminary investigation.

d. Record an “extraordinary loss” in the proprietary accounts in an amount equal to the amount of the NULO. This “extraordinary loss” should be recorded in the fiscal year that is current at the time that the adjustment is made as addressed in subparagraph 111003.A.2.b., above, irrespective of when the disbursement occurred.

3. Disbursements In-Transit

a. Disbursements in-transit must be obligated and expensed against the Working Capital Fund activity in which the transaction resides. If an activity is not identified in the transaction record, the DoD Component involved shall designate a specific activity.

b. Disbursements in-transit shall be charged in the same manner as UMDs. Charge the activity in which the disbursement in-transit resides by establishing a formal obligation.

c. If, upon recording the obligation, the obligated balance exceeds the budgetary resources available, at the level of Antideficiency Act violation responsibility, report a potential violation of the Antideficiency Act and initiate a preliminary investigation.

d. Record an “extraordinary loss” in the proprietary accounts in an amount equal to the amount of the disbursement in-transit. This “extraordinary loss” should be recorded in the fiscal year that is current at the time that the obligation is made as addressed in subparagraph 111003A.3 b., above, irrespective of when the disbursement occurred.

e. The 180-day timeframe for posting disbursements in-transit begins on the earlier of (1) the date that the transaction exceeds the current distribution timeframe for disbursements--no more than 120 days for cross disbursement transactions and for MILSTRIP billings, and no more than 60 days for transactions by or for others (TBOs/TFOs) or (2) the date that the detail transaction fails an editor validation in the transmission or matching process. For example, if a detail transaction (hard copy or electronic) cannot be routed to an activity accounting system, the 180-day timeframe begins on the day that the routing system identifies that a problem is precluding the transaction from being routed to the activity accounting system. If a disbursement is transmitted to an activity, but is rejected by the activity accounting office or system, the 180-day timeframe starts on the day the transaction failed the initial attempt to match the correct obligation in the activity accounting system, or otherwise is rejected.

B. Proprietary Account Adjustments. Record an “extraordinary gain” in the proprietary account in an amount that is equal to the amount of the obligation or obligation adjustment provided for in subparagraphs 111003.A.1. through 3., above, as applicable. This “extraordinary gain” should be recorded in the fiscal year that is current at the time that the obligation or obligation adjustment is made as addressed in subparagraphs 111003.A.1. through 3., above, irrespective of when the disbursement occurred. Exceptions to the requirements of this paragraph may be approved by the Director of Accounting Policy in the Office of the USD(C). Such exceptions must be in writing.

C. Continue Research Efforts. The requirement to obligate and expense UMD, NULOs, and disbursements in-transit that remain unmatched at the end of the 180-day timeframe does not eliminate the need to complete the research and post the disbursement to the correct obligation. Research efforts must be continued-until the transaction is matched to the correct obligation or approval to discontinue research is obtained in accordance with the procedures in section 1108.

D. Reporting Requirements when the Correct Obligation has not been Identified within 180 Days. When obligations are established in accordance with the procedures addressed in subparagraphs 111003.A.1. through 3., above, the applicable transactions shall not be identified as closed out on monthly UMD and NULO status reports. Establishment of obligations for transactions addressed in subsection 111003 does not diminish or eliminate the

need to match these transactions to the proper obligation. The DFAS will specify procedures for identifying these transactions and amounts on the monthly problem disbursements reports.

111004. Posting Procedures when Required Research is Unsuccessful and Discontinuance of Further Research is Approved. The procedures addressed in paragraphs 111004.A. through C., below, shall be applied when the actions in section 1107 have been completed and a request to discontinue further research has been submitted and approved in accordance with section 1108.

A. Approval Before the Expiration of the 180-Day Period. If approval to discontinue further research occurs before the expiration of the 180-day period discussed in subsection 111003, above, and amounts have not been obligated and expensed in accordance with the provisions of that section, obligations and expenses must be established in accordance with the provisions of that section. Additionally, such obligations must be reported in accordance with paragraph 11 1004. C., below.

B. Approval After the Expiration of the 180-Day Period. If approval to discontinue further research occurs after the expiration of the 180-day period discussed in subsection 111003, above, and amounts have been obligated and expensed in accordance with the provisions of that section, no further obligation or expense action is required. However, such amounts are required to be reported in accordance with paragraph 111004. C., below.

C. Reporting Requirements when Required Research was Unsuccessful and Discontinuance of Further Research is Approved. Transactions cleared in accordance with the procedures addressed in sections 111004.A. and B., above, must be identified separately. from those cleared through the normal research and matching process. Therefore, upon completion of the actions described in those paragraphs, the applicable transactions shall be identified and reported in monthly UMD and NULO status reports. Such amounts shall be reported separately from all other amounts and corrections and reported separately as UMDs, NULOs, and in-transit disbursements.

1111 CORRECTIONS AND POSTINGS OF DISBURSEMENT INVOLVING THE FOREIGN MILITARY SALES (FMS) TRUST FUND

111101. General. Corrections and postings of disbursements in the FMS Trust Fund may require adjustments both to disbursements and charges to FMS cases or FMS surcharge accounts. This section cites general procedures for recording corrections of prior disbursements erroneously charged to the wrong obligation or otherwise posted erroneously. The procedures are stated in general terms in recognition of the numerous accounting systems, each of which has specific transaction identifiers and processing requirements.

111102. Special Notification Requirements

A. If, at the end of 120 days after discovery of the UMD or NULO condition, the DFAS or other accounting office has not been able to resolve the transactions, the

transactions shall be forwarded to the fund holder for resolution. For FMS, both the Defense Security Assistance Agency (DSAA) and the fund holder are to be involved in the resolution. At this time, the fund holder should be notified that he or she must fund the transaction if the transaction is not properly matched within 60 days. For FMS, a draft case modification, if required, is prepared for DSAA countersignature.

B. Due to FMS case management requirements, disbursements and disbursement adjustments involving FMS funds shall be coordinated with the DFAS-Denver Center. The DFAS will establish notification and approval procedures.

111103. Corrections of Prior Disbursements or Posting Errors when the Correct Obligation has been Identified

A. To record a disbursement properly that previously was charged erroneously, adjust the records of the FMS case or FMS surcharge account that should have been charged by taking one of the following two actions:

1. If a disbursement exceeds a prior obligation (that is, if it created a NULO), an adjustment to the prior obligation is required; therefore, increase the obligation previously recorded and match the disbursement to the adjusted obligation.
2. If a disbursement was made for which an obligation was not recorded previously, or otherwise has not been identified, an obligation is required; therefore, record an obligation and match the disbursement to the obligation.
3. If, upon recording the obligation, the obligated balance exceeds the budgetary resources available, at the level of Antideficiency Act violation responsibility, report a potential violation of the Antideficiency Act and initiate a preliminary review.

B. To correct an improper charge that previously was erroneously charged, adjust the records of the applicable FMS case or FMS surcharge account charged in error by taking one of the following two actions:

1. If a recoupment applies to a disbursement that was matched erroneously to an obligation, record a recoupment reversing the prior disbursement.
2. If the recoupment applies to a previously UMD, NULO, or disbursement in-transit for which, after 180 days, an obligation or obligation adjustment was established in accordance with subsection 111104, below, record the recoupment as an offset to the obligation or obligation adjustment and reverse the obligation or obligation adjustment.

111104. Posting Procedures when the Correct Obligation has not been Identified within 180 Days. Except as provided for in paragraphs 110301.B. and 110501.H., obligations or obligation adjustments are to be established for disbursements that have not been matched to the

correct obligation within 180 days. These obligations or adjustments are to be processed and recorded consistent with the procedures provided for in paragraphs 111104.A. through E., below:

A. Unmatched Disbursements

1. Unmatched disbursements must be obligated against the FMS case or FMS surcharge account where the UMD resides. (If a UMD has not been identified to a specific FMS case or FMS surcharge account, it shall be assigned to the FMS administrative surcharge account.)

2. Charge the FMS case or FMS surcharge account in which the unmatched disbursement resides by establishing a formal obligation. Obligations may be posted either at the detail (individual) transaction or summary level.

a. If the summary obligation method is used, the summary obligation amounts must be fully substantiated by detail transaction listings of each UMD making up the summary amount.

b. If posted at the document level, record a obligation adjustment in the accounting records. Post the UMD being cleared against the adjusted obligation.

3. If, upon recording the obligation, the obligated balance exceeds the budgetary resources available, at the level of Antideficiency Act violation responsibility, report a potential violation of the Antideficiency Act and initiate a preliminary investigation.

B. Negative Unliquidated Obligations

1. Negative unliquidated obligations must be obligated against the FMS case or FMS surcharge account where the NULOs reside.

2. Charge the FMS case or FMS surcharge account in which the NULO resides by establishing a formal obligation adjustment. Obligations may be posted either at the detail (individual) transaction or summary level.

a. If the summary obligation method is used, the summary obligation amounts must be fully substantiated by detail transaction listings of each NULO making up the summary amount.

b. If posted at the document level, increase the amount of the previously recorded obligation that the NULO matches by recording a obligation adjustment in the accounting records.

3. If, upon recording the obligation, the obligated balance exceeds the budgetary resources available, at the level of Antideficiency Act violation responsibility, report a potential violation of the Antideficiency Act and initiate a preliminary review.

C. Disbursements In-Transit

1. Disbursements in-transit must be obligated against the FMS case or FMS surcharge account in which the transaction resides. If an FMS case or FMS surcharge account is not identified in the transaction record, it shall be assigned to the FMS administrative surcharge account.

2. Disbursements in-transit shall be charged in the same reamer as UMDs. Charge the FMS case or FMS surcharge account in which the disbursement in-transit resides by establishing a formal obligation.

3. The 180-day timeframe for posting disbursements in-transit begins on the earlier of (a) the date that the transaction exceeds the current distribution timeframe for disbursements--no more than 120 days for cross disbursement transactions and for MILSTRIP billings, and no more than 60 days for transactions by or for others (TBOs/TFOs) or (b) the date that the detail transaction fails an editor validation in the transmission or matching process.

a. For example, if a detail transaction (hard copy or electronic) cannot be routed to an FMS case or FMS surcharge account accounting system, the 180-day timeframe begins on the day that the routing system identifies that a problem is precluding the transaction from being routed to the FMS case or FMS surcharge account accounting system.

b. If a disbursement is transmitted to the Deputate for Security Assistance, DFAS-Denver Center, but is rejected by the Center, the 180-day timeframe starts on the day the transaction failed the initial attempt to match the correct obligation in the FMS case or FMS surcharge account accounting system, or otherwise is rejected.

4. If, upon recording the obligation, the obligated balance exceeds the budgetary resources available, at the level of Antideficiency Act violation responsibility, report a potential violation of the Antideficiency Act and initiate a preliminary investigation.

D. Continue Research Efforts. The requirement to obligate and expense UMD, NULOs, and disbursements in-transit that remain unmatched at-the end of the 180-day timeframe does not eliminate the need to complete the research and post the disbursement to the correct obligation. Research efforts shall continue until the transaction is matched to the correct obligation or approval to discontinue research is obtained in accordance with the procedures in section 1108,

E. Reporting Requirements When The Correct Obligation Has Not Been Identified Within 180 Days. When obligations are established in accordance with the procedures

addressed in paragraphs 111104.A. through C., above, the applicable transactions shall not be identified as closed out on monthly UMD and NULO status reports. Establishment of obligations for transactions addressed in subsection 111104 does not diminish or eliminate the need to match these transactions to the proper obligation. The DFAS will provide detail procedures to be used in identifying these transactions and amounts on the monthly problem disbursements reports.

111105. Posting Procedures when Required Research is Unsuccessful and Discontinuance of Further Research is Approved. The procedures addressed in paragraphs 111105.A. through C., below, shall be applied when the actions in section 1107 have been completed and a request to discontinue further research has been submitted and approved in accordance with section 1108.

A. Approval Before the Expiration of the 180-Day Period. If approval to discontinue further research occurs before the expiration of the 180-day period discussed in subsection 111104, above, and amounts have not been obligated and expensed in accordance with the provisions of that section, obligations must be established in accordance with these provisions. Additionally, such obligations must be reported in accordance with paragraph 11 1105. C., below.

B. Approval After the Expiration of the 180-Day Period. If approval to discontinue further research occurs after the expiration of the 180-day period discussed in section 111104, above, and amounts have been obligated and expensed in accordance with the provisions of that section, no further obligation or expense action is required. However, such amounts shall be reported in accordance with paragraph 111105. C., below.

C. Reporting Requirements When Required Research was Unsuccessful and Discontinuance of Further Research is Approved. Transactions cleared in accordance with the procedures addressed in paragraphs 111105.A. and B., above, must be identified separately from those cleared through the normal research and matching process. Therefore, upon completion of the actions described in that guidance, the applicable transactions shall be identified and reported in monthly UMD and NULO status reports. Such amounts shall be reported separately from all other amounts/corrections, and reported separately as UMD, NULOs, and in-transit disbursements.

1112 CORRECTIONS OF DISBURSEMENTS INVOLVING BOTH APPROPRIATED FUNDS AND REVOLVING OR TRUST FUNDS

The procedures used to correct disbursement transactions erroneously charged to one fund type (e.g., appropriated fund) that should have been charged to another fund type (e.g., working capital or trust fund), require the application of procedures from each fund type involved. For example, for a disbursement that was charged erroneously to an appropriated fund that should have been charged to a working capital fund, the recoupment to the appropriated fund should be processed in accordance with the applicable recoupment paragraph in section 1109,

while the charge to the working capital funds should be processed in accordance with the applicable paragraph in section 1110.

1113 CORRECTIONS REQUIRING NEW DISBURSEMENTS OR COLLECTIONS

111301. General. When the correction requires a new disbursement or collection, process the corrective action in accordance with sections, 1109, 1110, 1111, or 1112, as applicable. Additionally, process the new disbursement or collection in accordance with the provisions of subsection 111302, below, if the disbursement or collection does not involve a canceled appropriation. Process the transaction in accordance subsection 111303, below, if the disbursement or collection does involve a canceled appropriation.

111302. Disbursements or Collections that are Chargeable to a Current or Expired Appropriation or a Working Capital or Trust Fund

A. Disbursement. When a new cash disbursement involves a current or expired appropriation or a working capital or trust fund, and a canceled appropriation is not involved, process and record the disbursement in accordance with existing policies and procedures for new disbursements for such accounts.

B. Collection. When a new cash collection involves a current or expired appropriation or a working capital or trust fund, and a canceled account is not involved, process and record the collection in accordance with existing policies and procedures for collections for such accounts.

111303. Disbursements or Collections that are Properly Chargeable to a Canceled Appropriation (Except that the Appropriation is Canceled)

A. Disbursement. When a new disbursement involves an amount that otherwise is properly chargeable to a canceled appropriation except that the appropriation is canceled, comply with the provisions of the closing accounts legislation (summarized in paragraphs 110402.E.-G.) including:

1. Record and report the charge as a new obligation and a disbursement in a currently available appropriation that is available for the same purpose as the canceled appropriation. If the obligation causes the cumulative 1 percent limit (identified in paragraph 110402.LF.) to be exceeded, no disbursement can be made. The office funding the proposed payment (contract) must contact the cognizant Military Department (Assistant Secretary for Financial Management and Comptroller) or the Defense Agency Comptroller for referral to the Office of the USD(C) for appropriate disposition.

2. Adjust the records of the canceled appropriation to reflect the new disbursement by taking one of the following two actions, as appropriate.

a. Reduce the unliquidated balance of the canceled appropriation if the correct detail obligation was recorded in the canceled appropriation prior to the cancellation of the appropriation. (There should be no change in the unobligated balance of the canceled appropriation.) Match the current charge (disbursement) to the appropriate prior obligation in the canceled appropriation.

b. Make a memorandum record of the disbursement and reduce the unobligated balance of the canceled appropriation if the correct detail obligation was not recorded in the canceled appropriation prior to the cancellation of the appropriation. (There should be no change in the unliquidated obligation balance of the canceled appropriation.)

3. The disbursement shall not be issued if the adjustment required by subparagraphs 111303.A.2.a. or b., above, would exceed the unexpended balance of the canceled appropriation, or if reducing the unobligated balance in accordance with the provisions of subparagraph 111303.A.2.b., above, would result in a negative unobligated balance at the appropriation level.

4. The disbursement may be made, but a potential violation of the Antideficiency Act must be reported and a preliminary review initiated if the adjustments required by subparagraphs 111303.A.2.a. or b., above, (a) would not exceed the unexpended balance or the unobligated balance at the appropriation level, but (b) would exceed the unexpended balance or the unobligated balance of an administrative subdivision, of the appropriation, that has Antideficiency Act violation responsibility.

B. Collection. When a new cash refund or other collection involves an amount that otherwise would be refunded or collected to a canceled appropriation except that the appropriation is canceled, comply with the provisions of the closing accounts legislation including:

1. Deposit the collection to the Treasury receipts account 3200, "Collections of Receivables from Canceled Accounts."

2. Increase the unobligated or unliquidated balance of the canceled appropriation, as appropriate, to reflect each refund or collection deposited into the Treasury account. Adjust the records of the canceled appropriation to reflect the new refund or collection by taking one of the following two actions, as appropriate.

a. If the collection applies to an accounts receivable that had been established prior to the cancellation of the appropriation, record a memorandum collection offsetting the receivable and increase the unobligated balance of the canceled appropriation.

b. If the collection applies to a disbursement that was not established as an accounts receivable prior to the cancellation of the appropriation, record a memorandum collection as an offset to the previous disbursement and increase the unliquidated obligation balance of the appropriation.

1114 REPORTING REQUIREMENTS

111401. Data Collection Requirements. The DFAS shall be responsible for collecting and consolidating data and reporting on the amounts and the status of UMDs, NULOS, and disbursements in-transit.

111402. Recurring Monthly Reporting Requirements

A. DoD Component accounting offices shall transmit to the DFAS-HQ-A, on a monthly basis, a status report identifying all disbursement transactions that have not been matched to the correct obligation. The DFAS will specify the format and detail reporting requirements.

B. When, in accordance with the provisions of paragraphs 110904.F. and subsections 111003., and 111104., the correct obligation has not been identified within 180 days and [new] obligations have been established, the applicable transactions shall not be identified as closed out on monthly UMD and NULO status reports. Establishment of obligations for transactions addressed in the provisions cited above does not diminish or eliminate the need to match those transactions to the proper obligation. The DFAS will specify detail procedures to be used in identifying these transactions and amounts on the monthly problem disbursements reports.

1115 MAINTENANCE OF ADEQUATE RECORDS

DoD Components, and supporting accounting offices, shall maintain an audit trail with adequate records to substantiate all transactions, amounts and actions taken with respect to the research and clearing of UMDs, NULOs, and disbursements in-transit. This includes, but is not limited to, determinations that selected transactions meet the criteria for discontinuing further research.

Chapter 12

POLICIES AND PROCEDURES GOVERNING THE USE OF THE AUTHORITY OF
SECTION 3732, REVISED STATUTES (NOW 41 U.S.C. 11)

1201 OVERVIEW

120101. Purpose. This chapter establishes departmental policy and basic procedures to be followed with respect to the use of the authority of Section 3732, Revised Statutes (41 U.S.C. 11). That statute authorizes the Military Departments to incur obligations for specific purposes in excess of appropriations available.

120102. General

A. Title 41, United States Code, section 11, authorizes the Military Departments to incur obligations in excess of available appropriations in procuring or furnishing clothing, subsistence, forage, fuel, quarters, transportation, or medical and hospital supplies not to exceed the necessities of the current fiscal year.

B. Title 10, United States Code, section 2204, requires the Secretary of Defense to approve scheduled rates of obligations of funds appropriated to the Department for the purpose of restricting obligations and expenditures as may be necessary to prevent overdrafts and deficiencies in any fiscal year for which appropriations are made. Section 2204 does not prohibit the Department from incurring a deficiency as separately authorized by law.

C. Volume 14 of this Regulation (which implements 31 U.S.C. 1517(a)) establishes the basic system of controls and other fundamental requirements for the administration of appropriations and funds. The system of administrative controls was designed to (1) restrict obligations and expenditures against appropriations and funds to the amounts available therein or to the amounts apportioned, and (2) enable officials to fix responsibility in the officers and employees of the Department who may violate any provision of the law or regulation.

1202 POLICY AND PROCEDURES

120201. The Department shall limit its use of the authority in 41 U.S.C. 11 to emergency circumstances. The exigencies of those circumstances must be such that immediate action is imperative and action cannot be delayed long enough to obtain sufficient funds to cover the procurement or furnishing of those items in paragraph 120102.A., above, needed for the current fiscal year. In determining the urgency of the circumstances, due consideration shall be given in each specific case to the feasibility of obtaining funds by use of telephones, facsimile machines, or other electronic means. The authority of 41 U.S.C. 11 shall not be used to circumvent the provisions of 31 U.S.C. 1517(a).

120202. It is not considered practicable to define specifically the conditions and circumstances which conceivably could constitute an emergency. Each instance in which the authority of 41 U.S.C. 11 is to be used must be determined on a case-by-case basis in accordance with the policy guidelines in this chapter.

120203. Funds shall be administered in accordance with the system of administrative controls established by Volume 14 of this Regulation in such a manner that officials, responsible for administering each appropriation, allocation, allotment, and other fund subdivisions, may take timely action to prevent overobligation of any fund subdivision, notwithstanding 41 U.S.C. 11.

120204. Overobligation of any appropriation or fund subject to apportionment, or any subdivision thereof for procurement or furnishing of those items in paragraph 120102.A., above, shall be deemed to be a violation of the Antideficiency Act. There are two exceptions: (A) If the overobligation was made in emergency circumstances in accordance with the spirit and intent of provisions set forth above, and (B) if such procurements are not in excess of the necessities to relieve the period of emergency. However, for the second exception, the necessities for such period cannot exceed the necessities of the current fiscal year.

120205. When it is necessary to create or authorize an overobligation for the purposes set forth in 41 U.S.C. 11, the individual responsible shall determine, and so certify in writing, that all three of the following circumstances existed:

- A. An emergency existed within the spirit and intent of this section (1202).
- B. The purpose for which the overobligation was created or authorized was to meet other necessities of the period involved.
- C. It was not feasible to obtain in advance sufficient funds to cover such necessities.

120206. Such certification shall indicate the amount of the overobligation and shall be filed with the supporting records of the appropriation, allocation, or allotment involved. The overobligation shall be disclosed fully in the fiscal reports to the next higher level of command, indicating that the overobligation was incurred under authority of 41 U.S.C. 11.

120207. Having exercised the authority of 41 U.S.C. 11 pursuant to this chapter, the individual responsible shall advise the next higher level of command immediately and take appropriate steps to obtain additional funds.

CHAPTER 13

RECEIPT AND DISTRIBUTION OF BUDGETARY RESOURCES

DEPARTMENTAL-LEVEL

1301 GENERAL

130101. Purpose. The purpose of this chapter is to prescribe the standards for recording receipt and subsequent distribution of budgetary resources transactions in the departmental-level budgetary accounts.

130102. Applicability and Scope. The departmental-level budgetary accounts apply to the Military Departments and the Washington Headquarters Services at “headquarters” level. All of the departmental-level budgetary accounts are covered in this chapter.

130103. Overview. The main purpose of the budgetary accounts prescribed for a departmental-level accounting entity is to ensure that the budget execution accounting required by the Congress, the Office of Management and Budget (OMB), Treasury Department, and OSD is accomplished. Departmental-level accounting covers appropriation by the Congress, apportionment and reappropriation by OMB, and allocation to the execution level. In addition, budgetary accounts used at the departmental-level ensure that transfers between appropriation and fund accounts, and restorations and withdrawals or write-offs of unobligated balances are properly recorded. The monitoring of lower levels and consolidating reports for higher levels are facilitated by accounting at the departmental-level.

130104. Revisions. The Department currently is revising its general ledger account structure to ensure consistency with the U.S. Government Standard General Ledger published by the Treasury Department. Although that process has commenced, it has not yet completed. Therefore, before the accounts contained in this chapter are used in an automated system, the Director of Accounting Policy, Office of the Deputy Chief Financial Officer, should be contacted for the most current revision at (703) 697-6875 or DSN 227-6875.

1302 STANDARDS

130201. Accounts. The accounts established for use by departmental-level accounting entities implement the U.S. Government Standard General Ledger. In addition to detail level accounts used for routine posting of transactions, summary accounts are provided to facilitate aggregation of data for reporting purposes. Budgetary accounts have been established for recording appropriations and other budget authority realized, apportionments, allocations, transfers, and contract authority transactions. Amounts of budgetary resources received are debited to specifically titled accounts for each of these resources and credited to accounts that recognize the availability status of the resources. The departmental-level accounting entity also issues fund allocations to subordinate commands. In addition, the special actions of restorations and withdrawals or write-offs of unobligated balances are accomplished at departmental-level.

The following subsections set forth the standards for recording transactions in the departmental-level accounts.

130202. Appropriations

A. General. Appropriations are statutory authorities to incur obligations (see subparagraph 130202.A.4, below, for exceptions) and make payments from the U. S. Treasury for specified purposes. An appropriation act is the most common means of providing budget authority to Federal agencies. Budget authority has the following characteristics:

1. Period of Availability. Budget authority may be made available for obligation for varying periods.

a. One-Year (Annual) Authority. Budget authority that is available for obligation only during a specified fiscal year and expires at the end of that period.

b. Multiple-Year Authority. Budget authority that is available for obligation for a specified period of time in excess of one fiscal year.

c. No-Year Authority. Budget authority that remains available for obligation for an indefinite period of time.

2. Determination of Amount. Budget authority may be granted for varying amounts.

a. Definite Authority. Authority that is stated as a specific sum at the time it is granted. This includes authority stated as not to exceed a specified amount. Most DoD appropriations are for definite amounts of authority.

b. Indefinite Authority. Authority for which a specific sum is not stated, but is determined by other factors such as the receipts from a certain source or obligations incurred. For a more complete discussion of indefinite authority, see subsection 130210, below.

3. Reappropriations. Reappropriations are statutory authorities that extend the obligating/paying authority for all or part of the unobligated balances of expiring and expired appropriations. (See subsection 130207, below, for the complete discussion of reappropriations.)

4. Exceptions. Exceptions to the general rule that appropriations provide budget authority to incur additional obligations are as follows:

a. Appropriations to liquidate contract authority (see paragraph 130205.B., below).

b. Appropriations to reduce outstanding debt (see figure 13-10, but generally inapplicable to the Department).

c. Appropriations for refunds of receipts (but generally inapplicable to the Department).

d. Appropriations made to an expired account (4112) to cover obligations in excess of available funds (see figure 13-11, but generally inapplicable to the Department).

5. Appropriation Warrants

a. FMS Form 6200, "Department of the Treasury Appropriation Warrant" (figure 13-1) is a convenient source document for entries into the accounts. To ensure agreement with Treasury Department accounts, warrants must be recorded exactly as received even if they are thought to be in error. Corrections shall be journalized and corrected warrants requested. However, amounts known to be enacted into law must be recorded for accounting period reports regardless of receipt of the warrant.

b. The Military Departments and Washington Headquarters Services (for the OSD/Defense Agencies) shall request FMS Forms 6200 from the Treasury Department during the period of a continuing resolution for a specified period of time less than a full fiscal year, or if the continuing resolution is for a full fiscal year with designated appropriation amounts. When there is a separate appropriation act, the Treasury Department will prepare and distribute the FMS Forms 6200 without a request from the applicable DoD Components.

B. Classification of Appropriations. Departmental-level appropriations and all other budgetary resources must be classified by appropriation account, fiscal year program, and obligation/expenditure limitation, at the level required by OSD for appropriation and fund status reporting (see Chapter 4 of Volume 6 of this Regulation). Needed classification requirements must be obtained from the legal requirements and program/budget documents such as the DD Form 1414 (Base for Reprogramming Action).

C. Recording an Appropriation. The most common departmental-level appropriation transaction is recorded as follows:

Dr 4119 Other Appropriations Realized
Cr 4450 Unapportioned Authority - Available

To record an appropriation realized - Treasury Warrant (figure 13-1).

NOTE: A separate entry is required to establish the fund balance with the Treasury.

D. However, complexities must be accommodated. The appropriation act itself may require withholding some of the appropriation; a rescission may be proposed, or the OMB may impose a deferral. Amounts not made available by apportionment must be so recorded. Credit accounts (4395, "Authority Unavailable Pursuant to Public Law," 4420, "Unapportioned Authority - Pending Rescission," and 4430, "Unapportioned Authority - OMB Deferral") are established to accommodate these complexities. Debit entries reclassifying these credit balances shall be recorded when evidence is received that the legal requirements have been met or the required administrative actions have been taken.

E. Figures 13-49 through 13-52 define the accounts discussed above and illustrate the transactions that affect them.

130203. Appropriation Transfers. Appropriation transfers are distributions of one agency's budgetary resources to another. From a consolidated reporting standpoint, it is important that the issuing and receiving agencies both record the allocation in the same accounting period. Once the transfer is accomplished, the appropriation making the transfer no longer has budgetary and proprietary control of the funds. Budgetary and proprietary responsibility now lies with the appropriation receiving the transfer. Appropriation transfers are non-expenditure transfers and, as such, must be authorized by legislation. Appropriation transfers can be anticipated and recorded as such or they can occur without being previously recorded as anticipated. An anticipated appropriation transfer does not provide any obligation authority, Obligation authority is provided only after the transfers is accomplished and the Office of Management and Budget (OMB) apportions the transferred finds. Figures 13-34 through 13-39 define the accounts used specifically for appropriation transfers and show entries for transactions that affect them, An illustration of the accounting process is:

130204. Apportionments and Reapportionments

A. An apportionment or reapportionment is a distribution made by the OMB of amounts available for obligation in an appropriation or fund account. Except in certain instances, as specified in OMB Circular No. A-34, apportionments and reapportionments by the OMB are required before funds may be obligated. The distribution of apportionments is part of an overall financial plan for the year that is based on a forecast of obligations to be incurred within an appropriation. (The OMB'S apportioned amount is in response to a departmental request made on SF 132, "Apportionment and Reapportionment Schedule") Apportionments divide amounts available for obligation by specific time periods (usually quarters), activities, projects, objects, or by combinations of these categories.

B. The completed SF 132, showing the OMB'S apportioned amounts, normally is the source document used to record apportionments and reapportionments. However, letter apportionments often are used during the period of a continuing resolution for unexpired unobligated balances brought forward, and for special circumstances such as transfers that occur near the end of a fiscal year.

C. The most common departmental-level apportionment transactions are as follows:

1. Appropriated (Direct Program) Authority

Dr 4450 Unapportioned Authority - Available
Cr 4511 Unallocated Apportionment - Direct Program - Current Period

To record the SF 132, Apportionment and Reapportionment Schedule.

2. Reimbursable Program Authority

Figure 13-1

D. However, complexities must be accommodated. Some of the amounts apportioned may be withheld subsequently by the OSD; some may be allocated for specific subsequent periods; and some may be for the reimbursable program. To accommodate these possibilities, several unallocated apportionment accounts are used. Figures 13-55 through 13-62 define the unallocated apportionment accounts and illustrate the entries for transactions affecting them.

1. The term “direct program” refers to the obligation authority specified in an appropriation act itself. The appropriation does not specify the amount of reimbursable work expected to be accomplished. Authority to accept a customer order for reimbursable work and use obligation authority provided through that acceptance must either be authorized specifically in the apportionment process or be of the type that becomes automatically apportioned and available upon acceptance of customer orders. Figure 13-41 defines the account for anticipated reimbursements and illustrates the entries for transactions affecting it. For a more complete discussion of reimbursements, see Chapter 15 of this volume.

2. The reimbursable program specifically apportioned shall be allocated subject to withholdings by the OSD. The entry to record a withholding of the reimbursable program is as follows:

Dr 4593	Specifically Apportioned Reimbursable Program
Cr 4514	Unallocated Apportionment - Reimbursable Program
	- Withheld from Allocation

E. Amounts apportioned through the current period of the fiscal year may be assumed to be allocable unless specific identification of withholding is made.

F. If SF 132s on hand are not yet processed with regard to the latest appropriations enacted, amounts necessary to cover valid commitments and obligations must be recorded at the end of the accounting period as apportioned and allocated. If an enacted supplemental appropriation is not included on the year-end SF 132, it nevertheless shall be recorded as fully apportioned.

G. In the absence of an appropriation, the Congress may pass a resolution providing authority for agencies to continue current operations. Continuing resolutions are subject to OMB apportionment in the same manner as appropriations. Within periods of continuing resolution authority, the President’s budget estimates of the unobligated balances are brought forward on October 1, and the reimbursable program for each appropriation account shall be recorded as apportioned and allocated to the extent that they remain within any amount specifically designated by the authority. If the estimates for each amount have been reduced from the President’s budget, apportionments and allocations shall be recorded at the reduced amount. Increases are to be considered available for subsequent apportionment, and shall not be allocated until an approved SF 132 containing the increase has been received.

H. In the Homeowners Assistance Fund, if amounts actually becoming available are less than anticipated for indefinite budget authority, transfers, reimbursements, or recoveries; the difference will be deducted from amounts apportioned and not from amounts deferred or otherwise unapportioned unless specific provision is made for a different treatment on the approved apportionment form or reapportionment action is taken.

I. Not all appropriations are apportioned. The accounting entry to record non-apportioned appropriations is as follows:

Dr 4119 Other Appropriations Realized
Cr 4620 Other Funds Available for Commitment/Obligation,
or
Cr 4630 Funds Not Available for Commitment/Obligation

To record an appropriation realized - Treasury Warrant (figure 13-1).

NOTE: A separate proprietary accounting entry is required to establish the fund balance with the Treasury.

130205. Indefinite Contract Authority

A. Contract authority is statutory authority to incur obligations prior to an appropriation (or the realization of revenues) for the future payment of such obligations. (See paragraph 130205.B., below.) Indefinite contract authority is that contract authority in which a specific amount of contract authority is not predetermined but, instead, is available as needed to cover the obligations incurred. Although indefinite contract authority is normally accounted for through a no-year appropriation account, contract authority must be apportioned each fiscal year. The major permanent indefinite authorities are as follows:

1. Emergency military procurement under 41 U.S.C. 11 ;
2. Inventory procurement in anticipation of succeeding fiscal year sales under 10 U.S.C. 2210(b); and,
3. Procurement for foreign military sales under 22 U.S.C. 2762.

B. Contract liquidating authority is an appropriation or reappropriation enacted to pay the obligations incurred under contract authority. However, within the Department of Defense, the realization of revenue, rather than an appropriation, normally is used to liquidate unfunded contract authority .

C. The accounting entry used to record the allocation of anticipated contract authority and the subsequent realization upon commitment or obligation action are as follows:

1. Contract Authority Allocation Entries
 - a. Dr 4032 Anticipated Contract Authority
Cr 4450 Unapportioned Authority - Available
 - b. Dr 4450 Unapportioned Authority - Available
Cr 4516 Unallocated Unfunded Contract Authority
 - c. Dr 4516 Unallocated Unfunded Contract Authority
Cr 4541 Allocations Issued - Direct Program - Current Period
Cr 4542 Allocations Issued - Direct Program - Subsequent Periods
2. Realization of Contract Authority (Upon Commitment or Obligation)
Dr 4132 Current Year Contract Authority Realized - Indefinite
Cr 4032 Anticipated Contract Authority

D. Contract authority retains its separate identity at departmental-level through the use of specifically designated accounts. Additionally, the date and number of the establishing public law must be entered into the records.

E. More specific guidance on accounting for each of the permanent indefinite contract authorities may be found as indicated below:

1. Emergency military procurement (41 U.S.C. 11 contract authority) is covered by DoD Directive 7220.8).
2. Working Capital Fund contract authority is covered in Volume 11B of this Regulation.
3. Foreign military sales contract authority is covered in Volume 15 of this Regulation.

F. Figures 13-2 and 13-3 and figures 13-19 through 13-25 define the accounts used for contract authority and illustrate the entries for transactions affecting them.

130206. Transfers of Funds. When specifically authorized by law, all or part of the budget authority in one account may be transferred to another account. These transfers shall be made on an expenditure or nonexpenditure basis, as appropriate.

A. Expenditure Transfers Between Appropriations. Expenditure transfers are made when the transfer benefits the transferring account. Since they are treated as payments and collections, expenditure transfers are not applicable to departmental-level accounting entities. These transactions include the following:

1. Withdrawals and credits between accounts not specifically defined as nonexpenditure transactions;
2. All transfers between U. S. Treasury budgetary and nonbudgetary accounts such as general fund accounts and deposit accounts; and,
3. Adjustments to correct errors in expenditure transactions. (Obligations must be transferred also, when appropriate.)

B. Appropriation Transfers

1. Appropriation transfers are distributions of one agency's budgetary resources to another. Transfers between appropriations must be authorized by law and represent a redistribution of unobligated balances of budget authority between appropriation accounts for the benefit of the gaining appropriation account. For purposes of this paragraph, they will not include transfers for establishment of transfer appropriation accounts for the benefit of the transferring account.

2. These transfers often are anticipated during apportionment development. Approved anticipated transfers are treated as authority available for apportionment, and prior year authority and current year authority are kept separate. Agreement between the transferring and receiving appropriation accounts must be maintained. Accordingly, anticipated and accomplished transfers must be recorded and reported in the transferring and receiving appropriation accounts in the same accounting period. Obligation authority is available only after the transfers is accomplished and the OMB apportions the transferred funds.

3. SF 1151, "Nonexpenditure Transfer Authorization" (figure 13-4) is used to document transfers. See I TFM 2-2035.20 for instructions relative to preparation of the SF 1151. Chapter 3 of this Volume contains additional information about appropriation transfers. An illustration of the accounting process is:

4. Figures 13-34 through 13-39 define transfer accounts and illustrate entries for transactions affecting them.

130207. Reappropriations

A. General. A reappropriation is statutory authority to restore or extend the obligational availability, whether for the same or different purpose, of all or part of the unobligated balance of budget authority that has expired or would otherwise expire in an annual or multiple-year appropriation. Reappropriation transactions require nonexpenditure transfer of the funds involved from the expired or otherwise expiring account to the designated current account. Reappropriations that provide funds to a fiscal year for which they were not previously available constitute new budget authority in the receiving account.

B. Use of the SF 1151. The SF 1151 (figure 13-4), annotated “REAPPROPRIATION” in the top right-hand corner, shall be used to accomplish the reappropriation when a current year law extends the availability of part or all of a:

1. Current year appropriation;
2. Prior year unexpired appropriation; or,
3. Prior year expired or expiring appropriation when the unobligated balance has not been withdrawn previously to the surplus fund of the Treasury. See I TFM 2-2060 for instructions relative to preparation of the SF 1151.

C. Use of FMS Form 6200. The FMS Form 6200 (figure 13-1) shall be used when a current year law extends the availability of part or all of a prior year expired appropriation when an unobligated balance is available at fiscal year-end for reappropriation in a subsequent fiscal year.

Standard Form No. 1151 7 GAO 2000 1151-104		VOUCHER NO.

Figure 13-4

D. Obtaining Appropriation Warrants. An FMS Form 6200 must be requested from the Treasury Department for reappropriations. The letter of request must state the amount to be warranted and the statutory authority for the reappropriation. The address for this request letter is:

Director, Accounting Control Division
Finance Management Branch
Funds Management Division
Financial Management Service
Department of the Treasury
3700 East-West Highway, Room 6FO6
Hyattsville, MD 20782

Telephone (202) 874-9780

E. Timing of Actions

1. Necessary steps to initiate the source documents and record the reappropriation in the gaining and losing accounts normally must be undertaken in the month following the effective date of the legislation providing for the reappropriation.

2. If the available balance in a losing appropriation is not sufficient to cover prompt transfer, the reappropriation may be delayed, effected in part or, for good cause, not made at all. Decisions to delay or not make a reappropriation transfer require written notification to the USD(C), within five working days of the determination. The notification must set forth the circumstances requiring the delay or nonperformance of the reappropriation transfer.

F. Withdrawal of Unobligated Balances. Normally, unobligated balances in the losing accounts will be withdrawn from operating activities. However, formal withdrawal is not necessary when the operating activity has both the gaining and losing accounts, and the intent of the reappropriation is to extend the availability of funds for the same purposes as the losing account. In this case, local entries may be made to ensure that transactions, records, and reports cite the gaining account rather than the losing account.

G. Recording Reappropriations. Reappropriations are recorded as other new budget authority. Figure 13-34 defines the account for other new budget authority and illustrates the entries for the implementing transactions.

130208. Allocations

A. Allocations are distributions of apportionments or funds that do not require apportionment by the departmental-level accounting entity to an operating agency or other intermediate-level accounting entity.

B. Allocations carry the same legal and other limitations as apportionments.

C. Amounts allocated must be debited to the appropriate unallocated apportionment accounts and credited to the allocations issued accounts. Figures 13-63 through 13-67 define the allocations issued accounts and illustrate the entries for the implementing transactions.

D. Since an oral allocation generally has no validity, allocations shall be in writing. The format is determined by the departmental-level accounting entity issuing the allocation. However, see appendix A, subsection A.5.d. of Volume 14 of this Regulation for use of expedited means of communication in emergencies.

130209. Restorations and Withdrawals/Writeoffs

A. Congressionally enacted appropriations for the Department usually are available for a fixed period of one or more fiscal years. Authority to incur new obligations expires at the end of the period of availability. Upon expiration, an appropriation may have up to three distinct balances in its accounts: (1) accrued expenditures - paid, (2) accrued expenditures - unpaid, plus undelivered orders (the sum of (1) and (2) is called obligations) and (3) an unobligated balance.

B. Expired balances retain their fiscal year identity for the following five (5) fiscal years. During this 5-year period, the unobligated balance of an expired fund is available only for adjustments to obligations initially incurred during the fiscal year (or years) for which the appropriation account was available. The unobligated balance of an expired fund may not be used to create new obligations. Normally, at the end of the 5-year period, any remaining unobligated balance and unliquidated obligations shall be transferred to GLA 4350, "Canceled Authority."

C. The following definitions are for the specific terms applicable to restorations and withdrawals/writeoffs.

1. Restoration. A previously withdrawn unobligated amount that is again made available for obligation and outlay.

2. Write-off. The withdrawal from availability for obligation of an unobligated balance from a no-year appropriation pursuant to 31 U.S.C. 1555.

3. Withdrawal. Unobligated amounts that are withdrawn by administrative action (rather than by law) from obligation availability. A withdrawal excludes amounts of expired accounts and amounts rescinded by the Congress.

D. Amounts withdrawn or written off are credited to account 4391, "Restorations, Writeoffs and Withdrawals," and debited to account 4511, "Unallocated Apportionment - Direct Program - Current Period." Restorations are accounted for by contra entries to the write-off or withdrawal (i.e., debit account 4391, "Restorations, Writeoffs and Withdrawals," and credit account 4511, "Unallocated Apportionment - Direct Program - Current

Period.”). Figure 13-27 defines account 4391 and illustrates the entries for the implementing transactions.

E. The balance in GLA 4650, “Expired Authority,” is not a fund balance (i.e., cash) account available in the Treasury. Transfers into the account (withdrawals) and transfers out (restorations) do not, in and of themselves, affect the cash position of the U.S. Treasury. Expired authority is an available budgetary resource for the specific purpose of ensuring that valid obligations of expired and lapsed appropriation accounts can be met without recourse to individual appropriation action by the Congress.

130210. Indefinite Appropriations

A. Indefinite appropriations are appropriations of a current or permanent nature in which a definite amount is not stated, but is to be determined otherwise on the basis of stipulated subsequent events. One type of indefinite appropriation for which the Department currently is concerned derives from “available” receipts. For example, the receipts under the Federal Account Symbol and Title 215095, “Sale of Hunting and Fishing Permits, Military Reservations,” are, by permanent appropriation, available for expenditure under appropriation account 21X5095, “Wildlife Conservation, etc., Military Reservations, Army.” In other cases, the amount authorized may be all or a portion of the receipts under a receipt account, but they may not be available until they have been “warranted” by the Treasury Department: or, the amount authorized may be specified as the amount actually obligated for a specified purpose.

B. Amounts of indefinite appropriations derived from “available” receipts anticipated for the fiscal year ordinarily shall be recorded from administratively prepared journal vouchers based upon the best current estimates of receipts for the fiscal year by responsible officials. Amounts of those indefinite appropriations realized must be recorded monthly on the basis of amounts of receipts reported in Statements of Transactions, DD Form 1329 (see Volume 6, Chapter 3, of this Regulation), or equivalent instruments. These amounts are warranted by the Treasury Department on FMS Form 6200 (figure 13-1) at the end of the fiscal year. However, since they will have been recorded on the basis of statements of transactions, the warrants will be used merely to confirm the amounts recorded.

C. Anticipated amounts of indefinite appropriations derived from “available” receipts shall be reported as “anticipated” budgetary resources until the amounts are realized. The budget authority so generated will serve to increase the uncommitted/unobligated balance as reported on the Acct Rpt(M)133, “Report on Budget Execution;” however, such balances should not be recorded in the accounts as currently available for obligation until realization of the receipts. Figure 13-17 defines the account for recording anticipated indefinite appropriations and illustrates the entries for the implementing transactions.

130211. Reprogramming. The practice of reprogramming departmental funds covered in appropriation acts is a necessary, desirable and timely device for achieving flexibility in the execution of Defense programs. Specific guidance on the procedures for reprogramming of DoD appropriated funds is contained in chapters 6 and 7 of this Volume.

1303 ACCOUNT ADJUSTMENTS AND ACCOUNT CLOSING PROCEDURES130301. Adjustments to Expiring and Nonexpiring Accounts

A. Cancel appropriation transfers anticipated to be made to or from other accounts. Anticipated appropriation transfers shall be canceled as of the end of the fiscal year in which anticipated.

1. The entry to cancel unrealized anticipated appropriation transfers from other appropriations or funds is as follows:

Dr 4450 Unapportioned Authority - Available
Cr 4160 Anticipated Transfers of Current Fiscal Year Authority
Cr 4180 Anticipated Transfers of Prior Fiscal Year Authority

2. The entry to cancel unaccomplished anticipated appropriation transfers to other appropriations or funds is as follows:

Dr 4160 Anticipated Transfers of Current Fiscal Year Authority
Dr 4180 Anticipated Transfers of Prior Fiscal Year Authority
Cr 4450 Unapportioned Authority - Available

B. Eliminate unrealized anticipated indefinite appropriations. The entry to eliminate the amount of anticipated indefinite appropriations that were not realized is as follows:

Dr 4450 Unapportioned Authority - Available
Cr 4120 Appropriations Anticipated (Indefinite)

C. Cancel anticipated reimbursements in no-year, expiring annual, and multiple-year accounts as of the end of the fiscal year. The entry to eliminate the balance of automatically and specifically apportioned reimbursable program authority not allocated to lower levels is as follows:

Dr 4514 Unallocated Apportionment - Reimbursable Program
- Withheld from Allocation
Cr 4210 Anticipated Reimbursements

130302. Budget Execution Report Preparation. After completion of the adjustments identified above, budget execution reports shall be prepared as specified in Volume 6, Chapter 4, of this Regulation.

130303. Notification From Lower Levels. The departmental-level accounting entity shall be informed by the intermediate and installation levels of the following adjustments and account balances.

A. Installation-Level Notification To Be Provided Uncommitted and unobligated balances remaining in expiring accounts for direct authority (GLA 4611, “Uncommitted/Unobligated Allotments - Direct Program - Current Period,” GLA 4612, “Uncommitted/Unobligated Allotments - Direct Program - Subsequent Periods,” and GLA 4613, “Uncommitted/Unobligated Allotments - Withheld Programs.”) (See subparagraph 130304.A., below.)

B. Intermediate-Level Notification To Be Provided. Unallotted allocations of direct program authority to the installation level. (See subparagraphs 130304.A.(1) and (3), below, GLA 4561, “Unallotted Allocations - Direct Program - Current Period,” and GLA 4562, “Unallotted Allocations - Direct Program - Subsequent Periods”.)

130304. Closing Procedures. After preparation of the prescribed budget execution reports, the following entries shall be made, at the expiration of the period of availability for obligation, to close expended amounts to the authorizing account for the expenditures and to withdraw any remaining program authority.

A. Direct Program Closing Entries

1. Appropriated Authority

(a) The entry to recognize unallotted allocations held at the intermediate level, unobligated allotments held at the installation level, and unobligated allocations to other agencies is as follows:

Dr 4119 Other Appropriations Realized	<u>1/</u>
Dr 4150 Other New Budget Authority	<u>2/</u>
Dr 4530 Allocations From Others	<u>3/</u>
Cr 4511 Unallocated Apportionment - Direct Program - Current Period	
Cr 4520 Allocations To Others	

NOTES:

1/ The intermediate levels and the installation levels shall inform the departmental-level accounting entity of the unallotted allocations and unobligated allotments as described in subparagraph 130303.A. and paragraph 130303.B., above.

2/ This debit balance is eliminated through entries (b) and (c) below.

3/ This debit balance is eliminated through entries (b) and (d) below.

(b) The entry to close amounts allocated to lower levels and other agencies is as follows:

Dr 4520 Allocations To Others
Dr 4541 Allocations Issued - Direct Program - Current Period
Dr 4542 Allocations Issued - Direct Program -Subsequent Periods
Dr 4545 Allocations Issued - Withheld Programs
Cr 4119 Other Appropriations Realized
Cr 4150 Other New Budget Authority
Cr 4530 Allocations From Others

(c) The entry to close unapportioned budget authority realized through reappropriations is as follows:

Dr 4450 Authority Available for Apportionment
Cr 4150 Other New Budget Authority

(d) The entry to record return of unobligated interagency allocations to the agency from which received is as follows:

Dr 4511 Unallocated Apportionment - Direct Program - Current Period
Cr 4530 Allocations From Others

(e) The entry to record return of unobligated interagency allocations from the agency to which allocated is as follows:

Dr 4520 Allocations to Others
Cr 4450 Authority Available for Apportionment

(f) The entry to reduce appropriations realized by the amount of rescinded appropriations is as follows:

Dr 4113 Appropriations Rescinded
Cr 4119 Other Appropriations Realized

(g) The entry to reduce appropriations realized by the amount of budgetary resources withheld pursuant to public law is as follows:

Dr 4410 Budgetary Resources - Not Available Pursuant To Public Law
Cr 4119 Other Appropriations Realized

(h) The entry to record unobligated budget authority available of expired annual or multiple-year appropriations is as follows:

Dr 4430 Appropriations Available for Apportionment
- OMB Deferred Programs
Dr 4450 Authority Available for Apportionment

Dr 4511 Unallocated Apportionment - Direct Program - Current Period
Dr 4512 Unallocated Apportionment - Direct Program - Subsequent
Periods
Dr 4513 Unallocated Apportionment - OSD Withheld programs
Dr 4620 Other Funds Available for Commitment/Obligation
Dr 4630 Other Funds Unavailable for Commitment/Obligation
Cr 4650 Expired Authority

NOTE: The credit entry to GLA 4650, "Expired Authority," should be equal to the debit balance remaining in GLA 4119, "Other Appropriations Realized," upon completion of the closing entries specified above.

2. Transfer Authority

(a) The entry to close transfers accomplished to other appropriations or funds is as follows:

Dr 4170 Appropriation Transfers
Dr 4190 Transfers - Prior Year Budgetary Resources
Cr 4119 Other Appropriations Realized

(b) The entry to close appropriation transfers realized from other appropriations or funds is as follows:

Dr 4119 Other Appropriations Realized
Cr 4170 Appropriation Transfers
Cr 4190 Transfers - Prior Year Budgetary Resources

(c) The entry to recognize unallotted allocations of realized transfers held at the intermediate level and unobligated allotments of realized transfers held at the installation level is as follows:

Dr 4119 Other Appropriations Realized
Cr 4511 Unallocated Apportionment - Direct Program - Current
Period

NOTE: The intermediate levels and the installation levels shall inform the departmental-level accounting entity of the unallotted allocations and unobligated allotments as described in paragraph 130303. B., above.

B. Reimbursable Program Closing Entries. No closing entries shall be made for the reimbursable program at the departmental level. An adjusting entry, specified in paragraph 130301 .C., above, eliminates any departmental-level reimbursable program account balance.

130305. Adjustments to Expired Authority. GLA 4650, "Expired Authority," represents the unobligated balance in an appropriation at the time of its expiration. Expired

authority, prior to cancellation of an appropriation, authorizes a DoD Component to adjust upward previously under recorded obligations or to record obligations initially that should have been recorded (but were not) against an expired appropriation before its expiration. Authority to adjust obligations upward through use of expired budget authority is recorded in accounts as follows:

Dr 4650 Expired Authority
Cr 4114 Appropriations Realized But Withdrawn

Obligation, expenditure, and closing of expired authority is recorded in the same manner as prescribed for current year direct program appropriation accounts.

130306. Canceled Authority. The National Defense Authorization Act (P.L. 101-510) requires any balance remaining in an account in excess of 5 years to be canceled. GLA 4350, "Canceled Authority," represents the amount of canceled authority (includes both [1] unobligated and [2] obligated but unpaid). Payment of obligations incurred in a canceled appropriation shall be made from a current appropriation available for the same general purpose as the one from which the payables were canceled. The total of payments from a current appropriation for obligations and payables of a canceled appropriation should not exceed 1 percent of the new appropriation. If such payments to be made exceed the 1 percent limitation, additional authority must be sought from the Congress. An illustration of the entries are:

a. The entry to transfer expired authority at the time of cancellation of an appropriation is as follows:

Dr 4650 Expired Authority
Cr 4350 Canceled Authority

b. The entry to allocate budget authority at the departmental level from a current appropriation to pay obligations applicable to a canceled appropriation is as follows:

(1) Entry if the current account has been allocated in its entirety (reprogramming and withdrawal of funds is necessary to make funds available for payment of obligations applicable to canceled accounts):

Dr 4541 Allocations Issued - Direct Program - Current Period
Cr 4511 Unallocated Apportionment - Direct program - Current Period

(2) Entry if a portion [not to exceed 1 percent] of the current account has been previously withheld for the payment of obligations of canceled appropriations:

Dr 4395 Authority Unavailable Pursuant to Public Law (1 %)
Cr 4450 Authority Available for Apportionment

(3) In either case, the reduction of authority that was provided by the canceled appropriation must also be recorded through the following entry:

Dr 4350 Canceled Authority	
Cr 4119 Other Appropriations Realized (for canceled appropriation)	

NOTE: GLA 4119, "Other Appropriations Realized," should be maintained by both appropriation and by fiscal year.

ACCOUNT 4001 ANTICIPATED TOTAL RESOURCES

Figure 13-45

ACCOUNT 4391 RESTORATIONS, WRITEOFFS AND WITHDRAWALS

Debit or Credit Balance. Represents the amount available for obligation during the year that ceased to be available during or at the end of the fiscal year, other than amounts rescinded by law. Includes unobligated balances expiring for obligation, amounts written off or withdrawn by administrative action, unobligated balances returned to unappropriated receipts, amounts withdrawn/lapsed from liquidating appropriations.

<u>Debit</u>	<u>Credit</u>
Amounts restored for net upward obligation adjustments.	Amounts written off pursuant to 31 U.S.C. 1555.
Contra: 4511 Unallocated Apportionment - Direct Program - Current Period	Contra: 4511 Unallocated Apportionment - Direct Program - Current Period

Figure 13-46

ACCOUNT 4392 RESCISSIONS - CURRENT YEAR

Credit Balance. Represents the amount of congressional rescissions of unobligated balances of current year budgetary resources. Statutory citation is to the rescission act.

DebitCredit

Amount of withdrawal of unobligated balances due to rescission.

Contra: 4420 Unapportioned Authority -
Pending Rescission

Figure 13-47

ACCOUNT 4393 WITHDRAWALS DUE TO RESCISSIONS - PRIOR YEAR OF
UNOBLIGATED BALANCES

Credit Balance. Represents the amount of congressional rescissions of unobligated balances of prior year budgetary resources. Statutory citation is to the rescission act.

Debit

Credit

Amount of withdrawal of unobligated
balances due to rescission.

Contra: 4420 Unapportioned Authority -
Pending Rescission

Figure 13-48

ACCOUNT 4395 AUTHORITY UNAVAILABLE PURSUANT TO PUBLIC LAW

Credit Balance. Represents the amount of appropriations/reappropriations withheld by a specific provision in law. Includes those appropriations for which availability is contingent by law upon the occurrence of a specified event such as: enactment of authorizing legislation, emergencies arising from national disasters, unanticipated increases in costs, or other events specified by law.

<u>Debit</u>	<u>Credit</u>
Amount released when legal requirements are met.	Amount withheld pursuant to public law.
Contra: 4450 Unapportioned Authority Available	Contra: 4450 Unapportioned Authority Available

Figure 13-49

ACCOUNT 4396 AUTHORITY PERMANENTLY UNAVAILABLE
PURSUANT TO PUBLIC LAW

Credit Balance. General permanent statutory reductions to budget authority other than rescissions that rescind the authority of more than one account; e.g., Gramm-Rudman-Hollings Act, and cancellation due to reappropriation.

<u>Debit</u>	<u>Credit</u>
Amount released when legal requirements are met.	Amount withheld pursuant to public law.
Contra: 4450 Unapportioned Authority Available	Contra: 4450 Unapportioned Authority Available

Figure 13-50

ACCOUNT 4420 UNAPPORTIONED AUTHORITY -
PENDING RESCISSION

Credit Balance. Represents the amount of budget authority withheld pending the enactment of legislation canceling the authority to obligate such funds.

<u>Debit</u>	<u>Credit</u>
1. Amount of budget authority rescinded by legislative action.	Amount of budget authority withheld pending rescission.
Contra: 4113 Appropriations Rescinded	Contra: 4440 Revolving Funds Available for Apportionment
2. Amount of withdrawals of unobligated balances of prior year budgetary resources due to rescission.	4450 Unapportioned Authority Available
Contra: 4392 Withdrawals Due to Rescission of Unobligated Balances	
3. Amount of budget authority made available for obligation through cancellation of rescission proposal or congressional direction.

CHAPTER 14

RECEIPT AND DISTRIBUTION OF BUDGETARY RESOURCES

INTERMEDIATE-LEVEL

1401 GENERAL

140101. Purpose. The purpose of this chapter is to prescribe the standards for recording receipt and subsequent distribution of budgetary resources in the intermediate-level budgetary accounts, which are applicable to operating agencies or other intermediate-level accounting entities.

140102. Applicability and Scope. Only those DoD Components that are structured organizationally into three (or more) levels are required to use the intermediate-level accounts covered by this chapter.

140103. Overview. The intermediate-level budgetary accounts are used to record the receipt of allocations or suballocations from higher authority, and the subsequent issuance of allotments to installation-level activities.

140104. Revisions. The Department is currently revising its general ledger account structure to ensure consistency with that contained in the U.S. Government Standard General Ledger published by the Treasury Department. Although that process has commenced, it has not yet completed. Therefore, before the accounts contained in this chapter are used in an automated system, the Director of Accounting Policy, Office of the Deputy Chief Financial Officer, should be contacted for the most current revision at (703) 697-6875 or DSN 227-6875.

1402 STANDARDS140201. Allocations

A. As stated in Chapter 3 of this volume, an allocation or suballocation must be made in writing and contain an original grantor signature or the electronic equivalent. However, Volume 14, Appendix A, of this Regulation permits the use of an automated system to communicate and record such fund subdivisions as long as a confirmation copy is provided to the recipient within a reasonable time, usually one month.

B. Allocations, suballocations, or their parts, that are not required to be further subdivided may be treated and recorded as allotments.

C. Allocations received are debited to accounts in the 4550, "Internal Fund Distributions Received" series, and credited to the appropriate unallotted allocations accounts in the 4560, "Funds Available for Allotment" series. Entries to these accounts are supported by applicable DoD Component allocation and suballocation documents.

140202. Allotments

A. An allotment is a formal distribution of an allocation or suballocation and must contain at least the same legal and other limitations applicable to the allocation or suballocation.

B. Since, generally, an oral allotment has no validity, allotments must be in writing. However, see enclosure 5, subsection I.4. of DoD Directive 7200.1, for use of expedited means of communication in emergencies. No form is prescribed; it may be designed to meet the needs of the allotter.

C. Allotments issued are credited to applicable accounts in the 4570, "Allotments Issued" series, and debited to the appropriate unallotted allocation account. Entries to these accounts are supported by applicable DoD Component allotment documents.

140203. Accounts. Figures 14-1 through 14-13 define the accounts used by intermediate-level accounting entities, and illustrate the entries for the transactions affecting them.

1403 ACCOUNT CLOSING PROCEDURES

140301. Notification to Departmental Level. The departmental-level accounting entity shall be informed of unallotted allocations of direct program authority to the installation level. (See paragraph 140302.A., below, 4561, "Unallotted Allocations - Direct Program - Current Period," and 4562, "Unallotted Allocations - Direct Program - Subsequent Periods.")

140302. Closing Procedures. After preparation of the prescribed budget execution reports, the following entries shall be made, at the expiration of the period of availability for obligation, to close expended amounts to the authorizing account for the expenditures and to withdraw any remaining program authority.

A. Direct Program Closing Entries

1. The entry to close unissued allocations (unallotted and withheld) remaining at the intermediate level is as follows:

Dr 4561	Unallotted Allocations - Direct Program - Current Period
Dr 4562	Unallotted Allocations - Direct Program - Subsequent Periods
Dr 4565	Unallotted Allocations - Withheld Programs
Cr 4550	Internal Fund Distributions Received

NOTE: The departmental-level accounting entity shall be informed of the amount of appropriated authority remaining unissued at fiscal year end in GLA 4561, "Unallotted Allocations - Direct Program - Current Period," and GLA 4562, "Unallotted Allocations - Direct Program - Subsequent Periods."

2. The entry to close allotments made to the installation level is as follows:

Dr 4571 Allotments Issued - Direct Program -
Current Period
Dr 4572 Allotments Issued - Direct Program -
Subsequent Periods
Dr 4575 Allotments Issued - Withheld Programs
Cr 4550 Internal Fund Distributions Received

B. Reimbursable Program Closing Entries

1. The entry to close allocations remaining unallotted to the installation level is as follows:

Dr 4563 Unallotted Allocations - Reimbursable
Program - Current Period
Dr 4564 Unallotted Allocations - Reimbursable
Program - Subsequent Periods
Cr 4550 Internal Fund Distributions Received

2. The entry to close allotments made to the installation level is as follows:

Dr 4573 Allotments Issued - Reimbursable Program -
Current Period
Dr 4574 Allotments Issued - Reimbursable Program -
Subsequent Periods
Cr 4550 Internal Fund Distributions Received

ACCOUNT 4550 INTERNAL FUND DISTRIBUTIONS RECEIVED

Debit Balance. Represents the amount of direct and reimbursable program authority received from departmental level by an intermediate-level activity. It also can represent the amount of suballocations received from another intermediate-level activity.

CHAPTER 15

RECEIPT AND USE OF BUDGETARY RESOURCES

EXECUTION LEVEL1501 GENERAL

150101. Purpose. The purpose of this chapter is to prescribe departmental standards for recording transactions in the execution-level budgetary accounts.

150102. Applicability and Scope. All DoD accounting entities that are involved with budget execution transactions; that is, those transactions outlined in paragraph 150103.A., below, shall use the execution-level budgetary accounts prescribed in this chapter. However, not all of the accounts will apply to all accounting entities, and subsidiary accounts may be established, as needed, by an accounting entity.

150103. Overview

A. The execution-level budgetary accounts are used to record the majority of day-to-day budget execution transactions. This chapter discusses the accounting standards in the following order:

1. Receipt of allotments;
2. Commitments;
3. Obligations;
4. Reimbursements; and
5. Use of contract authority.

B. The transactions discussed frequently will require a compound entry; that is, entries must be made in both the budgetary accounts and in the asset, liability, and equity accounts. The entries in the asset, liability, and equity accounts will not be covered in this chapter.

C. Revisions. The Department currently is revising its general ledger account structure to ensure consistency with the U.S. Government Standard General Ledger published by the Treasury Department. Although that process has commenced, it has not yet completed. Therefore, before the accounts contained in this chapter are used in an automated system, the Director of Accounting Policy, Office of the Deputy Chief Financial Officer, should be contacted for the most current revision at (703) 697-6875 or DSN 227-6875.

1502 STANDARDS150201. Allotments ReceivedA. Requirements

1. An allotment is a distribution of budget authority to an execution-level accounting entity. It authorizes the incurrence of obligations within a specified amount. Suballotments may be used to further subdivide the budget authority. As accounting for a suballotment is the same as accounting for an allotment, only the term allotment will be used in this chapter.

2. Although an allotment document format is not prescribed, it must disclose specific classifications and limitations that must be tracked in the accounting records. For instance, an appropriation committee may state that a specific amount has been added to an appropriation for a certain purpose. To ensure that the congressional intent is accomplished, the accounting entity receiving an allotted share of such budget authority shall account for it, and for the undelivered orders and accrued expenditures incurred against that share.

B. Accounting Entries

1. GLA 4580, "Allotments Received," (figure 15-41) is used to record allotments of direct program authority received by an execution-level accounting entity.

2. Allotments of Appropriated Authority. If an allotment document provides the basis, the credits shall be segregated among the accounts established for the current period, subsequent periods, and withheld amounts (pending completion of action necessary for release). Figures 15-41 through 15-47 define the accounts used to classify uncommitted/unobligated allotments, and illustrate the entries for transactions affecting them. The general ledger accounting entry for recording receipt of an allotment of appropriated (direct program) authority follows:

a. Allotment Immediately Available for Obligation

Dr 4580 Allotments Received
Cr 4611 Uncommitted/Unobligated Obligation
Authority - Direct Program-Available

b. Allotment Not Immediately Available for Obligation

Dr 4580 Allotments Received
Cr 4591 Uncommitted/Unobligated Obligation Authority-
Available in Subsequent Periods
4592 Uncommitted/Unobligated Obligation Authority-
Availability Withheld

150202. CommitmentsA. Requirements

1. A commitment is an administrative reservation of funds based upon firm procurement requests, orders, directives, and equivalent instruments. Since an obligation equal to or less than the commitment may be incurred without further recourse to an authorizing official, commitments are required for some appropriations (see subparagraph 150202.A.5) and are permissible for others. Commitments, when recorded in the accounting records, reduce the uncommitted/unobligated balance. A commitment document shall be signed by a person authorized to reserve funds; that is, the official responsible for administrative control of funds for the affected subdivision of the appropriation. This helps ensure that the subsequent entry of an undelivered order or accrued expenditure will not exceed available funds.

2. Chapter 8 of this volume contains the detailed requirements for estimating and recording the amounts of commitments.

3. A commitment generally is not recordable from an action document approving a procurement program because execution of the program requires specific actions to reserve all or part of the subdivision of funds made available to the program. The program approval may be recorded as an initiation. (See subparagraph 150202.A.4., below.) Also, a commitment usually is not recordable from an order to commence procurement since such orders generally are not firm reservations permitting the recording of an obligation without recourse to the person authorized to reserve funds. Such orders also may be recorded as initiations.

4. Initiations are entered into memorandum accounts to ensure that precommitment actions, such as approved procurement programs and procurement orders, are maintained within the available subdivision of funds. An initiation results in an administrative reservation of funds based upon procurement orders, requests, or equivalent instruments. It authorizes preliminary negotiation of procurement actions, but requires that the action must be referred to the official responsible for administrative control of funds prior to incurrence of the obligation. Since initiations are not part of the official accounting requirements, allotment issuers or receivers who require initiation accounting shall ensure that the procedures and practices are cost effective. Synonyms for the term “initiation” may be used.

5. Commitment accounting is required by agreement with the OMB for the procurement appropriation accounts; military construction appropriation accounts; and the research, development, test and evaluation appropriation accounts. However, commitments need not be recorded for small purchases if, in the aggregate, they are not significant in the management of funds. Commitment accounting is not required for the operation and maintenance appropriation accounts, revolving fund accounts, or the military personnel appropriation accounts, but may be used if cost effective.

6. Outstanding commitments shall be canceled as of the end of the period that the appropriation is available for obligation. There can be no commitments in expired appropriation accounts.

B. Accounting Entries

1. Commitments are recorded as follows:

Dr 4611 Uncommitted/Unobligated Allotments -
 Direct Program - Current Period
 Dr 4614 Uncommitted/Unobligated Allotments -
 Reimbursable Program - Current Period
 Cr 4710 Outstanding Commitments - Direct Program
 Cr 4720 Outstanding Commitments - Reimbursable Program

2. Outstanding commitments are reduced when an undelivered order or Expended Authority entry is made. The entry is as follows:

Dr 4710 Outstanding Commitments - Direct Program
 Dr 4720 Outstanding Commitments - Reimbursable Program
 Cr 4811 Undelivered Orders - Unpaid - Direct Program
 Cr 4812 Undelivered Orders - Paid - Direct Program
 Cr 4821 Undelivered Orders - Unpaid - Reimbursable Program
 Cr 4822 Undelivered Orders - Paid - Reimbursable Program
 Cr 4910 Expended Authority-Unpaid - Direct Program
 Cr 4920 Expended Authority-Unpaid - Reimbursable Program
 Cr 4931 Expended Authority-Paid - Direct Program
 Cr 4941 Expended Authority-Paid - Reimbursable Program
 Dr/Cr 4611 Uncommitted/Unobligated Allotments -
 Direct Program - Current Period
 4614 Uncommitted/Unobligated Allotments -
 Reimbursable Program - Current Period
 (GLAs 4611/4614 are increased [credited] or decreased [debited] if the undelivered order or accrued expenditure differs from the outstanding commitment)

3. Figures 15-51 through 15-53 define the outstanding commitment accounts and illustrate the effect of entries 1 and 2.

150203. Obligations

A. Requirements

1. Obligations incurred are the amounts of orders placed, contracts awarded, services received, and similar transactions during an accounting period that will require

payment during the same or a future period. Such amounts include payments for which obligations have not previously been recorded, and adjustments for differences between obligations previously recorded and actual payments to liquidate those obligations.

2. The execution-level budgetary account structure requires that the amount of obligations incurred be segregated into undelivered orders and Expended Authority - Paid or Expended Authority - Unpaid. The Expended Authority - Paid is the definitive final obligation incurred. It shall be recorded regardless of whether the preceding steps of ordering (undelivered order) and delivery (Expended Authority - Unpaid) were recorded. It is not necessary for the order and delivery transaction to be recorded in the budgetary accounts after the fact.

3. “Expended Authority” is the term used for the credits entered into the budgetary accounts to recognize liabilities incurred and payments made for (a) services performed by employees, contractors, other government accounting entities, vendors, carriers, grantees, lessors, etc.; (b) goods and other tangible property received; and (c) items such as annuities or insurance claims for which no current service is required. In the DoD execution-level budgetary accounts, Expended Authority is categorized either as paid or unpaid. Entries to the Expended Authority accounts require a compound entry to affect the asset, liability, and equity accounts. The asset, liability, and equity account entries are discussed in other parts of this Regulation.

4. Undelivered orders are contracts or orders issued for goods and services for which the liability has not yet accrued. The orders may be for any goods or services that are required to meet a bona fide need of the issuing entity.

5. Reductions or cancellations of prior year obligations in no-year and unexpired multiple-year accounts shall be reported specifically in budget execution reports. (See Volume 6, Chapter 4 of this Regulation.) GLA 4310, “Anticipated Recoveries of Prior Year Obligations,” shall not be used without prior approval of the Directorate for Accounting Policy, OUSD(C).

6. Chapter 8 of this volume contains the detailed requirements for determining and recording the amounts of obligations.

B. Accounting Entries. Obligations are recorded as follows:

1. The entry to record an undelivered order (without an advance payment) preceded by a commitment:

Dr 4710 Outstanding Commitments - Direct Program
Cr 4811 Undelivered Orders - Unpaid - Direct Program
Dr/Cr 4611 Uncommitted/Unobligated Allotments - Direct
Program - Current Period

Dr 4720 Outstanding Commitments - Reimbursable Program
Cr 4821 Undelivered Orders - Unpaid - Reimbursable Program
Dr/Cr 4614 Uncommitted/Unobligated Allotments - Reimbursable Program - Current Period
(GLAs 4611/4614 are increased [credited] or decreased [debited] if the undelivered order differs from the outstanding commitment)

2. The entry to record an undelivered order (without an advance payment) not preceded by a commitment:

Dr 4611 Uncommitted/Unobligated Allotments - Direct Program - Current Period
Cr 4811 Undelivered Orders - Unpaid - Direct Program

Dr 4614 Uncommitted/Unobligated Allotments - Reimbursable Program - Current Period
Cr 4821 Undelivered Orders - Unpaid - Reimbursable Program

3. The entry to record an undelivered order (with an advance payment, such as a travel advance) not preceded by a commitment:

Dr 4611 Uncommitted/Unobligated Allotments - Direct Program - Current Period
Cr 4812 Undelivered Orders - Paid - Direct Program (amount of advance)
Cr 4811 Undelivered Orders - Unpaid - Direct Program (net obligation)

Dr 4614 Uncommitted/Unobligated Allotments - Reimbursable Program - Current Period
Cr 4822 Undelivered Orders - Paid - Reimbursable Program (amount of advance)
Cr 4821 Undelivered Orders - Unpaid - Reimbursable Program (net obligation)

NOTE: Entries to GLAs 4812 and 4822 require a compound entry to debit the GLA series 1400, "Advances and Prepayments," and credit GLA 1012, "Funds Disbursed."

4. The entry to recognize an Expended Authority-Unpaid for delivery of goods or performance of services when an undelivered order-without advance has been recorded:

Dr 4811 Undelivered Orders - Unpaid - Direct Program
Cr 4910 Expended Authority-Unpaid - Direct Program
Dr/Cr 4611 Uncommitted/Unobligated Allotments -
Direct Program - Current Period

Dr 4821 Undelivered Orders - Unpaid - Reimbursable Program
Cr 4920 Expended Authority-Unpaid - Reimbursable
Program
Dr/Cr 4614 Uncommitted/Unobligated Allotments -
Reimbursable Program - Current Period
(GLAs 4611/4614 are increased [credited] or decreased [debited] if the
Expended Authority-Unpaid differs from the undelivered order)

NOTE: Entries to GLAs 4910 and 4920 require a compound entry to credit the GLA series 2000, "Liabilities," and debit the GLA series 1000, "Assets," or GLA series 6000, "Expense," as appropriate.

5. The entry to recognize Expended Authority-Unpaid when an undelivered order or commitment has not been recorded:

Dr 4611 Uncommitted/Unobligated Allotments-Direct Program-
Current Period
Cr 4910 Expended Authority Unpaid - Direct Program

Dr 4614 Uncommitted/Unobligated Allotments - Reimbursable
Program - Current Period
Cr 4920 Expended Authority-Unpaid - Reimbursable
Program

NOTE: Entries to GLAs 4910 and 4920 require a compound entry to credit the GLA series 2000, "Liabilities," and debit the GLA series 1000, "Assets," or GLA series 6000, "Expense," as appropriate.

6. The entry to recognize Expended Authority-Paid when Expended Authority-Unpaid has been recorded:

Dr 4910 Expended Authority-Unpaid - Direct Program
Cr 4931 Expended Authority-Paid - Direct Program
Dr/Cr 4611 Uncommitted/Unobligated Allotments -
Direct Program Available

Dr 4920 Expended Authority-Unpaid - Reimbursable Program
Cr 4941 Expended Authority-Paid - Reimbursable Program
Dr/Cr 4614 Uncommitted/Unobligated Allotments -
Reimbursable Program

(GLAs 4611/4614 are increased [credited] or decreased [debited] if the Expended Authority-Paid differs from the Expended Authority-Unpaid)

7. The entry to recognize Expended Authority-Paid when an Undelivered Order-Paid has been recorded:

Dr 4812 Undelivered Orders - Paid - Direct Program
Cr 4931 Expended Authority-Paid - Direct Program

Dr 4822 Undelivered Orders - Paid - Reimbursable Program
Cr 4941 Expended Authority-Paid - Reimbursable Program

NOTE: Entries to GLAs 4931 and 4941 require a compound entry to debit GLA series 1400, "Advances and Prepayments," and to credit GLA 1012, "Funds Disbursed."

8. The entry to recognize Expended Authority-Paid when Expended Authority-Unpaid, an undelivered order, or commitment has not been recorded:

Dr 4611 Uncommitted/Unobligated Allotments - Direct Program - Available
Cr 4931 Expended Authority-Paid - Direct Program

Dr 4614 Uncommitted/Unobligated Allotments - Reimbursable Program
Cr 4941 Expended Authority-Paid - Reimbursable Program

NOTE: Entries to GLAs 4931 and 4941 require a compound entry to debit GLA series 1000, "Assets," or GLA series 6000, "Expense," and to credit GLA 1012, "Funds Disbursed."

9. The entry to recognize a refund due of a previously made payment:

Dr 4931 Expended Authority-Paid - Direct Program
Cr 4932 Expended Authority - Refunds Due - Direct Program

Dr 4941 Expended Authority-Paid - Reimbursable Program
Cr 4942 Expended Authority - Refunds Due - Reimbursable Program

NOTE: Entries to GLAs 4932 and 4942 require a compound entry to debit GLA, 1315, "Refunds Receivable - Government" or GLA 1316, "Refunds Receivable - Public" and to credit the GLA series 1000, "Assets" or GLA series 6000, "Expense," as appropriate.

10. The entry to recognize the collection of a refund due of a previously made payment:

Dr 4932 Expended Authority - Refunds Due - Direct Program
Cr 4611 Uncommitted/Unobligated Allotments - Direct
Program - Current Period

Dr 4942 Expended Authority - Refunds Due - Reimbursable
Program
Cr 4614 Uncommitted/Unobligated Allotments -
Reimbursable Program - Current Period

NOTE: Entries to GLAs 4932 and 4942 require a compound entry to debit GLA, 1011, "Funds Collected" and to credit the GLA 1315, "Refunds Receivable - Government" or GLA 1316, "Refunds Receivable - Public."

11. The entry to recognize disbursements reported by the Treasury Department and departmental (or other) finance network that are not immediately distributable at the execution level (such as, disbursements that fail local edit routines) is as follows:

Dr 4910 Expended Authority-Unpaid - Direct Program
Dr 4920 Expended Authority-Unpaid - Reimbursable Program
Cr 4950 Expended Authority-Paid - Undistributed

NOTE: Entries to GLA 4950 require a compound entry to debit GLA 1015, "Undistributed Disbursements," and credit GLA 1012, "Funds Disbursed."

12. Undistributed disbursements shall be researched to identify the proper fund to which they apply. Erroneously reported disbursements shall be reversed. The accounting entry to record disbursements after their proper identification is known is as follows:

Dr 4950 Expended Authority-Paid - Undistributed
Cr 4931 Expended Authority-Paid - Direct Program
Cr 4941 Expended Authority-Paid - Reimbursable Program

13. The entry to record recovery of a prior year direct program obligation in a no-year or unexpired multiple-year account is as follows:

Dr 4811 Undelivered Orders - Unpaid - Direct Program
Dr 4910 Expended Authority-Unpaid - Direct Program
Cr 4971 Downward Adjustments of Prior Year Expended
Authority - Unpaid

Dr 4931 Expended Authority-Paid - Direct Program
Dr 4812 Undelivered Orders - Paid -Direct Program
Cr 4972 Downward Adjustments of Prior Year Expended
Authority - Paid

14. The entry to record recovery of a prior year reimbursable program obligation in a no-year or unexpired multiple-year account is as follows:

Dr 4821 Undelivered Orders - Unpaid - Reimbursable Program
Cr 4871 Downward Adjustments of Prior Year
Undelivered Orders-Unpaid

Dr 4920 Expended Authority-Unpaid - Reimbursable Program

150204 Reimbursements

A. Requirements

1. General

(a) Reimbursements to appropriations (appropriation reimbursements) are amounts earned and collected for property sold or services furnished either to the public or another federal accounting entity. To be considered an appropriation reimbursement, the collection must be authorized by law for credit to the specific appropriation or fund account. Within the Department, a reimbursement program must be authorized for the account by the USD(C) through the budget preparation process and statutory authorization of the budget through the authorization and appropriation process. Except for refunds, collections that are not authorized as appropriation reimbursements shall be deposited to the general fund of the U. S. Treasury as miscellaneous receipts. (Refunds normally are deposited to the appropriation account from which the original disbursement was made.)

(b) In general, collections in the absence of an authorized reimbursable program for DoD goods and services do not create budgetary resources. Except for refunds, such collections shall be deposited to the general fund of the U. S. Treasury as miscellaneous receipts unless the deposit to an appropriation or fund is authorized by law. Volume 11A, Chapter 3 of this Regulation contains the general statement of policy and requirements when work is performed or materiel is provided to private parties.

2. Anticipated Reimbursements

a. Anticipated reimbursements are, in the case of transactions with the public, estimated collections comprising advances expected to be received and reimbursements expected to be earned. In transactions between U.S. Government accounting entities, anticipated reimbursements consist of orders expected to be received, but for which no orders have been accepted. Anticipated reimbursements may not be used as a source of obligational authority until a customer order is accepted unless such use specifically is authorized in statute. The primary example of the use of anticipated reimbursements to create obligational authority is a revolving fund, in which anticipated reimbursements underlie apportionments of contract authority.

b. An allotted reimbursable program does not constitute authority to incur obligations. Obligations may be incurred only upon acceptance of a customer order. The reimbursable program does not have to be specifically allotted. Apportionment, allocation, and allotment of the reimbursable program may be treated as “automatic” when written OMB approval is obtained by the DoD Component responsible for the appropriation concerned. OMB approval is dependent upon meeting the criteria for automatic apportionment of reimbursements contained in Chapter 2 of this volume.

3. Customer Orders

a. Accepted customer orders establish obligational authority in a performing allotment. Unfilled customer orders are the amounts of orders accepted from other accounting entities within the U.S. Government for goods and services to be furnished on a reimbursable basis; or, in the case of transactions with the public, are amounts collected in advance for which the accounting entity has not yet performed as requested. On an exception basis, there may be orders from the public received and accepted without payment in advance, but only when specifically permitted by statute. Acceptance of a customer order requires that the performing accounting entity agree in writing to perform the work for the requesting (customer) accounting entity. Volume 11A of this Regulation discusses the forms that are used to document these requests and acceptances. GLA 4221, “Unfilled Customer Orders - Unpaid - Automatic Apportionment,” GLA 4222, “Unfilled Customer Orders - Unpaid - Specific Apportionment,” GLA 4223, “Unfilled Customer Orders - Paid - Automatic Apportionment,” and GLA 4224, “Unfilled Customer Orders - Paid - Specific Apportionment,” are the execution-level budgetary accounts that are used, as applicable, to record obligational authority for the reimbursable program. Corresponding amounts are recorded in GLA 4614, “Uncommitted/Unobligated Allotments - Reimbursable Program - Current Period.” An allotment of reimbursable program

authority, whether specific or automatic, authorizes the reimbursable program. It does not establish obligational authority.

b. In the case of multiple-year appropriation accounts whose periods of availability for obligation overlap, reimbursable customer orders and their related transactions shall be applied only to the most current account available during the period the orders were received. In other words, new customer orders may not be recorded in a multiple-year appropriation account after its first year of availability.

4. Unearned Revenue. Unearned revenue is the amount recognized as received by a performing organization in the form of advance payments for the future delivery of goods, services, or other assets. GLA 4223, “Unfilled Customer Orders - Paid - Automatic Apportionment,” and GLA 4224, “Unfilled Customer Orders - Paid - Specific Apportionment,” are the execution-level budgetary accounts that are used as applicable to record reimbursable orders accepted with advance payment. Compound entries must be made to recognize advance payments in both the budgetary accounts and asset and liability accounts. The proprietary accounting entries are illustrated in Volume 4, Chapter 13 of this Regulation. (See GLA 2300, “Unearned Revenues (Advances)”.)

5. Earned Reimbursements

a. An earned reimbursement is the amount recognized when a performing organization renders actual or constructive performance on a reimbursable order. Generally, it is at the point of recognition of an accrued expenditure--paid or unpaid--that compound entries must be made to record the performance and earnings in both the budgetary accounts and in the asset, liability, and equity accounts. However, reimbursable orders received and accepted with payment in advance require a compound entry to credit GLA 2300, “Unearned Revenues (Advances),” and debit GLA 1011, “Funds Collected.” (See subparagraph 150204 A.4., above.)

b. Generally, reimbursements shall recover the cost elements set forth in Volume 11A of this Regulation. However, other billing prices may be established when specifically authorized by a DoD issuance (e.g., directive or instruction). See Volume 11A for additional guidance.

c. Reimbursements shall be accounted for separately by the accounting entity having responsibility for collection. Appropriate billing documents indicating the specific property delivered or services rendered, quantities, dollar amounts, and reference to each customer order shall be maintained.

d. Earned reimbursements shall be recorded and billed promptly in the accounting period earned. However, see the waiver of billing of small amounts in Chapter 1, Volume 11A of this Regulation.

e. Collections from DoD accounting entities generally should be made without the use of checks through processing the billing and collecting entries simultaneously in the disbursing officers' accounts. The requesting accounting entity shall record its obligations in accordance with the standards for recognition of obligations in Volume 3, Chapter 8 of this Regulation.

6. Sales from Inventory. For FMS and non-FMS sales of items from inventory, a determination first must be made whether the item requires replacement, that there is a replacement-in-kind, or that it will not be replaced (free assets). FMS sales of free assets shall be deposited in the U. S. Treasury as miscellaneous receipts, or in the Special Defense Acquisition Fund. Earnings from all other sales from inventory (items requiring replacement, replacement-in-kind and non-FMS free assets) are available for obligation up to account expiration. Collections shall be made before obligations can be incurred for reprocurement. If the item sold is to be replaced with an identical item (replacement-in-kind), the reimbursement from the sale shall be included in reimbursable financing, and the buy-back of the item in the reimbursable program. If the replacement will not be identical to the item sold, the reimbursement from the sale will be included under reimbursable financing, but the buy-back of the replacement shall be shown under the direct budget program and reprogramming action taken prior to replacement.

B. Accounting Entries

1. Allotments of Anticipated Reimbursable Program Authority. At the beginning of each fiscal year an entry shall be made to record an allotment of anticipated reimbursable program authority. For an automatically apportioned reimbursable program (the predominant type within the Department), an estimate of the expected reimbursable program shall be entered. For a specifically apportioned reimbursable program, the exact amount specified in the allotment device shall be entered. An estimate of automatically apportioned reimbursable authority may be revised, upward or downward, by the performing activity at any time during a fiscal year to reflect the current estimate. The specifically apportioned reimbursable program authority may not be revised unless a revised allotment device is requested and received. The general ledger accounting entry for recording an allotment of authority to accept reimbursable orders is as follows:

Dr 4210 Anticipated Reimbursements
 Cr 4593 Specifically Apportioned Reimbursable Program
 or
 Cr 4594 Automatically Apportioned Reimbursable
 Program

NOTE: An allotment of anticipated reimbursable program authority does not provide obligation authority. An allotment of anticipated reimbursable program authority provides only authority to accept reimbursable orders. The accepted reimbursable order provides the obligation authority.

2. Acceptance of Customer Orders.

a. Specifically Apportioned Reimbursable Program. The entry for acceptance of a customer order under specific apportionment is as follows:

Dr 4593 Specifically Apportioned Reimbursable Program
Cr 4614 Uncommitted/Unobligated Allotments -
Reimbursable Program

Dr 4221 Unfilled Customer Orders - Unpaid

or

Dr 4222 Unfilled Customer Orders - Paid
Cr 4210 Anticipated Reimbursements

b. Automatically Apportioned Reimbursable Program. The entry for acceptance of a customer order when automatic apportionment is approved is as follows:

Dr 4594 Automatically Apportioned Reimbursable Program
Cr 4614 Uncommitted/Unobligated Allotments -
Reimbursable program

Dr 4221 Unfilled Customer Orders - Unpaid

or

Dr 4222 Unfilled Customer Orders - Paid
Cr 4210 Anticipated Reimbursements

3. The accounting entry for recording an earned reimbursement is as follows (collected and uncollected accounts are used as applicable):

Dr 4251 Reimbursements and Other Income Earned - Receivable
Cr 4221 Unfilled Customer Orders - Unpaid

Dr 4252 Reimbursements and Other Income Earned - Collected
Cr 4222 Unfilled Customer Orders - Paid

4. The accounting entry for acceptance of a progress payment (treated as an earned reimbursement) in advance of order completion is as follows:

Dr 4222 Unfilled Customer Orders - Paid
Cr 4221 Unfilled Customer Orders - Unpaid

5. The accounting entry for recording a collection reported by the Treasury Department and departmental (or other) finance network that is not immediately

distributable at the execution level; for example, a collection that fails a local edit routine, is as follows:

Dr 4253 Reimbursements and Other Income Earned - Collected -
Undistributed
Cr 4251 Reimbursements and Other Income Earned -
Receivable

6. Undistributed collections shall be researched to identify the proper fund to which they apply. Erroneously reported collections shall be reversed. The accounting entry to record collections after their proper identification is known is as follows:

Dr 4252 Reimbursements and Other Income Earned - Collected
Cr 4253 Reimbursements and Other Income - Collected -
Undistributed

7. Figures 15-11 through 15-17, 15-44 and 15-45 define the accounts used for reimbursements and illustrate the entries for the implementing transactions.

C. The standards for recording transactions in the Receivables and revenue accounts are in Volume 4, Chapters 3 and 18 of this Regulation.

150205 Borrowing Authority

A. Requirements

1. Borrowing authority is statutory authority to incur obligations and to make payments for specified purposes out of borrowed money. Within the Department, borrowing authority is used for mortgage assumptions under the Homeowners Assistance Program. (See DoD Directive 5100.54.)

2. Borrowing authority shall be established as needed by the acquisition of property subject to a mortgage, and withdrawn upon payment of the mortgage principal. When the mortgage is assumed by a buyer, the borrowing authority is disestablished.

3. The Homeowners Assistance Fund has both an expenditure account and a borrowing account. The transaction classification codes for reporting to the Treasury Department are:

(22) 97X4090 - Expenditure account transactions

(87) 97X4090 - Borrowing account decreases

(97) 97X4090 - Borrowing account increases

4. The accrued expenditures for the acquisition of homes subject to mortgages payable that are assumed by the U.S. Government shall include the amount of the mortgage balance payable. The accrued revenues for the sale of homes subject to mortgages payable that are assumed by the buyer shall include the amount of the mortgage balance payable. Homes may be sold subject to another loan of all or part of the cash purchase price to the new buyer. In this case, the U.S. Government has a second mortgage on the home. The revenue for the sale includes this mortgage receivable.

5. The assumption of a mortgage payable by the U.S. Government is an increase in the borrowing account. The payments on the mortgage principal are decreases in the borrowing account. The assumption of the mortgage balance payable by a buyer is a decrease in the borrowing account. The borrowing account is equal to borrowing authority.

6. Simultaneous asset, liability, revenue, and expense accounting is required and described in the applicable chapters.

B. Accounting Entries

1. To record the acquisition of a home when a mortgage is assumed:

Dr 4142 Current Year Borrowing Authority Realized - Indefinite
(Mortgage Principal)

Dr 4611 Allotments Realized - Direct program (Cash Payments)
Cr 4931 Expended Authority-Paid - Direct Program

NOTE: The total acquisition cost of the property including the mortgage payable shall be coded (22) in disbursement reports to the Treasury Department in accordance with Volume 6, Chapter 3 of this Regulation. The amount of the mortgage assumed is reported as a reimbursement with prefix (97) - an increase in the borrowing account.

2. The entry when a mortgage payment is made is as follows:

Dr 4143 Borrowing Authority - Withdrawn
Cr 4142 Current Year Borrowing Authority Realized -
Indefinite

NOTE: To record payment on the principal. This is coded (87) in disbursement reports to the Treasury Department in accordance with Volume 6, Chapter 3 of this Regulation - a decrease in the borrowing account.

Dr 4611 Uncommitted/Unobligated Allotments - Direct Program-
Available
Cr 4931 Expended Authority-Paid - Direct Program

NOTE: To record payment of interest on the mortgage. This is coded (22) in disbursement reports to the Treasury Department in accordance with Volume 6, Chapter 3 of this Regulation.

3. To record the sale of a home with divestment of the mortgage:

Dr 4252 Reimbursements and Other Income Earned - Collected
Cr 4142 Borrowing Authority - Indefinite

NOTE: The total sale price of the property including the mortgage payable shall be coded (22) in disbursement reports to the Treasury Department. The amount of the existing mortgage assumed by the buyer is reported as a disbursement with prefix (87) - a decrease in the borrowing account.

4. Figures 15-1 through 15-9 define the borrowing authority accounts and illustrate the entries for the above transactions.

1503 ACCOUNT ADJUSTMENTS AND ACCOUNT CLOSING PROCEDURES

150301. Adjustments to No-Year, Expiring, and Nonexpiring Multiple-Year Appropriation Accounts. At fiscal year end, installations shall ensure that obligational authority and obligations are accurately stated in view of the most current information available. Actions to accomplish these fiscal year end adjustments include the following:

A. Review and validate unfilled orders under the Economy Act (31 U.S.C. 1535). Cancel those orders funded from expiring accounts, or the portion thereof that will not be obligated by fiscal year end. Notify ordering activities of order reductions that affect their obligations and fund availability.

B. Review and validate unfilled project orders funded by expiring accounts. Cancel those orders that will not be started by January 1 of the ensuing fiscal year. Notify ordering activities of order reductions that affect their obligations and fund availability.

C. Review anticipated reimbursements to eliminate anticipated reimbursements for orders not accepted.

D. Review estimated obligations for possible overstatement or understatement.

E. Review obligations for goods and services ordered. Cancel orders or contracts for goods or services that are no longer needed or that are not likely to be delivered, and deobligate the appropriate amounts.

F. Review obligations for goods received for which payment has not yet been made. Return goods that are no longer needed and recover the amounts obligated.

150302. Adjustments to Expiring Accounts Only

A. Cancel outstanding commitments in expiring accounts. Outstanding commitments shall be canceled as of the end of the period that an appropriation is available for obligation. There can be no commitments in expired accounts. The entries to cancel outstanding commitments are as follows:

Dr 4710 Outstanding Commitments - Direct Program
Cr 4611 Uncommitted/Unobligated Allotments - Direct Program-
Available

Dr 4720 Outstanding Commitments - Reimbursable Program
Cr 4614 Uncommitted/Unobligated Allotments - Reimbursable
Program

B. Review completed customer orders to restore reimbursable program obligational authority made available that was in excess of performance cost. To the extent that restored funds are not returned, unobligated amounts that have been earned, but remain uncollected, shall be eliminated from the expiring appropriation account and established against the miscellaneous receipt account to which the collection is to be deposited. The unobligated balance associated with such earnings will thus be eliminated.

C. Reduce the balance in the Unfilled Orders accounts (GLA series 4220) to the amount of valid remaining uncompleted customer orders only.

D. Eliminate any balance remaining in Anticipated Reimbursements accounts (GLA series 4210).

150303. Adjustments to Canceled Appropriation Accounts Only. Upon cancellation of an appropriation, and prior to normal closing entries, cancel all obligations (undelivered orders and unpaid Expended Authority) and uncollected reimbursements. The entry to cancel obligations is:

Dr 4800 Series Undelivered Orders
Dr 4900 Series Expended Authority-Unpaid
Cr 4580 Allotments Received

The entry to cancel uncollected reimbursements is:

Dr 4220 Unfilled Customer Orders
Cr 4251 Reimbursements and Other Income Earned - Receivable

150305. Report Preparation. After completion of the adjustments identified above, budget execution reports shall be prepared as specified in Volume 6, Chapter 4 of this Regulation.

150306. Closing Procedures. After preparing the prescribed budget execution reports, the following entries shall be made for expired accounts and no-year accounts to close expended and unobligated amounts to the authorizing account.

A. Direct Program Closing Entries

1. Appropriated Authority

a. The entry to close the Expended Authority - Paid accounts is as follows:

Dr 4931 Expended Authority-Paid - Direct Program
Cr 4580 Allotments Received

b. The entry to close uncommitted and unobligated direct program allotment balances is as follows:

Dr 4611 Uncommitted/Unobligated Allotments -
Direct Program - Available
Dr 4591 Uncommitted/Unobligated Obligation Authority-
Available in Subsequent Periods
Dr 4592 Uncommitted/Unobligated Obligation Authority-
Availability Withheld
Cr 4650 Allotments - Expired Authority

c. The entry to close the accounts for recoveries of prior year direct program obligations and expenditures applicable to expired appropriations is as follows:

Entry to Close Upward Obligation Adjustments

Dr 4811 Undelivered Orders-Unpaid-Direct Program
Dr 4812 Undelivered Orders-Paid-Direct Program
Dr 4910 Expended Authority-Unpaid-Direct Program
Cr 4880 Upward Adjustments of Prior-Year Undelivered Orders

Entry to Close Upward Expenditure Adjustments

Dr 4931 Expended Authority-Paid-Direct Program
Cr 4981 Upward Adjustments of Prior-Year Expended Authority

Entry to Close Downward Obligation Adjustments

Dr 4870 Downward Adjustments of Prior-Year Obligations
Cr 4811 Undelivered Orders-Unpaid-Direct Program
Cr 4812 Undelivered Orders-Paid-Direct Program
Cr 4910 Expended Authority-Unpaid-Direct Program

Entry to Close Downward Expenditure Adjustments

Dr 4971 Downward Adjustments of Prior-Year Expended Authority
Cr 4931 Expended Authority-Paid-Direct Program

2. Borrowing Authority. The entry to reduce expenditures paid in the Homeowners' Assistance Program by the amount of principal payments received is as follows:

Dr 4931 Expended Authority-Paid - Direct Program
Cr Actual Reductions to Borrowing Authority

B. Reimbursable Program Closing Entries

1. Specifically Apportioned Reimbursable Authority

a. The entry to close unrealized anticipated reimbursable program authority is as follows:

Dr 4593 Specifically Apportioned Reimbursable Program
Cr 4210 Anticipated Reimbursements

b. The entry to close reimbursable program expenditures paid is as follows:

Dr 4941 Expended Authority-Paid - Reimbursable
Program
Cr 4201 Total Actual Resources

c. The entry to close earned reimbursements which have been collected is as follows:

Dr 4201 Total Actual Resources
Cr 4252 Reimbursements Earned - Collected

d. The entries to close the accounts for recoveries of prior year specifically apportioned reimbursable program obligations and expenditures of the unexpired portion of multiple-year and no-year appropriations are the same as those shown in subparagraph 150306.B.2.d. below.

2. Automatically Apportioned Reimbursable Authority

a. The entry to close unrealized anticipated reimbursable program authority is as follows:

Dr 4594 Automatically Apportioned Reimbursable
Program
Cr 4210 Anticipated Reimbursements

b. The entry to close the Expended Authority-Paid account is as follows:

Dr 4941 Expended Authority-Paid - Reimbursable
Program
Cr 4201 Total Actual Resources

c. The entry to close earned reimbursements which have been collected is as follows:

Dr 4201 Total Actual Resources
Cr 4252 Reimbursements Earned - Collected

d. The entries to close the accounts for recoveries of prior year reimbursable program obligations and expenditures of the unexpired portion of multiple-year and no-year appropriations are as follows:

Entry to Close Upward Obligation Adjustments

Dr 4821 Undelivered Orders- Unpaid - Reimbursable Program
Dr 4822 Undelivered Orders-Paid - Reimbursable Program
Dr 4910 Expended Authority-Unpaid- Reimbursable Program
Cr 4880 Upward Adjustments of Prior-Year Undelivered Orders

Entry to Close Upward Expenditure Adjustments

Dr 4941 Expended Authority-Unpaid - Reimbursable Program
Cr 4981 Upward Adjustments of Prior-Year Expended Authority

Entry to Close Downward Obligation Adjustments

Dr 4870 Downward Adjustments of Prior-Year Obligations
Cr 4821 Undelivered Orders-Unpaid - Reimbursable Program
Cr 4822 Undelivered Orders-Paid - Reimbursable Program
Cr 4921 Expended Authority-Unpaid - Direct Program

Entry to Close Downward Expenditure Adjustments

Dr 4971 Downward Adjustments of Prior-Year Expended Authority
Cr 4941 Expended Authority - Paid - Reimbursable Program

150307 Expired and Canceled Accounts. Prior to fiscal year 1990, unobligated obligation authority was withdrawn and returned to the U.S. Treasury at the end of an appropriation's availability for obligation. In November 1990, the National Defense Authorization Act (P.L. 101-510) was enacted. It changed the requirements cited above. This law provides for the following:

For 5 years after the time an appropriation expires for incurring new obligations, both the obligated and unobligated balances of that appropriation will be available for recording, adjusting, and liquidating obligations properly chargeable to that account.

For appropriations that are available for obligation for a specific period, i.e., annual and multi-year appropriations, on September 30 of the fifth fiscal year after an appropriation's period of availability for incurring new obligations expires, both the obligated and unobligated balances of that appropriation are required to be canceled and will no longer be available for obligation or expenditure for any purpose.

Following cancellation of an appropriation, if it becomes necessary to record an obligation or an adjustment to an obligation, which otherwise would have been properly chargeable (both as to purpose and amount) to an appropriation before it was canceled, then the obligation should be charged to an appropriation currently available for the same purpose.

When a currently available appropriation is used to pay an obligation, which otherwise would have been properly chargeable (both as to purpose and amount) to a canceled appropriation, the total of all such payments by that current appropriation may not exceed the lesser of:

A. The unexpended balance of the canceled appropriation (the unexpended balance is the sum of the unobligated balance plus the unpaid obligations of an appropriation at the time of cancellation, adjusted for obligations and payments which are incurred or made subsequent to cancellation and which would otherwise have been properly charged to the appropriation except for the cancellation of the appropriation); or

B. The unexpired unobligated balance of the currently available appropriation; or

C. One percent of the total original amount appropriated to the current appropriation being charged.

1. For annual accounts, the 1 percent limitation is of the annual appropriation for the applicable account not total budgetary resources (e.g., reimbursable program authority).

2. For multi-year accounts, the 1 percent limitation applies to the total (multi-year) amount of the appropriation.

3. For contract changes, charges made to currently available appropriations will have no impact on the 1 percent limitation rule. That is, the 1 percent (of the currently available appropriation) amount will not be decreased by the charges made to current appropriations for contract changes.

150308. Accounting For Expired Authority. Expired authority is composed of (a) unobligated balances and (b) obligated, but unliquidated, balances remaining in

appropriations that no longer are available for incurring new obligations. The balances no longer are available because the time available for incurring such obligations has expired.

A. Elimination of Unobligated Balances. P.L. 101-510 requires separate accounts for each expired fixed appropriation to be maintained by its fiscal year identity for 5 years following the appropriation's period of availability for obligation. During this 5-year period, obligations may be adjusted upward and downward and disbursements may be made from these expired appropriations.

1. Direct Program. Unobligated budget authority of an expired appropriation, at the time of its expiration, shall be closed to GLA 4650, "Expired Authority," as follows:

Dr 4610 Series Allotments - Realized Resources
Dr 4620 Other Funds Available for Commitment & Obligation
Dr 4630 Other Funds Unavailable for Commitment & Obligation
Cr 4650 Expired Authority

2. Reimbursable Program. The closing entries shown in paragraph 150306.B, eliminate reimbursable program authority that has been expended. In addition to the elimination of expended reimbursable program authority, a change is necessary to eliminate unobligated reimbursable program authority existing at the time of expiration of the receiving appropriation. Unobligated reimbursable program authority shall be returned to the financing appropriation. The obligation authority necessary to finance any subsequent upward obligation adjustments shall be requested from that financing appropriation. The entry to eliminate unobligated reimbursable program authority amounts is:

Dr 4614 Uncommitted& Unobligated Allotments- Reimbursable
Program
Cr 4593 Specifically Apportioned Reimbursable Program
or
Cr 4594 Automatically Apportioned Reimbursable Program

B. Adjustments To Expired Authority. Expired accounts shall be maintained by fiscal year identity for 5 years following the expiration of the obligational period for the appropriation. During this 5-year period, obligations may be adjusted upward or downward and disbursements made.

1. Upward Adjustments (Obligations) of Expired Authority. GLA 4650, "Expired Authority," is a credit balance account that, prior to appropriation cancellation, is equal to the balance of unobligated expired direct program budget authority. Expired authority, prior to appropriation cancellation, provides the ability to a DoD Component to adjust obligations upward that were previously under recorded or to record obligations that should have been recorded (but were not) against an expired appropriation before its expiration. The following entry illustrates an upward obligation adjustment from expired authority.

Dr 4650 Expired Authority

Cr 4880 Upward Adjustments of Prior-Year Obligations
or
Cr 4980 Upward Adjustments of Prior-Year Expended Authority

2. Downward Adjustments (Deobligations) of Expired Authority. The entry to record downward adjustments (deobligations) of an obligation in an expired appropriation is as follows:

Dr 4870 Downward Adjustments of Prior-Year Obligations
Dr 4971 Downward Adjustments of Prior-Year Expended Authority
Cr 4650 Expired Authority

3. Closing Entries. The entry to close, at fiscal year end, the accounts for upward and downward adjustments to expired appropriation obligations is as follows:

Upward Adjustment Closing Entries

Dr 4811 Undelivered Orders-Unpaid-Direct Program
Dr 4812 Undelivered Orders-Paid-Direct Program
Dr 4910 Expended Authority-Unpaid-Direct Program
Cr 4880 Upward Adjustments of Prior-Year Undelivered Orders

Dr 4931 Expended Authority-Paid-Direct Program
Cr 4981 Upward Adjustments of Prior-Year Expended Authority

Downward Adjustment Closing Entries

Dr 4870 Downward Adjustments of Prior-Year Obligations
Cr 4811 Undelivered Orders-Unpaid-Direct Program
Cr 4812 Undelivered Orders-Paid-Direct Program
Cr 4910 Expended Authority-Unpaid-Direct program

Dr 4971 Downward Adjustments of Prior-Year Expended Authority
Cr 4931 Expended Authority-Paid-Direct Program

150309. Accounting For Canceled Authority. The FY 1990 National Defense Authorization Act (P.L. 101-510) requires that, on September 30th of the fifth fiscal year after the period of availability for obligation of a fixed appropriation account ends, the account shall be closed and any remaining balance (whether obligated or unobligated) in the account shall be canceled and, thereafter, shall not be available for obligation or expenditure for any purpose. The obligational status of a canceled account continuously must be maintained even though no expenditures or collections may be made to that account. In addition, collections authorized, or required to be credited to an appropriation account but not received before closing of the account, shall be deposited in the miscellaneous receipt account "Collections of Receivables from Canceled Accounts" (Treasury Symbol 3200).

A. Accounting For Canceled Obligated and Unobligated Balances. Upon cancellation of an appropriation the balance in account 4650 shall be reclassified as canceled authority. The entry to accomplish this action is:

Dr 4650 Expired Authority
Cr 4350 Canceled Authority

NOTE: Expenditures from a current appropriation that are applicable to obligations incurred in a canceled appropriation will reduce the balance in GLA 4350 as discussed in subparagraph 150309.C, "Accounting for Expenditures Applicable to Canceled appropriations," below.

B. Accounting For Collections Applicable to Closed Accounts. In accordance with P.L. 101-510, any collections received after cancellation of an account shall be deposited to the miscellaneous receipt account, "Collections of Receivables from Canceled Accounts" (Treasury Symbol 3200).

C. Accounting For Expenditures Applicable To Canceled Appropriations. The status of direct program obligated and unobligated balances and reimbursable program obligated balances, even in an account which has been closed, must be continuously maintained. If payments (cash collections) are not received for obligations incurred in the reimbursable program, those obligations must be covered by direct program unobligated authority existing in the closed account.

The presence of a sufficient existing direct program unobligated balance in a closed account is determined by deducting from the unobligated balance at the time of cancellation all amounts charged to current appropriations that otherwise would have been chargeable to the closed account, both as to purpose and in amount, except that the account was canceled.

The total of payments from a current appropriation for obligations and payables of a canceled appropriation cannot exceed the lesser of (1) the unexpended balance of the canceled appropriation, (2) the unexpired unobligated balance of the currently available appropriation, or (3) 1 percent of the current appropriation being charged. Payables applicable to canceled appropriations must be paid from funds of subsequent appropriations that are available for the same general purpose as the one from which the payables were canceled. In accordance with Part XI of OMB Circular A-34, "Instructions on Budget Execution," the liabilities may not be recorded on the books of a subsequent appropriation until (1) valid bills are received for payment and (2) it is certain the payment will be made from that subsequent appropriation. If such payments to be made exceed the 1 percent limitation, additional authority must be sought from the Congress. It is important to note that the liability of a current account to pay an obligation of a canceled account is recorded only in the proprietary accounts of the current account pursuant to the above criteria. The obligation of a current account to pay, however, including upward obligation adjustments, must be recorded in the budgetary accounts at the time it is first known against the obligational authority of the canceled account that would have been available except for its cancellation.

ACCOUNT 4042 ANTICIPATED BORROWING AUTHORITY

Debit Balance. The anticipated authority that permits a federal agency to incur obligations and make payments for specific purposes out of monies borrowed from Treasury.

<u>Debit</u>	<u>Credit</u>
Amount of borrowing authority made available by statute for subsequent obligation.	1. Amount of commitments and obligations incurred against borrowing authority.
Contra: 4610 Allotments - Realized Resources	Contra: 4142 Current Year Borrowing Authority Realized - Indefinite
	2. Write-off of lapsing borrowing authority.
	Contra: 4392 Rescissions

Figure 15-1

ACCOUNT 4140 BORROWING AUTHORITY

Debit Balance. This is a summary account. Accounts subsidiary to this summary account are used to record statutory authority that permits a federal agency to incur obligations and to make payments for specified purposes from the proceeds of borrowed funds.

DebitCredit

This account is a summary account.

Figure 15-2

ACCOUNT 4141 BORROWING AUTHORITY - DEFINITE

Debit Balance. The amount of statutory authority during the fiscal year that permits federal agencies to incur obligations and make payments to liquidate the obligations out of borrowed monies where a specific sum or specific aggregate amount “not to exceed” is stated at the time the authority is granted. (As a rule, Indefinite Borrowing Authority [GLA 4142] rather than Definite Borrowing Authority is used within the Department of Defense.

DebitCredit

Do not use this account without prior approval from
the Director for Accounting Policy, OUSD(C).

Figure 15-3

ACCOUNT 4142 CURRENT YEAR BORROWING AUTHORITY REALIZED -
INDEFINITE

Debit Balance. New statutory authority during the fiscal year that permits a federal agency to incur obligations and make payments for specified purposes out of borrowed monies where a specific sum is not stated when the authority is granted but is determinable only at some future date. Under the Homeowners Assistance Program, represents the amount of budget authority established by assumption of mortgages under the Homeowners Assistance Program. The account is increased when a mortgage is assumed and decreased by payments on mortgage principal, and upon sale of the mortgaged property. (As a rule, Indefinite Borrowing Authority, rather than Definite Borrowing Authority [GLA 4142], is used within the Department.)

Debit

Amount of commitments and obligations incurred against Borrowing Authority.

Contra: 4042 Anticipated Borrowing Authority

Credit

Payments made to liquidate borrowing authority realized.

Contra: 4610 Series Allotments - Realized

Figure 15-4

ACCOUNT 4143 ACTUAL REDUCTIONS TO BORROWING AUTHORITY

Credit Balance. The amount of borrowing authority reduced by legislation that cancels budget authority during the fiscal year.

CHAPTER 16

ACCRUED EXPENDITURES FOR CONTRACTS1601 PURPOSE

The purpose of this chapter is to furnish supplementary departmental guidance on accounting for accrued expenditures for contract deliverables accepted on contracts administered by the Defense Contract Management Command (DCMC) and paid by the DFAS-Columbus Center.

1602 STANDARDS

160201. Accrued expenditures recorded in budgetary accounts must report, separately, the amounts paid and unpaid for all contract deliverables accepted during the fiscal year.

160202. Accrued expenditures for contracts must be recorded during the period in which the goods or services are received and accepted using appropriate accounting entries.

160203. Accrued expenditures shall be recorded in the records of the accountable entity for which the contract undelivered order is recorded and obligated.

1603 OPERATIONAL REQUIREMENTS

160301. The DFAS-Columbus Center will transmit accrued expenditure data to the applicable accounting station in accordance with the following:

A. Daily Reporting

1. Accrued Expenditures Paid. Contract Payment Notices or notices of prevalidated payment will be transmitted promptly after disbursement to designated accounting stations. These notices include the amounts of progress payments made and recouped so that the outstanding balance of progress payments can be recognized in the accounting records as non-accrued advances on undelivered orders.

2. Accrued Expenditures Unpaid. Shipment Performance Notices will be transmitted promptly after contract administration acceptance on the DD Form 250 (or equivalent acceptance document) to the designated logistics or program manager. These notices then are available to accounting systems that interface with logistics and program management systems, and have been designed with the capability to recognize shipment and receipt data as accounts payable and accrued expenditures unpaid liabilities. For certain large contracts, a notice of intended payment may be transmitted by the DFAS-Columbus Center to serve as the accrued expenditure unpaid notice for such payments. The accrued expenditures unpaid amount must equal the amount recorded as accounts payable in the proprietary accounts.

B. Monthly Reporting

1. At the end of each month, the DFAS-Columbus Center will prepare an accrued expenditure report. This report serves as an overall control on entries recorded by individual accounting entities and will report summary totals (at the appropriation subhead level) without reference to transactions or the contracts to which the amounts apply. The categories reflected in the report include:

- a. Outstanding acceptances;
- b. Undisbursed invoices without acceptance or in cash management status;
- c. Outstanding balance of unrecouped progress payments;
- d. Holdback amounts on cost/fee vouchers or non-final clearance on certain contract conditions; and
- e. Termination costs.

2. The accrued expenditure report is transmitted as follows:

For Army and Defense Appropriations:

Defense Finance and Accounting Service-Indianapolis Center
Directorate for Departmental Accounting
8899 East 56th Street
Indianapolis, IN 46249-0100

For Navy Appropriations:

Defense Finance and Accounting Service-Cleveland Center
Directorate for Departmental Accounting and Analysis
1240 East Ninth Street
Cleveland, OH 44199-2055

For Air Force Appropriations:

Defense Finance and Accounting Service-Denver Center
Departmental Accounting Directorate
6760 E. Irvington Place
Denver, CO 80279-8000

C. Transmission of both daily and monthly transactions shall be accomplished via the Defense Switched Network (DSN). The DFAS-Columbus Center shall transmit by close of business the workday following the action date. For example, activity for Tuesday would be transmitted on Wednesday and activity for Friday would be transmitted on the following Monday.

160302. Accrued expenditures must be recorded at least monthly at the level most useful to accounting entity management, e.g., contract line item. The entry, at a minimum, must be at the level used for recording the undelivered order. Reporting within and outside the accounting entity must be based on recorded data.

A. The amounts included in the daily transactions--transmitted by the DFAS-Columbus Center--will be used for maintenance of accrual accounting records. In addition, those accounting systems interfacing with logistics systems shall record unpaid accrued expenditures for destination contract deliverables (based on the logistics system recording of the DoD 4000.25-2-M, "Military Standard Transaction Reporting and Accounting Procedures") or for any delivery received prior to the DFAS-Columbus Center transmission of a transaction notice. The accounting entries required for accrued expenditure accounting are included in Chapter 15 of this Volume.

B. Summary amounts reported in the monthly accrued expenditure report by the DFAS-Columbus Center may not be used for accounting record maintenance, but shall be used at the DFAS Center reporting level for checking the reasonableness of amounts included in installation and intermediate level reports. This summary data may also be used to effect a temporary accrual of unpaid amounts for departmental level reporting when it is known that lower operational levels do not record accrued amounts for contracts administered by the DCMC and paid by the DFAS-Columbus Center.

160303. Particular attention must be paid to internal control procedures. Safeguards are necessary to ensure that transactions are recorded only once. Specifically, performance notices of DCMC acceptance of work, progress payments and shipment notices all may be "first documentation" used to record the accrued expenditure. One document should not be used to duplicate a transaction recorded from another, although any such document should be used to ensure completeness and to adjust accrued expenditures-unpaid and accrued expenditures-paid amounts and classification. Similarly non-DCMC sources of data may be used by the accounting entity to verify completeness, but must not create duplicate accrued expenditures.

(This page intentionally left blank.)

CHAPTER 17

ACCOUNTING REQUIREMENTS FOR MILITARY CONSTRUCTION PROJECTS1701 GENERAL

170101. Purpose. This chapter identifies accounting requirement applicable to the acquisition and/or construction of real property. It addresses (A) costs to be charged to appropriations available for military construction (these costs are referred to as funded costs); (B) costs that, although financed by appropriations or funds other than those available for a specific construction project, are to be capitalized as part of the real property investment (these are referred to as unfunded costs); (C) preparation of accounting source documents required to support entries to real property accounts; (D) obligation and expenditure restrictions and limitations for military construction projects, and (E) various other related functions.

170102. OverviewA. Authorization Requirements

1. Each year an annual or biennial request for major construction projects and programs is submitted to the Congress. Requests presented are reviewed, adjusted, and approved through established command and staff channels, including the Office of the Secretary of Defense (OSD) and the Office of Management and Budget (OMB) before submission to the Congress for authorization. Guidance for submitting military construction projects for authorization is provided by the Assistant Secretary of Defense (Economic Security) in conjunction with the ODC(P/B).

2. Requests for authorization are confined to projects that reasonably can be expected to be executed within the fiscal year requested.

3. Authorization requests for major construction projects are supported by data on proposed physical capacity or other physical measurements, as well as data on estimated costs. Generally, the data for such projects shall be arranged by state and/or installation. These data shall be accompanied with comparative data on the existing real property inventory and projects expected to be subject to future authorization requests. Related data with respect to approved missions and proposed forces also should be provided. Programs also should be evaluated with respect to that portion of a project subject to request for immediate authorization and that portion deferred for future authorization requests.

B. Appropriation Requirements

1. Appropriation requests in support of all new military construction projects are submitted to the Congress annually or biennially, as required. Military construction appropriations generally are available for obligation for five fiscal years. Such appropriation requests are consistent with existing authorizations, authorization requests, or other requests for

funds, as applicable, and include specific budget estimates for those projects for which legislative authorization has been, or is being, requested.

2. Individual projects must be authorized and appropriated in consonance with Title 10, United States Code, sections 2821, 2822, 2824 and 2825.

3. Consistent with congressional authorization and the reprogramming criteria provided in Chapter 7 of this Volume, and within total amounts appropriated in each annual appropriation act, adjustments may be made as necessary to finance to completion the cost of (a) projects previously approved and started, (b) projects expected to be started during the current fiscal year, and (c) other project costs that represent valid unfinanced requirements for the budget year. Amounts previously appropriated in excess of the cost of performance may be reprogrammed to support the completion of other projects.

4. Individual projects cited as a source of funds for reprogramming shall be limited to the new total cost included in the estimate given to the Congress.

C. Planning and Design

1. Planning and design functions are efforts necessary to develop preliminary project cost estimates.

2. Title 10, United States Code, section 2807 authorizes the Secretary of the Military Department concerned to perform planning and design efforts for military construction or land acquisition projects. Such efforts, to the extent accomplished within amounts otherwise appropriated, may be accomplished without specific congressional authorization for the project involved. For projects where the estimated design costs exceed the amount established in 10 U.S.C. 2807, the Secretary of a Military Department shall notify the appropriate committees of the Congress not less than 21 days before the initial obligation of funds for such services. This provision applies only to the Military Service active components. There is no requirement for the Reserve Components to notify the committees at any design cost threshold.

3. Functions that may be performed under the authority of planning and design are as follows:

a. Architectural and engineering services and construction design required for site investigation, survey, mapping, or sketches.

b. Preparation of cost estimates for construction and land acquisition projects.

c. Preparation of plans, specifications, special studies, including value engineering, and construction contract documents.

- d. Construction management of projects that are funded by foreign governments for which elements of the Armed Forces of the United States are the primary user.
- e. Development and updating of design criteria and manuals.
- f. Preparation of standard designs and definitive drawings used on military construction projects.
- g. Management of military construction program design and contract administrative services for design.
- h. Certification of project cost.
- i. Administration of architectural and engineering service contracts for the design of construction and land acquisition projects.
- j. Printing and reproduction of bid documents, preparing pre-bid government estimates and liaison with prospective bidders prior to award of a construction contract.

D. Major Construction

1. Major military construction projects include all acquisition and/or construction, additions, expansions, extensions, conversions, alterations, or replacements of (a) facilities with costs in excess of the amount specified by law as the maximum amount for a minor construction project or (b) any project, regardless of cost, approved as a specific line item in the Military Construction budget request. Costs of a major construction project should include the following:

- a. Surveys, demolition and site preparation.
- b. Acquisition, conversion, rehabilitation, and installation of facilities.
- c. Acquisition and installation of equipment and appurtenances integral to the project.
- d. Acquisition and installation of supporting facilities (including utilities) and appurtenances incident to the project.
- e. Supervision, administration, and overhead incident to the project.

f. Design and support of design for construction projects after construction award (includes change orders, value engineering proposals, and as-built drawings).

2. Specifically excluded from major construction are those costs identified as minor construction, planning and design, or supporting activities. Efforts financed by other than military construction appropriations are discussed in section 1703, below.

E. Emergency Construction

1. The Secretaries of the Military Departments and Directors of Defense Agencies may carry out a major construction project under the authority of 10 U.S.C. 2803, after appropriate congressional notification. Additional guidance is contained in DoD Directive 4270.36, "DoD Emergency, Contingency, and Other Unprogrammed Construction." Emergency construction is limited to those projects where it is determined that:

a. The project is vital to national security, protection of health and safety, or quality of the environment.

b. The requirement for the project is so urgent that deferral of the project for inclusion in the next Military Construction Authorization Act would be inconsistent with national security, protection of health and safety, or quality of the environment.

2. When a decision is made to request approval for an emergency construction project, the DoD Component concerned shall submit a notification and request for reprogramming of military construction funds in accordance with the provisions of 10 U.S.C. 2803 and Chapter 7 of this Volume. Each reprogramming request shall include the following:

a. Justification for, and the current estimate of, the cost of the project.

b. Justification for carrying out the project as an emergency construction project.

c. A statement as to the source of funds to be used for the project.

3. Emergency construction projects shall be financed within amounts appropriated for military construction that have not been obligated for other purposes. The maximum amount that may be obligated by each Military Department in any fiscal year is established in 10 U.S.C. 2803.

4. Actual construction shall not commence prior to the receipt of appropriate DoD and congressional approval.

5. Except as otherwise specifically provided for, emergency construction projects shall be subject to the same restrictions and limitations as major construction projects. Additionally, the identification and treatment of costs for emergency construction projects shall be consistent with that for major construction projects.

6. There is no provision for emergency construction for the Reserve Components.

F. Contingency Construction

1. Title 10, United States Code, section 2804 and the annual Military Construction Appropriation Acts contain authority that authorized projects of an urgent nature to be funded from the Contingency Construction Account. Such efforts, to the extent accomplished within amounts appropriated for such purposes, may be accomplished without specific congressional authorization for the project involved. Use of this authority requires approval by the Secretary of Defense and written notification to the appropriate committees of Congress. In addition, there is a statutory waiting period of 21 days following congressional notification before funds may be obligated for any project approved under this authority.

2. A project financed under this authority requires a determination that deferral of the project for inclusion in the next Military Construction Authorization Act would be inconsistent with national security or national interest. Additional guidance is contained in DoD Directive 4270.36.

3. When a decision is made to request approval for an contingency construction project, the DoD Component concerned shall submit a notification and request for reprogramming of military construction funds in accordance with the provisions of 10 U.S.C. 2804 and Chapter 7 of this Volume. Each reprogramming request shall include the following:

a. Justification for, and the current estimate of, the cost of the project.

b. Justification for carrying out the project as an contingency construction project.

c. A statement as to the source of funds to be used for the project.

4. Actual construction shall not commence prior to the receipt of appropriate DoD and congressional approval.

G. Environmental Response Actions

1. Title 10, United States Code, section 2810 contains authority that authorizes the Secretary of Defense to carry out constructions projects for environmental response actions. Such efforts may be accomplished without specific congressional authorization for the project involved. Use of this authority requires approval by the Secretary of Defense and written notification to the appropriate committees of Congress. In addition, there is a statutory waiting period of 21 days following congressional notification before funds may be obligated for any project approved under this authority.

2. When a decision is made to request approval for an environmental response action construction project, the applicable DoD Component concerned shall submit a request for reprogramming of military construction funds in accordance with the provisions of 10 U.S.C. 2810 and Chapter 7 of this Volume. Each reprogramming request shall include:

a. Justification for, and the current estimate of, the cost of the project.

b. A statement as to the source of funds to be used for the project.

H. Construction in the Event of a Declaration of War or National Emergency

1. Title 10, United States Code, section 2808 contains authority that authorizes the Secretary of Defense to undertake military construction projects, without regard to any other provision of law, in the event of a declaration of war or the declaration by the President of a national emergency that requires use of the Armed Forces of the United States.

2. Such projects may be undertaken only within the total amount of funds that have been appropriated for military construction, including funds appropriated for family housing, that have not been obligated. (This authority shall terminate at the end of the war or national emergency). Use of this authority requires the Secretary of Defense to notify the appropriate committees of Congress. Additional guidance is contained in DoD Directive 4270.36.

I. Minor Construction

1. Projects that involve the acquisition (except land), new construction, addition, expansion, extension, alteration, conversion, replacement, or installation of permanent or temporary facilities (except family quarters) are considered to be minor construction projects when (a) the cost of the project does not exceed such amount as may be specified by 10 U.S.C. 2805 for the Active Components and 10 U.S.C. 18233a for the Reserve Components and (b) the project has not been included in the budget request as a specific line item.

2. When a minor construction project costing more than amounts established in 10 U.S.C. 18233a is undertaken, appropriate congressional committees shall be

notified prior to the start of the project. The project then may be carried out only after the end of the 21 day period beginning on the day the notification is received by the committees, or after each such committee approves the project, if the committees approve the project before the end of the 21 day period. Funds cannot be obligated for construction until committee approval is obtained.

3. Title 10, United States Code, section 2805 contains authority that authorizes the Secretary of Defense to carry out minor constructions projects within an amount equal to 125 percent of the amount authorized by law for such purposes without specific congressional authorization, except as provided in 10 U.S.C. 2805(a)(2). Use of this authority requires written notification to the appropriate committees of Congress and a statutory waiting period of 21 days following congressional notification before funds may be obligated for any project approved under this authority.

4. Planning and design costs are excluded from the cost determination for purposes of determining compliance with the amounts established in 10 U.S.C. 2805 for minor construction projects; however, design costs are not excluded from capitalization.

5. Each project accomplished under the minor construction authority must result in a complete real property facility or improvement. Further, each project must, to the maximum extent possible, be consistent with the appropriate installation master plan. Requests for project approval must fully disclose the relation of the project to the master plan and must detail further planned construction to the same or closely related facilities.

6. DoD Components are precluded from using materials, supplies, or items of installed capital equipment on their own minor construction projects on a nonreimbursable basis.

7. Prerequisites for establishing a minor construction project include identification of the required end result of the project and its correlation with the appropriate installation master plan.

8. It is not feasible to prescribe absolute criteria for determining what scope of work would, under all possible circumstances, properly constitute a separate minor construction project. However, minor construction projects undertaken under the authority of 10 U.S.C. 2805 must be consistent with the intent of the statute as to what constitutes a separate project.

9. The planned acquisition of, or improvement to, a real property facility through a series of minor construction projects; that is, incremental-type construction is prohibited.

Notwithstanding any other provisions for approval of minor construction projects, no project may be proposed to be accomplished under minor construction authority that previously has been

deleted by the Congress from proposed military construction authorization legislation or otherwise disapproved of by the Congress.

J. Restoration or Replacement of Damaged or Destroyed Facilities

1. The Secretaries of the Military Departments, with the approval of the Secretary of Defense, may request congressional approval to repair, restore or replace a facility that has been damaged or destroyed for which legislative authorization and appropriation has not been provided.

2. Title 10, United States Code, section 2854 requires that Congress be notified in writing when the cost of a project is greater than the amount specified in 10 U.S.C. 2805 for minor construction.

3. When a decision is made to request approval for restoration or replacement of damaged or destroyed facilities, the applicable DoD Component concerned shall submit a request for reprogramming of military construction funds in accordance with the provisions of 10 U.S.C. 2854 and Chapter 7 of this Volume. Each reprogramming request shall include:

a. Justification for, and the current estimate of, the cost of the project.

b. A statement as to the source of funds to be used for the project.

4. Restoration or replacement projects shall be financed within amounts appropriated for military construction that have not been obligated for other purposes.

5. Actual construction shall not commence prior to the receipt of appropriate DoD and congressional approval.

K. Supporting Activities

1. Funding for supporting activities provides for access roads under authorization contained in 23 U.S.C. 210. Access roads may be required in conjunction with construction, expansion, improvement, replacement, or relocation of DoD facilities.

2. Highways located within the boundaries of a military reservation are not eligible for financing from these funds. Such highways shall be funded from major construction, emergency construction, or minor construction programs, as applicable. Additionally, projects in the regular Federal Air Primary Systems normally are not considered eligible for financing with these funds.

3. Funds available for Defense access roads can be provided to the Department of Transportation (DoT) via a Standard Form (SF) 1151, "Nonexpenditure Transfer Authorization" nonexpenditure cash transfer or the effort may be carried out by DoT on a reimbursable basis.

L. Scope of a Military Construction Project

1. All acquisitions of land, regardless of cost, maybe considered to be a military construction project. Submit all requests for purchase, withdrawal from public domain, lease or permit from individuals or government entities, or any other type of use agreement involving more than 1,000 acres, or land whose estimated purchase price or annual lease price exceeds \$1 million to the Deputy Secretary of Defense through the Deputy Assistant Secretary of Defense (Installations). Title 10, United States Code, section 2673 also authorizes use of Operation and Maintenance funds for land acquisition as defined in 10 U.S.C. 2672.

2. A military construction project includes all construction efforts, or any contribution authorized by law, necessary to produce a complete and usable facility or a complete and usable improvement to an existing facility or improvement as specifically authorized by law.

3. Military construction project funding includes equipment installed in and made a part of real property structures or improvements. Construction project finding excludes all production and movable equipment. The source and cost of all production and movable equipment directly associated with construction projects shall be disclosed as additional information in presenting construction programs and budgets.

4. Construction applicable to one real property facility:

a. All construction proposed for a real property facility in which the same functional purpose or related functional purposes involved will be treated as one project.

b. All concurrent construction proposed for contiguous areas of a multi-use facility shall be treated as a single project even though the construction pertains to unrelated functional purposes. For this purpose, contiguous means "in actual contact" or "touching."

c. All construction proposed for a multi-use facility that is common to the facility as a whole, or common to areas in which the same or related functional purposes are performed, shall be treated as a single project.

d. Construction proposed for a multi-use facility may be divided into separate projects provided that each project can be clearly defined and the result is a complete and usable facility.

5. When construction is accomplished concurrent with repair and/or maintenance work as an integrated undertaking, the construction may be treated as a separate project. If the construction is treated as a separate project, cost limitations, notification, and other requirements associated with applicable construction projects apply. For this purpose, engineering estimates may be used to determine costs applicable to the construction portion.

6. A decision as to whether one or more projects are to be established for related efforts relating to subparagraph 170102.L.5, above, shall be submitted for approval to the Secretary of the cognizant Military Department.

1702. EFFORTS TO BE FINANCED BY MILITARY CONSTRUCTION APPROPRIATIONS

170201. All costs of the military construction program are financed from appropriations available for that purpose. These costs include design, major construction projects, supporting construction functions, construction overhead, and projects authorized in the United States Code for funding by appropriations available for military construction. Unfunded costs that are capitalized, but financed by appropriations other than those available for military construction, are addressed in section 1703, below.

170202. For other than family housing projects, the military construction appropriation shall be used when the cost of a minor construction project is greater than the amount established in Title 10, United States Code, section 2805.

170203. Funded Project Costs. Except as prescribed in section 1703, below, major construction costs incurred during the design and construction phases are funded from applicable military construction appropriations. These costs include, but are not necessarily limited to, the following:

- A. All materials, supplies, and services applicable to the project.
- B. All items of installed capital equipment.
- C. Transportation costs applicable to materials, supplies, installed capital type equipment, and government-owned equipment.
- D. Labor costs, including construction units composed of foreign nationals but excluding U.S. military labor.
- E. That portion of installation overhead or support costs that can be identified as representing additional costs that would not have been incurred were it not for the project.
- F. Supervision, inspection and overhead costs charged by the U.S. Army Corps of Engineers and the Naval Facilities Engineering Command when serving as the design and/or construction agent.

G. Travel and per diem related to applicable military or civilian labor.

H. That portion of costs applicable to the operation and maintenance of Government-owned equipment shall be computed on an hourly rate in accordance with guidance in Chapter 1, Volume 11A of this Regulation.

170204. Overhead Expenses. All overhead expenses for the military construction program, including work for others, initially are financed from the performing military construction appropriation. These expenses are distributed to projects, including work for others. Military construction overhead includes the following efforts:

A. Personal services (and support costs) at field and headquarters activities related to the military construction program.

B. Contract administration.

C. Military construction program and project management (including post construction evaluation).

D. Technical direction and coordination of projects.

E. Land planning studies or reports, appraisal, and title search after congressional authorization of a land acquisition or exchange.

F. Project management and administration not otherwise identified above.

170205. Reimbursable Project Costs. The appropriation or fund financing a construction project shall reimburse other appropriations or funds, as applicable, for costs initially financed by another appropriation or fund. Reimbursement between appropriations shall be made by use of an SF 1080, "Voucher for Transfers Between Appropriations and/or Funds," on a "no-check" basis.

1703. EFFORTS FINANCED BY OTHER THAN MILITARY CONSTRUCTION APPROPRIATIONS

170301. Unfunded Costs. Some efforts in support of military construction are identified as unfunded costs. However, such costs must be capitalized as part of the value of the property. Unfunded costs are those that (a) contribute to a military construction project, (b) are financed from appropriations other than military construction, and (c) are not reimbursed by appropriations available for military construction. Unfunded costs are capitalized as part of the real property investment and include the following:

A. Costs financed from military personnel appropriations.

B. Costs applicable to the depreciation of government-owned equipment shall be computed on an hourly rate in accordance with guidance in Chapter 1, Volume 11A of this Regulation.

C. Materials, supplies, and items of installed capital equipment that have been obtained specifically for a project on a nonreimbursable basis, either as excess distributions from another DoD Component or as excess distributions from other Federal agencies. A DoD Component is precluded from using materials, supplies, or items of installed capital type equipment on its own minor construction projects on a nonreimbursable basis.

D. Unfunded civilian fringe benefit rates for DoD civilian personnel as prescribed in Chapter 6, Appendix C, "Civilian Personnel Fringe Benefit," Volume 11A of this Regulation.

E. Gifts from private parties.

170302. Planning and design costs are excluded from the cost determination for purposes of determining compliance with the amounts established in 10 U.S.C. 2805 for minor construction projects.

170303. For other than family housing facilities, when the cost of a project is less than the amount specified in 10 U.S.C. 2805, the project shall be financed from applicable Operation and Maintenance (O&M) appropriations; Research, Development, Test and Evaluation (RDT&E) appropriations; or working capital fund resources, as appropriate.

170304. Items of equipment that are movable in nature and not affixed as an integral part of a facility shall be financed from applicable O&M appropriations; RDT&E appropriations; procurement appropriations; or working capital fund resources, as appropriate. This equipment includes all types of production, processing, technical, training, servicing, RDT&E, and pre-wired work stations.

170305. Any operational equipment for which installation mountings and connections are provided in the building design, and that are detachable without damage to the building or equipment, shall be financed from applicable O&M appropriations; RDT&E appropriations; procurement appropriations; or working capital fund resources, as appropriate.

170306. The costs of alterations to install movable equipment that is not affixed as an integral part of a facility shall be financed from applicable O&M appropriations; RDT&E appropriations; procurement appropriation or working capital fund resources, as appropriate.

170307. The following examples of installation or relocation items should be financed from applicable O&M appropriations; RDT&E appropriations; procurement appropriations; or working capital fund resources, as appropriate:

A. Prefabricated screens, partitions, false floors, platforms, and shielding for electromagnetic radiating services.

B. Temporary removal and reinstallation or portions of existing walls, roofs, utility systems, and appurtenances to permit installation of equipment.

C. Secondary utility work necessary to connect equipment to existing utilities services within a facility between the primary entry or source of utilities into the structure and the equipment to be served.

170308. Advance Planning. Advance planning costs should be financed through the O&M accounts and expensed in the period incurred. Working capital funds will finance advance planning costs through its operating account and expense these costs in the period incurred. (See Volume 11B of this Regulation). Advance planning is not encompassed by, and should not be performed under, the authority of military construction project planning and design efforts. Advance planning costs are not to be included in determining compliance with the amounts established in 10 U.S.C. 2805 for minor construction projects. The following are examples of advance planning functions:

A. Developing the requirements for a military construction project (project formulation).

B. Developing a master plan for an installation.

C. Initial explorations of project alternatives and rough drawings.

D. Facilities related management studies.

E. Conceptual analysis.

E. Making alternative site studies.

F. Developing and validating military construction project documentation prior to commencing project design.

G. Preparing engineering analyses and studies to develop technical design parameters prior to commencing project design.

H. Preparing environmental impact assessments and statements.

170309. Family Housing. All family housing construction projects shall be funded from applicable family housing appropriations. Guidance concerning funding of family housing efforts is addressed in Chapter 6, "Military Construction/Family Housing Appropriations," Volume 2, of this Regulation.

170310. Projects for pollution abatement, energy conservation, and occupational safety and health activities may be funded from other than the military construction appropriation when the cost of a project:

A. Is funded from the proceeds of sales of recyclable material in accordance with Chapter 5, "Disposition of Proceeds From DoD Sales of Surplus Personal Property," Volume 11A of this Regulation, and 10 U.S.C. 2577.

B. Does not exceed 50 percent of the amount established by law as a maximum amount for minor construction projects in accordance with 10 U.S.C. 2577.

1704. AUTHORIZATION, APPROPRIATION, OBLIGATION, AND EXPENDITURE RESTRICTIONS

170401. Program Restrictions

A. Specific authorization shall be required for work to be performed under major construction programs unless the project is carried out under one of the authorities provided by Title 10, United States Code, sections 18233a, 2803, 2804, 2805, 2808, 2810, or 2854--or other authorities--to carry out a project not otherwise specifically authorized.

B. Each Act of Congress that provides authorization for work to be performed under major construction programs generally contains a limitation on total costs for work to be undertaken for each installation as a whole, for emergency construction work on a Department-wide basis and, in some cases for a type or category of construction. In certain circumstances, overruns, within stated percentages, may be authorized with respect to individual cost limitations, provided the total amount authorized for any appropriation is not exceeded.

170402. Obligation and Expenditure Restrictions

A. Appropriated funds authorized for obligation are subject to DoD Directive 7200.1 and the Antideficiency Act provisions addressed in Volume 14 of this Regulation. An adequate system of funds control shall be established in accordance with Volume 14. These controls shall be designed to ensure that individual projects are being carried out consistent with authorized purposes and within authorized and available funds.

B. Absent a specific provision of law, the cost estimate for each project approved by the Congress is not a separate statutory cost limitation. Major physical or financial changes in individual projects previously approved shall be reported in advance to the House and Senate Appropriations Committees and the House National Security and Senate Armed Services Committees for their approval after proper clearance within the Department and the OMB.

C. Limitations shall be at the project level for major construction and budget activity for minor construction, planning and design, etc.

D. DoD Components have limited authority to realign resources between projects consistent with Chapter 6, Volume 2 of this Regulation.

E. Requests for apportionment of appropriated funds shall be based on estimates contained in applicable approved operating budgets.

F. Within each Military Department, funding authorizations to incur obligations shall be made by means of subdivisions of appropriated funds to operating agencies and operating units responsible for construction. Such funding authorizations shall be less than or equal to total obligation requirements for the respective approved operating budgets.

G. There shall be only one allocation of funds from the construction appropriation to any operating agency and only one allotment of funds from any such allocation to each operating unit. Each allocation or allotment should carry with it only such additional obligation limitations as may be established by the OMB or the Secretary of Defense, or as otherwise required by the Congress or the President. Separate limitations imposed on total costs by congressional authorizations and by administrative action must be observed at every level in connection with budgetary and funding actions as well as in program execution.

H. When a Military Department performs construction work or services for another DoD Component, or another Federal agency, such work or services shall be performed on a reimbursable basis pursuant to the orders received by the performing Military Department's construction appropriation. There is one exception: The Department of the Army (U.S. Army Corps of Engineers) and the Department of the Navy (Naval Facilities Engineering Command) may perform work or services for the Department of the Air Force and the Federal Emergency Management Agency under allocations or allotments. The performance of work under Air Force and Federal Emergency Management Agency allocations or allotments shall be in accordance with procedures applicable to the performance of construction programs of the Department of the Army or Department of the Navy, as appropriate. Transfer appropriation accounts shall not be established for any such work, nor shall there be advances of funds to finance orders given for work or services. No work or services shall be performed under a direct "citation of funds" (that is, direct charge by the performing unit and or activity to the funds of the ordering unit and or activity).

I. The following policies shall be followed with respect to the performance of all work or services on a reimbursable basis under a construction appropriation:

1. Reimbursements earned are an additional source of obligational authority under the appropriate budget program account. For purposes of establishing obligational authority, such reimbursements may be anticipated for orders received. Cost limitations for the performance of work shall be observed pursuant to the terms of the orders received. Operating budgets shall include estimates of reimbursable orders received or anticipated.

2. Reimbursements are to be budgeted and their use controlled at the Military Department level where management and control of a program is retained. In these cases, allocations and allotments of funds shall be expressed in terms of total obligational authority in operating budgets of the respective operating agencies and operating units responsible for carrying out the program.

J. Title 10, United States Code, sections 4540, 7212 and 9540 limit the amount of obligations that can be incurred on the production and delivery of design, plans, drawings and specifications for any public works or utilities project to not more than six percent of the estimated cost of the project. The 6 percent threshold does not include costs associated with activities such as design reviews, advertisements, preparation of invitations for bids, requests for proposals, land survey, soils and/or other investigations and model studies, determination of program or project requirements, design development criteria, environmental impact statements and supporting data, or travel and per diem.

170403. Certifications of Costs

A. Certifications of costs incurred shall be prepared in accordance with the format shown in Appendix A to this chapter. These certifications shall include statements of total cost incurred on the project, the funded portion of total costs, the unfunded portion of total costs, and a statement that funded costs incurred do not exceed authorized amounts. In connection with the statement of total costs and funded costs, authorized amounts shall also be disclosed. Such disclosure shall indicate the approving authority,

B. The certification shall be prepared within 60 days after physical completion of the project and shall be signed by the installation commander, the responsible engineering official (e.g., post engineer, civil engineer, or public works officer), and the responsible fiscal official.

C. A copy of the certification shall be retained in a project file at each level that maintains project files.

1705. DOCUMENTATION STANDARDS

170501. Project Files. Project files shall be maintained for each construction project. These project files shall represent a complete historical record of the project from inception to completion. Correspondence and other documentation pertinent to the project shall be incorporated into project files at all appropriate levels. Construction agents are responsible for holding the historical project files. These files may include memorandums for record pertaining to decisions resulting from discussions, meetings, and telephone conversations.

170502. Acceptance of Real Property. The acceptance of real property by a user organization, as well as the transfer between DoD Components, or to or from other Federal agencies, must be documented. The Transfer and Acceptance of Military Real Property format shown in Appendix B to this chapter shall be used as a basic source document for transferring the

value of a military construction project to the installation's real property records. In addition, the format shall be prepared at the point amounts are transferred from Construction in Progress accounts to the applicable asset account (e.g., Building). This will provide an audit trail for the recording of the capitalized assets in the applicable property accounts. A locally developed installation format may be used in lieu of the format in Appendix B, if it contains essentially the same information.

170503. Classification of Amounts for Accounting Purposes

A. Within each construction appropriation, there should be only one account structure for classifying costs for the joint purposes of planning, programming, budgeting and accounting (including reporting). Similarly, within each construction appropriation, there should be a single uniform classification of accounts for the purpose of summarizing costs and obligations in budgets, accounting for costs and reporting these costs. The management of an activity performing a construction project is responsible for ensuring that all significant costs (that is, both funded and unfunded costs) are recorded for the project and that all costs subject to capitalization are included in the real property asset accounts, property records, and reports submitted to the OSD and the Congress.

B. The OMB and the Treasury Department have mandated use of a standard general ledger chart of accounts. The DoD Standard General Ledger is identified in Chapter 7, Volume 1 of this Regulation. Use of these DoD accounts is required in order to classify costs for the joint purposes of planning, programming, budgeting, and accounting for construction projects. All organizational levels incurring any significant level of costs shall use the Standard General Ledger to accumulate the cost of performance of construction projects and programs.

c. Cost accounting modules for accumulating and controlling construction projects shall be integrated with an activity's overall accounting system. Cost accounting systems represent a subsidiary ledger of the general accounting system. Therefore, cost accounts, as appropriate, shall be established for each project. Cost identification and cost finding are prescribed in Chapters 19 and 22, Volume 4, of this Regulation.

D. Charges to an account shall be categorized in one of the four construction phases addressed in Appendix C to this chapter. The four phases addressed in Appendix C identify those costs that will be expensed and those costs that will be capitalized.

E. Amounts to be Expensed

(1) Costs incurred in the advance planning (discussed in subsection 170308, above), programming and budgeting phases shall be expensed in the period incurred.

(2) When a project is abandoned, the total cost incurred shall be expensed consistent with guidance contained in Chapter 6, Volume 4, of this Regulation.

(3) The basic expense accounts that should be used to subdivide a project and the use of these accounts maybe found in Chapter 17, Volume 4, of this Regulation

F. Amounts to be Capitalized

(1) Capitalization is a concept while recognizes that the costs incurred in a construction project are to be shown as an asset. Capitalization applies to those projects for which actual costs and expected useful life meet the criteria specified in Chapters 1 and 6, Volume 4, of this Regulation.

(2) All significant costs related to the construction or acquisition of an asset, including unfunded costs addressed in section 1703, above, shall be recognized in capitalizing the costs of a project.

(3) The cost of efforts associated with the design, construction contracting, and construction phases of a project shall be capitalized.

(4) Direct costs incurred in the design and construction phases of a project shall be charged to a specific project. Other costs (listed in subsection 170204, above) that are financed by military construction and subject to capitalization shall be identified to the appropriate indirect cost groups for subsequent allocation to supervision, inspection and overhead cost pools.

170504. Financial Reports

A. Accounting records at every level shall be designed to permit summarization of financial transactions that produce accurate and timely information from one system of accounts. Data produced shall be in formats required for preparation of prescribed budget and financial reports and for such other day-to-day management data as may be required in executing financial oversight. In addition, records and costs must be designed and maintained so as to facilitate audits of project amounts.

B. Each military construction appropriation account shall be reported monthly in the Report of Appropriation Status by Fiscal Year Program and Subaccounts, AR(M)1002. The report shall be prepared as prescribed in Chapter 4, Volume 6, of this Regulation.

170505. Specific Entries. Construction In Progress accounts in the general ledger account 1720 series will be used to accumulate and control costs as prescribed in Chapter 6, Volume 4, of this Regulation. Construction in Progress accounts may be subdivided as necessary to accumulate and control costs. Chapter 15 of this Volume prescribes the budgetary general ledger accounts to be used in recording military construction budget execution transactions. The illustrative entries below are to supplement the entries in Chapter 6, Volume 4, of this Regulation and chapter 15 of this Volume.

- A. Dr 4611 Uncommitted/Unobligated Allotments - Direct Program -
Current Period
Cr 4710 Outstanding Commitments - Direct Program

To record commitments when the direct program is used.

- B. Dr 4710 Outstanding Commitments - Direct Program
Cr 4810 Undelivered Orders - Direct Program

To record the award of a military construction contract.

- C. Dr 4810 Undelivered Orders - Direct Program
Cr 4910 Accrued Expenditures - Unpaid - Direct Program

Dr 1722 Construction in Progress - Contractor
Cr 2113 Accounts Payable - Public - Current

To record the receipt of a contractor's invoice for work performed.

- D. Dr 4910 Accrued Expenditures - Unpaid - Direct Program
Cr 4930 Accrued Expenditures - Paid - Direct Program

Dr 2113 Accounts Payable - Public - Current
Cr 1012 Funds Disbursed

To record the payment of a contractor's invoice (assumes no contract holdback requirement).

- E. Dr 1730 Buildings
Cr 1722 Construction in Progress - Contractors

To record the transfer from the Construction in Progress accounts to the Building account upon completion of the project.

APPENDIX A

EXAMPLE - CERTIFICATION OF COST INCURRED

(Minor Construction Projects Undertaken Under Authority of 10 U.S.C. 2805)

Military Department or Defense Agency: _____

Installation: _____

Project Description and Identification: _____

1. Approved and actual cost were as follows:

	Approved *	Actual
	<u>Costs</u>	<u>Costs</u>
Funded Costs		
Unfunded Costs		
Total Costs		

* The project was approved by (approving authority)

2. Funded costs do not exceed the limitations of 10 U.S.C. 2674 or any other legislative or administrative limitations.

I certify that, to the best of my information and belief, the above statements are true. I further certify that, in the discharge of my official duties, I have taken every reasonable action to verify and assure the accuracy of these statements.

<u>(Date)</u>	<u>(Installation or Base Commander)</u>	<u>(Signature)</u>
	Name, Rank, Position	

<u>(Date)</u>	<u>(Responsible Engineering Official)</u>	<u>(Signature)</u>
	Name, Rank, Position	

<u>(Date)</u>	<u>(Responsible Fiscal Official)</u>	<u>(Signature)</u>
	Name, Rank, Position	

NOTE: To be completed within 60 days after completion of project or, in the event of a contract dispute, as soon as such dispute is settled.

APPENDIX B
TRANSFER AND ACCEPTANCE OF MILITARY REAL PROPERTY

TRANSFER AND ACCEPTANCE OF MILITARY REAL PROPERTY								PAGE _____ OF _____ PAGES								
1. FROM (Installation/Activity/Service & Zip Code)			2. OPERATING UNIT		3. DISTRICT CODE		4. OPERATING AGENCY		5. DATE		6. JOB NUMBER		7. SERIAL NUMBER		8. CONTRACT NUMBER	
9. TO (Installation/Activity/Service & Zip Code)			10. OPERATING UNIT		11. DISTRICT CODE		12. OPERATING AGENCY		13. ACCTG. NUMBER		14. ACCTG. OFFICE NUMBER		15. TYPE OF TRANSACTION A. _____ B. _____		16. PROJECT NUMBER	
ITEM NO.	CATEGORY CODE	FACILITY	NO. OF UNITS	TYPE	UNIT OF MEAS.	TOTAL QUANTITY	COST		DRAWING NUMBERS	REMARKS						
17	18	19	20	21	22	23	24		25	26						
27. STATEMENT OF COMPLETION: The facilities listed hereon are in accordance with maps, drawings, and specifications and change orders approved by the authorized representative of the using agency except for the deficiencies listed on the attached.																
TRANSFERRED BY (Signature)					DATE:		28. ACCEPTED BY (Signature)					DATE				
TITLE (Area Engr./Base Engr./DPWO)							TITLE (Area Engr./Base Engr./DPWO)					29. PROPERTY VOUCHER NUMBER				

APPENDIX B
TRANSFER AND ACCEPTANCE OF MILITARY REAL PROPERTY

This exhibit sets forth the essential information required for the transfer and acceptance of military real property and should be completed to support entries into the real property accounts.

A. GENERAL INFORMATION ON THE TRANSFER AND ACCEPTANCE FORMAT

1. The page number and the total number of pages comprising each transfer transaction shall be shown in the space provided at the top right-hand part of the format.
2. When two or more pages are required, items 27 through 29 shall be completed only on the final page. In such cases, the bottom portion of the format (blocks 27 through 29) shall be excluded from each page except the final page.

B. PROCEDURES FOR COMPLETING THE TRANSFER AND ACCEPTANCE FORM

- | | |
|------------|---|
| ITEM 1 | Self-explanatory |
| ITEM 2 | To be assigned in accordance with DoD Component implementation. |
| ITEM 3 | Identify Intermediate Command, as necessary. |
| ITEM 4 | Primarily for Navy use. |
| ITEM 5 | Enter the date the transfer and acceptance document is prepared. |
| ITEM 6 | For Army use, enter appropriate Army job and directive number. For Air Force use, enter base job number, as appropriate, when form is used for transfer within the Air Force. |
| ITEM 7 | For Army use, or for transfer of construction to the Air Force, identify the fiscal year, and sequence number for each installation to which real property is being transferred; for example, for FY 1988, show 88-1, 88-2, etc. For the Navy, the serial number shall be assigned by the area or district public works office and shall represent the numerical sequence of submissions by respective contract number. |
| ITEM 8 | Insert appropriate contract number. |
| ITEM 9 | Self-explanatory. |
| ITEM 10-12 | Same as instructions for Items 2, 3 and 4. To be used by the gaining activity. (Not applicable for Air Force use.) |

- ITEM 13 For Navy use only. Insert the accounting number assigned to, or used by, the activity in Item 9.
- ITEM 14 For Navy use only. Insert the accounting number assigned to the activity performing the official property accounting for the activity shown in item 9.
- ITEM 15A Indicate whether the transfer is new construction, existing facilities, capital improvements to existing facilities, other. Additional remarks should be entered on a separate schedule if “other” is specified.
- ITEM 15B Indicate whether transfer is being made at time of beneficial occupancy, physical completion, financial completion (with respect to new construction), or “other.” Additional remarks should be entered on a separate schedule if “other” is specified.
- ITEM 16 Enter the code number assigned to identify the project with the statutory authority appropriate for the construction.
- ITEM 17 A separate item number will be assigned for each category code. Item numbers will be shown in column 17 and assigned sequentially starting with the number one.
- ITEM 18-19 Enter the category code and description that appropriately describes the primary use for which the facility (building, structure, utility) is designed. Not more than one category code (Item 18) will be listed per line item (Item 17). Category codes and descriptions should be consistent with DoD Instruction 4165.3, “Department of Defense Facility Classes and Construction Categories,” and enclosure 1 to DoD Instruction 4165.14, “Inventory of Military Real Property.”
- ITEM 20 Show number of units in terms of buildings or other structures.
- ITEM 21 Enter the type of construction; use “P” for permanent, “S” for semipermanent, or “T” for temporary, as appropriate.
- ITEM 22 Enter the unit of measure. Abbreviate such as “M2” for square feet, etc.
- ITEM 23 Enter total quantity for measure identified in Item 22.
- ITEM 24 Indicate cost for each item number, category code, and description. When a document includes some estimates, annotate each cost figure with an alphabetical suffix of “P” for preliminary or “F” for final.
- ITEM 25-29 Self-explanatory.

APPENDIX C PHASES OF MILITARY CONSTRUCTION

Congressional authorization of major construction projects typically represents the culmination of planning, programming, and budgeting efforts. A project evolves from a determination that additional facilities are needed. The need is defined, given a priority ranking, and placed in competition with other projects for available resources. The project definition effort begins at the installation level and moves through the chain of command until the project ultimately is included in the budget submittal. Attachment 1 to this appendix, "Evolution of a FY 1995 Military Construction Project," depicts the life-cycle of a military construction project and shows that the process of acquiring a military facility could take 3 to 7 years from conception to completion. The actual design phase could take 1 to 2 1/2 years, while the construction phase could take 1 to 3 years. The remaining time is for planning, programming, budgeting and procurement activities. The scope and cost of each project must be finalized before the annual budget submission to the Congress. The total construction process consists of four phases.

1. PLANNING AND PROGRAMMING

a. **Planning.** During planning, an installation's facility requirements are derived from the installation's mission. The need to acquire additional facilities is determined by an assessment of how existing facilities meet the installation's facility requirements. If additional facilities are needed, construction projects may be undertaken to build new facilities, or upgrade existing, substandard facilities to accommodate new missions, accept technological changes, and improve operational efficiency.

b. **Programming.** During programming, requirements--which are not met--are matched with anticipated resources and included in a long-range plan to acquire those facilities. Installation plans are combined into a Component-wide basis to ensure compatibility with the nation's military strategy, Component priorities and guidance, and in consideration of the DoD facilities investment goal.

c. **Investment Goal.** The Department and the Congress recognize that there is a minimum level of facilities investment that should be reached each year to protect the investment in existing facilities, ensure that facilities will continue to satisfy their designated purposes, and renew our installations. The physical plant must be capable of supporting operational requirements and readiness, both today and in the future. The investment goal is expressed as a percentage of plant replacement value.

d. **Plant Replacement Value (PRV).** See Attachment 2 to this appendix for further details.

e. **Master Planning.** Facility requirements are reflected in an installation master plan. This document is the installation's long-range strategy for development. It prescribes overall facility quality standards and architectural themes and addresses such areas as land use, utility systems, roads and parking.

f. **Project Planning and Programming.** After it is determined that a construction project is needed, a general description of the project requirement, its scope and a cost estimate are developed and, along with supporting documentation, submitted as part of the installation's military construction budget request. The project shall include associated equipment, furnishings (classified as equipment in place), and supporting facilities.

g. The cost of the above efforts normally is expensed and not capitalized.

2. BUDGETING

a. DoD Components determine which facility projects should be included in their Military construction budgets. Some facility projects may qualify for inclusion in other budgets, such as Procurement, RDT&E, or O&M or for accomplishment with nonappropriated funds.

b. The budget requests are forwarded to OSD, where all DoD Component programs are reviewed for compliance with DoD objectives and policy and refined and modified as necessary to ensure consistency and conformity. Once the program has been reviewed by the OSD, it becomes part of the budget request submitted to the OMB for transmission to the Congress as part of the President's Budget.

c. After receipt of the President's Budget, it is reviewed by oversight subcommittees of the House and Senate Appropriations Committees and the House National Security and Senate Armed Services Committees. Often, witnesses from respective DoD Components, and sometimes from the private sector, appear before the subcommittees to furnish further information on specific programs and projects.

d. Upon completion of its review, each subcommittee marks up the budget request and forwards its recommendations for approval to the full committee and then to the full chamber. Differences between the projects approved by the House and Senate are resolved in joint conferences. The Congress passes separate authorization and appropriation bills that, when signed by the President, become the approved Military Construction program.

e. The cost of the above efforts normally is expensed and not capitalized.

3. DESIGN

a. Once a Military Department has validated the requirement and priority of a military construction project and inserted it in a specific fiscal year program, a design instruction is issued to the design agent who initiates the design process.

b. Design may be accomplished by contracting with an architect-engineer firm, a design build firm, or an in-house professional staff. If the design is to be contracted, 10 U.S.C. 2855 will be followed.

c. Design is accomplished in predetermined phases to assure that user requirements are addressed properly in the design and that established standards and criteria are met. The number of phases and detail required for each phase varies with each project, depending on complexity, special interest, high visibility, time constraints and funding level.

d. Normally, the critical point is at the preliminary design stage (referred to as the 35 percent stage) since this stage provides sufficient detail to define scope, criteria, and cost estimates for consideration in the budgeting process. The content of the 35 percent design submittal is defined in the contract scope of work and will vary depending on the contract delivery strategy to be used to acquire the facility. The most typical strategy is a design based on a unique one-of-a-kind effort. However, design could also be a site-adapt, a performance specification using commercially available building systems, a design-build, etc., but each of these contracting processes determines the content of the 35 percent design submittal.

e. Design includes such actions as the development of design manuals, software programs, guide specifications and standards, standard drawings, extensive site

investigation, analysis of alternative solutions, development of building systems layout, outline specifications, cost estimates, and special studies including value engineering.

f. The final design phase is initiated after thorough review by the using activities to ensure that requirements and criteria are addressed properly in the preliminary design documents and that the project has been revalidated and still is in the budget. Upon completion of the working drawings, contract specifications, and bidding documents, the project is ready to be advertised for construction. Projects require both congressional authorization and appropriation before a construction contract can be awarded.

g. The cost of the above efforts, including administrative and overhead support costs, shall be capitalized.

4. CONSTRUCTION

a. Normally, military construction projects are awarded through a competitive bid process that consists of advertising in the "Commerce Business Daily," using sealed bid procedures and awarding a firm fixed price contract to the responsible contractor submitting the lowest acceptable bid. However, as discussed previously for the design phase, alternative contracting delivery strategies may be followed in accordance with the Federal Acquisition Regulation (FAR) and congressional direction. Regardless of the method used, all requirements for construction contracts over \$250,000 must be advertised in the "Commerce Business Daily" to include details of the bidding procedures to be used.

b. Advertisement, award and administration of a construction contract require both in-house and contract efforts that include reproduction of bid documents, preparation and response to the advertisement, supervision, and administration and inspection throughout the life of the construction project, in addition to the total cost of the construction contract.

c. The cost of the above efforts shall be capitalized.

* Future Years Defense Program

** Architect and/or Engineer

1/ Reserve Component facilities are to be at 65% design complete before inclusion in the DoD budget

2/ Contracts may not be awarded without congressional authorization and appropriations.

ATTACHMENT 2 TO APPENDIX C
PLANT REPLACEMENT VALUE

The Department and the Congress recognize that there is a minimum level of facilities investment that should be made each year to protect the investment in existing facilities, ensure that facilities will continue to satisfy their designated purposes, and renew our military installations. The physical plant must be capable of supporting operational requirements and readiness, both today and in the future. The plant replacement cycle is one indicator of an appropriate facility investment level. The methodology to determine the plant replacement cycle makes use of one indicator, plant replacement value which is described in this addendum.

1. PLANT REPLACEMENT VALUE (PRV)

The PRV is the cost of replacing the current physical plant with modern facilities built at today's construction costs using today's construction standards. It includes all buildings, structures, or other improvements to real property, regardless of funding source but does not include land value or leasing costs.

2. CALCULATION

a. The PRV shall be calculated by applying current construction pricing data to the total inventory of the current physical plant. This will yield the PRV.

b. The "Tri-Service Cost and Pricing Guide" should be consulted to determine current construction prices. Appropriate unit costs may not be available in the pricing guide. If this occurs, DoD Components shall use any other supportable sources available. DoD Components should use the most accurate estimates. The PRV shall not be calculated by inflating the original facility acquisition cost to the current year, unless no other reasonable method is available.

c. The PRV shall be identified for each of the following investment categories (ICs):

- IC 01 Aviation Operational
- IC 02 Communication Operational
- IC 03 Waterfront Operational
- IC 04 Other Operational
- IC 05 Training
- IC 06 Aviation Maintenance
- IC 07 Shipyard Maintenance
- IC 08 Other Maintenance and/or Production
- IC 09 Research, Development, Test, and Evaluation
- IC 10 Petroleum, Oil and Lubricant Supply and/or Storage
- IC 11 Ammunition Supply and/or Storage
- IC 12 Other Supply and/or Storage
- IC 13 Medical and/or Dental
- IC 14 Administration
- IC 15 Troop Housing and/or Messing
- IC 16 Other Personnel Support Services
- IC 17 Utilities
- IC 18 Real Estate and Ground Structures (less land)
- IC 19 Other Facility Costs
- IC 20 Family Housing

d. Facility acquisitions include all aspects to include construction, purchases, donations, and transfers in. In effect, include any transactions that increase the size of the physical plant.

e. Facility losses include demolitions, transfers out, sales, and losses because of fire or natural disaster. In effect, include any transactions that decrease the size of the physical plant.

f. The DoD Component shall maintain an audit trail of the calculations used to develop the PRV.

3. REPORTING REQUIREMENTS

PRV information is to be furnished to the Office of the Deputy Under Secretary of Defense (Installations) within 60 days after the end of each fiscal year. The following format will be used for submitting this information.

Plant Replacement Value (PRV) for FY 19____ (As of September 30, 19____) (Dollars in Millions)					
INSTRUCTIONS					
1. List the PRVs reported for the prior FY in column 2.			3. List acquisitions and losses for the current reporting FY in columns 3b and 3c.		
2. Calculate the prior year PRVs with current reporting year values and list in column 3a.			4. The current year PRVs in column 4 (columns 3a + 3b + 3c).		
1. Facility Categories (Enter totals for each category) (Use ICs & FCC cross reference list)	2. PRV Prior FY	3. Current FY Value			4. PRV Current FY
		a. PRV Prior FY	b. Acquisitions	c. Losses	
IC 01 Aviation Operational					
IC 02 Communication Operational					
IC 03 Waterfront Operational					
IC 04 Other Operational					
IC 05 Training					
IC 06 Aviation Maintenance

INVESTMENT CATEGORIES (ICs) AND THREE-DIGIT FACILITY
CATEGORY CODE (FCC) CROSS REFERENCE LIST

Operations (all FCCs in the 100s except 171 and 179)

IC 01 - Aviation Operational Facilities

- 111 Airfield Pavements - Runways
- 112 Airfield Pavements - Taxiways
- 113 Airfield Pavements - Aprons
- 116 Airfield Pavements - Other
- 121 Airfield Fuel Dispensing
- 133 Navigation and Traffic Aids - Buildings
- 134 Navigation and Traffic Aids - Other than Buildings
- 136 Airfield Pavement Lighting
- 141 Operational - Buildings
- 149 Operational Facilities Other than Buildings

IC 02 - Communication Operational Facilities

- 131 Communications - Buildings
- 132 Communications - Other than Buildings
- 135 Communications - Lines

IC 03 - Waterfront Operational Facilities

- 122 Marine Fuel Dispensing
- 151 Piers
- 152 Wharfs
- 153 Cargo Handling or Staging Areas
- 154 Sea Walls, Bulkheads, and Quay Walls
- 155 Small Craft Berthing
- 156 Cargo Handling Facilities and/or Buildings
- 159 Other Waterfront Operational
- 161 Harbor Protection Facilities

162 Coastal Protection Facilities

163 Moorings

164 Marine Improvements

165 Dredging

169 Other Harbor and Coastal

IC 04 - Other Operational Facilities

123 Land Vehicle Fuel Dispensing

124 Operational Fuel Storage

125 Petroleum, Oil, and Lubricant (POL) Pipeline

126 Liquid Fuel and Dispensing - Other

137 Ship Navigation and Traffic Aids - Buildings

138 Ship Navigation and Traffic Aids - Other than Buildings

142 Operational - Helium Plants and Storage

143 Ship and Other Operational - Buildings

148 Ship and Other Operational - Other than Buildings

Training (FCCs 171 and 179)

IC 05 - Training Facilities

171 Training Buildings

179 Training Facilities - Other than Buildings

Maintenance and Production (all FCCs in the 200s)

IC 06 - Aviation Maintenance Facilities

211 Maintenance - Aircraft

221 Production - Aircraft

IC 07 - Shipyard Maintenance Facilities

213 Maintenance - Ships and Spares

223 Production - Ships and Spares

IC 08 - Other Maintenance and or Production Facilities

- 212 Maintenance - Guided Missiles
- 214 Maintenance - Tank and Automotive
- 215 Maintenance - Weapons and Spares
- 216 Maintenance - Ammunition, Explosives, and Toxic
- 217 Maintenance - Electronics and Communications Equipment
- 218 Maintenance - Facilities for Miscellaneous
- 219 Maintenance - Installation, Repair, and Operation
- 222 Production - Guided Missiles
- 224 Production - Tank and Automotive
- 225 Production - Weapons and Spares
- 226 Production - Ammunition, Explosives, and Toxic
- 227 Production - Electronics and Communications Equipment
- 228 Production - Facilities for Miscellaneous
- 229 Production - Installation, Maintenance, Repair, and Operations

Research, Development, Test and Evaluation (RDT&E) (all FCCs in the 300s)

IC 09 - RDT&E Facilities

- 310 Science Labs
- 311 Aircraft
- 312 Missile and Space
- 313 Ship and Marine Equipment
- 314 Tank and Automotive
- 315 Weapons and Weapon Systems
- 316 Ammunition, Explosives, and Toxic
- 317 Electronic, Communications, and Electrical Equipment
- 318 Propulsion
- 319 Miscellaneous Items and Equipment
- 320 Underwater Equipment

321 Technical Services

371 Range Facilities

390 Other than Buildings

Supply (all FCCs in the 400s)

IC 10 - POL Supply and or Storage Facilities

411 Liquid Fuel Storage - Bulk

412 Liquid Storage Other than Water, Fuel, and Propellants

IC 11 - Ammunition Supply and or Storage Facilities

421 Ammunition Storage - Depot and Arsenal

422 Ammunition Storage - Installation and Ready Issue

423 Ammunition Storage - Liquid Propellant

424 Weapon-Related Battery Storage

425 Open Ammunition Storage Pad (Other)

IC 12 - Other Supply and or Storage Facilities

431 Cold Storage - Depot and In-Transit

432 Cold Storage - Installation and Ready Issue

441 Storage - Covered - Depot and Arsenal

442 Storage - Covered - Installation and Organizational

451 Storage - Open - Depot

452 Storage - Open - Installation and Organizational

Hospital and Medical (all FCCs in the 500s)

IC 13 - Medical and or Dental Facilities

510 Medical Center and or Hospital

530 Laboratories

540 Dental Clinics

550 Dispensaries and/or Clinics

Administrative (all FCCs in the 600s)

IC 14 - Administrative Facilities

610 Administrative Buildings

620 Administrative Structures - Underground

690 Administrative Structures - Other than Buildings

Troop Housing and or Messing (all FCCs 721 through 725)

IC 15 - Troop Housing and or Messing Facilities

721 UPH - Enlisted Personnel

722 UPH - Mess Facilities

723 UPH - Detached Facilities

724 UPH - Officers Quarters

725 UPH - Emergency

Community (all FCCs 730 through 760)

IC 16 - Other Personnel Support Services Facilities

730 Personnel Support and Service

740 Morale, Welfare, and Recreational (MWR) - Interior

750 Morale, Welfare, and Recreational (MWR) - Exterior

760 Museums and Memorials

Utilities (all FCCs in the 800s except 851, 852, 860, 871, and 872)

IC 17 - Utilities Facilities

811 Electrical Power - Source

812 Electrical Power - Transmission and Distribution Lines

813 Electrical Power - Substations and Switching Stations

821 Heat - Source

822 Heat - Transmission and Distribution Lines

823 Heat and Gas - Source

824 Heat and Gas - Transmission

- 826 Refrigeration (Air Conditioning) - Source
- 827 Chilled Water (Air Conditioning) - Transmission and Distribution
- 831 Sewage and Industrial Waste - Treatment and Disposal
- 832 Sewage and Industrial Waste - Collection
- 833 Refuse and Garbage
- 841 Water - Supply, Treatment, and Storage - Potable
- 842 Water - Distribution System - Potable
- 843 Water - Fire Protection
- 844 Water - Supply and Storage - Nonpotable
- 845 Water - Distribution System - Nonpotable
- 880 Fire and Other Alarm Systems
- 890 Miscellaneous Utilities

Real Estate and/or Roads and/or Grounds (other than land) (all FCCs in the 900s plus 851, 852, 860, 871, and 872)

IC 18 - Real Estate and Ground Structures (less land)

- 851 Roads
- 852 Sidewalks and Other Pavement
- 860 Railroad Tracks
- 871 Grounds Drainage
- 872 Ground Fencing, Gates, and Guard Towers
- 912 Public Domain Withdrawal
- 923 Foreign Rights
- 931 Buildings
- 932 Site Improvement
- 933 Demolition
- 939 Other

Other

IC 19 - Other Facility Costs

Family Housing (FCCs 711 through 714)

IC 20 - Family Housing Facilities

711 Family Housing - Dwellings

712 Family Housing - Trailers

713 Family Housing - Trailer Sites

714 Family Housing - Detached Facilities

CHAPTER 18

PUBLIC ENTERPRISE AND TRUST FUNDS1801 GENERAL

This chapter identifies the policies and procedures to guide budget execution for public enterprise and trust funds.

1802 BACKGROUND

180201. This guidance is applicable to the following Funds:

Public Enterprise Funds

National Defense Stockpile Transaction Fund

Army Conventional Ammunition Working Capital Fund

Pentagon Reservation Maintenance Revolving Fund (PRMRF)

National Defense Sealift Fund

Buildings Maintenance Fund (BMF)

Trust Funds

National Security Education Trust Fund

Department of the Navy Trust Revolving Funds *

Department of the Air Force Trust Revolving Funds *

Surcharge Collections, Sales of Commissary Stores, Defense

* Exempt from apportionment

180202. Appropriations usually are provided to start, increase the size, or replace significant losses of a public enterprise or trust fund. Also, existing resources in other accounts may be transferred to a revolving fund as capitalized assets to serve these same purposes in lieu of an appropriation. The resources used to commence or increase the size of a revolving fund are commonly referred to as “the corpus of the public enterprise or trust fund.” The corpus forms the nucleus of resources used to acquire the items needed to perform the mission of the public enterprise or trust fund.

180203. Revenues are generated in DoD public enterprise or trust funds from customers buying goods or services. The funds collected from customers are used to pay for the acquisition of resources needed to operate the public enterprise or trust fund. In public enterprise or trust funds that are apportioned by the OMB, the ability to incur obligations is limited to the amount of authority approved for obligation during the budget review as amended by unanticipated events during execution. A DD Form 1105, “Apportionment and Reapportionment Schedule,” is required to be submitted to the OMB for approval of the amount of obligation authority needed for the operation of the public enterprise or trust fund for a fiscal period, usually a full fiscal year.

Budgetary resources available for apportionment action include:

- A. New budget authority (appropriations).
- B. Available unobligated balances at the beginning of the fiscal period.
- C. Reimbursements and other income (also known as offsetting collections credited to the appropriation or fund account).
- D. Recoveries of prior year obligations.
- E. Restorations.
- F. Anticipated contract authority.

180204. The apportionment of anticipated reimbursements as obligational authority in no way authorizes a public enterprise or trust fund to obligate in excess of the orders received from within the Federal Government and advances received for orders outside the Federal Government. Orders from state, local, and foreign governments are considered to be orders from the public.

180205. Other assets, whether of a working capital nature such as inventories of stock or of a fixed asset nature, are not considered as a budgetary resource. Such assets, therefore, do not enter into the determination of unobligated balances. However, claims against budgetary resources, such as accounts payable and undelivered orders, are obligations of a public enterprise or trust fund and must be subtracted from unobligated balances when incurred. Obligations for the procurement of inventories, as well as for the acquisition of other public enterprise or trust fund assets, must be recognized, recorded, and reported along with other obligations.

180206. The amount of contract authority apportioned or the available balance of contract authority may be less than the total budgetary resources available in a working capital fund. The difference, which cannot be obligated unless it is apportioned, may be characterized either as an unapportioned balance of a public enterprise or trust fund or a restrictive withholding. The concept of an unapportioned balance is one of preserving a portion of the fund's capital so it may continue to revolve or represents those resources not scheduled for obligation within a fiscal year.

180207. The incurring of obligations or authorizing the incurrence of obligations in excess of apportioned budgetary resources must be reported as an apparent violation of the Antideficiency Act, as required by DoD Directive 7200.1. This reporting requirement applies whether or not a public enterprise or trust fund has unapportioned budgetary resources or nonbudgetary assets greater than the amount of the deficiency.

1803 EXECUTION REQUIREMENTS

180301. Apportionment - A DD Form 1105 (Apportionment and Reapportionment Schedule) is to be prepared by the managing DoD Component and submitted to the ODC(P/B)

Directorate for Revolving Funds or Directorate for Investment for the National Defense Stockpile Transaction Fund the William Langer Jewel Bearing Plant Revolving Fund; the National Defense Sealift Fund (Investment); the Emergency Response Fund; the Surcharge Collections, Sales of Commissary Stores, Defense account; the Army Conventional Ammunition Working Capital Fund; the Pentagon Reservation Maintenance Revolving Fund; the Buildings Maintenance Funds; and any other Public Enterprise or Management Fund to which the Congress appropriates funds. The DD Form 1105 will be reviewed and submitted by the OUSD(C) to the OMB for approval.

180302. Annual Operating Budget - The ODC(P/B) Directorate for Revolving Funds or Directorate for Investment will issue funding documents to the applicable DoD Component granting authority to incur cost or obligate funds for the National Defense Stockpile Transaction Fund; the William Langer Jewel Bearing Plant Revolving Fund; the National Defense Sealift Fund (Investment); the Emergency Response Fund; the Surcharge Collections, Sales of Commissary Stores, Defense account; the Army Conventional Ammunition Working Capital Fund, the Buildings Maintenance Fund; and the Pentagon Reservation Maintenance Revolving Fund. Each operating budget provides an obligation limitation (subject to 31 U.S.C. 1517a) which, if exceeded, is a statutory violation. Each Component is responsible for taking actions that maintain a positive cash balance in order to remain solvent and enable operations (disbursements) to continue. It is a statutory violation for a Component's cash to go below zero at any time. A sample of a funding document is on the next page.

180303. Adjusting Component Resources Based on budget execution experience, Components periodically request the ODC(P/B) Directorate for Revolving Funds or Investment to adjust their obligation limitations. Unless the Congress has provided a specific limitation or other direction that would preclude making a requested adjustment, a Component's request will be evaluated on the merit of the justification provided. If approved by ODC(P/B), a revised apportionment will be requested from OMB and, if approved by OMB, the Component-requested revision will be reflected as a revised limitation of the applicable operating budget.

180304. Execution Review The ODC(P/B) Directorate for Revolving Funds or Investment receives a monthly DD Form 1176 Report (Report on Budget Execution) for each account (see Chapter 4, Volume 6 of this Regulation). In addition, revenue and expense statements, similar to the statement of operations for working capital funds (see Chapter 70, Volume 11B of this Regulation), are received for the PRMRF and BMF accounts. Each account is reviewed to determine actual results of operation in comparison with plans provided by the Components by month for obligations, disbursements, and collections, as well as revenue, expense, and net operating results for those using income statements, and for civilian full-time equivalents (FTEs) or military strength for those whose budgets include personnel support. When there are significant deviations from plan in actual execution, the ODC(P/B) analyst and the Component mutually determine the management actions that may be required to bring execution back into line with the plan, or the need for and justification to revise plans consistent with current and more realistic financial expectations.

(NAME OF FUND AND APPROPRIATION CODE)

CHAPTER 19

WORKING CAPITAL FUNDS

1901 GENERAL

This chapter provides the policies and procedures to guide budget execution for working capital funds.

1902 BACKGROUND

190201. This guidance is applicable to working capital funds.

190202. Appropriations usually are provided to start, increase the size, or replace significant losses of a public enterprise or working capital fund. Also, existing resources in other accounts may be transferred to a working capital fund as capitalized assets to serve these same purposes in lieu of an appropriation. The resources used to commence or increase the size of a working capital fund are commonly referred to as “the corpus of the revolving fund.” The corpus forms the nucleus of resources used to acquire the items needed to perform the mission of the working capital fund.

190203. Revenues are generated in DoD revolving funds from customers buying goods or services. The funds collected from customers are used to pay for the acquisition of resources needed to operate the working capital fund. In working capital funds that are apportioned by the OMB, the ability to incur obligations is limited to the amount of authority approved for obligation during the budget review as amended by unanticipated events during execution. A DD Form 1105, “Apportionment and Reapportionment Schedule,” is required to be submitted to the OMB for approval of the amount of obligation authority needed for the operation of the working capital fund for a fiscal period, usually a full fiscal year.

Budgetary resources available for apportionment action include:

- A. New budget authority (appropriations).
- B. Available unobligated balances at the beginning of the fiscal period.
- C. Reimbursements and other income (also known as offsetting collections credited to the appropriation or fund account).
- D. Recoveries of prior year obligations.
- E. Restorations.
- F. Anticipated contract authority.

190204. The apportionment of anticipated reimbursements as obligational authority in no way authorizes a working capital fund to obligate in excess of the orders received from within the Federal Government and advances received for orders outside the Federal Government. Orders from state, local, and foreign governments are considered to be orders from the public.

190205. Other assets, whether of a working capital nature such as inventories of stock or of a fixed asset nature, are not considered as a budgetary resource. Such assets, therefore, do not enter into the determination of unobligated balances. However, claims against budgetary resources, such as accounts payable and undelivered orders, are obligations of a working capital fund and must be subtracted from unobligated balances when incurred. Obligations for the procurement of inventories, as well as for the acquisition of other working capital fund assets, must be recognized, recorded, and reported along with other obligations.

190206. The amount of contract authority apportioned or the available balance of contract authority may be less than the total budgetary resources available in a working capital fund. The difference, which cannot be obligated unless it is apportioned, may be characterized as either an unapportioned balance of a revolving fund or a restrictive withholding. The concept of an unapportioned balance is one of preserving a portion of the fund's capital so it may continue to revolve or represents those resources not scheduled for obligation within a fiscal year.

190207. The incurring of obligations or authorizing the incurrence of obligations in excess of apportioned budgetary resources must be reported as an apparent violation of the Antideficiency Act, as required by DoD Directive 7200.1. This reporting requirement applies whether or not a working capital fund has unapportioned budgetary resources or nonbudgetary assets greater than the amount of the deficiency.

1903 EXECUTION REQUIREMENTS

190301. Apportionment The OMB apportions to the USD(C) the Working Capital Funds appropriation and contract authority for the current fiscal year by means of a DD Form 1105 as shown later in the chapter. The DD Form 1105 is prepared by the Revolving Funds Directorate, reviewed by the Deputy Comptroller (Program/Budget), and submitted to the OMB for approval. Contract authority on the DD Form 1105, authority to obligate funds in anticipation of receipt of customer orders, is provided for Supply-type business area operations (Supply Management, Distribution Depots, the Defense Reutilization and Marketing Service, Navy Logistics Support, and DeCA Resale Operations), and the capital purchase authority of all business areas.

The initial apportionment of contract authority for a year normally is based on the operating and capital budget (obligation) estimates for each Supply-type business area and the Working Capital Funds appropriation request reflected in the budget year column of last year's President's budget (the Program and Financing statement). Contract authority is also requested and provided for Supply-type business area commitments based on the level of actual commitments incurred as reflected in current year accounting reports. Requested adjustments to the initial apportionment

are provided to OMB in February/March reflecting revised estimates in the current year column of the President's budget submission just provided to Congress, and at subsequent times during the year reflecting significant changes that are anticipated to occur as a result of budget execution experience.

The Defense Finance and Accounting Service receives a document from the Revolving Funds Directorate that notes 1105-approved resources and customer orders by business area reflected in the relevant President's budget, entitled "Working Capital Funds 1176 Controls" (shown later in this chapter). It is used to establish the level of anticipated resources on lines 1.D. (contract authority available) and 3.C. (anticipated orders for the rest of the year) of the DD Form 1176 and therein are part of the equation in determining budgetary resource totals.

190302. Annual Operating Budget The Revolving Funds Directorate issues initial Annual Operating Budgets (AOBs) for each Components' Working Capital Funds business area prior to the beginning of the fiscal year. A sample is shown later in this chapter. The AOB identifies an operating budget, net operating result, and unit cost(s) targets and capital budget limitation (subject to 31 U.S.C. 1517) for each business area.

Cash is centrally managed by the Army, Navy, Air Force, USTRANSCOM, and DLA for the Defense Agencies. Each is responsible for taking actions that enable their Component to maintain a positive balance in order to remain solvent and allow operations (disbursements) to continue. It is a violation of the Antideficiency Act if a Component's cash goes below zero at any time. Components shall maintain a positive budgetary resource balance, i.e., obligations do not exceed resources comprised of any appropriation, unobligated balances carried forward from a previous period, current or prior year transfers of balances from other accounts, current year unobligated balances, and recoveries from the de-obligation of prior year obligations. Additionally, the level of OMB-apportioned contract authority may be delineated specifically on applicable AOBs that provide authority for which budgetary resources are not required.

190303. Budgetary Resources Obligations or accrued expenses should not be authorized or incurred in a working capital fund business area unless available resources, or the "bank balance" as reflected in line 8.D. of the DD Form 1176 or the sum of lines 9.A.1., 9.B., and 9.C. of the SF 133 exceed the proposed obligation or accrued expense. Obligor funds or incurring an accrued expense that results in the business area account being "overdrawn" can result in a violation of the Antideficiency Act for the account manager. Such violations are reportable to the President and the Congress, and can involve criminal prosecution for the responsible person or people as well.

Calculating budgetary resources, which must remain positive at all times, is as follows:

DD Form 1176 Report Lines

Add: Line 6 - Total Budgetary Resources

Less: Line 1D - Anticipated Resources

Less: Line 2C - Anticipated Transfers of Prior Year Balances

Less: Line 3C - Anticipated Orders for the rest of the Year
 Less: Line 7 - Obligations Incurred
 Less: Line 9 - Unobligated Balances not Available
 Less: Line 8A - Commitments Outstanding
 Equals: **Line 8D - Budgetary Resources Available for Obligations**

SF133 Report Lines

Add: Line 7 - Total Budgetary Resources
 Less: Anticipated Borrowing Authority in Line 1B
 Less: Anticipated Contract Authority in Line 1C
 Less: Line 1E - Other (Anticipated) Budget Authority
 Less: Line 2C - Anticipated Transfers of Prior Year Balances
 Less: Line 3C - Anticipated Spending Authority
 Less: Line 3D - Anticipated Transfers from Trust Funds
 Less: Line 4B - Anticipated Recovery of Prior Year Obligations
 Less: Line 8 - Obligations Incurred
 Less: Line 9A2 - Anticipated Unobligated Apportionment
 Less: Line 10 - Unobligated Balances not Available
 Equals: **Line 9A1 - Available Unobligated Apportionment**
Plus: Line 9B - Balance Exempt from Apportionment
Plus: Line 9C - Other Available Unobligated Balances

190304. Adjusting Component Resources Based on budget execution experience, Components periodically request the Revolving Funds Directorate to adjust their targets and/or capital budget limitation. Unless the Congress has provided a capital purchase limitation or other direction that would preclude making a requested adjustment, a Component's request will be evaluated and approved or disapproved and reflected in a revised AOB based on the merit of the justification provided.

190305. Execution Review The Revolving Funds Directorate receives from DFAS a monthly DD Form 1176 (Report on Budget Execution) and AR(M)1307 Report (Working Capital Funds Accounting Report). See, respectively, Chapter 4, Volume 6, and Chapter 70, Volume 11B, of this Regulation. In some cases, a unit cost report also is delivered from a Component. Each is reviewed by the Revolving Funds Directorate to determine actual results of operation in comparison with plans by month for disbursements, collections, revenue, expense, net operating results, and unit costs. Typically in February, May, and August, each Component's results of operation (through the latest available accounting period) are formally reviewed by the Principal Deputy Under Secretary of Defense (Comptroller), Deputy Comptroller (Program/Budget), and Director for Revolving Funds to determine the financial operations that are proceeding according to plan and, when there are significant deviations from plan in actual execution, to determine the management actions that may be required to bring execution back into line with the plan or revise plans consistent with current and more realistic financial expectations.

a/ In addition to amounts apportioned herein, recoveries of prior year obligations are automatically apportioned.

b/ Amounts apportioned herein are applicable to Working Capital Funds Supply Management, Distribution Depots, Reutilization and Marketing Services, Commissary Resale Stocks, and Logistics Support Activities business area operating expenses, appropriations, and the entire Working Capital Funds capital investment budget.

c/ Pursuant to 10 U.S.C. 2210(b), obligations and commitments may be incurred in excess of apportioned resources actually realized in the amount of contract authority approved, but not in excess of the total apportioned. The actual unfunded balance of contract authority of \$9,529,049,107 on October 1, 1995 is increased by \$30,721,876,469 provided that this amount is automatically reduced to the extent that orders are received.

Authorization Number: AFDM-96-2	Date:	Approved:	

LIMITATIONS AND GUIDANCE:

1. This AOB revision reflects estimates contained in the FY 1996 column of the FY 1997 President's budget and \$.4 million in additional FY 1992 capital purchase authority as noted in a February 28, 1996 memo from the Director for Revolving Funds, subject: Request for \$3.2 Million Depot Maintenance Business Area FY 1996 Capital Funds. This AOB revision also includes \$65,000 in additional FY 1993 capital purchase authority for the Air Mobility Command to finance an Intrusion Detection System that the Air Force Audit Agency determined should have been a capital rather than operating budget requirement.
2. Operating costs are not to be incurred beyond the total approved amount shown for the Operating Budget without the specific prior approval of this office.
3. Major Maintenance and Repair. The FY 1996 obligations for major maintenance and repair will be treated as a direct expense within the operating budget authority.
4. The amount listed in the Total Cost Column for the Capital Obligation Authority represents a limitation subject to the provision of 31 U.S.C. 1517, the Antideficiency Act. Obligations are not to be incurred beyond the total approved amount shown for each year for the Capital Budget (as modified by reprogramming per authority provided in Chapter 9, Volume 2B, of this Regulation) without the specific prior approval of the ODC(P/B). No other funds are available for Capital Obligations except as provided in this document.
5. NOR: The NOR provides the overall net operating results expected to be achieved in the Business by the end of the year. The NOR provides a primary financial management goal and will be used in conjunction with other performance measures to assess the overall operational effectiveness of the business area, as identified and reported monthly on the AR 1307 Report. For each business area, the Component is responsible for preparing a monthly Revenue and Cost Plan. Joint execution reviews of this plan will be conducted by ODC(P/B) and the cognizant Component in May and August 1996.
6. CASH MANAGEMENT: The January 5, 1995, USD(C) memorandum, subject : Working Capital Funds Cash Management Responsibility, assigned the Services and DLA the responsibility for Working Capital Funds cash management for designated business areas effective February 1, 1995. This cash management responsibility for the Air Force entails taking action to maintain a positive cash balance for Air Force business areas, in total, at all times. Failure to maintain a positive balance will result in a statutory violation of 31 U.S.C. 1517 by the Component. The Component may require DFAS to vary its billing cycle or advance bill, when it is deemed necessary to do so, in order to maintain cash solvency. The magnitude, duration, and reason for advance billing by business area must be reported by the initiating Component to the Director for Revolving Funds within 15 calendar days of the end of the month in which the advance billing took place. The Component remains responsible for compliance with monthly execution of collections and disbursements in accordance with the monthly approved plan.
7. UNIT COST: The total cost for those outputs identified by a unit cost is predicated on a projected level of work load. Components may request increases in Cost Authority based on an increase in the number or value of orders accepted. Conversely, if actual work load declines below levels anticipated, appropriate reductions will be made to the total costs shown in this document.
8. PERFORMANCE GOALS: Descriptions of performance effectiveness measures are contained in the Working Capital Funds Milestone II report submitted to Congress on March 1, 1993.

<u>Measure</u>	<u>Goal</u>
Schedule Conformance	TBD
Quality Deficiency Reports (QDRs)	TBD
Net Operating Results	\$-93.9M

9. OTHER:

- a. No cost may be incurred to fund Base Realignment and Closure Program expenses.
- b. Included in the total operating cost authority in this document is \$105.8 million in anticipated depreciation costs, based on current estimates of actual depreciation expenses.
- c. By DoD policy, FY 1996 working capital fund costs for civilian separation incentives are to be financed by working capital funds.
- d. This document reflects capital program threshold of \$100,000.
- e. The procedures for the release of JLSC-related hardware capital authority are as follows: JLSC will identify the hardware required, the dollar value of the hardware, the site where the hardware will be installed, and the required installation date to the USD(C). DISA and the Component Comptroller will be notified and requested to verify the requirement. Subsequent to the DISA/Component Comptroller verification of the requirement, the capital authority will be released in an update to the AOB. \$11.6 million for DMSS is withheld pending the above-noted verification of requirement.

CAPITAL BUDGET PROGRAM

The Capital Budget is to be executed based on the approved annual programs contained in the President's budget as modified by approved budget decisions. Deviations from the President's budget, that are consistent with approved reprogramming criteria, must be identified to the ODC(P/B) Director for Revolving Funds during the scheduled execution review. Listed below is the approved project list for capital budget obligations.

Capital Project Within Scope Obligation Adjustments

Capital obligation adjustments must be charged to the program year cited for the original project. Capital obligation authority can be provided for any program year for within-scope increases if the following conditions are met; (1) the original program year must have sufficient unobligated budget authority (original program plus program adjustments less actual obligations) to accommodate the adjustment, and (2) the total obligations, including both new obligations and all adjustments, cannot exceed the total obligation authority for all program years issued on the AOB. If these conditions are met, this AOB automatically provides the authority to obligate prior year program funds for within scope capital adjustments of less than \$100,000. Since the adjustments must cite the original program year, the obligation authority for a currently issued program year must be reduced to offset the adjustments if sufficient funding for the original program year is not available on the AOB. The offset must be sufficient to limit total capital obligations during the fiscal year to the total obligation authority issued on the AOB. Subsequent AOBs may restore this authority by issuing the prior year program funds if appropriate.

FOREWORD

This Volume of the DoD Financial Management Regulation is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures." It governs financial management by establishing and enforcing requirements, principles, standards, systems, procedures, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the Department of Defense. It directs financial management requirements, systems, and functions for all appropriated, nonappropriated, working capital, revolving, and trust fund activities. In addition, it directs statutory and regulatory financial reporting requirements.

This Volume of the Regulation applies to the Office of the Secretary of Defense; the Military Departments; the Chairman of the Joint Chiefs of Staff and the Joint Staff; the Unified and Specified Commands; the Inspector General of the DoD, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components").

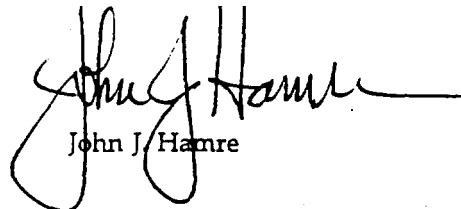

This Volume of the Regulation is effective immediately and is mandatory for use by all DoD Components. The Heads of the DoD Components shall ensure that it is adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives/regulations without prior written approval from the Office of the Under Secretary of Defense

The reporting requirements contained in this regulation are exempt from licensing in accordance with paragraph E.4.f., of DoD 8910. I-M, "Procedures for Management of Information Requirements."

Forward recommended changes to this Volume of the Regulation through channels to the address below. Submit requests for deviations from or exceptions to specific standards, with justification, to

Office of the Under Secretary of Defense (Comptroller)
1100 Defense Pentagon
Washington, DC 20301-1100

DoD Components will be provided copies of this Volume of the Regulation through their normal publications channels. Other Federal Agencies and the public may obtain copies of this volume from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161; telephone (703) 487-4650,

John J. Hamre

INTRODUCTION TO THE DoD FINANCIAL MANAGEMENT REGULATION

GENERAL

The DoD Financial Management Regulation provides all DoD components with the policy, regulation, and procedures within the area of responsibility of the Under Secretary of Defense (Comptroller) (USD(C)). The Regulation consists of the following 15 volumes:

- | | |
|--|--|
| 1. General Financial Management Information, Systems, and Requirements | 7. Military Pay Policy and Procedures |
| 2. Budget Formulation and Presentation | 8. Civilian Pay Policy and Procedures |
| 3. Budget Execution - Availability and use of Budgetary Resources | 9. Travel Policy and Procedures |
| 4. Accounting Policy and Procedures | 10. Contract Payment Policy and Procedures |
| 5. Disbursing Policy and Procedures | 11. Reimbursable Operations, Policy and Procedures |
| 6. Reporting Policy and Procedures | 12. Special Accounts, Funds and Programs |
| | 13. Nonappropriated Funds Policy and Procedures |
| | 14. Administrative Control of Appropriations |
| | 15. Security Assistance Policy and Procedures |

AUTHORIZATION

This Regulation is issued by the USD(C) under authority of Department of Defense Instruction

7000.14 "DoD Financial Management Policy and Procedures," dated November 15, 1992.

PARAGRAPH NUMBERING SYSTEM

The paragraph numbering system of this Regulation is consistent for all 15 Volumes. The 6 digit paragraph number and its subparagraph designators are formulated as follows:

01
CHAPTER 1

01
SECTION 1

01
PARAGRAPH 1

A. 1. a. (1) (a)
SUBPARAGRAPHS

PUBLICATIONS SUPERSEDED

This Volume of the Regulation
(Volume 4) will supersede the following:

DoD 7220.9-M "DoD Finance and Accounting
Manual" (Chapters: 31, 32, 33, 34, 35, 36, 37, 41,
42, 43, 44, 45, 46, 51, 52, 61, 63, 64, 71, 72, 73, 74,
75,).

CHAPTER 1

FINANCIAL CONTROL OF ASSETS0101 GENERAL

010101. Purpose. This chapter sets forth overall standards to be followed in accounting for assets. One of the objectives of Department of Defense (DoD) accounting is establishing accounting control over all assets provided to, or acquired by, the DoD. Assets shall be under continuous accounting control from acquisition to disposition. Such control helps ensure proper and authorized use as well as adequate care and preservation, since no asset can be acquired, put into use, transferred, written down, written off, or disposed of, without the proper authorization necessary to document and record the transaction. All tangible assets provided to the DoD shall be accounted for, including assets in transit and assets in the hands of contractors, private parties, and other government agencies.

★ 010102. Overview. A DoD asset is any item of economic value owned by a DoD Component or held in a fiduciary capacity under the control of a DoD Component. The item may be physical in nature (tangible) or a DoD Component may have a right to control the item (intangible). The value of a DoD asset is expressed in terms of its acquisition cost and control of the asset by a particular DoD Component must be the result of a past transaction or event.

★ 010103. Entity vs. Nonentity Assets. Entity assets are those assets which the reporting DoD Component has authority to use in its operations. The authority to use assets in a DoD Component's operations means that the DoD Component has the authority to decide how the asset is used, or is legally obligated to use the asset to meet statutory obligations. Nonentity assets are those assets that are held by a DoD Component but are not available for the Component to use in its operations. In some circumstances, a DoD Component may maintain cash or other nonentity assets in a fiduciary capacity for the U.S. Treasury, other government agencies or nonfederal entities. Entity assets include real property assets used in the operations of the Defense Agencies (e.g., the Defense Logistics Agency Headquarters building located at Ft. Belvoir). Such real property assets are required by statute to be recorded in the real property databases of the Military Departments, but are predominately used by the Defense Agencies and are considered entity assets of the Defense Agencies for financial statement purposes. Entity cash and assets should be reported separately from nonentity cash and assets.

★ 010104. Intragovernmental vs. Public Transactions. Intragovernmental assets arise from transactions among federal agencies. Within the DoD, intragovernmental assets represent claims of a Military Department or Defense Agency against other DoD Components and other federal agencies. Intragovernmental liabilities represent claims of other federal agencies against the Department. Public assets arise from transactions between DoD Components and nonfederal entities. The term "nonfederal entities" encompasses domestic and foreign persons and domestic and foreign organizations outside the U.S. Government.

★ 010105. The transactions discussed in chapters 2 through 7 of this Volume frequently will require compound accounting entries; that is, accounting entries must be made simultaneously in both the proprietary accounts and the budgetary accounts. Both proprietary and budgetary entries will be shown, where applicable. Additional information on budgetary accounts not covered in this chapter are included in Volume 3, “Budget Execution - Availability and Use of Budgetary Resources” to this Regulation.

0102 ACCOUNTING STANDARDS

010201. The specific accounting standards for each category of assets are discussed in the sections that concern those assets. The following general standards apply to all assets.

010202. An asset is an economic resource available to the DoD and has three essential characteristics.

A. It has a capacity to contribute to the accomplishment of the DoD mission. This capacity often is called “service potential.”

B. The DoD can use the asset or control access of others to the asset.

C. The transaction or event giving rise to the DoD’s right to, or financial control over, the asset has already occurred.

010203. Noncash assets shall be valued promptly, once acquired by or taken into possession by the DoD, and subjected to monetary accounting control.

★0103 FUND BALANCE WITH TREASURY AND CASH

010301. The principal DoD cash account is its fund balance with the Treasury. “Fund Balance With Treasury” includes all funds on deposit with Treasury reported on the SF 224 Statement of Transactions, SF 1219 Statement of Accountability and/or Financial Management Service 2108 Year-end Closing Statement. The fund balance decreases when disbursements are made, transfers are issued, and rescissions are authorized by the Congress. The reporting entity will reconcile the Department’s “Fund Balance With Treasury” general ledger account at the appropriation level to Treasury. This section discusses standards for accounting for transactions affecting cash. The Treasury Financial Manual and Title 7 of the General Accounting Office Policies and Procedures Manual for the Guidance of Federal Agencies contain specific processing requirements for disbursing officers’ transactions.

★ 010302. In addition to “Fund Balance With Treasury,” DoD reporting entities may hold cash. Cash includes all monetary resources on hand or on deposit with banks and other financial institutions, including coins, currency, and readily negotiable instruments (such as checks and money orders). Cash must be recognized as an entity or nonentity asset and consists of the following:

★ A. Undeposited Collections. Coins, paper currency, and readily negotiable instruments, such as money orders, checks, and bank drafts on hand or in transit for deposit.

★ B. Imprest Funds. The authorized amount of cash held by disbursing officers at personal risk. (With the exception of contingency operations and exceptional circumstances, imprest funds are not authorized within the DoD.)

★ C. Other Cash. Cash holdings other than undeposited collections and imprest funds.

★ D. Other Monetary Assets. The balance of monetary assets, including gold (valued at market), special drawing rights, and U.S. Reserves in the International Monetary Fund.

★ E. Foreign Currency. The U.S. dollar equivalent of foreign government currency.

010303. Restricted Cash. Cash may be restricted. Restrictions are usually imposed on cash deposits by law, regulation, or agreement. Nonentity cash is always restricted cash. Entity cash may be restricted for specific purposes. Such cash may be in escrow or other special accounts. Financial reports should disclose the reasons and nature of restrictions.

010304. The following standards apply to accounting for cash.

A. Cash accounting shall:

1. Be complete, accurate and timely.
2. Cover cash receipts, cash disbursements, and cash balances.
3. Comply with applicable laws and regulations.
4. Disclose errors, losses, and gains.

B. Cash receipts shall be recorded immediately upon collection, kept under control, and deposited intact as soon as practicable. Cash collections shall not be held by the disbursing officer to cover cash disbursements.

C. Disbursements shall be made only after evidence of performance has been received or an advance payment has been authorized. Disbursements shall be recorded promptly in the applicable DoD accounting system and reported in the Statement of Transactions.

D. Cash receipts and disbursements are to be reconciled with appropriate documents and accounting records, as applicable within each accounting period.

E. Foreign currencies shall be accounted for in subsidiary accounts separate from U.S. currency. Foreign currencies shall be reported at the U.S. dollar equivalent using the exchange rates prescribed by the Secretary of the Treasury. The fact that a foreign currency is not freely exchangeable shall be footnoted on reports. Accounting entities may prepare financial statements for their own use, which may or may not be in U.S. dollars. These lower level statements shall be translated into U.S. dollars when used to prepare departmental financial statements.

F. Guidance relating to cash management procedures prescribed by the Treasury Department is in Chapter 2 of this Volume.

0104 RECEIVABLES

★ 010401. Amounts due the DoD shall be recorded accurately in the appropriate receivable account in the accounting period during which the transaction or event giving rise to the receivable occurs. Receivables arise from claims to cash or other assets and include accounts receivable, interest receivable, and loans receivable.

★ 010402. A receivable should be recognized when a federal entity establishes a claim to cash or other assets against other entities, either based on legal provisions, such as a payment due date (e.g., taxes not received by the due date they are due), or goods or services provided. If the exact amount is unknown, a reasonable estimate should be made.

★ 010403. Guidance relating to receivables is contained in Chapter 3 of this Volume.

★0105 INVENTORY AND RELATED PROPERTY

★ 010501. Inventory is tangible personal property that is (1) held for sale, (2) in the process of production for sale, or (3) to be consumed in the production of goods for sale or in the provision of services for a fee. Inventory includes items for sale or transfer to (1) entities outside the federal government, or (2) other federal entities.

★ A. Inventory shall be recognized as an asset when title passes to the purchasing entity or when the goods are delivered to the purchasing entity. Delivery or constructive delivery shall be based on the terms of the contract regarding shipping and/or delivery.

★ B. Inventory shall be valued at either (1) historical cost, or (2) latest acquisition cost.

★ 010502. Guidance relating to inventories is contained in Chapter 4 of this Volume as well as Volume 11B of this Regulation.

★ 010503. Related property includes operating materials and supplies, stockpile materials, seized and forfeited property, foreclosed property, and goods held under price support

and stabilization programs. Guidance on such related properties is contained in Chapter 4 of this Volume.

★0106 ADVANCES AND PREPAYMENTS

★ 010601. Advances. Advances are cash outlays made by a federal entity to its employees, contractors, grantees, or others to cover a part or all of the recipients' anticipated expenses or as advance payments for the cost of goods and services the entity acquires. Common examples are travel advances which are made in contemplation of future travel expenses or advances to contractors which are made in contemplation of future receipt of inventory or fixed assets. Advances are reduced when related goods or services are received, contract terms are met, or progress is made under a contract, or prepaid expenses expire.

★ 010602. Prepayments. Prepayments are payments made by a federal entity to cover certain periodic expenses before those expenses are incurred. Typical prepaid expenses are rents paid to a lessor at the beginning of a rental period. Prepayments are reduced when goods or services are received, contract terms are met, or progress is made under a contract.

★ 010603. Advances and prepayments are assets of the paying entity.

★ 010604. Advances and prepayments made from one federal entity to another federal entity are intragovernmental transactions and should be accounted for and reported separately from those made to nonfederal entities.

★ 010605. Guidance relating to advances and prepayments is contained in Chapter 5 of this Volume.

★0107 PROPERTY, PLANT AND EQUIPMENT

★ 010701. Property, plant and equipment (PP&E) is composed of General PP&E and Stewardship PP&E. Accounting for property, plant and equipment in which the government has an ownership interest is important because public funds are invested. Property is accounted for in accounting systems and controlled in property accountability systems or records. The accounting system identifies the dollar value of property in summary terms. Property accountability systems and records should provide information as to quantities and costs which underlay the summary figures reflected in the accounting system. The DoD has an obligation to safeguard its property from theft, abuse, waste, and unauthorized use and otherwise manage the property efficiently and effectively.

★ 010702. All General PP&E assets are to be recorded in accounting records at cost. Such costs shall include all costs incurred to bring the PP&E to a form and location suitable for its intended use in operations. The cost of Stewardship PP&E shall be expensed in the accounting period in which incurred. The acquisition cost and related expenses for property shall be recorded as specified in Chapter 6 of this Volume.

★ 010703. The accounting standards, policy and guidance relating to PP&E are contained in Chapter 6 of this Volume.

0108 OTHER ASSETS

★ 010801. Other assets are those assets that cannot be classified in a specific category identified in sections 0101 through 0107, above. Included in this category are investments and other miscellaneous assets not otherwise classified.

010802. The accounting standards to be followed for these assets are included in Chapter 7 of this Volume. The basic purpose is to ensure financial control over these assets and the recording of expenses or dispositions in the appropriate accounting periods.

CHAPTER 2

ACCOUNTING FOR CASH AND FUND BALANCES WITH TREASURY0201 GENERAL

020101 Purpose. This chapter prescribes the accounting policy and related management requirements necessary to establish financial control over fund balances with the U.S. Treasury and cash resources not part of the fund balance with the U.S. Treasury. The applicable general ledger accounts are included in the DoD Uniform Chart of Accounts in Chapter 7, Volume 1 of this Regulation and their use is illustrated in this chapter.

020102 Overview

A. Sections 0204 through 0206 below, prescribe procedures for DoD Components to follow to ensure proper accounting for cash.

B. The following definitions apply to fund balances with Treasury and cash:

1. Entity Cash. Entity cash is the amount of cash that the reporting entity holds and is authorized by law to spend.

2. Non-entity Cash. Non-entity cash is cash that a federal entity collects and holds on behalf of the U.S. Government or other entities. In some circumstances, the entity deposits cash in its accounts in a fiduciary capacity for the U.S. Treasury or other entities. Non-entity cash should be reported separately from entity cash.

3. Restricted Cash. Cash may be restricted. Restrictions are usually imposed on cash deposits by law, regulation, or agreement. Non-entity cash is always restricted cash. Entity cash may be restricted for specific purposes. Such cash may be in escrow or other special accounts. Financial reports should disclose the reasons and nature of restrictions.

C. Fund Balance with Treasury.

1. A federal entity's fund balance with the Treasury is the aggregate amount of funds in the entity's accounts with Treasury for which the entity is authorized to make expenditures and pay liabilities. Fund balance with Treasury is an intra-governmental item. From the reporting entity's perspective, a fund balance with Treasury is an asset because it represents the entity's claim to the U.S. Government's resources. However, from the perspective of the federal government as a whole, it is not an asset; and while it represents a commitment to make resources available to federal departments, agencies, programs and other entities, it is not a liability.

2. A federal entity's fund balance with Treasury includes clearing account balances and the dollar equivalent of foreign currency account balances. Foreign currency account balances should be translated into U.S. dollars at exchange rates determined by the Treasury and effective at the financial reporting date. A federal entity's fund balance with Treasury also includes balances for direct loan and loan guarantee activities held in the credit reform program, financing, and liquidating accounts.

3. Depending upon the level of the entity within the organization, a fund balance with Treasury may be increased by (a) receiving appropriations, reappropriations, continuing resolutions, appropriation restorations, allocations, and allotments, and (b) receiving transfers and collections of reimbursements from other entities. An entity's fund balance with Treasury also may be increased by amounts borrowed from Treasury, Federal Financing Bank, or other entities, and amounts collected and credited to appropriation or fund accounts that the entity is authorized to spend or used to offset its expenditures.

4. An entity's fund balance with Treasury does not include contract authority or unused authority to borrow. Contract authority is a statutory authority under which contracts or obligations may be entered into prior to receiving an appropriation for the payment of obligations. The later enacted appropriation provides cash to liquidate obligations. Thus, contract authority merely permits a federal entity to incur certain obligations but does not, in itself, add funds to the agency's account with Treasury.

5. Authority to borrow is a statutory authority that permits a federal agency to incur obligations and make payments for specific purposes out of borrowed funds. Authority to borrow adds funds to an agency's accounts with Treasury only after the agency actually uses the authority to borrow a specific amount of funds. Thus, authority to borrow is included in an entity's fund balance with Treasury only to the extent that funds are actually borrowed under the authority.

6. An entity's fund balance with Treasury is reduced by (a) disbursements made to pay liabilities or to purchase assets, goods, and services, (b) investments in U.S. securities (securities issued by Treasury or other U.S. Government agencies), (c) cancellation of expired appropriations; (d) transfers and payments for reimbursements to other entities or to the Treasury, and (e) sequestration or rescission of appropriations, as applicable.

7. Disclosure should be made to distinguish two categories of funds within the entity's fund balance with Treasury: the obligated balance not yet disbursed and the unobligated balance. The obligated balance not yet disbursed is the amount of funds against which budgetary obligations have been incurred, but disbursements have not been made.

8. The unobligated balance is the amount of funds available to an entity against which no claims have been recorded. Unobligated balances are generally available to a federal entity for specific purposes stipulated by law. Unobligated balances may also include balances in expired accounts that are available only for approved adjustments to prior

obligations. Certain unobligated balances may be restricted to future use and are not apportioned for current use. Disclosure should be provided on such restrictions.

9. Federal entities should explain any discrepancies between fund balance with Treasury in their general ledger accounts and the balance in the Treasury's accounts and explain the causes. (Discrepancies due to time lag should be reconciled and discrepancies due to error should be corrected.) Agencies also should provide information on unexpended balances in cancelled appropriations that are returned to Treasury at the end of a fiscal year.

0202 POLICY

The policy in Sections 0203. through 0206, below, of this chapter provide the basis for DoD Components' management of, accounting for, and reporting on collections and expenditures within the Department of Defense.

0203 FUND BALANCE WITH TREASURY STANDARD

020301 The Fund Balance with the U.S. Treasury is the amount available to the DoD Component through appropriations, transfers, collections, and disbursements. Standards for recording collections and disbursements are contained in other sections of this chapter. The following subsections provide guidance to be followed by DoD Components for recording appropriations and transfers.

020302 Fund Balance With Treasury (Account 1010). "Fund Balance With Treasury" represents the net funds available to a DoD entity and is increased due to appropriations, reappropriations, continuing resolutions, and collections of reimbursements or advances. The account is decreased due to rescissions, and disbursements. It is a summary control account for "Funds Collected" (Account 1011); "Funds Disbursed" (Account 1012); "Funds With Treasury" (Account 1013); "Undistributed Collections (Account 1014); and "Undistributed Disbursements" (Account 1015). The "Fund Balance With Treasury" account is for financial

reporting purposes. No entries are posted to this account.

020303 Funds With Treasury (Account 1013)

A. At the DoD Component level, "Funds With Treasury" is used to record funds made available by appropriation, reappropriation, continuing resolution, allocation, rescissions, and transfers with or without benefit to the transferring account.

B. Subsidiary accounts shall be

established for each appropriation. Documentation supporting each subsidiary account shall be maintained.

C. Table 2-1 illustrates the most common entries used for this account.

D. Sources of entries to the "Funds With Treasury" account include Appropriation Warrants (TFS 6200), allocation documents, and Nonexpenditure Transfer Authorizations (SF-1151).

**ACCOUNTING ENTRIES FOR ACCOUNT 1013 -
FUNDS WITH TREASURY**

Dr 1013 Funds With Treasury
Cr 3100 Appropriated Capital

To record the receipt of Appropriation Warrants (TFS 6200), nonexpenditure transfers (SF 1151), and other authority and fund transfers from current and prior year appropriations and funds.

Dr 3100 Appropriated Capital
Cr 1013 Funds With Treasury

To record nonexpenditure transfers and other authority and fund transfers to current and prior year appropriations and funds; and budgetary authority rescinded by legislative action.

Dr 1013 Funds With Treasury
Cr 1011 Funds Collected

To close funds collected at fiscal year end.

Dr 1012 Funds Disbursed
Cr 1013 Funds With Treasury

To close funds disbursed at fiscal year end.

TABLE 2-1

**0204 BILLINGS AND COLLECTION
POLICY**

020401 Charges and fees computed for collection from private parties and agencies outside the Federal Government for goods or services

furnished or the lease or sale of property shall be collected in advance, except as authorized by statute. When payment after performance is allowed, an accounts receivable shall be established to control collections. The following actions shall be taken to ensure proper collection:

020402 A discussion of the more significant accounting entries for fund collections is provided in paragraphs 020402.A through 020402.C, below.

A. Funds Collected (Account 1011)

1. "Funds Collected" is used to record funds received for advances from outside sources, performance of reimbursable work, collection of receivables, and sale of assets. This account is subsidiary to account 1010, "Fund

Balance with Treasury." Subaccounts shall be maintained for each appropriation or fund. This account is to be used by all DoD Components.

2. Table 2-2 illustrates the most common entries used for this account.

3. Sources of entries to the "Funds Collected" account include journal vouchers, cash collection vouchers, sales records, and documented gains and losses that have been reported to Treasury.

**ACCOUNTING ENTRIES FOR ACCOUNT 1011 -
FUNDS COLLECTED**

Dr 1011 Funds Collected

TABLE 2-2

B. Undistributed Collections (Account 1014)
(To be published)

2. Table 2-3 illustrates the most common entries used for this account.

C. Undeposited Collections (Account 1110)

3. Sources of entries to the "Undeposited Collections" account are collection records and certificates of deposit that have been reported to Treasury.

1. "Undeposited Collections" is used to record amounts for which a deposit confirmation has not been issued by the U.S. Treasury. Subaccounts shall be maintained for each appropriation or fund. This account is to be used by all DoD Components.

0205 DISBURSEMENT POLICY

020501 Disbursement Accounting Entries. A discussion of the more significant accounting entries for fund disbursements is provided in paragraphs 020501.A through 020501.C, below.

**ACCOUNTING ENTRIES FOR ACCOUNT 1110 -
UNDEPOSITED COLLECTIONS**

Dr 1110 Undeposited Collections
Cr 1300 Applicable "Receivables" account

To record amounts received that have not yet been deposited.

Dr 1011 Funds Collected
Cr 1110 Undeposited Collections

To record amounts deposited.

TABLE 2-3

A. Funds Disbursed (Account 1012)

1. "Funds Disbursed" is used to record the amount of payments made (net of refunds, erroneous payments, and return of advances) from a DoD appropriation or fund account. This account is subsidiary to account 1010, "Fund Balance with Treasury." Subaccounts shall be maintained for each appropriation or fund. This account is to be used by all DoD Components.

2. Table 2-4 illustrates the most common entries used for this account.

3. Sources of entries to the "Funds Disbursed" account include journal vouchers and cash disbursement vouchers that have been reported to Treasury.

B. Undistributed Disbursements (Account 1015)
(To be published)

C. Foreign Currency (Account 1200)

1. "Foreign Currency" is used to record in U.S. dollar equivalents the purchase or exchange of foreign government currency and other transactions occurring through use of the foreign currency. Transactions shall be recorded at the current exchange rate specified by the U.S. Treasury. Foreign currency fluctuation gains or losses resulting from the settlement of foreign currency receivables or payables shall be recorded when the settlement occurs. This account is to be used by all DoD Components when foreign currencies are involved.

**ACCOUNTING ENTRIES FOR ACCOUNT 1012 -
FUNDS DISBURSED**

Cr 1191 Disbursing Officer's Cash

To record establishment or increase in imprest funds.

2. Dr 1191 Disbursing Officer's Cash
Cr 1120 Imprest Funds

To record reductions in imprest funds.

TABLE 2-7

020603 Audit and Review

A. Managers who supervise personnel holding cash are responsible for maintaining appropriate accounting and internal controls for such assets. This responsibility includes insuring the legality, propriety, and correctness of disbursements and collections of public funds.

B. Audits, both announced and unannounced of each fund, shall determine whether:

1. All funds properly are accounted and reported.
2. The amount is not in excess of cash requirements.

3. Procedures are established and followed to protect the funds from loss or misuse.

The frequency of such audits shall be decided by management based on vulnerability assessments in DoD Directive 5010.38. Disbursing officers may make such inspection and reviews of imprest funds as they deem necessary to protect the interests of the U.S. Government.

C. Unannounced inspections, including cash counts, shall be made of each fund at least once each quarter by qualified individuals who are under the jurisdiction of the comptroller or the chief accounting officer of the installation (where such positions exist). These inspections may not be conducted by anyone subordinate to the fund custodian.

D. Any unauthorized use of, irregularity in, or improper accounting for a cash fund shall be investigated as prescribed in DoD Instruction 7200.10 and reported to the approving authority and to the disbursing officer involved. Reports should indicate if prescribed procedures were being followed and should recommend any actions considered necessary or desirable for preventing recurrence of the irregularity.

E. Each DoD Component shall delegate responsibility to a specific official for investigation of shortages or losses in imprest funds and instituting disciplinary actions. These matters shall be monitored centrally in each cognizant DoD Component.

CHAPTER 3

RECEIVABLES0301 GENERAL

The purpose of this chapter is to issue the policy that shall be followed in recording and accounting for receivables. A basic tenet of accounting is the establishment of accounting control over all receivables. Receivables shall be recorded when earned and collected when due. Procedures shall be established for the routine aging of all amounts overdue so that appropriated actions can be taken to effect their collection. The aggressive and efficient management of receivables in the Department of Defense is an important element of DoD stewardship over public funds.

0302 POLICY

Accounts receivable shall be recorded accurately and promptly on completion of the acts that entitle the Department of Defense to collect amounts owed it. Receivables include, but are not limited to, monies due for indebtedness determined as a result of travel and other overdue advances, dishonored checks, sale of goods and services, fines, penalties, interest, overpayment, fees, rent, claims, damages, and any other event resulting in a determination that a dept is owed the Department of Defense. Amounts receivable shall be reduced upon collection of the debt. Unless otherwise specified by law, all funds collected shall be deposited to the Treasury as miscellaneous receipts. Loans and other receivables shall be accorded similar accounting treatment to that given accounts receivable. The following subsections provide the specific standards to be followed in accounting for receivables:

030201 Receivables shall be recorded accurately and promptly so as to provide timely and reliable financial status on all debts owed the U.S. Government.

030202 Information on receivables shall be developed, maintained, and reported using the

receivables accounts listed in Chapter 7, Volume 1 of this Regulation. Subsidiary accounts for major categories of receivables shall be maintained to facilitate clear and full disclosure, that is, the debtor, the amount, and the type of debt. Examples of account entries are provided later in this chapter.

030203 Subsidiary records shall be reconciled to the control accounts monthly.

030204 Accounting records for receivables shall be maintained so that all transactions affecting the receivables for each reporting period are included.

030205 The basic standards for internal control prescribed in DoD Directive 5010.38 must be adhered to in establishing and collecting receivables.

030206 Accounting for receivables shall include provisions for:

A. Credit management and debt collection. The DoD policy for credit management and debt collection programs is provided in Chapter 28, of Volume 5 of this Regulation.

B. The accurate and timely recording and aging of accounts, loans, and other receivables that result from normal activity, and all other debts including interest, penalty, and administrative charges applied to delinquent receivables. A delinquent receivable is defined as a receivable that remains unpaid after its due date. The due date is normally 30 days from the date of invoice or notice of payment due, unless a specific due date is established by statute, contract provision, or notice of indebtedness. Debts being liquidated by installment payments are not to be considered as delinquent, unless an installment is missed.

C. The accurate and timely recording of collections and liquidation of associated receivables. A receivable is recorded timely if recorded within the same month discovered.

D. The immediate recording of items not previously recorded due to error or oversight. Due dates for such items shall be established in the first notification to the debtor.

030207 All debts and accounts that result from the occurrence of any event for which a determination is made that money is owed to the U.S. Government shall be considered as receivables and recorded in a DoD Component's accounting system at the earliest opportunity.

030208 When management determines that resources should be recovered from a defense contractor and the contracting officer issues a demand for payment, a receivable shall be recorded and collection action initiated. The accounting and finance officer shall record the receivable upon receipt of a copy of the demand for payment. The date of demand for payment shall establish the point in time when the receivable must be recorded.

030209 Receivables from nonappropriated fund instrumentalities (NAFIs) shall be recorded as transactions with the public. They shall be included in the Schedule 220.9, "Report on Accounts and Loans Receivable Due From the Public." Accounts receivable from the FMS Trust Fund are to be recorded and reported as receivables due from other Government agencies.

030210 Gains or losses resulting from foreign currency receivables shall be recorded in the "Other Gains or Losses" account for the period when settlement occurs (see Chapter 19). This requirement does not supersede the accounting requirement concerning gains or losses in foreign currency transactions as set forth in 31 U.S.C. 3342.

030211 Interest receivable shall be recorded in the accounts when interest income is earned but not collected. Interest shall continue to be

recorded, even when regular loan payments are not made, until the related debt is officially declared to be in default or a debt agreement modification action is taken.

030212 The Comptroller General and the Department of the Treasury require Federal Agencies to establish allowances for uncollectible accounts. In addition, agencies are required to age delinquent receivable accounts reflecting amounts owed to the Government. DoD Components operating under this Regulation shall ensure that their accounting systems provide for formal aging of delinquent receivables and the establishment of allowances for uncollectible accounts.

A. While other methods may be recognized and considered appropriate, the general reserve method is considered the most suitable for DoD Components in determining the amount of uncollectible accounts receivable. Under this method, a reserve is based on bad debt experience and changes in outstanding accounts receivable balances. In recognition of the principle that the more delinquent an account receivable becomes the greater the likelihood that it will not be collected in full, the analysis of receivables by age groups can be used in determining a reasonable amount to add to the allowance for loss on accounts and refunds receivable. To make this determination, it is desirable to estimate the percentage of probable expense for each age group of accounts receivable. This percentage, when applied to the dollar amount in each age group, gives a probable expense for each group. By adding together the probable expense for each age group, the required balance in the allowance for loss on accounts and refunds receivable is determined.

B. In preparing an aging schedule, amounts shall be considered as delinquent if not paid within 30 days from date of invoice or notice of payment due, unless different terms are specified by contract, other agreement or DoD Component procedures. Receivables shall be aged in the groups listed in Table 3-1.

AGED RECEIVABLE GROUPS

1-30 days delinquent
 31-60 days delinquent
 61-90 days delinquent
 91-120 days delinquent
 121-180 days delinquent
 181-360 days delinquent
 Over 360 days delinquent
 > 1 year ≤ 2 years
 > 2 years ≤ 3 years
 over 3 years

Table 3-1

0303 EXTENT OF COLLECTION EFFORTS
FOR DOMESTIC DEBTS

030301 General Policy. Except for debts from foreign countries, accounting and collection procedures shall be designed to provide information to assist in determining realistic points of diminishing returns beyond which collection efforts are not justified, and the minimum amount of a debt when no collection action at all should be undertaken. Procedures shall be designed to capture the total cost of the debt collection process (both direct and indirect costs), by dollar range of debt and the total number of cases processed. Until actual cost data are accumulated, cost analysis techniques shall be developed and used to determine the unit cost of processing first debt notices, follow-up actions, requests for waiver or remission, etc. When estimated costs are used, the estimates shall be updated periodically or when circumstances and conditions change significantly.

030302 Comparison Requirements. Each DoD Component shall make at least an annual comparison of costs incurred against amounts collected in its debt collection process to assist in the establishment of reasonable points at which costs of further collection efforts are likely to exceed recovery. This cost comparison, however, represents but one appraisal element to be considered

in the analysis of when and where to terminate collection efforts. Other reviews concerning the type of debt, size, age statistical analysis, etc., also should be performed before a final point of termination of collection action is determined. The following definitions should be considered when making cost comparisons, reviews, and analysis:

A. The Debt Collection Process. Includes (1) the preparation of the first debt notice; (2) all follow-up actions such as answering rebuttals, processing requests for waiver or remission, holding hearing, negotiating compromises, handling installment contract and suspense, processing collections, and making referrals to credit reporting and collection agencies; and (3) the completion of the case, including maintaining the case file information until the appropriate statute of limitations expires.

B. Direct Cost. Includes any costs that can be identified specifically with handling cases or accounts during the debt collection process. These normally consist of personnel costs, computer equipment costs, supplies, postage and contract services.

C. Indirect Cost. Includes any costs that are identified with the debt collection process, but which benefit that process and at least one other activity. These costs shall be accumulated only when they are expected to exceed 20 percent of the direct costs.

D. Cases Processed. The number of cases completed or closed during the year either by collection or write-off. Collection includes compromises and offsets from other Federal Government payments.

030303 Break-Even Analysis. A break-even analysis is one method of determining realistic points at which further collection efforts are not justified. A break-even analysis format and instructions are provided as Table 3-2.

BREAK-EVEN ANALYSIS

(1)	(2)	(3)	(4)	(5)	(6)
<u>\$ Range</u>	<u>CASES</u> <u>#</u> <u>PROCESSED</u>	<u>ORIGINAL</u> <u>\$</u> <u>AMOUNT</u>	<u>COST TO</u> <u>\$</u> <u>COLLECT</u>	<u>\$</u> <u>COLLECTIONS</u>	<u>\$</u> <u>DIFFERENCE</u>
\$ 0-25					
26-50					
51-75					
76-100					
101-125					
126-575					
576-600					
SUBTOTAL					
OVER 600					
GRAND TOTAL					

Column (1) - Dollar range should be meaningful to the debt collection process. Subtotal can be placed anywhere within dollar range to relate to a particular debt collection need.

Column (2) - Total number of cases processed within this particular dollar range.

Column (3) - Original dollar amount of debts for this particular range.

Column (4) - Historical cost for this particular range or subtotal times number of cases in column (2).

Column (5) - Accumulate collections per range or subtotal.

Column (6) - Column (5) minus column (4). Break-even point is where the collections (5) are equal to the cost to collect (4).

Grand total of collections (column (5)) divided by grand total of original dollar amount (column (3)) = percent collection range for period.

Table 3-2

0304 EXTENT OF COLLECTION EFFORTS
FOR DEBTS FROM FOREIGN
COUNTRIES

General policy for collection of debts from foreign countries is contained in Chapter 12, Volume 6, of this Regulation.

0305 INTEREST, PENALTY, AND
ADMINISTRATIVE CHARGES

030501 General

A. Accounting for receivables shall include provisions for accruing interest, penalty, and administrative charges on delinquent accounts from the public in accordance with 31 U.S.C. 3717. Accounting systems shall be designed to accumulate and record such charges for all debts owed the U.S. Government. Note, however, that debts owed by any Federal Agency (including NAFIs), or any State or local government are exempt from interest, penalty, and administrative charges.

B. Payments of amounts owed the Federal Government by organizations, businesses, and individuals are expected to be made in accordance with terms specified in contracts, agreements, or notifications of indebtedness. The Federal Acquisition Regulation is the authority for the collection of contractual indebtedness. For those debts owed the Federal Government that are not covered by contracts or agreements, the initial notification of indebtedness shall inform the debtor of the basis for the indebtedness, the date payment is to be made (due date), and the requirement for interest, penalty, and administrative charges, unless otherwise prohibited by law.

C. The intent of interest, penalty, and administrative charges is to stimulate prompt payment, to recover to the U.S. Treasury the cost of borrowing necessitated by a delinquent receivable, and to recover to the creditor agency the cost of processing and handling delinquent claims, including the referral of claims to credit bureaus or collection agencies.

030502 Application of Charges. Guidance on assessing interest, penalty, and administrative charges is contained in the Federal Claims Collection Standards. Interest, penalty, and administrative charges, unless prohibited by law, shall be applied according to the following:

A. Interest charges shall be assessed on all late payments whether the debt is to be paid in a lump sum or by installments. Interest shall also be charged on audit-related debt. The minimum rate shall be the average investment rate on Treasury's Tax and Loan Account for the 12-month period ending September 30 of each year, as prescribed by the Treasury Department.

B. Fixed or variable interest rates shall be established for each type of loan receivable and for overdue accounts receivables from the public. The factors that affect the variability of interest rates (e.g., legislation, type of contract, occurrence of an event, passage of time, debtor's income level, federal funds rate, etc.) shall be identified. In the absence of specific authority embodied in statute, regulation required by statute, contract, or other public notice, the interest rate shall be the current rate on funds to the Treasury.

C. DoD Components shall assess a penalty charge, not to exceed 6 percent per annum on any portion of a debt that is delinquent more than 90 days.

D. In addition to interest and penalty charges, a charge shall be determined and prorated over delinquent claims to cover the costs of processing and handling them.

E. Accrued interest, administrative, and penalty charges shall be recorded in appropriate accounts contained in Chapter 7 of Volume 1. Subaccounts may be established under existing accounts prescribed for interest and penalty charges.

F. A collection shall be applied first toward administrative and penalty charges; second, toward accrued interest; and third, toward the remaining balance due.

030503 Disposition of Charges

A. Interest charges collected shall be deposited directly into Treasury receipt account 3210, "General Fund Proprietary Receipts, Defense Military, Not Otherwise Classified."

B. Penalty charges shall be deposited directly into Treasury receipt account 1099, "Fines, Penalties, and Forfeitures, Not Otherwise Classified."

C. Administrative charges required to pay for contractor collection fees or claims collection litigation reports shall be paid directly to the GSA designated contractor. Any excess amounts shall be deposited monthly to Treasury receipt account 3210, "General Fund Proprietary Receipts, Defense Military, Not otherwise Classified."

030504 Computation of Amounts

A. Interest Charges shall be computed using the following formula:

$$I = DNF$$

Where: I = Interest charge
D = Amount of delinquent account receivable
N = Number of days delinquent
F = Interest rate per day

B. A penalty charge cannot exceed 6 percent per year of that portion of the debt that is delinquent more than 90 days. As described in paragraph 030206.B, a debt becomes delinquent if not paid by the established due date. Therefore, a penalty charge of up to 6 percent may be applied on a debt that has been delinquent for 91 days past the established due date. Penalty charges shall be applied to those accounts reported in the aging category 91-180 days delinquent and beyond. DoD Components may determine what percent up to the maximum 6 percent will be applied to delinquent accounts.

C. An administrative charge shall be assessed to cover the added costs incurred in handling a debt beyond the date on which payment was due. Unlike the interest charge,

which begins to accrue on the date the delinquent notice actually is mailed, the administrative charge is applied only if payment is not made by the due date specified in the notice. DoD Components shall calculate administrative charges based upon actual costs incurred. If actual cost is not available, DoD Components may base administrative charges upon other historical costs or cost analyses so long as the method used supports determination of the charge. The administrative charge shall be applied to all delinquent debts with due regard given to the length of time the debts is delinquent, such as the age categories identified in paragraph 030212.B.

030505 Application to New Accounts. Rules for application of interest charges to newly established accounts are as follows:

A. The first interest rate used to determine charges on a delinquent account shall be applicable for the life of the delinquent account, unless the account is rescheduled or other events occur that justify an interest rate adjustment. The Department of the Treasury provides Federal Agencies with percentage rate to be used in applying interest by publishing the applicable rate in the Federal Register each quarter.

B. Payment terms specified in the notice of indebtedness shall be consistent with payment terms in the related contract or formal agreement.

C. Unless other provisions have been included in a contract or prior agreement, interest charges shall not be assessed until the debtor has been notified in writing that interest and penalty charges will accrue.

D. Interest and penalty charges shall continue to accrue after "date of death" when a claim is to be filed against an estate.

030506 Application to Existing Accounts. Rules for application of interest and penalty charges to accounts receivable on the effective date of this chapter are as follows:

A. On those debts for which payments are current and are being paid on a regular basis, an advisory notice shall be issued prescribing interest requirements with a stipulation that interest charges will not be imposed so long as payments remain current. This applies to in-service and out-of-service debts.

B. On those accounts for which payments are being made, but which are in arrears because some payments have been missed, the notice shall advise that federal regulations require interest and penalty charges to be assessed on the unpaid balance of the account if a regular payment schedule is not maintained.

C. Debtors with accounts that are over 90 days delinquent shall be notified of the requirement for assessing interest and penalty charges. If the debt is not liquidated by the due date prescribed in the notice, interest and penalty charges shall begin to accrue on the date of the notification.

030507 Payment Within 30 Days. Interest shall not be charged if payment is made within 30 days after the date from which interest begins to accrue (30 days after date notification was mailed). DoD Components may extend this period for an additional 30 days on a case-by-case basis.

030508 Waiver of Accrual of Interest, Penalty, and Administrative Charges. The head of a DoD Component, or designee, may promulgate regulations identifying circumstances appropriate to waive collection of interest and charges in conformity with the Federal Claims Collection Standards; otherwise, the policy regarding the waiver of the accrual of interest, penalty, and administrative charges is as follows:

A. The accrual of interest, penalty, and administrative charges may be waived when accounts are terminated or compromised, or when the additional charges would cause extreme hardship or would not be in the best interest of the Government.

B. Decisions to waive the accrual of interest, penalty, and administrative charges shall be considered on a case-by-case basis (no blanket waivers will be granted). Decisions on such waivers shall be documented, including an explanation as to the reasons for the waiver, and retained as a part of the official file.

C. Waiver of the accrual of interest, penalty, and administrative charges shall be approved at the same organizational level or by the same designee authorized to waive claims.

D. Once accrued, interest, penalty, and administrative charges shall be collected, reported, compromised, or written off in the same manner as the basic debt.

E. Debts that cannot be collected in full by a DoD Component's collection efforts shall be compromised, suspended, terminated, or reported to GAO or the Department of Justice in accordance with the Federal Claims Collection Standards. An inventory of cases referred including dollar amounts shall be maintained by each DoD Component for reporting purposes.

0306 REPORTING WRITE-OFF DEBT TO THE INTERNAL REVENUE SERVICE (IRS)

030601 Section V, paragraph 5, of Office of Management and Budget Circular A-129, requires that income from the discharge of indebtedness is to be included in the gross income of a taxpayer/debtor. Therefore, the outstanding balance, not including interest, of any defaulted obligation that meets the following criteria shall be reported on IRS Form 1099-G, "Statement for Recipients of Certain Government Payment."

A. The amount of the defaulted obligation not in dispute accrues to a total of \$600 or more for a calendar year.

B. The obligation is not discharged in a Title II bankruptcy case.

C. The applicable federal statute for enforcing collection of the obligation expired during the tax year, or some form of formal

compromise agreement is reached during the year, or some form of formal compromise agreement is reached during the year in which the debtor is discharged legally of all or a portion of the obligation (in this case the portion discharged, less interest, is reportable).

0307 REPORTING OF RECEIVABLES

DoD Components are required to report all receivables that arise as a result of the completion of an act that entitles a Federal Agency to collect amounts owed to it. These receivables are to be reported on the TFS Form 220, "Report on Financial Position," prescribed in Chapter 2-4100 of GAO and Chapter 5, Volume 6 of this Regulation. In addition to the TFS Form 220, DoD Components are required to submit Schedule 220.9, "Report on Accounts and Loans Receivable Due From the Public." Schedule 220.9 provides further visibility on public receivables as follows:

030701 Part I. Section A - Outstanding Receivables. Provides a total of current and nondelinquent receivables and an aging of delinquent receivables.

030702 Section B - Activity Fiscal Year to Date. Provides new receivables during the reporting period, total payments or collections against receivables, reclassified amounts, and amounts written off during the year. This information should be provided for accounts and loans receivable. These categories are identified specifically in exhibit number 5, Chapter 2-4100 of the TFM.

030703 Sections C and D. Provide for

allowances and write-offs and a reconciliation.

030704 Part II. Provides administrative actions and other supplemental information on delinquent and nondelinquent receivables such as cases referred to and resolved by the agency counsel and the Department of Justice; the aging of receivables reclassified; interest, penalties, and administrative charges; and a reconciliation with the TFS Form 220.

0308 RECEIVABLES AND RELATED CONTROL ACCOUNTS

030801 Accounts and Refunds Receivable

Figures 3-1 through 3-8 define the accounts that are used for accounts and refunds receivable and illustrate the entries for transactions that affect each account.

030802 Allowances for Loss

Figures 3-9 and 3-16 define the accounts that are used for allowances for loss and illustrate the entries for transactions that affect each account.

030803 Claims Receivable

Figure 3-11 defines this account and illustrates the entries for transactions that affect it.

030804 Loans Receivable

Figures 3-11 through 3-16 defines these accounts and illustrate the entries for transactions that affect them.

CHAPTER 4

OPERATING MATERIALS AND SUPPLIES AND STOCKPILE MATERIALS0401 GENERAL

040101 Purpose. This chapter prescribes the accounting policy and related requirements necessary to establish financial control over DoD materials and supplies including stockpile materials. The applicable general ledger accounts are included in the DoD Uniform Chart of Accounts in Chapter 7, Volume 1, of this Regulation, and the use of the operating materials and supplies and stockpile materials account is illustrated in this chapter.

040102 Operating Materials and Supplies Inventory. Operating materials and supplies consist of tangible personal property to be consumed in normal operations. Excluded are (a) goods that have been acquired for use in constructing real property, (b) stockpile materials, and (c) inventory.

040103 Distinction between Operating Materials and Supplies Inventory. The term "Inventory" is defined as tangible personal property, titled to the government, that is on hand or intransit (e.g., accepted at origin from a vendor, or moving between DoD activities) and is held for sale, future sale, repair, or pending transfer to disposal. Inventory excludes some other assets held for sale, such as (1) stockpile materials (including war reserve material), (2) seized and forfeited property, (3) foreclosed property, and (4) goods held under price support and stabilization programs. These goods may sold; the purpose, however, of acquiring them is not to provide a product or a service for a fee. Guidance relating to inventory held for sale in the course of normal operations will be included within Volume 11B of this Regulation.

040104 Stockpile Materials. Stockpile materials are strategic and critical materials held due to statutory requirements for use in national defense, conservation or national emergencies. They are not held with the intent of selling in the ordinary course of business. The following

items are specifically excluded from stockpile materials: (a) items that are held by an agency for sale for use in normal operations, (b) items that are held for use in the event of an agency's operating emergency or contingency, and (c) materials acquired to support market prices [that is, commodities specifically acquired, held, sold, or otherwise disposed of to satisfy or help satisfy economic goals].

040105 Recognition of Assets and Expenses. The consumption method of accounting for the recognition of expenses shall be applied for stockpile materials. The consumption method of accounting for the recognition of expenses shall ordinarily be applied for operating materials and supplies. However, in some instances, as noted below, the purchases method of accounting for the recognition of expenses may be used. Operating materials and supplies shall be recognized and reported as assets when produced or purchased. "Purchased" is defined as when title passes to the purchasing entity. If the contract between the buyer and the seller is silent regarding passage of title, title is assumed to pass upon delivery of the goods. Delivery or constructive delivery shall be based on the terms of the contract regarding shipping and/or delivery.

A. Consumption Method of Accounting. The cost of goods shall be removed from the applicable operating materials and supplies asset account and reported as an operating expense in the period they are issued for consumption in normal operations.

B. Purchase Method of Accounting. The purchase method of accounting provides that operating materials and supplies be expensed when purchased. The purchase method may be used only for those operating materials and supplies that have a general use, are not significant in dollar amount, and are in the hands of the end user (e.g., performing cost center) for use in normal operations.

040106 Valuation of Stockpile Materials. Stockpile materials, except for war reserve material, shall be valued on the basis of historical cost. Historical cost shall include all appropriate purchase, transportation and production costs incurred to bring the items to their current condition and location. Any abnormal costs, such as excessive handling or rework costs, shall be charged to operations of the period. The first-in, first-out (FIFO); weighted average; or moving average cost flow assumptions shall be applied in arriving at the historical cost of stockpile materials. The last-in, first-out (LIFO) is not permitted as an acceptable valuation method due to the stale values that would result. Stockpile materials, other than war reserve materials, are discussed in this chapter. War reserve materials are discussed in Volume 11B of this Regulation.

040107 Categorization and Valuation of Operating Materials and Supplies. Operating materials and supplies shall be categorized as (a) operating materials and supplies held for use, (b) operating materials and supplies held in reserve for future use, or (c) excess, obsolete and unserviceable operating materials and supplies. Each of the categories shall be valued as described below.

A. Operating Materials and Supplies Held for Use. Ordinarily, items carried in a supply management business area, procurement appropriation, or other appropriated account shall not be drawn from that source until the need for those operating materials and supplies, considering processing leadtime, arises. Similarly, operating materials and supplies procured from commercial sources should not ordinarily be procured for delivery prior to the need for those materials and supplies. Items classified as "Operating Materials and Supplies Held for Use," shall not exceed the amount expected to be used within 30 days unless justifying documentation supporting a supply in excess of 30 days is developed and maintained for review. Operating materials and supplies shall be valued on the basis of historical cost. Historical cost shall include all appropriate purchase and production costs incurred to bring the items to their current condition and location. Any abnormal costs, such as excessive handling

or rework costs, shall be charged to operations of the period. Donated operating materials and supplies shall be valued at their fair value at the time of donation. The first-in, first-out (FIFO); weighted average; or moving average cost flow assumptions shall be applied in arriving at the historical cost of ending operating materials and supplies and cost of goods consumed. The last-in, first-out (LIFO) is not permitted as an acceptable valuation method due to the stale values that would result.

B. Operating Materials and Supplies Held in Reserve for Future Use. As a rule, operating materials and supplies shall not exceed the amount expected to be used within 30 days unless justifying documentation supporting a supply in excess of 30 days is developed and maintained for review. Within reason and normal prudence, items in excess of current needs shall be returned to the supplier and credit requested. Operating materials and supplies maintained because they are not readily available in the market or because it is likely they will be needed subsequently shall be classified as Operating Materials and Supplies Held in Reserve for Future Use. Operating materials and supplies held in reserve for future use shall be valued using the same basis as operating materials and supplies held for use in normal operations.

C. Excess, Obsolete, and Unserviceable Operating Materials and Supplies.

1. Excess operating materials and supplies are operating materials and supplies that exceed the amount on hand that can be used within one year.

2. Obsolete operating materials and supplies are operating materials and supplies that are no longer needed due to changes in technology, laws, customs, or operations.

3. Unserviceable operating materials and supplies are operating materials and supplies that are physically damaged and cannot be consumed in operations.

4. Excess, obsolete, or unserviceable materials and supplies shall be valued at their estimated net realizable value. The difference between their carrying amount before identification as excess, obsolete or unserviceable and their estimated net realizable value shall be recognized as a loss in GLA 7293, "Other Miscellaneous Losses," at the time the determination is made even though the disposition of the materials and supplies may not occur until a later period. Any subsequent adjustments to its net realizable value upon disposal shall also be recognized as a loss.

040108 Financial Statement Disclosure Requirements for Operating Materials and Supplies. Notes accompanying financial statements shall include:

A. General composition of operating materials and supplies.

B. Basis for determining operating materials and supplies values; including valuation method and any cost flow assumption.

C. Changes from prior year accounting methods, if any.

D. Balances for each of the categories of operating materials and supplies described above.

E. Restrictions on the use of materials.

F. Decision criteria for identifying the category to which operating materials and supplies are assigned.

G. Changes in the criteria for identifying the category to which operating materials and supplies are assigned.

0402 ACCOUNTING POLICY

040201 The acquisition cost of DoD supplies and material represents a substantial investment. It is important to bring this cost under financial control and to carry it forward until the inventory is issued for use or transferred out of

the Department of Defense. Any item purchased by a DoD Component shall be brought under financial accounting control and recorded in the applicable general ledger account until issued to a user or consumer.

040202 Acquisition price means the price paid for the item net of any discounts determined to be economically feasible to take. Chapter 2 of this Volume provides guidance on determining when to take discounts.

040203 The general ledger accounts discussed in this chapter contain summary dollar amounts that shall be reported in the financial statements required by the Treasury and in other reporting requirements mandated by OMB and the Congress. Each account shall be updated based on applicable source documents.

0403 ACCOUNTING FOR OPERATING MATERIALS AND SUPPLIES

040301 A discussion of the operating materials and supplies accounts is provided in paragraphs 040302 through 040306, below.

040302 Operating Materials and Supplies (Account 1510)

A. "Operating Materials and Supplies" consist of tangible personal property to be consumed in normal operations. Operating materials and supplies shall be categorized as (1) operating materials and supplies held for use, (2) operating materials and supplies held for future use, or (3) excess, obsolete and unserviceable operating materials and supplies.

B. This account is a summary account used for financial statement purposes. No transactions are posted to this account.

040303 Operating Materials and Supplies Held for Use (Account 1511)

A. "Operating Materials and Supplies Held for Use" is used to record supplies and materials received and subsequently issued for use. As such this account is intended to be used by any DoD Component that maintains supplies and materials.

B. Table 4-1 illustrates the most common entries used for this account.

**ACCOUNTING ENTRIES FOR ACCOUNT 1511 -
OPERATING MATERIALS AND SUPPLIES HELD FOR USE**

1. Dr 1511 Operating Materials and Supplies Held for Use
Cr 2111 Accounts Payable-Government-Current
Cr 2113 Accounts Payable-Public-Current

To record receipt of supplies and material recorded into inventory.

2. Dr 6121 Supplies and Materials
Cr 1511 Operating Materials and Supplies Held for Use

To record the issue of supplies and material from inventory

3. Dr 1511 Operating Materials and Supplies Held for Use
Cr 1581 Inventory-Work in Process-In-House
Cr 1721 Construction in Progress-In-House
Cr 6121 Supplies and Materials

To record the return of supplies and material to inventory.

4. Dr 1511 Operating Materials and Supplies Held for Use
Cr 3220 Transfers In from Others-Without Reimbursement

To record supplies and material received without reimbursement by the Department of Defense.

5. Dr 1511 Operating Materials and Supplies Held for Use
Cr 7193 Other Miscellaneous Gains

To record an increase in the inventory of supplies and material discovered by physical inventory.

6. Dr 3231 Transfers Out to Government Agencies-Without Reimbursement
Dr 3232 Transfers Out to Others-Without Reimbursement
Cr 1511 Operating Materials and Supplies Held for Use

To record the transfer of supplies and material from inventory without reimbursement.

7. Dr 7293 Other Miscellaneous Losses
Cr 1511 Operating Materials and Supplies Held for Use

To record the following:

- (a) The nonreimbursable loss, damage, or destruction of supplies and material.
- (b) A decrease in supplies and material discovered by physical inventory.

8. Dr 1320 Claims Receivable-Public
Cr 1511 Operating Materials and Supplies Held for Use

To record the loss, damage, or destruction of supplies and material in inventory for which a legal right for a claim exists.

TABLE 4-1

C. Sources of entries to this account include contracts, invoices, receiving reports, payment vouchers, material-return documents, transfer documents, inventory documents, issue and shipping documents, sales records, and documented gains and losses.

040304 Operating Materials and Supplies Held in Reserve for Future Use (Account 1512)

A. "Operating Materials and Supplies Held in Reserve for Future Use" is used to record the value of stocks of materials and supplies maintained because they are not readily available in the market or because there is more than a remote chance that they will eventually be needed, although not necessarily in the normal course of operations.

B. This account is intended for use by all DoD activities, including Defense Business Operations Fund activities.

C. Table 4-2 illustrates the most common entries used for this account.

D. Sources for entries to this account include receiving reports, inspection reports, material release orders, and reports of survey.

040305 Operating Materials and Supplies - Excess, Obsolete and Unserviceable (Account 1513)

A. "Operating Materials and Supplies - Excess, Obsolete and Unserviceable" is used to record the value of stocks of materials and supplies maintained because they are not readily available in the market or because there is more than a remote chance they will eventually be needed, although not necessarily in the normal course of operations.

B. This account is intended for use by all DoD activities, including Defense Business Operations Fund activities.

C. Table 4-3 illustrates the most common entries used for this account.

**ACCOUNTING ENTRIES FOR ACCOUNT 1512 -
OPERATING MATERIALS AND SUPPLIES HELD IN RESERVE FOR FUTURE USE**

1. Dr 1512 Operating Materials and Supplies Held in Reserve for Future Use
Cr 1511 Operating Materials and Supplies Held for Use

To reclassify operating materials and supplies.

2. Dr 6121 Supplies and Materials
Cr 1511 Operating Materials and Supplies Held for Use

To record the use of operating materials and supplies.

3. Dr 1513 Operating Materials and Supplies-Excess, Obsolete and Unserviceable
Cr Operating Materials and Supplies Held in Reserve for Future Use

To reclassify operating materials and supplies.

TABLE 4-2

**ACCOUNTING ENTRIES FOR ACCOUNT 1513 -
OPERATING MATERIALS AND SUPPLIES - EXCESS, OBSOLETE AND UNSERVICEABLE**

1. Dr 1513 Operating Materials and Supplies - Excess, Obsolete and Unserviceable
Dr 7293 Other Miscellaneous Losses
Cr 1511 Operating Materials and Supplies Held for Use
Cr 1512 Operating Materials and Supplies Held in Reserve for Future Use

To record excess, obsolete, or unserviceable operating materials and supplies at its estimated net realizable value. The difference between the carrying amount before identification as excess, obsolete, or unserviceable and their estimated net realizable value shall be recognized at a loss in GLA 7291.2, "Excess/Obsolescence/Spoilage Loss," at the time the determination is made even though the disposition of the materials and supplies may not occur until a later period. Any subsequent adjustments to net realizable value upon disposal shall also be recognized as a loss.

2. Dr 7293 Other Miscellaneous Losses
Cr 1513 Operating Materials and Supplies-Excess, Obsolete and Unserviceable

To record remaining loss upon final disposal of excess, obsolete or unserviceable items.

TABLE 4-3

040306 Operating Materials and Supplies In Transit (Account 1514)

A. "Operating Materials and Supplies In Transit" is used to record the value of supplies and materials in transit that have not been received.

B. This account shall be used to record the initial acceptance of items when title has passed but the items have not been received

and accepted.

C. Items in transit between DoD accounting entities shall be kept under financial accounting control at all times. Entries to this account shall not be reversed at the beginning of the subsequent accounting period.

D. Table 4-4 illustrates the most common entries used for this account.

**ACCOUNTING ENTRIES FOR ACCOUNT 1514 -
OPERATING MATERIALS AND SUPPLIES IN TRANSIT**

1. Dr 1514 Operating Materials and Supplies In Transit
Cr 2111 Accounts Payable-Government-Current
Cr 2113 Accounts Payable-Public-Current

To record the value of operating materials and supplies in transit.

2. Dr 1511 Operating Materials and Supplies Held for Use
Dr 1512 Operating Materials and Supplies Held in Reserve for Future Use
Cr 1514 Operating Materials and Supplies In Transit

To record the receipt of operating materials and supplies in transit

TABLE 4-4

E. Sources of entries to this account include receiving reports, inspection reports, invoices, and documented estimates indicating source of estimates.

0404 ACCOUNTING FOR STOCKPILE MATERIALS

040401 Stockpile Materials (Account 1570)

A. "Stockpile Materials" are strategic and critical materials held due to statutory requirements for use in national defense, conservation or national emergencies. They are not held with the intent of selling in the ordinary course of business.

B. This account is a summary account used for financial statement purposes. No transactions are posted to this account.

040402 Stockpile Materials Held in Reserve (Account 1571)

A. "Stockpile Materials Held in Reserve" is the account commonly used to account for the value of stockpiled materials as stockpile materials are not held with the intent of selling in the ordinary course of business.

B. Table 4-5 illustrates the most common entries used for this account.

**ACCOUNTING ENTRIES FOR ACCOUNT 1571 -
STOCKPILE MATERIALS HELD IN RESERVE**

1. Dr 1571 Stockpile Materials Held in Reserve
Cr 2111 Accounts Payable-Government-Current
Cr 2113 Accounts Payable-Public-Current

To record receipt of stockpile material.

2. Dr 6121 Supplies and Materials
Cr 1571 Stockpile Materials Held in Reserve

To record issue of stockpile material.

TABLE 4-5

040403 Stockpile Materials Held For Sale (Account 1572)

A. "Stockpile Materials Held For Sale" is used to account for stockpile materials that have been authorized for sale. The materials authorized for sale shall be valued using the same basis used before they were authorized for sale. Any gain (or loss) upon sale shall be recognized as a gain (or loss) at that time.

B. Table 4-6 illustrates the most common entries used for this account.

040404 Allowance for Loss on Stockpile Materials (Account 1579.1)

A. "Allowance for Loss on Stockpile Materials" is used to adjust for reasonably predictable and recurring events that although not known in advance can nevertheless be estimated with a fair degree of precision. Predictable and recurring events include losses due to causes such as deterioration, breakage, and theft.

B. Table 4-7 illustrates the most common entries used for this account:

ACCOUNTING ENTRIES FOR ACCOUNT 1572 - STOCKPILE MATERIALS HELD FOR SALE

1. Dr 1572 Stockpile Materials Held For Sale
Cr 1571 Stockpile Materials Held in Reserve

Entry to reclassify stockpiles from "Held in Reserve" to "Held for Sale"

2. Dr 6500 Cost of Goods Sold
Dr 7293 Other Miscellaneous Losses
Cr 1572 Stockpile Materials Held For Sale

Entry to recognize sale of stockpile materials when a loss on its sale results.

3. Dr 6500 Cost of Goods Sold
Cr 1572 Stockpile Materials Held For Sale
Cr 7193 Other Miscellaneous Gains

Entry to recognize sale of stockpile materials when a gain on its sale results.

TABLE 4-6**ACCOUNTING ENTRIES FOR ACCOUNT 1579.1 -
ALLOWANCE FOR LOSS ON STOCKPILE MATERIALS**

1. Dr 7293 Other Miscellaneous Losses
Cr 1579.1 Allowance for Loss on Stockpile Materials

To record the estimate of loss due to shrinkage or other causes. (The estimate of loss may be subsequently valued higher or lower if it becomes obvious that the original estimate was significantly different from currently expected events.)

2. Dr 1579.1 Allowance for Loss on Stockpile Materials
Cr 1571 Stockpile Materials Held in Reserve
Cr 1572 Stockpile Materials Held For Sale

To record actual loss of stockpile materials. (If this entry would result in abnormal (debit) balance in account 1579.1, then the entry illustrated in (1.) above should be made for the abnormal portion.)

TABLE 4-7

C. Year-End Closing/Adjusting Entry. If the allowance amount established for the accounting period was exactly equal to the actual loss, then the balance in account 1579 would be zero (\$-0-). However, estimates are seldom exactly equal to actual events. If the allowance estimate was too high, then a greater loss than actually incurred was recorded against

current year operations. Conversely, if the allowance estimate was too low, then a smaller loss than actually incurred was recorded against current year operations. If those differences are not material, then no adjustment is necessary and the subsequent year allowance estimate can be modified to compensate for the difference. However, if those differences are material or if

management desires that the fiscal year-end allowance account be zero (\$-0-), adjusting entries may be made. The entries are in Table 4-8.

0405 ACCOUNTING FOR WORK IN PROCESS

040501 Four "Work in Process" subsidiary accounts control applicable work, payments, and property that receive special attention. "Work in Process-In-House," "Work in Process-Contractor," and "Work in Process-Other Government Activities," identify the performing activity. "Work in Process-Government-Furnished Material," identifies that portion of Government property (including other Federal Agencies) furnished to contractors and subcontractors for the perfor

mance of DoD contracts for other than real property. Government property, in this case, includes all personal property acquired directly by the Department of Defense made available for incorporation into personal property and products to be delivered under DoD contracts or to be consumed or expended in the performance of those contracts.

040502 Work in Process general ledger accounts may be used by any DoD Component or activity within those Components. However, since activities within the Defense Business Operations Fund (predominantly those within the Depot Maintenance business area) more commonly use the work in process general ledger accounts, the description and use of the work in process accounts is contained in Volume 11B of this Regulation.

ACCOUNTING ENTRIES FOR YEAR-END CLOSING/ADJUSTING ENTRY

Dr 1579 Allowance for Loss on Stockpile Materials
Cr 7293 Other Miscellaneous Losses

To adjust loss estimates to actual loss at fiscal year end when the loss estimate is greater than the actual loss.

Dr 7293 Other Miscellaneous Losses
Cr 1579 Allowance for Loss on Stockpile Materials

To adjust loss estimates to actual loss at fiscal year-end when the loss estimate is less than the actual loss.

CHAPTER 5

ADVANCES AND PREPAYMENTS0501 GENERAL

050101 Purpose. This chapter prescribes the principles and policy to be followed by DoD Components to account for advances and prepayments made to employees, other Federal Government agencies and to non-Federal Government organizations. Advances do not include payments for which performance has occurred.

050102 Overview

A. The legal authority to make advances is contained in 31 U.S.C. 3324:

"(a) Except as provided in this section, a payment under a contract to provide a service or deliver an article for the United States Government may not be more than the value of the service already provided or the article delivered."

"(b) An advance of public money may be made only if it is authorized by--

(1) a specific appropriation or other law; or

(2) the President to be made to--

(A) a disbursing official if the President decides the advance is necessary to carry out--

(i) the duties of the official promptly and faithfully; and

(ii) an obligation of the Government; or

(B) an individual serving in the armed forces at a distant station if the President decides the advance is necessary to disburse regularly pay and allowances."

B. Advances and prepayments are disbursements of money from Department of Treasury accounts before performance has been certified by an authorized DoD receiving official.

C. Advances are made in contemplation of the later receipt of goods, services, or other assets. Advances are made only to payees to whom a Component has an obligation and not in excess of the amount of the obligation. A common example is travel advances. Travel advances are amounts made available to employees before beginning a trip for costs to be incurred in accordance with the 5 U.S.C. 5705 and in accordance with standardized Government travel regulations.

1. Within the Department of Defense, the following categories of advances may exist: travel advances; advances to contractors and suppliers; advances to grantees; advances to the public, including foreign governments; and advances to Federal Agencies.

2. Advances to contractors and suppliers and to grantees shall be supported by the contracting officer's determination that all statutory requirements are met and that the provisions of the Federal Acquisition Regulation (FAR), Part 32, subpart 32-4 and the DoD FAR Supplement, Part 32, subpart 32-4 are met. These provisions require, among other things, that the contractor give adequate security, advance payments may not exceed the unpaid contract price, the advance payment shall not exceed the contractor's interim cash needs, the advance is necessary to supplement funds available to the contractor, and, the Department of Defense shall benefit from performance prospects, or there are other practical advantages.

3. Advances to foreign countries are authorized by 10 U.S.C. 2396 which provides that:

"(a) An advance under an appropriation to the Department of Defense may be made to pay for:

(1) compliance with laws and ministerial regulations of a foreign country;

(2) rent in a foreign country for periods of time determined by local custom; and

(3) tuition."

"(b)(1) Under regulations to be prescribed by the Secretary of Defense or by the Secretary of the Transportation with respect to the Coast Guard when it is not operating as a service of the Navy, an officer of an armed force of the United States accountable for public money may advance amounts to a disbursing official of a friendly foreign country or members of an armed force of a friendly foreign country for--

(A) pay and allowances to members of the armed force of that country; and

(B) necessary supplies and services.

(2) An advance may be made under this subsection only if the President has made an agreement with the foreign country--

(A) requiring reimbursement to the United States for amounts advanced;

(B) requiring the appropriate authority of the country to advance amounts reciprocally to members of the armed forces of the United States; and

(C) containing any other provision the President considers necessary to carry out this subsection and to safeguard the interests of the United States."

D. Advances to foreign governments shall be made as closely as possible to the time they actually disburse funds for costs incurred.

1. Normally, advances shall not be outstanding for more than 90 days. Statements of actual costs incurred in sufficient detail to allow certification of performance by an authorized DoD official shall be provided on a monthly basis. Advances to foreign countries may require consultation with the Treasury Department.

2. Advances made pursuant to 10 U.S.C. 2396 shall be recorded in account 1414, "Advances-All Others-Public." Subsidiary accounts shall be established for each country and each organization or person to whom the advance is made.

E. Prepayments are amounts paid for goods and services to be provided over a specified period in time. They apply only to those situations when it is a generally accepted industry practice to pay for items such as rents, subscriptions, and maintenance agreements in advance of the service being provided and the prepayment is authorized by law. When expenses are prepaid, DoD Components shall record the prepayment when it is made. At the end of the fiscal year, prepayments shall be reviewed and the expired portion expensed. As a general rule, DoD operation and maintenance appropriations are annual in nature and thus limited to obligations for goods and services required to meet current operating requirements. Progress payments to contractors also are recorded as prepayments.

F. Advances shall be made only to meet requirements authorized by law. When the conditions under which an advance was made are satisfied, the unused portions of the advance shall be collected immediately and returned to the fund from which originally made.

G. Except for DoD personnel receiving advances for travel purposes, all requesting organizations shall prove destitution; i.e., that they are financially unable to perform without DoD financial assistance. Failure to seek financial market assistance is not a valid basis

for requesting an advance. Organizations or individuals (other than DoD employees requesting travel advances) requesting advances shall demonstrate that all external financing sources have been exhausted before an advance is authorized.

H. Advances to civilian and military personnel for pay shall be made in accordance with the guidance contained in Chapters 28 and 29 of this Volume.

0502 ACCOUNTING POLICY

050201 DoD Components making advances or prepayments shall record them as assets until receipt of the goods or services involved or until contract terms are met. When goods or services have been received or contract terms met, the expense or acquired asset shall be recognized and the advances or prepayments reduced.

050202 Advance payments to grant award recipients (including amounts drawn against letters of credit) shall be accounted for as advances of the assisting DoD Component until the recipient has performed under the award or contract.

050203 Once the recipient has performed under the grant or agreement, the assisting agency shall record an expense in an amount equal to the cost of the services performed or costs incurred and reduce the advance account by a like amount.

050204 Advances and prepayments made shall be aggregated and not netted against each other and shown as separate line items on the financial statements and not included in accounts receivable or accounts payable.

050205 DoD Components shall report or disclose separately the amount of advances and prepayments associated with the following:

- A. Non-federal entities.
- B. Federal Agencies.

0503 ACCOUNTING FOR ADVANCES

050301 The primary purpose for advances is to provide funds to assist other organizations and individuals, who otherwise might be disadvantaged financially to carry out specified activities related to the U.S. national defense.

050302 Advances represent a current outlay of funds to meet a near- or long-term need. As such, they are a negative factor minimizing the Treasury's borrowing requirements. Accordingly, amounts advanced shall be kept to the minimum amounts necessary for the shortest possible time period.

050303 DoD Component financial management systems shall incorporate sufficient internal controls and information gathering techniques to monitor the use of advances made. Unneeded and unused balances shall be recovered as soon as information indicates they are excess to the purposes for which originally made.

050304 Recoveries of unused advances shall be recorded as a negative disbursement; i.e., as a debit to account 1012, Funds Disbursed. This permits the Funds Disbursed account to support the disbursements balances reported on the DD 1176, "Report on Budget Execution."

050305 Paragraphs 050306 through 050312, below, discuss the general ledger accounts to be used by DoD Components for advances. Accounts are established for the major categories of advances made by the Department of Defense.

050306 Advances and Prepayments (Account 1400)

A. "Advances and Prepayments" is used to record the outstanding balance of amounts advanced to Federal Agencies and non-federal entities by DoD Components and prepayments made for the later receipt of goods, services, or other assets.

B. This account is a summary control account for financial reporting purposes. No entries are posted to this account.

050307 Advances to Others (Account 1410)

A. "Advances to Others" represents the amount of payments made in contemplation of the future performance of services, receipt of goods, incurrence of expenditures, or for other assets.

B. This account is a summary control account used for financial reporting purposes. No entries are posted to this account.

050308 Travel Advances (Account 1411)

A. "Travel Advances" represents the outstanding balance of advances made to DoD military personnel, civilian employees, and appointees for per diem, transportation, and related expenses incident to travel on authorized official business or change of official duty station.

B. Travel advances shall be minimal and allowed only when necessary. Generally, advances shall not exceed 80 percent of the estimated per diem. The use of credit cards by DoD employees as a result of General Services Administration contracts with major credit cards is to be encouraged in lieu of travel advances.

C. Travel advances shall be charged to the appropriations or funds from which reimbursements of travel expenses are to be made. An authorized travel order shall serve as the basis for issuing a travel advance.

D. When authorized travel carries over from one fiscal year to the next, the total balance of all travel advances shall be transferred from the expiring appropriation accounts to the next year's appropriation accounts. Such transfers are to be made at the beginning of the new fiscal year. The transfer documents shall be supported by detailed data on each outstanding advance included in the transfer.

E. Periodically, but at least semiannually, all outstanding advances shall be reviewed to determine if the original justification for the advances are still valid. Advances determined to be in excess of the travelers'

immediate needs shall be collected from the traveler.

F. Recovery of travel advances may occur in the following ways: submission of a travel voucher upon completion of official travel; repayment by the employee to whom the advance was made; or, when necessary, deductions from the employee's pay. If the traveler is in a continuous travel status and periodic travel vouchers are submitted, the full amount of allowable travel expenses may be reimbursed to the traveler without deductions of advances until such time as the final vouchers are submitted.

G. If travel advances are not fully recoverable by deductions from travel vouchers or refunded by the travelers, prompt action shall be taken to recover the outstanding advances by deductions from any amounts due the traveler or by using any other legal means available. In such instances, the travel advance shall be reclassified and recorded in account 1316, "Refunds Receivable-Public."

H. Subsidiary travel advance accounts shall be established for each appropriation and for each employee. Information in the employee subsidiary account shall include sufficient information to establish an audit trail showing when the advance was made, the authority for the advance, and the date the advance was liquidated.

I. Employees shall be provided a reasonable period of time to repay their travel advances upon completion of travel. As a general rule, 15 calendar days shall be considered sufficient unless evidence is available to indicate a longer or shorter period is justifiable.

J. Table 5-1 illustrates the most common entries used for this account.

K. Sources for entries to this account include travel orders, travel vouchers, cash collection vouchers, disbursement vouchers, and journal vouchers.

ACCOUNTING ENTRIES FOR ACCOUNT 1411 - TRAVEL ADVANCES

1. Dr 1411 Travel Advances
Cr 1012 Funds Disbursed

To record travel advance issued to employee.

2. Dr 6116 Travel and Transportation of Persons
Dr 1012 Funds Disbursed
Cr 1411 Travel Advances

To liquidate outstanding travel advances on completion of travel. (Debit to 1012 required for part of advance returned)

3. Dr 1316 Refunds Receivable-Public
Cr 1411 Travel Advances

To transfer an unliquidated travel advance to refunds receivable when an employee fails to repay an advance.

Table 5-1**050309 Advances to Contractors and Suppliers (Account 1412)**

A. "Advances to Contractors and Suppliers" is used to record amounts advanced to non-federal organizations or individuals under contracts for goods and services.

B. This account shall be supported by subsidiary accounts for each appropriation and fund and for each advance made. Periodically, the account balance shall be reconciled with the detailed documentation supporting the advances recorded in this account. Such reconciliations shall be made no less frequently than semiannually.

C. Advances to non-federal organizations shall be made only when authorized by law.

D. Table 5-2 illustrates the most common entries used for this account.

E. Sources for entries to this account include contracts, receiving and inspection reports accepting goods and services received, and collection vouchers.

050310 Advances to Grantees (Account 1413)

A. "Advances to Grantees" is used to record amounts advanced to grantees pursuant to terms included in grant agreements.

B. This account shall be supported by subsidiary accounts for each applicable appropriation and grantee receiving an advance. Periodically, the account balance shall be reconciled with the detailed documentation supporting the advances recorded in this account. Such reconciliations shall be made no less frequently than semiannually.

C. Each account shall be reviewed periodically to determine whether amounts advanced are in excess of the grantee's current needs. Amounts determined to be excess shall be collected from the recipient. The timing of the review should be coordinated with DoD grantors so that the review occurs as each grant milestone or reporting requirement is reached.

D. Table 5-3 illustrates the most common entries used for this account:

**ACCOUNTING ENTRIES FOR ACCOUNT
1412 - ADVANCES TO CONTRACTORS AND SUPPLIERS**

1. Dr 1412 Advances to Contractors and Suppliers
Cr 1012 Funds Disbursed

To record advances issued.

2. Dr 6120 Other Services
Dr 1510 Inventory for Agency Operations
Dr 1766 Equipment Not in Use
Dr 1012 Funds Disbursed
Cr 1412 Advances to Contractors

To liquidate an outstanding advance and collect unused balances.

Table 5-2

ACCOUNTING ENTRIES FOR ACCOUNT 1413 - ADVANCES TO GRANTEEES

1. Dr 1413 Advances to Grantees
Cr 1012 Funds Disbursed

To record issue of an advance.

2. Dr 6123 Grants, Subsidies, and Contributions
Cr 1413 Advances to Grantees

To record application of an advance to execution of the grant.

3. Dr 1012 Funds Disbursed
Cr 1413 Advances to Grantees

To record recovery of advances made to grantees.

Table 5-3

E. Sources for entries to this account include grant agreements, disbursement vouchers, collection vouchers and reports on grant performance.

050311 Advances-All Other-Public (Account 1414)

A. "Advances-All Others-Public" is

used to record advances to the general public, pay advances to military personnel, and to foreign nations that may not be classified to a specific advance account.

B. This account shall be supported by subsidiary accounts for each applicable appropriation and recipient.

C. Advances in this category shall be made only when authorized by law or regulations as discussed in paragraph 050102.A.3 above.

D. Each account shall be reviewed periodically to determine whether the amounts advanced are in excess of the recipient's current needs. Amounts determined in excess shall be collected from the recipient. The required review shall be made at least semiannually.

E. Table 5-4 illustrates the most common entries used for this account:

F. Sources for entries to this account include contract documents, inspection and receiving reports, disbursing vouchers, and collection vouchers.

050312 Advances to Government Agencies and Funds (Account 1415)

A. "Advances to Government Agencies and Funds" is used to record advances made to other Federal Agencies and funds pursuant to law or agreements between DoD Components and other federal organizations.

B. This account shall be supported by subsidiary accounts for each appropriation and recipient.

C. Advances to other Government agencies shall be made only pursuant to law or when such interests are in U.S. national defense. Generally, work performed for the Department of Defense by other Federal Agencies is on a reimbursable or a direct cite arrangement, and funds are transferred to the performing agency using noncheck transfer mechanisms.

D. Table 5-5 illustrates the most common entries used for this account:

E. Sources for entries to this account include interagency agreements, disbursement vouchers, collection vouchers, and receiving and inspection reports.

ACCOUNTING ENTRIES FOR ACCOUNT 1414 - ADVANCES-ALL OTHERS-PUBLIC

1. Dr 1414 Advances-All Others-Public
Cr 1012 Funds Disbursed

To record advances made.

2. Dr 1012 Funds Disbursed
Cr 1414 Advances-All Others-Public

To record recovery of unused advances.

3. Dr 1510 Inventory for Agency Operations
Dr 6120 Other Services
Cr 1414 Advances-All Others-Public

To liquidate the advance when services required are delivered.

Table 5-4

0504 ACCOUNTING FOR PREPAYMENTS

050401 Prepayments are expenditures in advance of accepted or delivered performance. They differ from advances in that prepayments relate to transactions that are recurrent in nature and do not provide financing as a precondition of performance.

050402 In the absence of specific legal authority, DoD Components are not authorized to incur obligations using operation and maintenance appropriations for goods and services to be provided in future years.

050403 Prepayments as they apply to the Defense Business Operations Fund are discussed in Volume 11B of this regulation.

050404 Prepayments (Account 1450)

A. "Prepayments" represent the account of expenditures which provide future benefits and include such items as subscriptions, rents, taxes, royalties, commissions, progress payments to contractors, insurance and supplies. This account is a summary account used for financial reporting and control purposes.

B. Table 5-6 illustrates the most common entries used for this account.

C. Sources for entries to these accounts include progress payment requests, vendor invoices, contracts, and disbursement vouchers.

**ACCOUNTING ENTRIES FOR ACCOUNT 1415 -
ADVANCES TO GOVERNMENT AGENCIES AND FUNDS**

1. Dr 1415 Advances to Government Agencies
Cr 1012 Funds Disbursed

To record advances issued.

2. Dr 1510 Inventory for Agency Operations
Dr 6120 Other Services
Dr 1012 Funds Disbursed
Cr 1415 Advances to Other Government Agencies

To record liquidation of the advance, recovery of unused balances and performance.

Table 5-5

ACCOUNTING ENTRIES FOR ACCOUNT 1450 - PREPAYMENTS

1. Account 1451, "Prepaid Expenses." The following entries illustrate the use of this account:

- a. Dr 1451 Prepaid Expenses
Cr 1012 Funds Disbursed

To record invoice and prepayment of an item or service that will be an expense when received.

- b. Dr 6100 Operating/Program Expenses
Cr 1451 Prepaid Expenses

To amortize a prepaid expense over its prescribed period of usefulness.

- c. Dr 6100 Operating/Program Expenses
Cr 1451 Prepaid Expenses
Cr 1012 Funds Disbursed

To record receipt of an item or service for which prepayments have been made (including any payment due upon receipt).

2. Account 1452, "Progress Payments Made To Others." The following entries illustrate the use of this account:

- a. Dr 1452 Progress Payments Made To Others
Cr 1012 Funds Disbursed

To record prepayment for an asset that has not been received.

- b. Dr 1700 Fixed Assets
Cr 1452 Progress Payments Made To Others
Cr 1012 Funds Disbursed

To record receipt of an asset for which progress payments have been made (including any payment due upon receipt).

- c. Dr 1542 Inventory-Work in Process-Contractor
Cr 1452 Progress Payments Made To Others
Cr 1012 Funds Disbursed

To record receipt of an asset for which progress payments have been made (including any payment due upon receipt).

CHAPTER 6

FIXED ASSETS0601 GENERAL

060101 Purpose. This chapter prescribes the accounting policy to establish financial control over DoD fixed assets. The applicable general ledger accounts are listed in the DoD Uniform Chart of Accounts in Chapter 7, Volume 1 of this Regulation, and their use is illustrated in this chapter.

060102 Overview

A. The policy for recording fixed asset transactions implement the general property accounting policy prescribed in Chapter 1 of this Volume.

B. Fixed asset accounts are needed to bring the acquisition cost of DoD property under financial control and to provide a reliable basis for preparing reports to the President, the Congress, and the public on the value of DoD property.

0602 ACCOUNTING POLICY

060201 The acquisition cost of fixed assets consists of the amount, net of authorized discounts, paid or payable for the assets plus the transportation, installation, and other related costs of obtaining the assets in the form and place to be put into use.

060202 The term "costs" means costs paid to acquire the property. For example, another Federal Agency or another DoD Component may incur an identifiable cost related to the acquisition process of the acquiring DoD Component. Such a discretely identifiable cost is considered by the acquiring Component as part of the acquisition cost of property. An example of a cost that shall not be recorded is interest on the public debt that is paid by the Department of the Treasury, except as described in Chapter 1, paragraph 010504.C. of this Volume, and paragraph 060204, below.

060203 The guidance in paragraph 060202, above, on costs paid by other Federal Agencies applies to assets transferred in from another Federal Agency without reimbursement. Such transfers shall be recorded using the amounts recorded in the transferring Federal Agency's accounting system. Section 0605 of this chapter illustrates the accounting treatment for recording assets transferred in from other Federal Agencies.

060204 Only interest cost on loans obtained by the Department of Defense to finance capital expenditures by the Department of Defense are capitalized. However, imputed interest cost shall be included in the selling price of the property, plant, or equipment under certain circumstances. Volume 11 of this Regulation provides guidance to be followed in establishing selling prices.

060205 Property, plant, and equipment acquired or constructed for R&D testing activities normally shall be expensed when acquired. When the assets can be used for other purposes after the original R&D work is completed, the remaining value of the assets shall be capitalized by reducing the expense accounts to reflect the remaining acquisition cost of the assets to be capitalized.

060206 Assets shall have an estimated useful life to the Department of Defense of 2 years or more. Useful life refers to the period of economic usefulness of an asset to the Department of Defense as opposed to its physical life. Determination of an asset's useful life shall be based on actual or planned retirement or replacement practices, not "standard" tables of asset lives. When item-by-item calculations of depreciation are required, the estimated useful lives shall be reviewed at their 50 percent point and adjusted as needed to correspond to a more realistic remaining useful life. Subsequent reevaluations are not required.

060207 DoD Components shall capitalize all assets developed, manufactured, transferred, or acquired when the following criteria are met:

Acquisition cost, book value, or, when applicable, the estimated fair market value equals, or exceeds, the expense/investment funding threshold used by the Congress for appropriating DoD operating (expense) and procurement (investment) appropriations.

Estimated benefit period or useful life to the DoD of 2 years or more.

A. The dollar threshold for capitalizing an asset for accounting purposes is identical to, and automatically changes with, the expense/investment funding threshold used by the Congress for appropriating DoD operating (expense) and procurement (investment) appropriations. This criteria applies at the time of acquisition or capitalization. The acquisition cost of an asset is capitalized, regardless of the source of funding, when the capitalization criteria prescribed in this Volume are met.

B. Assets capitalized within any DoD appropriation or account at the previous threshold, which are not fully depreciated, shall continue to be capitalized (and depreciated if applicable) at the former capitalization threshold.

060208 Depreciation accounting is a technique that allocates the cost of depreciable property, plant, or equipment as an operating expense over the period in which removal is considered feasible. Depreciation recognizes the allocation of cost of depreciable physical plant, property, or equipment as an operating expense over the periods in which the assets are expected to provide benefits.

060209 Residual value is the estimated value remaining at the end of a fixed asset's useful life to the Department of Defense. Residual value is defined as being the amount that can be expected to be recovered from the asset's disposal when it is removed from service. As such, it is the estimated scrap value, trade-in value, or market value at the end of the asset's useful life to the using activity. Residual value is considered when it exceeds 10 percent of the

capitalized amount of the fixed asset. The estimated residual value does not change, although during inflationary periods a used asset may be sold for more than its original acquisition cost. This gain from inflation is accounted for only when realized since "anticipated" gains are not recognized in generally accepted accounting practice.

060210 Depreciation and depletion are computed using the capitalized amount less residual value. This amount shall be divided equally among the accounting periods, units of issue, hours of use, or quantities of resources removed during the asset's useful life. The asset's useful life shall not exceed 40 years. Asset useful life for Business Fund activities, are prescribed in Volume 11B, of this regulation.

060211 DoD accounting systems need to establish accounts in which to record the results of any calculation of depreciation and depletion. Non-Defense Business Operations Fund activities are not required to establish a capability to compute depreciation on an item-by-item basis, unless such a capability has been determined to be cost effective by the applicable DoD Component. Non-Defense Business Operations Fund activities are authorized to use cost-finding techniques to estimate depreciation when required for billings to non-federal organizations or for presentation in financial reports. Volume 11 of this Regulation provides additional guidance on the depreciation calculation. Business Fund activities shall establish the capability to compute depreciation.

060212 Entries recording transactions in accounting system general ledger accounts and the supporting subsidiary property records must:

A. Be supported by source documents that capture all transactions affecting the Component's investment in property, including:

1. All acquisitions, whether by purchase, transfer from other agencies, donation, or other means, as of the date the Component takes custody of the property.

2. All disposals or retirements when the property leaves the custody of the Component.

B. Include sufficient information so the property records control physical quantities of DoD property, identify its location, and show unit costs. These property records shall be designed to be of maximum assistance in making procurement and utilization decisions, including those decisions related to identifying potential excess property that may be available for reuse, transfer to other DoD activities, or made available for disposal in accordance with current DoD regulations and regulatory requirements.

C. Enable periodic independent verification of the accuracy of the accounting records through periodic physical counts that provide the capability to reconcile the subsidiary property records with the general ledger accounts.

D. Identify and classify DoD property, plant, and equipment that were capitalized, recorded in the accounting system, and reported in financial statements. DoD property that does not meet the capitalization criteria in Chapter 1 of this Volume also shall be recorded in property records for control purposes. Such property includes those considered sensitive, subject to pilferage, etc.

E. Be based on the same source documents, so that the property records are integrated and subsidiary to the accounting system or can be reconciled with the accounting system.

F. Accumulate the costs of construction in progress or work in process in the related general ledger accounts for comparison with authorized amounts and postings to the applicable fixed asset or inventory accounts when the work is completed or to the appropriate expense accounts if the work is terminated.

G. Include all DoD-owned property (even if held by others) and property of others held by the Department of Defense through seizure, forfeiture, etc.

H. Provide information to identify and account for leased property (even if not capitalized).

I. Provide information to identify and account for capitalized additions and improvements.

060213 Physical Inventories. DoD fixed assets shall be subject to periodic physical inventories. Fixed assets other than real property shall be inventoried physically every 3 years following the guidance in Chapter 4 of this Volume. Real property shall be inventoried every 5 years.

A. These inventories shall be taken to ensure, among other things, that DoD fixed assets are as follows:

1. At the location identified in the property records.

2. As described in the property records.

3. In the condition described in the property records.

B. The results of the physical counts shall be reconciled to the property records, including property books. Differences shall be researched and any adjustments shall be documented fully. Adjustments include unrecorded physical changes such as removal, addition, or modification of the fixed asset that were not recorded previously.

C. Fixed assets not in use may be inventoried physically using statistical sampling as discussed in Chapter 4 of this Volume. Fixed assets in use and all real property shall be subject to a 100 percent physical inventory. The physical counts shall be scheduled so that all items are counted within the time frames established in this subsection.

D. Care must be taken to consider infloat assets; i.e., receipts, issues, and in-transit items before reaching any conclusions that property records are inaccurate.

E. Adjustments to property records and financial records shall be made only for those items where the physical counts disclose discrepancies. Such adjustments shall be supported by reports of survey prepared in accordance with Chapter 7, "Financial Liability for Government Property, Lost, Damaged, or Destroyed," of Volume 12 of this regulation. Adjustments resulting from previously unrecorded modification or alterations also shall be supported by documentation showing the costs of the changes.

F. If the results of the physical counts indicate differences, the process shall be expanded for fixed assets in use or real property. If the results of the increased count also disclose differences, the financial statements shall be qualified to disclose that amounts reported as fixed assets are inaccurate. Failure to conduct required physical inventories and reconcile material differences between physical counts and property records or between property records and the controlling financial accounts shall be disclosed as a material weakness in Section 4 of the "Federal Managers' Financial Integrity Act" statement.

G. Adjustments to the general ledger inventory accounts shall be recorded as a miscellaneous gain (Account 7193) or as a miscellaneous loss (Account 7293).

0603 ACCOUNTING FOR REAL PROPERTY

060301 The Department of Defense shall record in the financial accounts the dollar value of real property that is under DoD control, unless there is evidence that the property is recorded in the accounting system of another Federal Agency. It is important that the overall accounting records of the Federal Government are not duplicated. If doubt persists, the DoD Component shall contact the other Federal Agency to determine if the real property is recorded in its accounting system. In those situations when it has not been recorded, the DoD Component shall reach agreement with the Federal Agency as to who shall record the real property. If the DoD Component is to record the real property, it shall request the necessary source documents to

establish the location, size, original acquisition cost, cost of improvements, estimated life of the building, the date the building was constructed, etc. This allows for identification of assets to the specific DoD Component, organization, program, etc., which is benefiting from the property. Subsidiary accounts shall be established, as necessary, to provide financial information on the various classifications of real property for reporting and internal management purposes.

060302 The DoD accounting entity that controls the access to real property at Fiscal Year end shall account for it. This shall preclude duplication in accounting and financial reporting and assure that the property is under financial control.

060303 A discussion of the real property accounts is provided in the following paragraphs 060304 through 060307, below.

060304 Fixed Assets, Net (Account 1700)

A. "Fixed Assets, Net" is used to record the value of all Department of Defense assets, including real property.

B. This account is a summary account. No individual transactions are posted to this account.

060305 Land (Account 1710)

A. "Land" is used to record the acquisition cost of DoD-controlled land. When the acquisition cost cannot be determined, the estimated fair market value shall be used.

B. Land includes not only the land but also the rights to it, such as easements.

C. Land is regarded for accounting purposes as a non-wasting asset. As such, land is not subject to depreciation.

D. The acquisition cost of land includes the purchase price; broker's commission; fees for examining and recording the title and surveying; and any razing and removal costs (less salvage proceeds) of structures on the land.

E. Periodic DoD payments for land rights are accounted for as a period operating expense.

F. DoD Components shall maintain subsidiary accounts by type of natural resource, when such financial data are required to meet reporting requirements.

G. Table 6-1 illustrates the most common entries used for this account.

H. Sources of entries to this account include invoices, payment vouchers, documented estimates indicating source of estimates, sales records, and documented transfers and losses.

060306 Buildings (Account 1730)

A. "Buildings" is used to record the acquisition cost of DoD-controlled buildings. When the acquisition cost cannot be determined, the estimated fair market value of buildings and the cost of obtaining them in the form to be put into use by the Department of Defense shall be recorded. The account includes capitalizable additions, alterations, improvements, and rehabilitations.

B. Subsidiary accounts are maintained as prescribed in enclosure 1 of Department of Defense Facility Classes and Construction Categories, DoD Instruction 4165.3. Additionally, buildings are identified as government furnished property (GFP) when applicable, and DoD Components shall have the capability to report GFP buildings when required.

C. Buildings are classified according to their actual use. For example, if "Training Facilities - Other Than Buildings" are converted into "Administrative Structures - Other Than Buildings," they are reclassified as the latter upon conversion. If the conversion affects the facilities' useful lives, they must be revised accordingly for depreciation accounting purposes.

D. The following criteria must be met for an item to qualify as an asset and be reported as such in a DoD entity's financial statements:

1. The asset must embody a probable future benefit that will contribute to the entity's operations.

ACCOUNTING ENTRIES FOR ACCOUNT 1710 - LAND

1. Dr 1710 Land
Cr 2113 Accounts Payable-Public-Current

To record the acquisition cost incurred by the Department of Defense for land.

2. Dr 1710 Land
Cr 2113 Accounts Payable-Public-Current
Cr 3220 Transfers In From Others-Without Reimbursement

To record both of the following:

- (a) The estimated fair market value or the specific amount established by authoritative sources for land for which the acquisition cost is not determined.
- (b) The costs of obtaining the property in the form to be put into use, and provided from other sources without reimbursement.

TABLE 6-1

2. The entity that reports the asset must be able to obtain the benefit and control access to the benefit inherent in the asset.

3. The transaction or event giving the entity a right to and control over the benefit must have already occurred.

E. DoD activities that meet the criteria in paragraph D. above shall record the capital asset in their property and financial records; record depreciation on the asset; and record improvements to the asset.

F. DoD activities who are sole occupants/tenants of Government owned facilities or hold capital leases (as opposed to operating leases) on entire buildings and sub-let portions of that building and meet the criteria in paragraph D. above shall record the asset in their property and financial records. DoD activities that are joint occupants/tenants of Government owned facilities shall determine which occupant/tenant will record the asset in their property and financial records by applying the following criteria in descending order of application:

1. Occupant/tenant that can substantiate preponderant use (via direct labor hours, actual hours, population, square footage, metered output, etc.) of an asset in the production of goods and services for their customers.

2. Occupant/tenant that have exclusive responsibility for the maintenance, repair, upkeep, and replacement (Military Construction) of the asset.

G. Table 6-2 illustrates the most common entries used for this account.

H. Sources of entries to this account include contracts, invoices, payment vouchers, reports of completed construction projects, transfer documents, documented estimates indicating source of estimates, inventory documents, and documented gains and losses.

060307 Accumulated Depreciation on Buildings (Account 1739)

A. "Accumulated Depreciation on Buildings" is used to record the accumulated depreciation charged to expense for buildings.

B. Table 6-3 illustrates the most common entries used for this account

C. Sources for entries to this account include journal vouchers with work papers supporting depreciation calculations and transfer documents.

060308 Other Structures and Facilities (Account 1740)

A. "Other Structures and Facilities" is used to record the acquisition cost of DoD-controlled utilities and ground improvements and those facilities not classified as buildings. When the acquisition cost cannot be determined, the estimated fair market value and the costs of obtaining them in the form to be put into use by the Department of Defense shall be recorded. The account includes capitalizable additions, alterations, improvements, and rehabilitations to other structures and facilities.

B. Subsidiary accounts shall be maintained by category groups as prescribed in enclosure 1 of DoD Instruction 4165.3. Additionally, other structures and facilities are identified as Government Furnished Property (GFP) when applicable, and DoD Components shall have the capability to report such GFP assets when required.

C. The illustrative entries and the sources of these entries to this account correspond to those for the "Buildings" account in paragraph 060306, above.

060309 Accumulated Depreciation on Other and Facilities (Account 1749)

A. "Accumulated Depreciation on Other Structures and Facilities" is used to record the cumulative depreciation on such assets.

ACCOUNTING ENTRIES FOR ACCOUNT 1730 - BUILDINGS

1. Dr 1730 Buildings
 - Cr 2113 Accounts Payable-Public-Current
 - Cr 2591 Mortgages Payable-Family Housing
 - Cr 2592 Mortgages Payable-Homeowners Assistance Program

To record the acquisition cost incurred by the Department of Defense for buildings.

2. Dr 1730 Buildings
 - Cr 1721 Construction in Progress-In-House
 - Cr 1722 Construction in Progress-Contractor
 - Cr 1723 Construction in Progress-Other Government Activities

To record the value of completed buildings transferred from construction in progress accounts.

3. Dr 1730 Buildings
 - Cr 2113 Accounts Payable-Public-Current

To record the following the act of taking possession of a building constructed with Military Construction appropriation funds.

4. Dr 1730 Buildings
 - Cr 1739 Accumulated Depreciation on Buildings
 - Cr 3220 Transfers In from Others-Without Reimbursement

To record the transferor's acquisition cost of facilities received without reimbursement.

5. Dr 1739 Accumulated Depreciation on Buildings
 - Dr 3231 Transfers Out to Government Agencies-Without Reimbursement
 - Cr 1730 Buildings
 - Cr 1710 Land

To record the value of facilities transferred without reimbursement to another Federal Agency or DoD accounting entity. This includes situations when GSA accepts accountability for disposal without a transfer of physical property to GSA.

6. Dr 1739 Accumulated Depreciation on Buildings
 - Dr 7293 Other Miscellaneous Losses
 - Cr 1730 Buildings

To record the nonreimbursable loss, damage, or destruction of a building.

TABLE 6-2

**ACCOUNTING ENTRIES FOR ACCOUNT 1739 -
ACCUMULATED DEPRECIATION ON BUILDINGS**

1. Dr 6126 Depreciation of Real Property
Cr 1739 Accumulated Depreciation on Buildings

To record depreciation expense for the current accounting period.

2. Dr 1739 Accumulated Depreciation on Buildings
Dr 3231 Transfers Out to Government Agencies-Without Reimbursement
Cr 1730 Buildings

To record the value of facilities transferred without reimbursement to another Federal Agency or DoD accounting entity. This includes situations when GSA accepts accountability for disposal without a transfer of physical property to GSA.

3. Dr 1730 Buildings
Cr 1739 Accumulated Depreciation on Buildings
Cr 3220 Transfers In from Others-Without Reimbursement

To record the transferor's acquisition cost of facilities received without reimbursement.

4. Dr 1739 Accumulated Depreciation on Buildings
Dr 7293 Other Miscellaneous Losses
Cr 1730 Buildings

To record the nonreimbursable loss, damage, or destruction of a building.

TABLE 6-3

B. The illustrative entries and the sources of these entries correspond to those for the "Accumulated Depreciation on Buildings" account, paragraph 060307, above.

**0604 ACCOUNTING FOR CONSTRUCTION
IN PROGRESS**

060401 The "Construction in Progress" accounts are used to accumulate costs of DoD real property construction projects. Included in this category is the equipment that is installed as an integral part of the real property and that normally could not be removed without dismantling the property. Examples of such equipment include heating and air conditioning systems, overhead cranes, elevators, etc. These costs, which are accumulated regardless of the

source of funding, include direct labor, direct material, and overhead. All of these costs, including those financed as "minor construction," are recorded in "Construction in Progress" accounts as long as the construction project is expected to meet the capitalization criteria prescribed in Chapter 1 of this Volume. The recording of costs in "Construction in Progress" accounts brings the costs under financial control and segregates them from expenses.

060402 Construction overhead includes any cost of construction in progress that benefits more than a single construction project. Overhead may include costs for supervision and other indirect labor, supplies and materials, transportation, depreciation, insurance, etc. Construction overhead must be collected in cost

pools and allocated to specific construction projects in proportion to the benefits received. Chapter 22 of this Volume contains the accounting standards for determining overhead construction costs.

060403 There are four "Construction in Progress" subsidiary accounts to control applicable work and property that receive special attention. "Construction in Progress-In-House," "Construction in Progress-Contractor," and "Construction in Progress-Other Government Activities" identify who is performing the construction. "Construction in Progress-Government-Furnished Material" identifies that portion of Government property (as defined in paragraph 060410, below) furnished to contractors and subcontractors for the performance of DoD construction contracts.

060404 "Construction in Progress" is accounted for by the U.S. Army Corps of Engineers (ACE) or the Naval Facilities Engineering Command (NAVFACENGCOM), as applicable, when they are responsible for the construction. The DoD accounting entity that is to receive the constructed property does not account for the construction costs, that can only be obtained from ACE or NAVFACENGCOM, until it accepts accountability for a completed asset.

060405 When construction projects are terminated before completion, the circumstances must be examined carefully to determine suitable

write-offs and other applicable accounting adjustments.

060406 Construction in Progress (Account 1720)

A. "Construction in Progress" is used to record the costs of direct labor, direct material, and overhead incurred in the construction of property and plant. On completion, these costs shall be transferred to the proper capital asset account as the acquisition cost of the item.

B. This account is a summary account used for financial control and reporting purposes. No entries are posted to this account.

060407 Construction in Progress-In-House (Account 1721)

A. "Construction in Progress-In-House" is used to record the cost of construction performed by DoD personnel.

B. Subsidiary accounts shall be maintained for each construction project to facilitate the transfer of costs to the applicable real property or expense account.

C. Table 6-4 illustrates the most common entries used for this account.

D. Sources of entries to this account include billings under contracts for materials, supplies, and equipment; documented assignments of costs accumulated in cost pools; issue and transfer documents; receiving and shipping reports; invoices; payment vouchers; payroll records; reports of completed construction projects; and documented losses.

060408 Construction in Progress-Contractor (Account 1722)

A. "Construction in Progress-Contractor" is used to record the value of work performed by contractors other than other Government Agencies in accordance with the terms of the applicable construction contracts. Progress payments for such work are discussed in Sub-part 32.5 of the Federal Acquisition Regulation. Other types of payments such as cost reimbursements also are included in this account.

B. Subsidiary accounts shall be maintained for each construction project to facilitate the transfer of costs to the applicable real property or expense account.

C. Table 6-5 illustrates the most common entries used for this account.

D. Sources of entries to this account include contracts, contractor requests for progress payments, invoices, payment vouchers, construction acceptance documents, accounting records, and reports of survey.

**ACCOUNTING ENTRIES FOR ACCOUNT 1721 -
CONSTRUCTION IN PROGRESS-IN-HOUSE**

1. Dr 1721 Construction in Progress-In-House
Cr 1521 Inventory Held for Sale
Cr 1766 Equipment Not in Use
Cr 6000 Expense accounts series

To record the costs incurred by the Department of Defense for construction in process.

2. Dr 1730 Buildings
Dr 1740 Other Structures and Facilities
Cr 1721 Construction in Progress-In-House

To record the value of DoD in-house construction projects completed.

3. Dr 7293 Other Miscellaneous Losses
Cr 1721 Construction in Progress-In-House

To record the nonreimbursable loss, damage, or destruction of "Construction in Progress-In-House."

TABLE 6-4**ACCOUNTING ENTRIES FOR ACCOUNT 1722 -
CONSTRUCTION IN PROGRESS-CONTRACTOR**

1. Dr 1722 Construction in Progress-Contractor
Cr 2113 Accounts Payable-Public-Current

To record the allowable costs of construction in progress reported by contractors other than Federal Government Agencies.

2. Dr 1730 Buildings
Dr 1740 Other Structures and Facilities
Cr 1722 Construction in Progress-Contractor

To transfer completed projects to the applicable real property accounts.

3. Dr 7293 Other Miscellaneous Losses
Cr 1722 Construction in Progress-Contractor

To record the loss of applicable construction in progress due to the nonreimbursable loss, damage, or destruction of related construction projects.

TABLE 6-5

060409 Construction in Progress-Other Government Activities (Account 1723)

A. "Construction in Progress - Other Government Activities" is used to record the value of work performed by other Federal Agencies for the construction of facilities, utilities, and ground improvements not yet accepted by the Department of Defense.

B. Subsidiary accounts shall be maintained for each construction project to facilitate the transfer of costs to the applicable real property or expense account.

C. Table 6-6 illustrates the most common entries used for this account.

D. Sources of entries to the "Construction in Progress - Other Government Activities" account include invoices, payment vouchers, construction acceptance documents, and reports of survey.

060410 Construction in Progress-Government-Furnished Material (Account 1724)

A. "Construction in Progress-Government-Furnished material" is the account for recording the value of that portion of Government property furnished to contractors and subcontractors (including other Federal Agencies) for the performance of DoD construction contracts. "Government property" in this case includes all personal property acquired directly by the Department of Defense as defined in Chapter 1 of this Volume and made available for incorporation into construction end products to be delivered under DoD construction contracts or to be consumed or expended in the performance of those construction contracts.

B. Subsidiary accounts shall be maintained for each contractor and contract that is furnished Government property.

C. Table 6-7 illustrates the most common entries used for this account.

**ACCOUNTING ENTRIES FOR ACCOUNT 1723 -
CONSTRUCTION IN PROGRESS-OTHER GOVERNMENT ACTIVITIES**

1. Dr 1723 Construction in Progress-Other Government Activities
Cr 2111 Accounts Payable-Government-Current

To record the allowable costs paid for construction being performed by another Federal Agency.

2. Dr 1730 Buildings
Dr 1740 Other Structures and Facilities
Cr 1723 Construction in Progress-Other Government Activities

To transfer completed projects to the applicable real property accounts.

3. Dr 7293 Other Miscellaneous Losses
Cr 1723 Construction in Progress-Other Government Activities

To record the loss of construction in progress due to the nonreimbursable loss, damage, or destruction of related projects constructed by a federal agency other than the Department of Defense.

TABLE 6-6

D. Sources of entries to this account include shipping and issue documents, construction acceptance documents and property administrator reports, material-return documents, collection and deposit documents, settlement agreements, and documented losses.

060411 Construction in Progress - Capital - Defense Business Operations Fund (Account 1725). This account is used to accumulate the cost of all capital assets developed or manufactured for the use by the performing business area activity. (See Volume 6, Chapter 6 for additional information on the Defense Business Operations Fund.

0605 ACCOUNTING FOR EQUIPMENT

060501 Equipment consists of all personal property owned by the Department of Defense that is not an integral part of real property (see Section 0603 of this chapter) that is as follows:

A. Meets the capitalization criteria prescribed in Chapter 1 of this Volume.

060502 All personal property owned by the Department of Defense shall be classified as military equipment. This includes weapons systems and all equipment necessary to support the DoD mission.

060503 Personal property being constructed for the Department of Defense shall be brought under accounting control using the work in process accounts described in Chapter 4 of this Volume.

060504 The following subsections provide accounting guidance for equipment owned by the Department of Defense.

060505 Equipment (Account 1750)

A. "Equipment" is used to record the value of nonmilitary personal property of a durable nature.

B. DoD Components are not authorized to use this account. All DoD personal property shall be recorded in the applicable accounts for military equipment.

060506 Accumulated Depreciation on Equipment (Account 1759)

A. "Accumulated Depreciation on Equipment" is used to record the accumulated depreciation of nonmilitary personal property of a durable nature.

B. DoD Components are not authorized to use this account. All DoD personal property, including depreciation, shall be recorded in the applicable accounts for military equipment.

060507 Military Equipment (Account 1760)

A. "Military Equipment" is used to record the capitalized value of DoD military equipment that has been issued for use. It does not include combat-type equipment in inventory, layaway, or not in use. The account also includes the cost of capitalizable upgrades, rehabilitation, and modifications.

B. This account is a summary account used for financial control and reporting purposes. No entries are posted to this account.

060508 Equipment in Use (Account 1762)

A. "Equipment in Use" is used to record the acquisition cost of military equipment in use by the Department of Defense. When the acquisition cost cannot be determined, the estimated fair market value of such equipment and the costs of obtaining the equipment in the form and place to be put into use are recorded. "Equipment in Use" is exclusive of the following:

1. "Equipment on Loan."
2. "Equipment with Contractors, Testing Agencies, Defense Industrial Facilities, and Others."
3. Equipment being incorporated into work in process or construction in progress.

The account also includes the cost of capitalizable additions, alterations, improvements, and rehabilitations of equipment in use.

**ACCOUNTING ENTRIES FOR ACCOUNT 1724 -
CONSTRUCTION IN PROGRESS-GOVERNMENT-FURNISHED MATERIAL**

1. Dr 1724 Construction in Progress-Government-Furnished Material
Cr 1521 Inventory Held for Sale
Cr 1766 Equipment Not in Use

To record the value of Government property furnished to contractors for the performance of DoD construction contracts.

2. Dr 1730 Buildings
Dr 1740 Other Structures and Facilities
Cr 1724 Construction in Progress-Government-Furnished Material

To record the value of Government property that is as follows:

- (a) Incorporated into or attached to a construction end product accepted by the Department of Defense.
- (b) Consumed or expended in the performance of DoD construction contracts.

3. Dr 1521 Inventory Held for Sale
Dr 1766 Equipment Not in Use
Cr 1724 Construction in Progress-Government-Furnished Material

To record the value of Government property returned by contractors.

4. Dr 1320 Accounts Receivable-Claims Receivable-Public
Cr 1724 Construction in Progress-Government-Furnished Material

To record a claim against a contractor for the value of the loss, damage, or destruction of Government property furnished in connection with DoD construction contracts.

5. Dr 7293 Other Miscellaneous Losses
Cr 1724 Construction in Progress-Government-Furnished Material

To record the nonrecoverable value of the loss, damage, or destruction of Government property furnished in connection with DoD construction contracts.

TABLE 6-7

B. Equipment is capitalized based upon the actual amount paid or payable for the equipment even when multi-year contracts are involved.

C. Capitalize computer software (programs, routines and subroutines) that is as follows:

1. Is integrated into hardware.
2. Loses its identity as software and is depreciated, when required, as hardware. Additional guidance for accounting for computer software can be found in GAO's Federal Government Accounting Pamphlet Number 4.

3. Meets the capitalization criteria prescribed in Chapter 1 of this Volume.

4. Additional guidance for capitalizing computer software can be found in Chapter 7 of this Volume, paragraph 070312.

D. Table 6-8 illustrates the most common entries used for this account.

E. Sources of entries to this account include contracts, invoices, receiving reports, payment vouchers, issue and shipping documents, transfer documents, documented estimates indicating source of estimates, inventory documents, and documented gains and losses.

060509 Equipment with Contractors, Testing Agencies, Defense Industrial Facilities, and Others (Account 1763)

A. "Equipment with Contractors, Testing Agencies, Defense Industrial Facilities, and Others" is used to record the capitalized value of DoD equipment furnished to contractors (including other Federal Agencies), testing agencies, defense industrial facilities, and others for the primary benefit of the Department of Defense or the DoD Component that furnishes the equipment. The equipment to be recorded in this account is usually returned after use or testing rather than incorporated into an end product, consumed, or expended. This account does not include the following:

ACCOUNTING ENTRIES FOR ACCOUNT 1762 - EQUIPMENT IN USE

1. Dr 1762 Equipment in Use
Cr 2113 Accounts Payable-Public-Current

To record the acquisition cost incurred by the Department of Defense for military equipment.

2. Dr 1762 Equipment in Use
Cr 1582 Work in Process-Contractor

To record the capitalized value of completed equipment transferred from work in process accounts to equipment in use.

3. Dr 1762 Equipment in Use
Cr 1766 Equipment Not in Use
Cr 1763 Equipment with Contractors, Testing Agencies, Defense Industrial Facilities, and Others
Cr 1764 Equipment on Loan

To record the transfer of equipment to "Equipment in Use."

4. Dr 1762 Equipment in Use
Cr 7193 Other Miscellaneous Gains

To record an increase in equipment in use that is discovered by physical inventory. The estimated fair market value of the discovered equipment shall be used when acquisition cost cannot be determined.

TABLE 6-8

ACCOUNTING ENTRIES FOR ACCOUNT 1762 - EQUIPMENT IN USE (CONT.)

5. Dr 1762 Equipment in Use
 Cr 2113 Accounts Payable-Public-Current
 Cr 3220 Transfers In from Others- Without Reimbursement
 Cr 1769 Accumulated Depreciation on Military Equipment

To record the following:

- (a) The estimated fair market value or the acquisition cost plus any accumulated depreciation recorded in the transferor's accounts for equipment in use received without reimbursement by the Department of Defense from a non-DoD Federal Agency.
- (b) The costs of obtaining the property in the form and place to be put into use.

6. Dr 1762 Equipment in Use
 Cr 3220 Transfers In from Others-Without Reimbursement
 Cr 1769 Accumulated Depreciation on Military Equipment

To record the transferor's value of military equipment in use that is received without reimbursement from another DoD Component.

7. Dr 1762 Equipment in Use
 Cr 2992 Liability for Property Furnished by Others

To record the estimated fair market value of property loaned to the Department of Defense by others with the agreement that it will be returned.

8. Dr 1766 Equipment Not in Use
 Cr 1762 Equipment in Use

To record the value of "Equipment in Use" that is transferred to "Equipment Not in Use." This includes "Equipment in Use" transferred to a depot maintenance facility.

9. Dr 1769 Accumulated Depreciation on Military Equipment
 Dr 3231 Transfers Out to Government Agencies-Without Reimbursement
 Cr 1762 Equipment in Use

To record the value of equipment in use that is transferred without reimbursement by the following:

- (a) The Department of Defense to another federal agency.
- (b) One DoD accounting entity to another. This includes situations when DLA accepts accountability for disposal without a transfer of physical property to DLA.

TABLE 6-8 (CONT.)

ACCOUNTING ENTRIES FOR ACCOUNT 1762 - EQUIPMENT IN USE (CONT.)

10. Dr 1769 Accumulated Depreciation on Military Equipment
 Dr 7293 Other Miscellaneous Fund Losses
 Cr 1762 Equipment in Use

To record the following:

- (a) The nonreimbursable loss, damage, or destruction of equipment in use.
 (b) By physical inventory.

11. Dr 1769 Accumulated Depreciation on Military Equipment
 Dr 1765 Property Awaiting Disposal
 Cr 1762 Equipment in Use

To record the value of equipment in use transferred to disposal.

- Dr 1762 Depreciation of Equipment
 Dr 2992 Liability for Property Furnished by Others
 Cr 1762 Equipment in Use
 Cr 1769 Accumulated Depreciation on Military Equipment

To record the return of property loaned to the Department of Defense by others.

TABLE 6-8 (CONT.)

1. Equipment transferred to a depot maintenance facility for repairs.

2. Government equipment that is furnished to be consumed or expended in the performance of a contract or for incorporation into an end product. The former are recorded as "Equipment Not in Use;" the latter are recorded as either "Construction in Progress - Government-Furnished Material" or "Work in Process - Government-Furnished Material."

B. Those who receive this equipment have custodial responsibility, but they have no property accounting responsibility.

C. Government-provided property, as discussed in Chapter 1 of this Volume includes both contractor-acquired and Government-furnished property. This account shall not include contractor-acquired property;

however, the account shall include Government-furnished special tooling, special test equipment, military property, and the plant equipment portion of facilities that is expected to be returned. Contractor-acquired property is accounted for in the "Work in Process-Contractor" and "Construction in Progress-Contractor" accounts.

D. The DoD accounting entity that controls the benefit from the use of the equipment shall account for the equipment. Depreciation, when applicable, is charged to the benefiting accounting entity(ies). Defense General Supply Center (DGSC) property is furnished to contractors. DGSC ensures that the controlling accounting entity receives the required information on the equipment to make the necessary accounting entries.

E. Table 6-9 illustrates the most common entries used for this account.

**ACCOUNTING ENTRIES FOR ACCOUNT 1763 - EQUIPMENT WITH CONTRACTORS,
TESTING AGENCIES, DEFENSE INDUSTRIAL FACILITIES, AND OTHERS**

1. Dr 1763 Equipment with Contractors, Testing Agencies, Defense Industrial
Facilities, and Others
Cr 1766 Equipment Not in Use

To record the capitalized value of equipment that is transferred to contractors.

2. Dr 1763 Equipment with Contractors, Testing Agencies, Defense Industrial
Facilities, and Others
Cr 2113 Accounts Payable-Public-Current

To record the acquisition cost of equipment incurred by the Department of Defense for which the cost is recorded initially in the "Equipment with Contractors, Testing Agencies, Defense Industrial Facilities, and Others" account.

3. Dr 1766 Equipment Not in Use
Cr 1763 Equipment with Contractors, Testing Agencies, Defense Industrial
Facilities, and Others

To record the value of "Equipment with Contractors, Testing Agencies, Defense Industrial Facilities, and Others" that is transferred to "Equipment Not in Use."

4. Dr 1762 Equipment in Use
Cr 1763 Equipment with Contractors, Testing Agencies, Defense Industrial
Facilities, and Others

To record the value of "Equipment with Contractors, Testing Agencies, Defense Industrial Facilities, and Others" that is transferred to "Equipment in Use."

5. Dr 1769 Accumulated Depreciation on Military Equipment
Dr 7293 Other Miscellaneous Losses
Cr 1763 Equipment with Contractors, Testing Agencies, Defense Industrial
Facilities, and Others

To record the nonreimbursable loss, damage, or destruction of "Equipment with Contractors, Testing Agencies, Defense Industrial Facilities, and Others."

TABLE 6-9

F. Sources of entries to this account include invoices, receiving reports, payment vouchers, transfer documents, and reports of survey.

060510 Equipment on Loan (Account 1764)

A. "Equipment on Loan" is used to record the capitalized value of DoD equipment that is loaned for the primary benefit of the borrower. Normally, the account does not include bailments because they are of such short duration that they would be washed during the same accounting period.

B. Those who borrow the equipment have custodial responsibility, but they have no property accounting responsibility.

C. Table 6-10 illustrates the most common used entries for this account.

D. Sources for entries to this account include loan and lease agreements; documented receipts, issues, shipments, losses, and claims; and reports of survey.

060511 Equipment Not in Use (Account 1766)

A. "Equipment Not in Use" is used to record the acquisition cost or, when applicable, estimated fair market value of capitalizable equipment held for future use, sale, or transfer. The account includes the cost of capitalizable additions, alterations, improvements, and rehabilitations to equipment not in use.

B. Equipment not in use includes the following:

1. Inventory.

2. Capitalizable equipment that is not in the supply system. Examples of the latter include the following:

a. Equipment removed from use for depot maintenance.

b. Equipment that is no longer in use because the item manager has directed that it be placed in layaway. Subsidiary

accounts shall be established as necessary to identify the cost of equipment in these categories.

C. "Equipment Not in Use" does not include equipment in use that is merely "down for maintenance" or "awaiting parts."

D. Table 6-11 illustrates the most common entries used for this account.

E. Sources of entries to this account include invoices, receiving reports, payment vouchers, sales records, issue and shipping documents, transfer documents, documented estimates indicating source of estimates, inventory documents, and documented gains and losses.

060512 Accumulated Depreciation on Military Equipment (Account 1769)

A. "Accumulated Depreciation on Military Equipment" is used to record the cumulative depreciation on military equipment.

B. Subsidiary accounts for "Accumulated Depreciation on Equipment" shall be maintained to correspond with the subsidiary accounts maintained for the military equipment accounts when such information is required for management and reporting purposes.

C. The standards for computing and recording depreciation are provided in Chapter 1 of this Volume.

D. Table 6-12 illustrates the most common entries used for this account.

E. Sources of entries to this account include official depreciation schedules; documented physical inventories, issues, shipments, transfers, and losses; and reports of survey.

060513 Equipment in Transit (Account 1770)

A. "Equipment in Transit" is used to record the acquisition cost of equipment in transit that has not been received.

ACCOUNTING ENTRIES FOR ACCOUNT 1764 - EQUIPMENT ON LOAN

1. Dr 1764 Equipment on Loan
Cr 1766 Equipment Not in Use
Cr 1762 Equipment in Use

To record the capitalized value of loaned "Equipment Not in Use" and "Equipment in Use" that is transferred to "Equipment on Loan."

2. Dr 1766 Equipment Not in Use
Dr 1762 Equipment in Use
Cr 1764 Equipment on Loan

To record the value of returned "Equipment on Loan" that is transferred to "Equipment Not in Use" or "Equipment in Use."

3. Dr 1769 Accumulated Depreciation on Military Equipment
Dr 1320 Claims Receivable-Public
Cr 1764 Equipment on Loan

To record the loss, damage, or destruction of equipment on loan for which a legal right for a claim exists.

4. Dr 1769 Accumulated Depreciation on Military Equipment
Dr 7293 Other Miscellaneous Losses
Cr 1764 Equipment on Loan

To record the loss, damage, or destruction of equipment on loan for which a legal right for a claim does not exist.

TABLE 6-10

B. The acquisition cost of equipment in transit shall be reversed only when the equipment is received.

C. A transferor is accountable for equipment until the transferee accepts accountability. Subsidiary accounts shall be established as necessary to ensure visibility of items in transit.

D. Table 6-13 illustrates the most common entries used for this account.

E. Sources for entries to this account include accounting records and documented estimates indicating source of estimates.

060514 Other Natural Resources (Account 1840)

A. "Other Natural Resources" is used to record the cost or appraised value of natural resources other than land.

B. Natural resources include resources such as oil, minerals, and timber. Minerals are not renewable, but timber is replenishable. When timber is replenished through planting and cultivation the costs are capitalized when the capitalization criteria prescribed in Chapter 1 of this Volume are met.

C. Table 6-14 illustrates the most common entries used for this account.

ACCOUNTING ENTRIES FOR ACCOUNT 1766 - EQUIPMENT NOT IN USE

1. Dr 1766 Equipment Not in Use
 Cr 2111 Accounts Payable-Government-Current
 Cr 2113 Accounts Payable-Public-Current

To record the acquisition cost incurred by the Department of Defense for equipment not in use for which the cost is recorded initially in the "Equipment Not in Use" account. This includes the cost of capitalizable depot maintenance.

2. Dr 1766 Equipment Not in Use
 Cr 1581 Work in Process-In-House
 Cr 1582 Work in Process-Contractor

To record the acquisition cost of equipment transferred from work in process" accounts to "Equipment Not in Use."

3. Dr 1766 Equipment Not in Use
 Cr 1762 Equipment in Use
 Cr 1763 Equipment with Contractors, Testing Agencies, Defense Industrial Facilities, and Others
 Cr 1764 Equipment on Loan

To record the acquisition cost of equipment transferred to "Equipment Not in Use." This includes equipment transferred to a depot maintenance facility for repair.

4. Dr 1766 Equipment Not in Use
 Cr 7193 Other Miscellaneous Gains

To record an increase in equipment not in use that is discovered by physical inventory. The estimated fair market value of the discovered equipment is used when acquisition cost cannot be determined.

5. Dr 1766 Equipment Not in Use
 Cr 1769 Accumulated Depreciation on Military Equipment
 Cr 3220 Transfers In from Others Without Reimbursement

To record the estimated fair market value or the specific amount established by authoritative sources for equipment not in use that is received without reimbursement by the Department of Defense from another Federal Agency. Equipment not in use that is transferred from one DoD accounting entity to another shall be recorded at the transferor's acquisition cost plus any accumulated depreciation.

TABLE 6-11

ACCOUNTING ENTRIES FOR ACCOUNT 1766 - EQUIPMENT NOT IN USE (CONT.)

6. Dr 1581 Work in Process-In-House
Cr 1766 Equipment Not in Use

To record the acquisition cost of equipment not in use that is issued for work in process or construction in progress.

7. Dr 3231 Transfers Out to Government Agencies-Without Reimbursement
Dr 1769 Accumulated Depreciation on Military Equipment
Cr 1766 Equipment Not in Use

To record the transfer without reimbursement by the Department of Defense to another Federal Agency or DoD accounting entity. This includes situations when the DLA accepts accountability for disposal without a transfer of physical property to DLA.

8. Dr 3232 Transfers Out to see Others-Without Reimbursement
Dr 1769 Accumulated Depreciation on Military Equipment
Cr 1766 Equipment Not in Use

To record the value of equipment not in use that is transferred without reimbursement by the Department of Defense to other than a Federal Agency.

9. Dr 7293 Other Miscellaneous Losses
Dr 1769 Accumulated Depreciation on Military Equipment
Cr 1766 Equipment Not in Use

To record the following:

- (a) The nonreimbursable loss, damage, or destruction of equipment not in use.
- (b) A decrease in equipment not in use that is discovered by physical inventory.

TABLE 6-11 (CONT.)

**ACCOUNTING ENTRIES FOR ACCOUNT 1769 -
ACCUMULATED DEPRECIATION ON MILITARY EQUIPMENT**

1. Dr 6125 Depreciation of Equipment
Cr 1769 Accumulated Depreciation on Military Equipment

To record depreciation expense for equipment.

2. Dr 1769 Accumulated Depreciation on Military Equipment
Dr 7293 Other Miscellaneous Losses
Cr 1762 Equipment in Use

To record the following:

- (a) The nonreimbursable loss, damage, or destruction of equipment.
- (b) A decrease in equipment discovered by physical inventory.

3. Dr 1769 Accumulated Depreciation on Military Equipment
Dr 3231 Transfers Out to Government Agencies-Without Reimbursement
Cr 1766 Equipment Not in Use

To record the value of equipment that is transferred without reimbursement by one of the following:

- (a) The Department of Defense to another Federal Government Agency.
- (b) One DoD accounting entity to another. This includes situations when DLA accepts accountability for disposal without a transfer of physical property to DLA.

4. Dr 1769 Accumulated Depreciation on Military Equipment
Dr 1320 Claims Receivable-Public
Cr 1764 Equipment on Loan

To record the loss, damage, or destruction of equipment on loan for which a legal right for a claim exists.

5. Dr 1769 Accumulated Depreciation on Military Equipment
Dr 7293 Other Miscellaneous Losses
Cr 1764 Equipment on Loan

To record the loss, damage or destruction of equipment on loan for which a legal right for a claim does not exist.

TABLE 6-12

ACCOUNTING ENTRIES FOR ACCOUNT 1770 - EQUIPMENT IN TRANSIT

1. Dr 1770 Equipment in Transit
 Cr 2111 Accounts Payable-Government-Current
 Cr 2113 Accounts Payable-Public-Current

To record the acquisition cost of equipment in transit.

2. Dr 1766 Equipment Not in Use
 Cr 1770 Equipment in Transit

To record receipt of equipment in transit.

TABLE 6-13

D. Sources for entries to this account include sales contracts, real estate deeds, reports of survey and journal vouchers supporting estimates of depletion allowances.

060515 Allowance for Depletion
(Account 1849)

A. "Allowance for Depletion" is the account for recording the cumulative depletion of depletable assets.

B. Subsidiary accounts for "Allowance for Depletion" shall be maintained for natural resources.

C. Table 6-15 illustrates the most common entries used for this account.

D. Sources for entries to this account include sales contracts, real estate deeds, reports of survey, and journal vouchers supporting estimates of depletion allowances.

ACCOUNTING ENTRIES FOR ACCOUNT 1840 - OTHER NATURAL RESOURCES

1. Dr 1840 Other Natural Resources
Cr 2113 Accounts Payable-Public-Current

To record the acquisition cost incurred by the Department of Defense for natural resources.

2. Dr 1840 Other Natural Resources
Cr 2111 Accounts Payable-Government-Current
Cr 3220 Transfers In from Others-Without Reimbursement

To record the following:

- (a) The estimated fair market value or the amount established by authoritative sources for land and other natural resources when the acquisition cost cannot be determined.
- (b) The costs of obtaining the property in the form to be put into use and received from others without reimbursement.

3. Dr 1849 Allowance for Depletion
Dr 3231 Transfers Out to Government Agencies-Without Reimbursement
Cr 1840 Other Natural Resources

To record the value of land and natural resources transferred to another Federal Agency.

4. Dr 1849 Allowance for Depletion
Dr 7293 Other Miscellaneous Losses
Cr 1840 Other Natural Resources

To record the nonreimbursable loss, damage, or destruction of natural resources.

5. Dr 1849 Allowance for Depletion
Dr 3620 Funds Returned to General Fund-Miscellaneous Receipts
Cr 1840 Other Natural Resources

To record the value of natural resources sold when the collection is returned to a miscellaneous receipts account.

TABLE 6-14

ACCOUNTING ENTRIES FOR ACCOUNT 1849 - ALLOWANCE FOR DEPLETION

1. Dr 6127 Depletion of Natural Resources
Cr 1849 Allowance for Depletion

To record depletion expense.

2. Dr 1849 Allowance for Depletion
Dr 3231 Transfers Out to Government Agencies-Without Reimbursement
Cr 1840 Other Natural Resources

To record the value of natural resources transferred without reimbursement to another Federal Agency or DoD accounting entity. This includes situations when GSA accepts accountability for disposal without a transfer of physical property to GSA.

3. Dr 1849 Allowance for Depletion
Dr 3620 Funds Returned to General Fund-Miscellaneous Receipts
Cr 1840 Other Natural Resources

To record the value of natural resources sold when the collection is returned to a miscellaneous receipts account.

4. Dr 1849 Allowance for Depletion
Dr 7293 Other Miscellaneous Losses
Cr 1840 Other Natural Resources

To record the nonreimbursable loss, damage, or destruction of natural resources

TABLE 6-15

ACCOUNT NO. 1700	
FIXED ASSETS, NET	
DESCRIPTION: The current book value of real and personal property in accordance with DoD capitalization criteria.	
DEBIT	CREDIT
<p>This account is a summary account</p> <p>Do not post individual transactions to this account</p>

CHAPTER 7

INVESTMENTS AND OTHER ASSETS0701 GENERAL

070101. Purpose. This chapter prescribes the accounting requirements for recording transactions in those asset accounts not covered in Chapters 2 through 6 of this Volume. These requirements are consistent with and implement the general accounting policy for assets prescribed in Chapter 1 of this Volume.

★070102. Overview. Other assets are those assets that are not used directly in performing the DoD mission. These assets consist of securities held in various trust funds, assets acquired through means other than appropriations and assets awaiting disposal.

★0702. ACCOUNTING POLICY AND PROCEDURES FOR INVESTMENTS AND OTHER ASSETS

070201. The following paragraphs describe the accounts used to record financial transactions related to investments and other assets owned by the DoD.

070202. Investments

“Investments” represents the value of securities and other assets held for the production of revenues in the form of interest, dividends, rentals, or lease payments, net of premiums and discounts.

★070203. Investments in U.S. Treasury Securities Issued by Public Debt (Account 1610)

★A. This account is used to record the par value of U.S. Treasury securities held by the DoD Components, to include marketable Treasury securities, non-marketable Treasury securities, and market-based Treasury securities.

B. The DoD Components holding such securities shall maintain an investment subsidiary ledger that provides the name, type, amount, acquisition date, acquisition cost, yield or interest rate, discount or premium, maturity date, and other applicable information for each investment.

C. A subsidiary account shall be maintained for each trust fund that invests in U.S. Treasury securities.

D. Table 7-1 illustrates the more common entries used for this account.

**★ ACCOUNTING ENTRIES FOR ACCOUNT 1610 - INVESTMENTS IN U.S.
TREASURY SECURITIES ISSUED BY PUBLIC DEBT**

1. Dr 1610 Investments in U.S. Treasury Securities Issued by Public Debt
 Cr 1010 Fund Balance With Treasury

To record the purchase of U.S. Treasury securities at par value.

2. Dr 1610 Investments in U.S. Treasury Securities Issued by Public Debt
 Cr 1611 Discount on U.S. Treasury Securities Issued by Public Debt
 Cr 1010 Fund Balance with Treasury

To record the purchase of U.S. Treasury securities at a discount.

3. Dr 1610 Investments in U.S. Treasury Securities Issued by Public Debt
 Dr 1612 Premium on U.S. Treasury Securities Issued by Public Debt
 Cr 1010 Fund Balance with Treasury

To record the purchase of U.S. Treasury securities at a premium.

4. Dr 1610 Investments in U.S. Treasury Securities Issued by Public Debt
 Dr 1612 Premium on U.S. Treasury Securities Issued by Public Debt
 Dr 1340 Interest Receivable
 Cr 1010 Fund Balance with Treasury

To record the purchase of U.S. Treasury securities at a premium when the purchase price includes interest from the last date interest was paid.

TABLE 7-1

★ACCOUNTING ENTRIES FOR ACCOUNT 1610 - INVESTMENTS IN U.S. TREASURY SECURITIES ISSUED BY PUBLIC DEBT (CONT'D)

5. Dr 1610 Investments in U.S. Treasury Securities Issued by Public Debt
 Dr 1340 Interest Receivable
 Cr 1010 Fund Balance with Treasury
 Cr 1611 Discount on U.S. Treasury Securities Issued by Public Debt

To record the purchase of U.S. Treasury securities at a discount when the purchase price includes interest from the last date interest was paid.

6. Dr 1610 Investments in U.S. Treasury Securities Issued by Public Debt
 Dr 1340 Interest Receivable
 Cr 1010 Fund Balance with Treasury

To record the purchase of U.S. Treasury securities at par when the purchase price includes interest from the last date interest was paid.

7. Dr 1010 Fund Balance with Treasury
 Cr 1610 Investments in U.S. Treasury Securities Issued by Public Debt

To record the following:

- (a) Redemption at maturity of U.S. Treasury securities purchased at par.
- (b) Sale of U.S. Treasury securities at par with no accrued interest earned. If interest has accrued it must be recognized in recording the sale.

TABLE 7-1 (Cont'd)

★E. The disposition of a U.S. Treasury security may result in a gain or loss. A comparison of principal proceeds, the book value of a U.S. Treasury security, and any remaining unamortized premium or discount will determine whether there is a gain or loss. Table 7-2 illustrates the disposition of a U.S. Treasury security with unamortized bond premium or discount.

**★ DISPOSITION OF A U.S. TREASURY SECURITY WITH
UNAMORTIZED PREMIUM OR DISCOUNT**

1. Dr 1010 Fund Balance with Treasury
 Dr 7210 Losses on Disposition of Assets
 Cr 1612 Premium on U.S. Treasury Securities Issued by Public Debt
 Cr 1610 Investments in U.S. Treasury Securities Issued by Public Debt

To record the redemption of U.S. Treasury securities at a loss after recognizing amortization of the premium.

2. Dr 1010 Fund Balance with Treasury
 Dr 1611 Discount on U.S. Treasury Securities Issued by Public Debt
 Dr 7210 Losses on Disposition of Assets
 Cr 1610 Investments in U.S. Treasury Securities Issued by Public Debt

To record the redemption of U.S. Treasury securities at a loss after recognizing amortization of the discount.

3. Dr 1010 Fund Balance with Treasury
 Dr 1611 Discount on U.S. Treasury Securities Issued by Public Debt
 Cr 1610 Investments in U.S. Treasury Securities Issued by Public Debt
 Cr 7110 Gains on Disposition of Assets

To record the redemption of U.S. Treasury securities at a gain after recognizing amortization of the discount.

4. Dr 1010 Fund Balance with Treasury
 Cr 1612 Premium on U.S. Treasury Securities Issued by Public Debt
 Cr 1610 Investments in U.S. Treasury Securities Issued by Public Debt
 Cr 7110 Gains on Disposition of Assets

To record the redemption of U.S. Treasury securities at a gain after recognizing amortization of the premium.

TABLE 7-2

★F. Periodically, but at least annually, the Investments in “U.S. Treasury Securities Issued by Public Debt” account balance is to be reconciled with the trust fund portfolios. Such reconciliations also should occur whenever there is a change in trust fund managers or other employees having access to the securities, or when there is a substantial addition, disposition, or replacement in the composition of the portfolio.

G. Unless otherwise provided for by the provisions governing a trust fund operation, securities held by DoD trust funds are U.S. Treasury securities. No certificates are issued by the Treasury. Instead, Treasury notifies trust fund managers of portfolio increases or decreases using the “Transaction Confirmation.”

H. Source documents for entries to the account include U.S. Treasury securities, the “Transaction Confirmation,” collection and disbursement vouchers, amortization schedules, and journal vouchers. Financial record retention requirements are in Chapter 9 of Volume 1 of this Regulation.

070204. Discount on U.S. Treasury Securities Issued by Public Debt (Account 1611), and Premium on U.S. Treasury Securities Issued by Public Debt (Account 1612)

A. Accounts 1611 and 1612 are used to record the unamortized premium or discount on securities. Account 1613 is used to record the amortization of premium or discount on U.S. Treasury securities.

B. A subsidiary account for unamortized premiums or discounts shall be maintained for each trust fund for determining the gain or loss on the disposition of securities held by each trust fund. This information also is needed for reporting on the financial status of each trust fund.

C. The entries in Tables 7-1 and 7-2 illustrate the use of these accounts in securities purchases and dispositions. Table 7-3 illustrates the use of these accounts in the amortization of premium or discount.

**★ ACCOUNTING ENTRIES FOR ACCOUNT 1613 -
AMORTIZATION OF DISCOUNT AND PREMIUM ON U.S. TREASURY
SECURITIES ISSUED BY PUBLIC DEBT**

1. Dr 1340 Interest Receivable
 Dr 1613 Amortization of Discount and Premium on U.S. Treasury Securities
 Issued by Public Debt
 Cr 5310 Interest Revenue
 Cr 1611 Discount on U.S. Treasury Securities Issued by Public Debt
 To record interest earned and amortize bond discount for the current period.

2. Dr 1340 Interest Receivable
 Dr 1612 Premium on U.S. Treasury Securities Issued by Public Debt
 Cr 1613 Amortization of Discount and Premium on U.S. Treasury Securities
 Issued by Public Debt
 Cr 5310 Interest Revenue
 To record interest earned and amortize bond premium for the current period.

TABLE 7-3

D. The income derived from U.S. Treasury securities other than Treasury bills shall be the interest stated on the face of the securities adjusted for the amortized premium or discount. For Treasury bills, the difference between the purchase price and the price received at the time of sale or maturity is income.

E. Premiums and discounts shall be amortized over the life of the securities using the effective interest method or other method if similar results are obtained. The computation of the effective interest rate (yield to maturity) and book value for notes and bonds uses a basic formula for book value. The formula is used to compute yield to maturity by a successive approximation process. This calculated yield to maturity is then used to compute book value at any specified date. The formula for the book value of a bond is found in Table 7-4.

★ FORMULA FOR THE BOOK VALUE OF A BOND

$$BV = (PV \times \frac{1}{(1+Y)^{NP}}) + (PV \times IR \times \frac{1 - \frac{1}{(1+Y)^{NP}}}{Y})$$

where:

BV = Book value at a given date.

PV = Par value at maturity.

Y = Semiannual yield to maturity.

NP = Number of semiannual periods to maturity, including as a decimal any fractional part of 6 Months from date selected to the next coupon payment date.

IR = Semiannual interest rate.

Y and IR (percents) are converted to full decimal ($0 < Y, IR < 1$).

Semiannual rates for Y and IR are computed by dividing the published annual rate by 2.

TABLE 7-4

F. To solve for the semiannual yield to maturity by successive approximation:

1. Set semiannual yield to maturity (Y) equal to the semiannual interest rate (IR), and compute book value (BV).
2. Compare BV to the purchase cost of the security.
3. If the purchase cost is greater, decrease the semiannual yield to maturity (Y) by .1 percent (.001).
4. If the purchase cost is lower, increase Y by .1 percent (.001).
5. When Y is found to .1 percent, repeat the above process using increments or decrements of .01 percent.
6. Iterate until Y is accurate to ten decimal places. The semiannual yield to maturity is the final value for Y.

7. To solve for book value at a given date, use the computed yield to maturity for Y, and an appropriate value for NP.

G. The value for amortized premium expense or amortized discount income is computed using differences in book values at selected dates. Unamortized premium or discount is computed using differences in par value and book value at selected dates.

H. Source documents for entries to this account include amortization schedules and journal vouchers. Financial record retention requirements are in Chapter 9 of Volume 1 of this Regulation.

070205. Other Investments (Account 1690)

A. “Other Investments” is used to record the value of securities issued by government sponsored enterprises and non-government entities.

B. The DoD Components are not authorized to own such securities. Accordingly, this account shall not be used by the DoD Components.

070206. Property Disposal

A. The Defense Reutilization and Marketing Service (DRMS) manages most of the property designated for recovery, utilization, and/or disposal. DRMS is an organization within the Defense Logistics Agency that administers the following:

1. The worldwide DoD Personal Property Utilization and Disposal Program governed by DoD 4160.21-M, “Defense Reutilization and Marketing Manual.”

2. The Defense Property Disposal Precious Metals Recovery Program governed by DoD Handbook 4160.21-H, “Defense Scrap Yard Handbook.”

(There are cases, however, when DRMS may not be involved. The disposition of surplus contractor-held inventory governed by the Federal Acquisition Regulation is one example.)

B. When a DRMS activity has responsibility for the disposal of certain property, such as explosives, but lacks adequate resources to physically handle it, DRMS shall make suitable alternative arrangements for its care and custody. DRMS shall maintain financial accounting records for such property. The activity performing custodial services shall maintain such property and financial accounting records as necessary to provide an accounting to DRMS for such property.

C. The DRMS shall not accept accountability for recovery, utilization, and/or disposal until the property is physically received unless the DRMS activity involved is prohibited

from physically receiving the property. In such cases, DRMS accountability begins when title passes to DRMS.

D. Property in-transit to disposal shall be recorded as “in transit” when such transfer begins. The accountable organization shall record the transaction in its accounting system when the transfer action is initiated. It shall be removed from the in-transit account only when the property is received and accepted by the DRMS activity. Under no circumstance shall entries to the in-transit accounts be reversed at the beginning of the following accounting period without proper supporting documentation such as reports of survey or notice of receipt by the DRMS activity.

★E. The DoD Component that is responsible for recognizing an asset shall record the difference between the value of the asset before identification as excess, obsolete, or condemned (i.e., unserviceable beyond repair) and its expected net realizable value after such identification as a gain or loss at the time the determination is made, even though disposition may not occur until a later period. The gain or loss shall be recognized in general ledger account 7110, “Gains on Disposition of Assets” or account 7210, “Losses on Disposition of Assets.” (Accounting for asset disposition gains and losses is discussed in Chapter 17 of this Volume.) Any subsequent adjustments to its net realizable value shall also be recognized as a gain or loss. “Net realizable value” is the estimated selling price in the ordinary course of business, less the estimated cost to sell. The net realizable value to a DoD Component will normally be zero, unless the proceeds are permitted to be retained and used by that DoD Component. Property awaiting disposal is not subject to further depreciation.

F. Subsidiary accounts shall be maintained in a manner that provides information necessary to manage and report on property awaiting disposal.

G. Property awaiting disposal that is not capitalized shall be monitored through property control records in the related property management system.

★H. Refer to Chapter 13 of this Volume for accounting policy and principles for measuring and recognizing accrued disposal costs.

070207. Assets Under Capital Lease (Account 1810)

A. Assets Under Capital Lease is used to record the amount of assets being leased under terms that essentially are equivalent to an installment purchase.

★B. A lease conveys the use of an asset or part of an asset (such as part of a building) from one entity, the lessor, to another, the lessee, for a specified period of time in return for rent or other compensation. Lessees have capital or operating leases while lessors have sales-type, direct financing, or operating leases. Capital, sales-type, and direct financing leases transfer substantially all the benefits and risks of ownership from the lessor to the lessee.

★C. When a lease essentially is equivalent to an installment purchase of property (a capital lease) and the value equals or exceeds the current DoD capitalization threshold, the lessee

shall record the applicable asset and liability. The amount to be recorded under a capital lease is the present value of the rental and other lease payments during the lease term, excluding that portion of the payments representing executory costs paid to the lessor. However, if the amount so determined exceeds the fair value of the leased property, at the inception of the lease, the amount recorded should be the fair value. If the executory costs portion of the minimum lease payments cannot be determined, the amount should be estimated. In such cases, the substance of the arrangement, rather than its legal form, shall determine the accounting treatment. All other leases should be accounted for as operating leases with no balance sheet recognition (i.e., rental of property).

D. Lessees shall classify a lease as a capital lease if any one of the following criteria is met:

1. The lease transfers ownership of the property to the lessee by the end of the lease term.

2. The lease contains an option to purchase the leased property at a bargain price.

3. The lease term (noncancelable portion plus all periods, if any, representing renewals or extensions that can reasonably be expected to be taken) is equal to or greater than 75 percent of the estimated economic life of the leased property.

4. The present value of rental and other minimum lease payments, excluding that portion representing executory costs, such as insurance, maintenance, and taxes to be paid by the lessor, equals or exceeds 90 percent of the fair value of the leased property. The lessee shall compute the present value of minimum lease payments using the Treasury Average Interest Rate for Marketable Interest-Bearing Debt unless:

a. It is practicable for the lessee to learn the interest rate implicit in the lease computed by the lessor, and

b. The implicit rate computed by the lessor is less than the Treasury Average Interest Rate for Marketable Interest-Bearing Debt.

★c. The criteria in paragraph 070308.D.4.a. and b., of this chapter do not apply if the beginning of the lease term falls within the last 25 percent of the total estimated economic life of the leased property. (An agency's rental of space from GSA does not meet these criteria.)

★E. A portion of each lease payment shall be allocated to interest expense, and the balance shall be applied to reduce the lease liability using the effective interest rate method. (Interest is calculated on the balance of the lease obligation for each period, and the remainder of the payment is applied as a reduction of the lease obligation.) The periodic payment amount allocated to interest expense shall be computed based on the interest rate used to compare the present value of minimum lease payments, unless the lease is recorded at fair value. In that

instance, trial and error must be used to compute the interest rate for application to the balance of the lease obligation.

F. In leases with a residual guarantee by the lessee or a penalty for failure to renew the lease at the end of the lease term, following the amortization method in paragraph 070204.F will result in a liability balance that will equal the amount of the guarantee or penalty at the end of the lease term. If a renewal or other extension of the lease term or a new lease under which the lessee continues to lease the same property renders the guarantee or penalty inoperative, the asset and the liability under the lease shall be adjusted by an amount equal to the difference between the present value of the future minimum lease payments under the revised agreement and the present balance of the liability. The present value of future minimum lease payments under the revised agreement shall be computed using the rate of interest used to record the lease initially. Other renewals and extensions of lease terms shall be considered new agreements.

G. Definitions

1. Lease Term. For nonoperating leases, the lease term is the fixed noncancelable term of the lease plus all periods, if any, representing renewals or extensions of the lease that can reasonably be expected to be taken.

2. Noncancelable. Means the lease is cancelable only on the occurrence of a remote contingency. Funds not being appropriated by the Congress in future years to cover the lease is considered a remote contingency.

★3. Bargain Purchase Option. A lessee's option to purchase leased property for a price which is sufficiently lower than the expected fair value of the property at the date the option becomes exercisable that, at inception of the lease, makes the exercise of the option reasonably assured.

★4. Estimated Economic Life. The estimated remaining period during which the property is expected to be economically usable by one or more users, with normal repairs and maintenance for the purpose for which it was intended at the inception of the lease, without limitation by the lease term.

5. Minimum Lease Payments. The payments that the lessee is obligated to make or can be required to make in connection with the leased property. (Contingent rentals are excluded from the minimum lease payments.)

★6. Fair Value. The price for which the property could be sold in an arm's-length transaction between unrelated parties.

7. Interest Rate Implicit in the Lease. The discount rate that, when applied to the minimum lease payments (less executory costs and the unguaranteed residual value), causes the aggregate present value at the beginning of the lease term to be equal to the fair value of the leased property at the inception of the lease.

8. Renewal or Extension of a Lease. The continuation of a lease agreement beyond the original lease term, including a new lease under which a lessee continues to use the same property.

H. Table 7-5 illustrates the most common entries used for this account.

★ACCOUNTING ENTRIES FOR ACCOUNT 1810 - ASSETS UNDER CAPITAL LEASE	
1.	Dr 1810 Assets Under Capital Lease Cr 2940 Capital Lease Liability To record the value of capital leases signed.
2.	Dr 1819 Accumulated Depreciation on Assets Under Capital Lease Dr 2940 Capital Lease Liability Dr 7210 Losses on Disposition of Assets Cr 1810 Assets Under Capital Lease To record disposition of an asset held under a capital lease at a loss.

TABLE 7-6

D. Sources for entries to this account include journal vouchers showing the basis for the depreciation computation. Financial record retention requirements are in Chapter 9 of Volume 1 of this Regulation.

070209. Leasehold Improvements (Account 1820)

★A. “Leasehold Improvements” is used to record the value of improvements to leased land, buildings, structures and facilities, as well as easements and right-of-ways, when the value equals or exceeds the current DoD capitalization threshold. Amounts recorded by DoD Components shall meet the capitalization criteria in Chapter 6 of this Volume.

★B. Improvements to leased facilities that do not meet the capitalization threshold shall be treated as current operating expenses.

C. Table 7-7 illustrates the most common entries used for this account.

D. Sources for entries to this account include journal vouchers and documents transferring completed construction projects to this account. Financial record retention requirements are in Chapter 9 of Volume 1 of this Regulation.

070210. Accumulated Amortization on Leasehold Improvements (Account 1829)

A. “Accumulated Amortization on Leasehold Improvements” is used to accumulate the amortization charges to expense for leasehold improvements.

★B. This account shall be used by those activities that are authorized to enter into capital lease agreements.

C. Table 7-7 illustrates the most common entries used for this account.

TABLE 7-7	

D. Sources for entries to this account include journal vouchers with workpapers supporting the computation of the amounts to be amortized over the life of the lease. Financial record retention requirements are in Chapter 9 of Volume 1 of this Regulation.

070211. Information Technology Software (Account 1830)

★A. “Information Technology Software” is used to record the value of DoD software that is owned for operational or other internal use. Such software may be commercial off-the-shelf (COTS), contractor-developed, or internally developed; and may consist of one or more components or modules.

★B. Internal use software that has a life expectancy of more than 2 years and equals or exceeds the current DoD capitalization threshold shall be capitalized (excluding software that is part of National Defense PP&E). Capitalized amounts should consider the software type, as follows.

1. COTS. The capitalized cost of COTS software should be the actual purchase price, plus any material internal costs incurred for implementation.

2. Contractor-Developed. The capitalized cost of contractor developed software should include the amount paid to the contractor for program design, installation, and implementation, plus any material internal costs incurred for implementation.

3. Internally Developed. The capitalized cost of internally developed software should include the full cost (direct and indirect) incurred subsequent to the selection of a design alternative, including the software configuration and software interfaces (see OMB Circular 109, "Major Systems Acquisitions"). The following cost elements should be included, as appropriate:

a. Compensation and benefits of the government personnel expected to devote significant time to the project (i.e., programmers, analysts, project managers, and administrative personnel).

b. Contractors and consultants.

c. Facilities and supplies devoted to the project.

d. Documentation and printing.

C. Table 7-8 illustrates the most common entries used for Account 1830.

2. Dr 7210 Losses on Disposition of Assets
 Dr 1839 Accumulated Amortization on Information Technology Software
 Cr 1830 Information Technology Software

To write off unusable software.

3. Dr 1839 Accumulated Amortization on Information Technology Software
 Cr 1830 Information Technology Software

To write off fully amortized software.

TABLE 7-8

D. Sources for entries to this account include payment vouchers; journal vouchers, and documents transferring completed software from work in process. Financial record retention requirements are in Chapter 9 of Volume 1 of this Regulation.

070212. Accumulated Amortization on Information Technology Software (Account 1839)

★A. “Accumulated Amortization on Information Technology Software” accumulates the amortization charged to expense for capitalized internal use software.

★B. Amortization shall be based on the straight-line method, and shall commence on the date the software is installed and ready for use. The recovery period (excluding software that is part of National Defense PP&E) shall be 5 years, barring earlier obsolescence or disposition.

C. Table 7-8 illustrates the most common entries used for Account 1839.

D. Sources for entries to this account include journal vouchers with workpapers supporting the computation of the amounts to be amortized. Financial record retention requirements are in Chapter 9 of Volume 1 of this Regulation.

★070213. Other General Property, Plant and Equipment (Account 1890).

“Other General Property, Plant and Equipment” is used to record the value of general property, plant, and equipment not otherwise classified.

070214. Other Assets, Net

“Other Assets, Net” represents the value of assets not specified in specific accounts discussed in Chapters 4 and 6 of this Volume or the preceding paragraphs in this chapter, less allowance for loss.

070215. Unrequisitioned Authorized Appropriations (Account 1920)

A. “Unrequisitioned Authorized Appropriations” is used to record the unrequisitioned disbursing authority as provided for in liquidating cash authority granted by Congress.

B. Entries to this account require a corresponding entry to budgetary accounts dealing with contract authority.

C. Table 7-9 illustrates the most common entries used for this account.

**★ ACCOUNTING ENTRIES FOR ACCOUNT 1920 -
UNREQUISITIONED AUTHORIZED APPROPRIATIONS**

1. Dr 1920 Unrequisitioned Authorized Appropriations

CHAPTER 8

FINANCIAL CONTROL OF LIABILITIES0801 GENERAL

080101 Purpose. This chapter sets forth the policy to be followed in accounting for liabilities.

080102 Overview

A. A DoD liability is an amount owed by the DoD for items received, services received, expenses incurred, assets acquired, construction performed (regardless of whether invoices have been received), and cash advances received but as yet unearned. Included are amounts owed for goods and services in the hands of prime contractors but which are owned by the DoD under the terms of the contract, and amounts owed under grants, pensions, awards, and other indebtedness not involving the furnishing of goods and services.

B. A contingent liability occurs when a condition, situation, or set of circumstances exists that may confirm the loss or impairment of an asset or the incurrence of a liability. Accrual and disclosure of contingencies varies depending on their probability of occurrence. Estimated losses shall be recorded in DoD financial systems and reported in Component financial statements if:

1. Information available before the financial statements are issued indicates that an asset probably has been impaired or a liability probably has been incurred as of the date of the financial statements.

2. The amount can be reasonably estimated.

C. For the purpose of federal credit programs, a contingent liability is a conditional commitment that may become an obligation because of a future event beyond the control of the DoD. Contingent liabilities include Defense Production Loan Guarantees.

0802 ACCOUNTING POLICY FOR LIABILITIES

080201 A liability has three essential characteristics.

A. It embodies a present obligation to others which will be settled by the probable future transfer or use of assets at one of the following:

1. A specified or determinable date.
2. At the time of a specific event.
3. On demand.

B. Because of equitable or legal responsibility, the DoD has little or no discretion to avoid future sacrifice.

C. The transaction or event giving rise to the duty and responsibility has already happened.

080202 Although liabilities rest generally on legal rights and duties, a legal claim is not a prerequisite for qualification as a liability if future cash or other transfer of assets in settlement is otherwise probable and estimable.

080203 Amounts recorded as liabilities shall be supported by sufficient documentation that establishes the basis for the claim against the DoD. Such documentation includes receiving reports, court decisions, and estimates of accrued liabilities for personnel services provided but for which payment is not made until the next scheduled payday.

080204 Liabilities shall be recorded initially in the designated accounts for the accounting period during which the transactions giving rise

to them occurred and removed in the period during which they are liquidated.

080205 Liabilities shall be recorded at amounts that reasonably represent the cost of the economic benefit to be used in settlement.

080206 Liabilities shall be recorded regardless of the availability of funds to be used in their liquidation.

080207 When liabilities are incurred as work is performed rather than when deliveries are made, appropriate accruals shall be made from performance reports for the affected accounting periods.

080208 When property is acquired under a lease-purchase agreement, the liability shall be recorded when the property is accepted.

080209 Amounts received from other accounting entities as unearned revenue shall be recorded as liabilities until performance occurs.

080210 Goods and services purchased under long-term contracts shall be recorded as a liability in the period in which the goods or services are received and accepted by the agency. The related asset or expense, as appropriate, shall be recorded at the same time as the liability. When goods and services are to be received over a period of time covering 2 or more accounting periods and payment is to be made upon completion of delivery, the liability shall be recorded as a noncurrent liability until completion of delivery. A noncurrent liability is one that will not be paid within 1 year of its incurrence.

080211 For financial reporting purposes, DoD Components shall compute the liability for property, plant, and equipment manufactured or constructed for them under long-term contracts on the basis of verified estimates of work completed (percentage-of-completion method) per contractor reports or invoices received during each account period, rather than on disbursements made. DoD Components shall use the contractor's requests for progress payments, certified by an authorized contact administrator, as the basis for recording the

liability. Appropriate liabilities for contract retainages, if any, shall be recorded as contract holdbacks. The appropriate work in process or construction in progress accounts shall be adjusted to reflect the value of work completed, as represented by approved progress payments accepted by the DoD Component.

080212 The annual leave liability shall be accrued.

080213 The liability for the DoD contribution to civilian retirement benefits earned shall be accrued. The amounts recorded in the applicable general ledger accounts shall be that portion of the liability that is to be paid by the appropriation current at the time the liability was incurred.

0803 UNBILLED LIABILITIES

080301 Open accounts payables require constant review to assure that they are valid liabilities. If an invoice has not been received for a liability that represents acceptable final performance on a contract or order, the procedures in paragraph 080302, below, may be implemented unless the contract or order is in litigation. When litigation is in effect, the liability shall remain on the accounts.

080302 When the invoice has not been received within 180 days from the date of acceptable final performance the following guidance shall be followed:

A. If the amount of the payable is less than \$100 and 90 days have lapsed since the initial documented request, the liability shall be written off and the related obligation cancelled and returned to the unobligated balance of the appropriation fund account.

B. If the amount of the payable is more than \$100 and there is documentation on file that at least 2 written requests have been made for an invoice, the liability shall be written off and the related obligation cancelled and returned to the unobligated balance of the appropriation fund account. To qualify for the write off and deobligation, the second request

for an invoice shall be dated at least 60 days before the date of the write off.

080303 Late invoices received must be matched against documentation of liabilities previously written off to determine their validity before payment. If a late billing is determined to be valid, the liability shall be reestablished and funds obligated and paid from an appropriate account (current appropriation or expired account). For expired accounts, the payment of a valid late bill shall be treated as an obligation adjustment. For cancelled accounts, the payment of a valid late bill should be from a current account (available for the same purpose as a canceled account), in an amount not to exceed the lesser of any remaining unobligated balance of the cancelled account or 1% of the current account. A portion of funds available for funding activity cost center will be reserved within each appropriation or fund for invoices received subsequent to writeoff.

080304 The funded amount maintained in the reserve for late bills shall be established at a level sufficient to preclude a violation of 31 U.S.C. 1341 or 1517(a) or both from receipt of valid late bills. The amount of the reserve for late bills shall be reviewed and approved by the comptroller of the activity annually, to determine if adjustment based upon experience is appropriate.

0804 ADJUSTING JOURNAL VOUCHERS

080401 The source documents used for accounts payable postings include receiving reports, invoices, and contractor reports, etc. As a general rule, all entries to the accounting system must be based upon routinely prepared source documents, which have been processed under prescribed internal control procedures. If source documents are not received, necessary follow up actions are taken to obtain the required documents. The unrecorded source document condition may have been caused by the failure to record a receiving report, or a particular transaction may have failed to post in an automated accounting system. Such events will be recorded on research listings as an unmatched item or a required document that has not been received. When the listings are

received, required research effort normally begins by first stratifying transaction by dollar values. Those in the highest category (over \$1 million, for example) will be researched first. When the first category is completed the next category (from \$100,000 to \$1 million, for example) will be researched until that group is completed. This operational review continues until all items have been resolved. Then the process is restarted when the next listing is received. Management is expected to monitor constantly the volume and dollar values of transactions requiring research and to authorize overtime, details of personnel, etc., when necessary, to assure required research is completed. However, there are competing requirements that can result in a significant value of low dollar transactions which have not been researched for long periods of time. Further, as a practical matter, it is not always cost effective or realistic to expend the effort necessary to obtain each and every source document. When this occurs, management may decide to process adjusting journal vouchers using the process described in this section.

080402 The need for an accounting adjustment is properly a decision to be made at the level at which an account is maintained. The decision, however, must be supported by documentation that shows reasonable and prudent research was conducted to support the adjustment. This document then must be retained for audit.

080403 Normally, the first step in the adjustment process is to group unmatched items into homogeneous lots. Each of these lots is then subjected to acceptance sampling. The sampling plan should follow normal statistical sampling procedures. If analysis of the sampled items confirms that there are unposted source documents for the entire lot, then applicable journal vouchers should be processed. If the sample discloses that some payables are invalid, or that some invoices have not been received, then estimation statistical sampling procedures should be applied to determine if research will cost more than likely recoveries. If statistical sampling procedures do not support either of the above actions, then each item in the lot must be subjected to normal research.

CHAPTER 9

ACCOUNTS PAYABLE0901 GENERAL

090101. Purpose. This chapter provides guidance to be followed in recording and liquidating amounts payable by DoD Components. The processes described in this chapter implement the accounting principles and policy contained in Chapter 8 of this Volume and complement the processes contained in Chapter 1 of this Volume as they relate to disbursements for goods and services received by DoD Components.

090102 Overview

A. The payables discussed in this chapter deal with all payables except those due federal employees, both civilian and military, for personal services.

B. Recording of an accounts payable generally is the first transaction level entry in the proprietary accounts. Until goods and services are received by a DoD Component, the transaction is recorded in the budgetary accounts as an undelivered order. When an accounting station receives evidence that performance has occurred, the transaction is recorded simultaneously in the budgetary accounts as an accrued expenditure unpaid and in the proprietary accounts as an accounts payable. This compound entry provides an internal check and balance in the accounting system by assuring that amounts recorded as accrued expenditures unpaid are equal to the amounts recorded as accounts payable. Figure 2-1 in chapter 2, of Volume 1, of this regulation illustrates the relationships between the budgetary accounts and the proprietary accounts.

C. Accounts payable are amounts owed for goods and services received (i.e., actual or constructive delivery).

D. Accounts payable include amounts for the following:

1. Goods and other property purchased and received.

2. Services performed by employees, contractors, grantees, and lessors supported by contractor invoices and other documentation that acknowledges receipt of service.

3. Amounts owed at the end of the accounting period under programs for which no further performance of services by payees is required (such as annuities, insurance premiums, and some cash grants).

0902 ACCOUNTING POLICY FOR PAYABLES

090201 Amounts recorded as payables shall be supported by documentation that clearly shows the basis for the amount recorded as a payable and the terms upon which payment is to be made.

A. The basis for recording an accounts payable shall be a receiving report that clearly shows the quantities received and accepted or services performed and accepted by the DoD. Such quantities shall be based on actual counts of the items delivered by the vendor. When applicable, accompanying inspection reports for the goods or services shall be attached to the receiving report. In such instances, the inspection report, together with the receiving report, serves as the basis for recording the liability.

B. Periodically, but at least annually, the balances in the accounts payable accounts shall be reconciled to the supporting documentation. Differences shall be researched and any necessary adjustments shall be fully documented.

090202 Amounts recorded as payables shall be net of all discounts offered by vendors, which

are economically justified. The decision as to whether the discount shall be taken is to be made using the guidance contained in chapter 2 of this Volume.

090203 An accounts payable for goods and services shall be recorded when supported by a receiving report and an inspection report or when other evidence of performance is received by the accounting station. When an obligation has not been recorded in the accounting system prior to receipt of the goods and services, the procedures outlined in paragraph 090204, below, shall be followed.

090204 For items manufactured to DoD specifications, the DoD Component shall record the appropriate payable, including contract retentions, based on requests for progress payments. Such amounts shall be supported by contract administrator certification as provided in the Defense/Federal Acquisition Regulations (DFAR). The offsetting entry for such payable shall be made to the appropriate prepayment account or construction in progress accounts described in chapters 4 and 6 of this Volume.

090205 The inability to match a performance report or invoice to the applicable undelivered order may indicate a breakdown of fund control processes and a material weakness in internal controls. When the process of posting a transaction to accounts payable does not disclose a matching transaction in the undelivered order account, there may be evidence that a contract either has not been awarded or a posting error has occurred. In this circumstance, the accounting office shall request the necessary documentation to support the required accounting entry. Appropriate officials shall be notified when it appears that performance reports or invoices are being received without a corresponding undelivered order having been previously recorded.

090206 When authorized under 10 U.S.C. 2326, an accrued expenditure unpaid may be established skipping the undelivered order phase. (These actions are known as Undefined Contract Actions (UCAs). Limitations on UCAs are discussed in the DFAR.

When this situation occurs the posting in the budgetary account shall be made simultaneously with the corresponding entry in the proprietary inventory and/or expense accounts and accounts payable.

090207 Transactions representing the value of goods and services accepted by DoD Components under "fast pay" procedures requires special attention. These payments create an abnormal balance in both the budgetary account accrued expenditures-unpaid and the proprietary accounts payable, since the transaction is recorded as a debit entry in both of these accounts without a matching previously recorded credit entry.

A. Under fast pay procedures, the contractor certifies that delivery has been made at the time the invoice is presented for payment and this certification is considered a sufficient basis for disbursement. Since payment is made based on the contractor's certification, accounting stations shall establish sufficient controls to assure that receiving reports necessary to support the necessary credit entries are received within a reasonable period of time. Under no circumstances shall a journal voucher be processed to correct the abnormal balance in accrued expenditures-unpaid or accounts payable. When the required receiving report evidencing actual receipt of the items is not received within a reasonable period of time, accounting stations shall take action to determine whether the goods and services have been received. For those cases in which the items have not been received, the accounts shall be brought back in balance by the following entry:

Dr Accounts Receivable (Government or Public)-Current

Cr Accounts Payable
(Government or Public)-Current

Offsets against current payments shall be supported by documentation signed by the appropriate official so that a clear audit trail is maintained until the transaction is completed. Guidance pertaining to the use and application of the fast pay process in the DoD is contained in chapter 2 of this Volume.

B. A special situation exists with Defense Business Operations Fund activities. When a Defense Business Operations Fund activity orders material and supplies to be delivered to a location, the recipient's payment of the billing constitutes evidence of receipt. This procedure is acceptable because the recipient has established an accounts payable to the Defense Business Operations Fund and, therefore, the payment provides assurance that the payee will be required to validate that the material has been received.

090208 DoD Components issuing monetary credits as compensation for property or services received from non-Federal Agencies shall record a liability equal to the value of the monetary credit. The use of such credits, however, shall be limited to those instances supported by specific statutory authority authorizing them. Such a credit would arise in a situation where a DoD Component enters into a barter agreement in which the services provided by the Component have a market value less than the services received by the Component. The cross servicing agreements for refueling NATO ships are examples.

0903 ACCOUNTING FOR PAYABLES

090301 This section provides guidance for recording payables and illustrates the use of the applicable accounts. The accounts discussed are categorized as other accrued liabilities.

090302 Liabilities (Account 2000)

A. "Liabilities" is a summary general ledger account used for financial reporting purposes. As such, no entries are posted to this account.

B. These accounts represent amounts owed by DoD Components for items or services received, expenses incurred, assets acquired, construction performed, and amounts received but as yet unearned.

090303 Accrued Liabilities-Other (Account 2100)

A. "Accrued Liabilities-Other" is a summary general ledger account used for financial reporting purposes. As such, no entries are posted to this account.

B. These accounts represent the amounts DoD Components owe for goods and other property ordered and received and for services rendered by other than employees.

090304 Accounts Payable (Account 2110)

A. "Accounts Payable" is a summary general ledger account used for financial reporting purposes. As such, no entries are posted to this account.

B. These accounts represent amounts owed to federal or nonfederal entities for goods and property ordered and received, and for services rendered by organizations and people other than employees.

C. Subsidiary accounts shall be established as needed to meet external reporting requirements and to provide internal control over amounts owed to others.

090305 Accounts Payable-Government-Current (Account 2111)

A. "Accounts Payable-Government-Current" represents amounts owed to U.S. Government Agencies for goods and services received but for which payment will be made in the current fiscal year.

B. Periodically, but at least annually, the balances recorded in this account and the related subsidiary accounts shall be reconciled with the voucher documentation files. Differences shall be researched and, if necessary, the accounts adjusted.

C. Table 9-1 illustrates the most common entries used for this account.

TABLE 9-3

D. Sources for entries to this account include disbursing vouchers, contract documents, and journal vouchers with supporting documentation showing the computation of the amounts to be withheld.

090308 Accounts Payable-Public-Noncurrent (Account 2114)

A. "Accounts Payable-Public-Noncurrent" is used to record those accounts payable that will not be paid within 1 year because delivery has not been completed or the documentation required for payment will not be received until a future date. Included in this account are amounts set aside for foreign national separation pay and retirement when such payments are required pursuant to agreements negotiated with the respective foreign countries.

B. Periodically, but at least annually, the balances recorded in this account and the related subsidiary accounts shall be reconciled with the voucher documentation files. Differences shall be researched and, if necessary, the accounts adjusted.

C. Table 9-4 illustrates the most common entries used for this account.

D. Sources for entries to this account include invoices, inspection reports, receiving reports, and journal vouchers.

090309 Claims Payable (Account 2115)

A. "Claims Payable" is used to record adjudicated claims against the DoD which have not been paid.

B. Table 9-5 illustrates the most common entries used for this account.

C. Sources for entries to this account include legal documents and supporting opinions from counsel and payment vouchers.

090310 Disbursements in Transit (Account 2120)

A. "Disbursements in Transit" is used to record those outlays transmitted to a designated disbursing office by an accounting activity but that have not been processed by the disbursing office.

B. This account shall not be used without the prior approval of the Office of the Deputy Under Secretary of Defense (Comptroller /Financial Management)/Deputy Chief Financial Officer.

090311 Contract Holdbacks (Account 2130)

A. "Contract Holdbacks" is used to record amounts withheld from grantees or contractors pending completion of contracts.

Cr 2113 Accounts Payable-Public-Current
Cr 2130 Contract Holdbacks
Cr 1012 Funds Disbursed

To record amounts withheld from progress payments pending successful completion of contracts.

2. Dr 2113 Accounts Payable-Public-Current
Dr 2130 Contract Holdbacks
Cr 1012 Funds Disbursed

To record final payment on a contract and release of amounts withheld when the contract is certified as completed and accepted by the contracting officer.

TABLE 9-6

090312 Accrued Interest Payable (Account 2140)

A. "Accrued Interest Payable" is used to record interest that accrues on borrowings and overdue accounts with the passage of time and is not due until a later date.

B. DoD policy is to pay its liabilities when they become due and payable. Accordingly, interest expense incurred by DoD Components shall be considered incurred when the liability is processed for payment. Interest expense is to be considered a current period operating expense and DoD Components shall not use this account.

090313 Other Accrued Liabilities (Account 2190)

A. "Other Accrued Liabilities" is used to record those accounts payable that cannot be classified or assigned to a specific account described in this section.

B. Use of this account by DoD Components should be infrequent. Accordingly, DoD Components shall not use this account without specific guidance from the Office of the Deputy Under Secretary of Defense (Comptroller /Financial Management)/Deputy Chief Financial Officer.

ACCOUNT NO. 2000

CHAPTER 10

ACCRUALS FOR PERSONNEL RELATED LIABILITIES1001 GENERAL

100101 Purpose. This chapter prescribes the accounting policy and related requirements for recording DoD liabilities for accrued payroll and benefits, actuarial liabilities, and civilian severance pay.

100102 Overview. The accounts discussed in this chapter provide financial data on accrued liabilities to be reported in the financial statements required by Treasury and to meet other reporting requirements mandated by OMB and the Congress.

1002 ACCOUNTING POLICY FOR ACCRUALS

100201 In addition to the accounting principles and policy in chapter 8 of this Volume, the following additional standards shall be recognized.

100202 The accounts shall be updated based on appropriate source documents and reflect the latest pay adjustments, leave balances, levels of benefits, and changes in benefit rules.

100203 Reasonable estimates (accruals) of the costs of services performed by DoD military and civilian employees shall be made when a pay period does not coincide with the end of an accounting period. Such accruals shall be recorded in the applicable accounting period based on journal vouchers with supporting documentation (or mechanized programs) that clearly shows the calculations and data used to compute the amount of the liability. The journal vouchers shall be signed by the appropriate authorized accounting official. These accruals shall be removed from the accounts only when the related pay is disbursed.

100204 Amounts due for annuities, adjudicated claims, and benefit payments as of the end of the period shall be recorded in the applicable

accounting period based on available information, provided that the payment is probable and the amount estimable. Such amounts shall be recorded based on journal vouchers and supporting documentation clearly showing the basis for the amounts recorded. The journal vouchers shall be signed by the appropriate authorized accounting official. Except for the DoD Component's share of fringe benefits computed as a part of the pay computation process, applicable accruals shall be reversed at the start of the next accounting period and actual costs accumulated.

100205 Awards made to employees such as those for suggestions, performance bonuses, special act awards, and productivity gain affect payroll cost. The DoD productivity gain sharing (PGS) program permits up to a maximum of 50 percent of achieved PGS savings to be paid to eligible employees. Subject to the 50 percent ceiling, the PGS program allows considerable flexibility in determination of the amount and form of payment--monetary or compensated absence (administrative leave). DoD activities develop their individual organization-wide PGS plans based on their mission functions. PGS plans should include a specified period of time that an employee must contribute to the work effort or be onboard to be eligible to receive a share of the PGS payout. PGS plans should also provide specifics as to whether an employee remains eligible or forfeits his/her share if the employee leaves the organization prior to the payout. If the plan and conditions permit, employees may elect to receive administrative leave, or cash payment, or a combination of administrative leave and pay. The administrative leave option may be granted at the discretion of the activity commander based upon workload requirements at the time. The period of time for which administrative leave may be granted to an employee will be derived by dividing the value of the employee's gain share award by his/her hourly rate plus an average factor for benefits. A liability shall be

recorded for that portion of a payout which is due but not yet paid.

100206 A compensated absence is an employee absence (ordinarily for vacation or illness) for which the employee will be paid. When DoD employees accrue rights to take leave with pay, DoD Components incur an expense and liability measured by the salary cost of the time that may be taken.

100206 The accrual of annual leave within the DoD is material and shall be recognized annually in DoD Component accounting records and financial statements. DoD Components, therefore, shall recognize the expense and related liability for annual leave (including home leave) as it accrues.

100207 Sick leave need not be accrued unless there is a need to recover full operating costs or a management requirement.

100208 The expense and related liability for annual leave shall be recorded at the wage rates at which the leave is earned. Use of a fringe benefit rate is also acceptable for calculating accrued annual leave.

100209 The liabilities for annual leave shall be adjusted to reflect all pay increases and unused leave balances at least annually for financial statement purposes.

100210 DoD Components responsible for accounting for programs that provide annuity benefits shall recognize a liability for the actuarial present value of accumulated benefits. These are benefits earned or accrued as of the benefit information date (the date as of which benefit information is presented) but will not be paid until a later date.

100211 Accumulated benefits for annuity programs shall be comprised of benefits expected to be paid to the following:

A. Persons who have not met the program's conditions and who will receive benefits in the future.

B. Persons who have met enough of the program's conditions to be considered probable recipients of future benefits.

C. The survivors of both groups, as applicable.

100212 The amounts to be reflected in the general ledger accounts shall not be limited to the amounts actually funded.

100213 To the extent such liabilities are unfunded DoD Components shall maintain appropriate supporting records of the unfunded portions to provide appropriate footnote disclosure in the financial statements when necessary.

100214 The liability for claims incurred (both reported and unreported) shall be determined by use of accepted actuarial principles and reported in the program's financial statements. If existing legislation requires that amounts paid to participants be recovered from others (e.g., employing agencies), then the estimated amount to be recovered shall be reported as a receivable with the sources of expected repayments clearly indicated.

1003 ACCOUNTING FOR ACCRUALS. The following accounts shall be used by DoD Components to record accruals:

100301 Accrued Liabilities-Payroll and Benefits (Account 2200)

A. "Accrued Liabilities-Payroll and Benefits" account reflects accrued funded payroll and benefits and accrued unfunded annual leave.

B. This account is a summary account used for financial reporting purposes. No transactions shall be posted to this summary account.

100302 Accrued Funded Payroll and Benefits (Account 2210)

A. "Accrued Funded Payroll and Benefits" reflects the estimated liability for salaries and wages of civilians that have been earned

but are unpaid and amounts of funded annual leave, sick leave (when a decision is made to record a liability for sick leave), and other employee benefits that have been earned but unpaid.

B. This account is a summary account for financial reporting purposes. No transactions shall be posted to this summary account.

100303 Accrued Payroll-Civilian (Account 2211)

A. "Accrued Payroll-Civilian" is used to record the estimated liability at the end of the current accounting period for the earned but unpaid civilian salaries and wages.

B. Table 10-1 illustrates the most common entries used for this account.

ACCOUNTING ENTRIES FOR ACCOUNT 2211 - ACCRUED PAYROLL-CIVILIAN

To record payment of benefits.

TABLE 10-4

100307 Accrued Payroll-Funded Annual Leave-Civilian (Account 2215)

A. "Accrued Payroll-Funded Annual Leave-Civilian" is used to record the estimated liability at the end of the current accounting period for earned but unpaid civilian employee annual leave that has been funded through rates charged to customers when that rate includes a factor for funding of this expense. This account

is applicable to the Defense Business Operations Fund and other DoD revolving funds that finance their full annual leave through reimbursable rates charged to customers.

B. Table 10-5 illustrates the most common entries used for this account.

C. Sources for entries to this account include payroll and leave records.

TABLE 10-5

100308 Accrued Unfunded Annual Leave (Account 2220)

A. "Accrued Unfunded Annual Leave" reflects amounts of annual leave that have been earned and are payable, and will be paid from future years appropriations.

B. This account is a summary account used for financial reporting purposes. No transactions shall be posted to this account.

C. Sources for entries to this account include the payroll and leave records.

100310 Accrued Annual Leave-Military (Unfunded) (Account 2222)

A. "Accrued Annual Leave-Military (Unfunded)" is used to record the amount of the estimated liability at the end of the current accounting period for earned but unpaid and unfunded military personnel annual leave.

B. This account is applicable to non Defense Business Operations Fund, departmental-level activities only.

C. Table 10-7 illustrates the most common entries used for this account.

D. Sources for entries to this account include the payroll and leave records.

100309 Accrued Annual Leave-Civilian (Unfunded) (Account 2221)

A. "Accrued Annual Leave-Civilian" is used to record the estimated liability at the end of the current accounting period for earned but unpaid and unfunded civilian employee annual leave, including home leave.

B. Table 10-6 illustrates the most common entries used for this account.

To record the amount of unfunded annual leave earned by military personnel.
2. Dr 2222 Accrued Annual Leave-Military (Unfunded)
Cr 2214 Accrued Payroll-Military-Employer Share of Fringe Benefits

To record the amount of unfunded annual leave taken by military personnel.

TABLE 10-7

100311 Actuarial Liabilities (Account 2600)

A. Actuarial Liabilities" reflects the estimated present value of program benefits that will be made in the future that relate to services performed or entitlements due as of the balance sheet date. This account is not used to accrue liabilities for contributions to these programs.

B. This account is a summary account used for financial reporting purposes. No entries are posted to this account.

100312 Retirement Plans (Account 2610)

A. "Retirement Plans" is used to record the actuarial present value of the

accumulated plan benefits of the DoD Military Retirement Fund.

B. In computing the liability, DoD personnel shall comply with the requirements in chapter 15 of this Volume.

C. Defense Finance and Accounting Service (DFAS) shall report DoD Military Retirement Fund financial information in financial statements in accordance with the guidance contained in chapters 1, 4, and 5, of Volume 6, of this regulation.

D. Table 10-8 illustrates the most common entries used for this account.

ACCOUNTING ENTRIES FOR ACCOUNT 2610 - RETIREMENT PLANS

1. Dr 7600 Changes in Actuarial Liability
Cr 2610 Retirement Plans

To record the increase in the actuarial present value of accumulated benefits payable from the DoD Military Retirement Fund.

2. Dr 2610 Retirement Plans
Cr 7600 Changes in Actuarial Liability

To record the decrease in the actuarial present value of accumulated benefits payable from the DoD Military Retirement Fund.

TABLE 10-8

E. Sources for entries to this account include documented actuarial determinations.

100313 Insurance Plans (Account 2620)

A. "Insurance Plans" is used to record the actuarial liability for future policy benefits of any insurance plan that DoD may be asked to administer.

B. At the present time, DoD does not administer any insurance plans. Accordingly, use of this account is not authorized.

100314 Other Actuarial Liabilities (Account 2690)

A. "Other Actuarial Liabilities" is used to record the actuarial present value of other plans not classified above.

B. At the present time, DoD does not administer any such plans. Accordingly, use of this account is not authorized.

100315 Accrued Civilian Severance Pay (Unfunded) (Account 2993)

A. "Accrued Civilian Severance Pay (Unfunded)" is used to record the unfunded liability for accrued payments due to former civilian employees who were involuntarily separated or to their survivors. Amounts recorded in this account do not include foreign national separation pay required pursuant to agreements negotiated with the respective foreign countries. Such amounts are treated as a noncurrent public account payable and recorded in account 2114, "Accounts Payable-Public-Noncurrent."

B. Table 10-9 illustrates the most common entries used for this account.

C. Sources for entries to this account include personnel office computations of the severance pay and disbursement vouchers.

CHAPTER 11

COMPONENT DEBT1101 GENERAL

110101 Purpose. This chapter prescribes the accounting principles and policy to be followed by DoD Components to account for debt incurred in accordance with statutory authority.

110102 Overview. Debt incurred by DoD Components is generally associated with housing programs determined to be necessary to carry out the Department of Defense's mission. Included are mortgage agreements accepted pursuant to the Family Housing Program and the Homeowners Assistance Fund. This chapter includes guidance to account for debt incurred to finance mortgages and illustrates the entries necessary to record transactions in these accounts.

A. FAMILY HOUSING PROGRAM

1. The Defense Family Housing Program provides housing for military families and for civilian families where circumstances requires the Department of Defense support this program by providing housing referral services, including administration of private rental housing for DoD personnel overseas; by leasing private housing for DoD personnel; or by guaranteeing service members' rental, mortgage and mortgage insurance payments on privately owned housing.

2. Guidance for financing the Family Housing Program is contained in Volume 2 of this Regulation, while guidance for accounting for funds made available for this program are contained in Volume 3.

B. HOMEOWNERS ASSISTANCE FUND

1. Under 42 U.S.C. 3374, the Secretary of Defense is authorized to provide assistance to owners of one or two family dwellings located at or near military installations

ordered to be closed in whole or in part. In certain instances, this assistance is rendered by acquiring negotiated title to the properties from such owners. Section d of the statute established the Homeowners Assistance Fund. Section g authorized the Secretary of Defense to enter into an agreement with the Secretary of Housing and Urban Development (HUD) with respect to the administration of the program. That agreement provided that, on the Department of Defense's behalf, HUD shall maintain, manage, and dispose of such properties acquired by the DoD and be reimbursed for all costs incurred in its administration. That agreement was terminated as of January 1, 1993. Since that date, all properties acquired are managed and disposed of by the Army Corps of Engineers.

2. The Chief of Engineers, Department of the Army Corps of Engineers, is responsible for obtaining title to the properties and for administration. The Chief of Engineers also is responsible for negotiating the Department of Defense's acquisition price with the property owner.

3. Funding for this program is through annual appropriations made available by the Congress.

4. DoD Directive 4165.50, "Home-owners Assistance Program," provides overall policy guidance and information on the program.

1102 ACCOUNTING POLICY FOR DEBT

110201 The accounting policy for properties acquired under both the Family Housing Assistance Program and the Homeowners Assistance Program are the same as those for real property discussed in Chapter 6 of this Volume. The accounting policy for the liabilities incurred under both programs are discussed in the following paragraphs.

110202 The liability for amounts owed on housing acquired under the two programs shall be equal to (1) borrowings from other Federal Agencies and the public to construct or acquire the properties, or (2) the mortgages assumed when title passes to the Department of Defense.

110203 The balance of the mortgages payable shall be reduced by that portion of the periodic payments made which represent the mortgage principal.

110204 Liabilities for borrowings from other Federal Agencies and non-federal organizations shall be recorded at the amounts actually obtained. Amounts paid to financial organizations to obtain the borrowings shall be treated as a current period operating expense.

1103 ACCOUNTING FOR DEBT

110301 The accounts used to account for Department of Defense debt are described in the following paragraphs.

110302 Debt (Account 2500)

A. This is a summary account used to record DoD's liability in the form of notes payable and other borrowing agreements.

B. This account is a summary account used for financial reporting and control purposes. Do not post entries to this account.

110303 Borrowing From Treasury (Account 2510)

A. "Borrowing From Treasury" is used to record amounts borrowed from the Treasury.

B. At the current time, no DoD Component is authorized to enter into borrowing agreements with the Treasury. Accordingly, this account shall not be used by DoD Components.

110304 Borrowing From Federal Financing Bank (Account 2520)

A. "Borrowing From Federal Financing Bank" is used to record amounts borrowed from Federal Financing Banks.

B. Since no DoD Component is authorized to borrow from a Federal Financing Bank, use of this account is not authorized.

110305 Securities Issued by Federal Agencies Under Special Financing Authority (Account 2530)

A. "Securities Issued by Federal Agencies Under Special Financing Authority" is used to record the liability arising from issuing new borrowings authorized under special financing authorities.

B. Since no DoD Component is authorized special financing authority to conduct programs, use of this account is not authorized.

110306 Participation Certificates (Account 2540)

A. "Participation Certificates" is used to record a DoD Component's liability for its share of participation certificates issued pursuant to legislative authority.

B. Since no DoD Component is authorized to issue such certificates or to participate in the issuance of such certificates, use of this account is not authorized.

110307 Other Debt (Account 2590)

A. "Other Debt" is used to account for all other forms of Department of Defense liabilities, secured and unsecured, not otherwise classified above.

B. This account is a summary account used for financial accounting and control purposes. No transactions are posted to this account.

**110308 Mortgages Payable-Family Housing
(Account 2591)**

A. "Mortgages Payable-Family Housing" represents the liability for outstanding mortgage balances on family housing properties owned by the DoD. The account is supported by subsidiary records for each outstanding mortgage.

B. Table 11-1 illustrates the most common entries used for this account.

C. Sources for entries to this account include titles, mortgage agreements, and disbursement vouchers.

110309 Mortgages Payable-Homeowners Assistance Program (Account 2592)

A. "Mortgages Payable-Homeowners Assistance Program" is used to record the out

standing balances of mortgages acquired by the Department of Defense on homes purchased under the provisions of the Homeowners Assistance Program.

B. This account shall be used by the Corps of Engineers to account for home mortgages acquired by the Chief of Engineer.

C. The account shall be increased for major repairs incurred to maintain the properties and put them in condition for resale. Costs not considered major shall be treated as a current period operating expense.

D. Table 11-2 illustrates the most common entries used for this account.

E. Sources for entries to this account include titles, purchase agreements, sales agreements, collection vouchers, and journal vouchers with supporting documentation computing the amount of the loss or gain on disposition.

CHAPTER 12

CAPITAL LEASES PAYABLE1201 GENERAL

120101. Purpose. This chapter prescribes the accounting principles and policy to be followed by Department of Defense (DoD) Components to account for liabilities associated with capital leases.

120102. Overview. Unless otherwise provided by legislation, DoD Components are not authorized to enter into capital leases. Accordingly, agreements to lease real estate and personal property are limited to current year operating requirements.

1202 ACCOUNTING POLICY FOR CAPITAL LEASE LIABILITIES

★120201. The DoD Components authorized to enter into capital lease agreements shall treat the transaction as the acquisition of an asset and the incurrence of a liability. The amount to be recorded as a liability under a capital lease is the lesser of the present value of the rental and other minimum lease payments during the lease term, excluding the executory costs (actual or estimated) paid to the lessor, or the asset's fair value (see paragraph 070207. of Volume 4 of this Regulation).

★120202. Chapter 7 of this Volume also provides guidance for determining whether a lease is a capital lease or an operating lease and for determining the amounts to be recorded.

1203 ACCOUNTING FOR CAPITAL LEASE LIABILITIES

120301. The following account shall be used to record the DoD Component's liability for capital leases.

120302. Capital Lease Liability (Account 2940).

A. Capital Lease Liability is used to record the liability incurred for capital leases entered into pursuant to legislative authority.

B. Table 12-1 illustrates the most common entries used for this account.

C. Sources for entries to this account include lease agreements and disbursing vouchers.

★CHAPTER 13★

★ACCRUED ENVIRONMENTAL AND NONENVIRONMENTAL DISPOSAL COST
LIABILITIES★1301 GENERAL

★130101. This chapter prescribes the accounting policy and principles for measuring (estimating) and recognizing (recording in the accounting system and reporting in the financial statements) Department of Defense (DoD) liabilities associated with the disposition of property, structures, equipment, munitions, and weapons. It also includes the preservation and management of training ranges at active installations (as described in subparagraph 130201.A. of this Chapter). The timing of disposal liability measurement will vary depending on whether the disposal effort involves the removal and disposal of hazardous waste (environmental disposal). The accounting entry used to record an environmental disposal liability is dependent on whether the liability existed at September 30, 1997, and on when the liability is first recorded (see paragraph 130108). The recording and reporting of disposal cost estimates in financial statements is subject to the materiality criterion in paragraph 130109 of this Chapter. Liability recognition shall not be based on the availability of funds.

130102. This chapter does not address a number of related issues. Accounting for accrued environmental restoration costs that result from past operations is discussed in Chapter 14 of this Volume. The property, plant, and equipment (PP&E) types discussed in this chapter are defined in Chapter 6 of Volume 4 of this Regulation. Accounting for asset disposition gains and losses is discussed in Chapter 17 of this Volume. Reporting guidance on liabilities in general is contained in Chapter 4 of Volume 6B of this Regulation. Required supplementary stewardship information (RSSI) reporting guidance is in Chapter 11 of Volume 6B of this Regulation. Applicable budget formulation guidance is in Chapters 4, 9, and 13 of Volume 2B of this Regulation, including the development of stabilized prices for the Defense Working Capital Fund. This chapter does not apply to costs that are incurred to bring land to a form suitable for intended use; these costs are discussed in Chapter 6 of this Volume. Nor does this chapter apply to the disposal costs associated with excess, obsolete, or unserviceable inventories; such costs are addressed in Chapter 17 of this Volume.

130103. Disposal costs shall be measured and recognized as discussed in Sections 1302, 1303, 1304, and 1305 of this Chapter.

130104. Disposal cost measurements (estimates) may be prepared at the installation or other organizational level. Cost estimates prepared for this purpose shall consider, on a current cost basis, the anticipated costs of the level of effort required to dispose of the item, as well as the costs of complying with associated applicable legal and/or regulatory requirements. Such cost estimates should be based on the current disposal or reuse technologies available. Cost estimates shall be revised when there is evidence that significant changes in the cost estimates have occurred, (e.g., changes in scope, ownership, regulation, or technology). As a minimum, long-term cost

estimates shall be adjusted (upward or downward) annually, through indexing, to maintain them on a current cost basis (i.e., as if acquired in the current period).

130105. Disposal estimates are subject to audit. The preparation of cost estimates may involve the application of specialized methods, accumulation and study of historical costs, and/or the conduct of technical analyses. Organizations that prepare cost estimates must retain adequate documentation to identify data sources, estimating method accreditation (including parametric models) and rationale used (see Key Accounting Requirement Number 8 in Chapter 3 of Volume 1 of this Regulation). Documentation of management review also must be retained.

130106. Estimates for disposal costs may be specific amounts or a range of amounts. If some amount within a range is considered a better estimate than any other estimate, that amount should be used. If no amount within a range is considered a better estimate than other estimates, then the minimum amount in the range should be used.

130107. Estimates for disposal costs should be offset by estimated cash proceeds only when the proceeds (resale, recycle, salvage, etc.) are permitted to be retained and used by the organization that will fund the disposal costs.

130108. Disposal liability estimates that are material at the reporting entity level, as identified in Section 0106 of Chapter 1 of Volume 6B of this Regulation, shall be recorded in the accounting system and reported in the financial statements as of the report date. Estimates for disposal liabilities shall be recorded as follows:

A. Environmental disposal liabilities incurred on or prior to September 30, 1997, for property, plant, and equipment (PP&E) (other than National Defense PP&E). Estimated environmental disposal liabilities for the property categories discussed in Sections 1302, 1303 and 1304 of this Chapter, that were probable and reasonably estimable at September 30, 1997, shall be recorded as follows:

★1. Except as provided for in subparagraphs 2 below, the total amount of the estimated liability shall be recorded for the environmental disposal estimate, with an offsetting charge to Prior Period Adjustments (Account 7400).

★2. If environmental disposal costs are expected to be recovered annually over the estimated useful life of the PP&E through user charges, then the DoD Components shall (a) record a liability for that portion of the environmental disposal estimate that is attributable to the portion of the useful life prior to September 30, 1997 (or prior to September 30, 1998, if the liability was not recorded previously), with an offsetting charge to Prior Period Adjustments (Account 7400) and (b) incrementally record the balance of the environmental disposal estimate in a systematic and rational manner over the remaining useful life of the asset. In recording the environmental disposal estimate during each period subsequent to September 30, 1997 (or subsequent to September 30, 1998, if the fiscal year 1998 increment was charged to Prior Period Adjustments (Account 7400)) that the PP&E is in operation, a portion of the estimated total cost shall be accrued as a liability, with an offsetting charge to expense, based on

the use of the physical capacity, in the following manner: each period estimate shall equal (i) the total (final) estimated costs of cleanup efforts, (ii) times the physical capacity used/total capacity, (iii) minus the amount previously recognized as an expense (or charged to Prior Period Adjustments (Account 7400) for any portion charged as a prior period adjustment for use prior to September 30, 1997 (or prior to September 30, 1998)). If physical capacity is not applicable or estimable, the estimated useful life of the associated PP&E may serve as the basis for the systematic recognition of expense and accumulation of a liability. The unrecognized portion of the estimated total disposal cost must be disclosed (provided as information by footnote) in the financial statements each period.

★B. Environmental disposal liabilities incurred after September 30, 1997, for PP&E (other than National Defense PP&E). Estimated environmental disposal liabilities for the property discussed in Sections 1302, 1303 and 1304 of this Chapter that were or are placed into service after September 30, 1997, that are probable and reasonably estimable, shall be recorded incrementally, in a systematic and rational manner. In recording the environmental disposal estimate during each period subsequent to September 30, 1997 (or subsequent to September 30, 1998, if the fiscal year 1998 increment was charged to Prior Period Adjustments (Account 7400)) that the PP&E is in operation, a portion of the estimated total disposal cost shall be accrued as a liability, with an offsetting charge to expense, based on the use of the physical capacity, in the following manner: each period estimate shall equal (i) the total (final) estimated costs of cleanup efforts, (ii) times the physical capacity used/total capacity, (iii) minus the amount previously recognized as an expense (or charged to Prior Period Adjustments for any portion charged as a prior period adjustment for use prior to September 30, 1997 (or September 30, 1998)). If physical capacity is not applicable or estimable, the estimated useful life of the associated PP&E may serve as the basis for the systematic recognition of expense and accumulation of a liability. The total (final) amount of the estimated total disposal cost must be disclosed (provided as information by footnote) in the financial statements each period.

★C. Environmental disposal liabilities incurred on or prior to September 30, 1997, for National Defense PP&E. Estimated environmental disposal liabilities for the property discussed in Section 1305 (National Defense PP&E) of this Chapter, that were probable and reasonably estimable at September 30, 1997 (or at September 30, 1998, if the liability was not recorded previously), shall be recorded as a liability, with an offsetting charge to Prior Period Adjustments (Account 7400).

★D. Environmental disposal liabilities incurred after September 30, 1997, for National Defense PP&E. Estimated environmental disposal liabilities for the property discussed in Section 1305 (National Defense PP&E) of this Chapter, that were or are placed into service after September 30, 1997 (or September 30, 1998, if the fiscal year 1998 increment was charged to Prior Period Adjustments (Account 7400)), that are probable and reasonably estimable shall be recorded as a liability, with an offsetting charge to expense.

E. Nonenvironmental disposal liabilities. Estimates for nonenvironmental disposal liabilities shall be charged to expense at the time a formal disposal decision is made except for nuclear powered assets as discussed in paragraph 130506 of this Chapter.

1302 ACCOUNTING POLICY FOR ACCRUED DISPOSAL COSTS FOR GENERAL
PP&E AND STEWARDSHIP LAND

130201. This category includes (1) preservation and management activities at active and inactive ranges at active installations (as defined in DoD Instruction 6055.14, “Unexploded Ordnance Safety on Ranges”), that are not part of the Defense Environmental Restoration Program; (2) excess and/or obsolete facilities and structures that are not included in the Defense Environmental Restoration Program (see paragraph 140202.A. of Chapter 14 of this Volume); and (3) equipment other than National Defense PP&E. (Guidance on disposal cost liabilities associated with National Defense PP&E is contained in Section 1305 of this Chapter.)

A. Range preservation and management activities include the removal and disposal of solid wastes (to include radioactive materials), clearance of unexploded ordnance, and efforts to control and/or eliminate pollutants and contaminants. Installation-level cost estimates shall be used for estimating the amount of the liability.

B. When the Department identifies excess and/or obsolete structures and schedules them for demolition or other disposition, installation-level cost estimates shall be used for disposal liability measurement. Cost estimates for excess and obsolete structures that will be disposed of without being demolished should include any necessary fix-up costs and any directly attributable environmental costs (such as inspection, sampling, testing, removal and disposal of lead-based paint or asbestos). Disposal cost estimates for excess and/or obsolete structures that will be demolished should include the following cost elements, as appropriate:

1. Compensation and benefits of government personnel expected to devote significant time directly to a disposal effort.

2. Efforts to tear down remove and dispose of the item(s).

3. Planning and design (including contract advertisement and document reproduction) efforts.

4. Re-landscaping.

5. Permits and approvals (including State Historic Preservation Officer concurrence and documentation and McKinney Act screening).

6. Directly attributable environmental costs (excluding environmental restoration under the Defense Environmental Restoration Program).

C. Installation-level cost estimates shall be used to measure the disposal liability for equipment other than National Defense PP&E.

★130202. Environmental asset disposal liabilities that are probable and reasonably estimable for ranges, facilities, structures, and equipment shall be recognized, in accordance with the guidance in paragraph 130108 of this Chapter, as follows:

A. For purposes of this guidance, range preservation and maintenance costs at active installations are considered to be environmental disposal. Estimated range preservation and management costs shall be recognized as expense systematically over the period of expected use. Accumulation of the liability and recognition of the related expense (Account 6800) shall commence when the range is placed into service. The liability will be reduced as costs are paid (including payments for assets acquired for use in disposal activities). When a cost estimate is revised, the cumulative effect of the change will be recognized as an expense in the current accounting period and the corresponding liability adjusted. Alternatively, the annual accumulation entry may be reversed at the opening of the subsequent fiscal year. In that event, payments will be charged to expense (Account 6100), and the revised expense (Account 6800) and liability estimates will be recognized at the fiscal year-end.

★B. The estimated environmental disposal costs (at disposition) of facilities, structures, and equipment that are probable and reasonably estimable shall be recognized as expense systematically over the period of their expected use, or based on physical capacity. If physical capacity is not applicable or estimable, estimated environmental disposal costs shall be recognized ratably over the estimated service life, or the useful life as determined under the depreciation criteria in Chapter 6 of this Volume. Accumulation of the liability and recognition of the related expense (Account 6800) shall commence when the PP&E is placed into service. The liability will be reduced as costs are paid (including payments for assets acquired for use in disposal activities). Alternatively, the annual accumulation entry may be reversed at the opening of the subsequent fiscal year. In that event, payments will be charged to expense (Account 6100), and the revised expense (Account 6800) and liability estimates will be recognized at the fiscal year-end. When a cost estimate is revised, the cumulative effect of the change that is applicable to prior and current period operations will be recognized as an expense in the current accounting period and the corresponding liability adjusted.

C. Figure 13-1 illustrates the most common liability account entries associated with the recognition of a future funded expense (Account 6800) and the necessary expense reversal upon the performance of disposal work. Sample entries to record the associated operating expenses/program costs (Account 6100) covered by available budgetary resources are in Section 1706 of Chapter 17 of this Volume.

130203. Nonenvironmental asset disposal liabilities that are probable and reasonably estimable for facilities, structures, and equipment that have been abandoned (e.g., buildings that have not been occupied for extended periods and are no longer maintained) or have been declared excess and/or obsolete and scheduled for demolition or other disposition within the next twelve months, shall be recognized. Sample entries to record operating expenses/program costs (Account 6100) covered by available budgetary resources are in Section 1706 of Chapter 17 of this Volume.

★1303 ACCOUNTING POLICY FOR ACCRUED DISPOSAL COST FOR CONVENTIONAL MUNITIONS, INCLUDING UNGUIDED MISSILES

130301. Conventional munitions may require disposal at the end of their useful lives. Liabilities for conventional munitions, including environmental disposal and nonenvironmental disposal, shall be measured and recognized as described in this section.

130302. With regard to conventional munitions, the hazardous waste removal and disposal cost measurements required by this chapter shall be applied to current fiscal year-end inventories by type (e.g., Munitions Items Disposition Action System families), less any appropriate downward adjustments to reflect factors that may reduce the quantities ultimately requiring disposal, including consumption, and operational losses that would not be replaced.

A. Cost estimates for environmental disposal should include the following cost elements, as appropriate:

1. The cost of employing contractors, engineers, and consultants.
2. Facilities and machinery and equipment dedicated to the applicable disposal effort, and associated operating and maintenance costs.
3. Compensation and benefits of government personnel expected to devote significant time directly to a disposal effort, to include security and surveillance.

B. Cost estimates for nonenvironmental disposal should include all tasks associated with removal, transportation (where applicable), demilitarization, final dismantlement and disposal, and consider the cost elements listed in paragraph A. (1), (2), and (3) of this Paragraph.

★130303. Estimated final environmental disposal costs that are probable and reasonably estimable shall be recognized, in accordance with the guidance in paragraph 130108 of this Chapter, as expense systematically during each period, based on the estimated service life. Accumulation of the liability and recognition of the related expense (Account 6800) shall commence when the items are placed into service. Alternatively, the annual accumulation entry may be reversed at the opening of the subsequent fiscal year. In that event, payments will be charged to expense (Account 6100), and the revised expense (Account 6800) and liability estimates will be recognized at the fiscal year-end. Figure 13-1 illustrates the most common liability account entries associated with the recognition of a future funded expense (Account 6800) and the necessary expense reversal upon the performance of cleanup work. Sample entries to record the associated operating expenses/program costs (Account 6100) covered by available budgetary resources are in Section 1706 of Chapter 17 of this Volume. When a cost estimate is revised, the cumulative effect of the change that is applicable to prior and current period operations will be recognized as an expense in the current accounting period and the corresponding liability adjusted.

130304. Nonenvironmental disposal liabilities that are probable and reasonably estimable, for munitions that have been declared excess and/or obsolete and scheduled for demolition or other disposition within the next twelve months shall be recognized. Sample entries to record the associated operating expenses/program costs (Account 6100) covered by available budgetary resources are in Section 1706 of Chapter 17 of this Volume.

★1304 ACCOUNTING POLICY FOR THE DESTRUCTION OF CHEMICAL AGENTS AND MUNITIONS SUBJECT TO 50 U.S.C. 1521

130401. The Congress, in 50 U.S.C. 1521, has enacted legislation to require the Secretary of Defense to carry out the destruction of the United States' lethal chemical agents and munitions by 2007. The Department of the Army manages this destruction program. This section prescribes the accounting policy and procedures for the chemical demilitarization activities directed in 50 U.S.C. 1521.

★130402. Environmental and nonenvironmental disposal activities conducted under 50 U.S.C. 1521 that are probable and reasonably estimable shall be recorded as liabilities, in accordance with the guidance in paragraph 130108 of this Chapter.

130403. Cost estimates for the destruction of stockpile and nonstockpile chemical agents and munitions should include all tasks associated with their destruction and include the following cost elements, as appropriate:

- A. Permits and licenses.
- B. Research and development and alternative technologies and approaches studies.
- C. Grants to state and local governments.
- D. Other payments to state, Tribal, and local governments (e.g., fees, purchases of emergency equipment, etc.).
- E. Oversight support payments to the Environmental Protection Agency.
- F. Contractors, engineers, and consultants.
- G. Facilities and machinery and equipment dedicated to a destruction effort, and their associated operating and maintenance costs.
- H. Compensation and benefits of government personnel expected to devote significant time directly to a destruction effort, including security and surveillance.

★130404. Destruction liabilities for chemical agents and munitions that are in inventory shall be recognized for the total disposal estimate. The liability will be reduced as destruction costs are paid. When a cost estimate is revised, the cumulative effect of the change will be recognized as an expense in the current accounting period and the corresponding liability adjusted. Alternatively, the total disposal entry may be reversed at the opening of the subsequent fiscal year. In that event, payments will be charged to expense (Account 6100), and the revised expense (Account 6800) and liability estimates will be recognized at the fiscal year-end. Figure 13-1 illustrates the most common liability account entries associated with the recognition of a future funded expense (Account 6800) and the necessary expense reversal upon the performance of disposal. Sample entries to record the associated operating expenses/program costs (Account 6100) covered by available budgetary resources are in Section 1706 of Chapter 17 of this Volume.

1305 ACCOUNTING POLICY FOR ACCRUED DISPOSAL COSTS FOR NATIONAL DEFENSE PP&E

130501. The guidance in this section does not apply to nuclear components that are owned and disposed of by the Department of Energy.

130502. With regard to National Defense PP&E, the environmental disposal cost measurements required by this chapter shall be developed in consideration of the RSSI report “As of 09/30/CY” quantities for the “Categories/Major Types,” excluding “Space Systems” and “Other Weapons Systems (see Figure 11-1 of Volume 6B, Chapter 11); less any appropriate downward adjustments to reflect factors that may reduce the quantities ultimately requiring disposal, including consumption, operational losses that would not be replaced, Foreign Military Sales, donations, recycling and reuse.

130503. Disposal liabilities for National Defense PP&E shall be measured as follows:

A. Environmental cost estimates for hazardous waste removal and disposal should include the following cost elements, as appropriate:

1. The cost of employing contractors, engineers, and consultants.
2. Facilities and machinery and equipment dedicated to the applicable disposal effort, and associated operating and maintenance costs.
3. Compensation and benefits of government personnel expected to devote significant time directly to a disposal effort, to include security and surveillance.

B. Nonenvironmental cost estimates for disposition related nonenvironmental disposal should include all tasks associated with removal, transportation (where applicable), demilitarization, final dismantlement and disposal, and shall include the cost elements listed in A. (1), (2), and (3) of this paragraph as applicable.

130504. Nonenvironmental disposal liabilities for National Defense PP&E that are probable and reasonably estimable shall be recognized as expense at the time there is a formal management decision that the items are to be retired (Army), decommissioned (Air Force), or stricken (Navy), and prior to their transfer to the Defense Reutilization and Marketing Service or other disposition (but see the exception for nuclear powered assets in paragraph 130506 of this Chapter). Sample entries to record the associated operating expenses/program costs (Account 6100) covered by available budgetary resources are in Section 1706 of Chapter 17 of this Volume.

★130505. Environmental disposal liabilities for National Defense PP&E that are probable and reasonably estimable shall be recognized, in accordance with the guidance in paragraph 130108 of this Chapter, as expense at the time items are placed into service and a liability established. The liability will be reduced as costs are paid (including payments for assets acquired for use in disposal activities). Alternatively, the annual accumulation entry may be reversed at the opening of the subsequent fiscal year. In that event, payments will be charged to expense (Account 6100), and the revised expense (Account 6800) and liability estimates will be recognized at the fiscal year-end. Figure 13-1 illustrates the most common liability account entries associated with the recognition of a future funded expense (Account 6800) and the necessary expense reversal upon the performance of cleanup work. Sample entries to record the associated operating expenses/program costs (Account 6100) covered by available budgetary resources are in Section 1706 of Chapter 17 of this Volume. When a cost-to-complete estimate is revised, the cumulative effect of the change will be recognized as expense in the current accounting period and the corresponding liability adjusted.

★130506. For nuclear powered assets (e.g., nuclear submarines and surface ships), the costs of both hazardous waste removal and disposal (environmental disposal) and nonenvironmental disposal, when probable and reasonably estimable, shall be recognized, in accordance with the guidance in paragraph 130108 of this Chapter, as expense, and a liability established, when items are placed into service. The liability will be reduced as costs are paid (including payments for assets acquired for use in disposal activities). Alternatively, the annual accumulation entry may be reversed at the opening of the subsequent fiscal year. In that event, payments will be charged to expense (Account 6100), and the revised expense (Account 6800) and liability estimates will be recognized at the fiscal year-end. Figure 13-1 illustrates the most common liability account entries associated with the recognition of a future funded expense (Account 6800) and the necessary expense reversal upon the performance of cleanup work. Sample entries to record the associated operating expenses/program costs (Account 6100) covered by available budgetary resources are in Section 1706 of Chapter 17 of this Volume. When a cost-to-complete estimate is revised, the cumulative effect of the change will be recognized as expense in the current accounting period and the corresponding liability adjusted.

★CHAPTER 14★

★ACCRUED ENVIRONMENTAL RESTORATION (CLEANUP) LIABILITIES★

1401 GENERAL

140101. This chapter prescribes the accounting policy and principles for measuring (estimating) and recognizing (recording in the accounting system and reporting in the financial statements) Department of Defense (DoD) liabilities associated with the containment, treatment, or removal of contamination that could pose a threat to public health and the environment. Liability recognition shall not be based on the availability of funds.

140102. This chapter does not address a number of other related issues. Accounting for disposal expenses (including hazardous waste removal and disposal) is discussed in Chapter 13 of this Volume. Reporting guidance on liabilities in general is contained in Chapter 4 of Volume 6B of this Regulation. Applicable budget formulation guidance is in Chapters 4, 9, and 13 of Volume 2B of this Regulation, including the development of stabilized prices for the Defense Working Capital Fund. This chapter does not apply to the costs of environmental compliance, pollution prevention, conservation activities, contaminations or spills, or treaty obligations, all of which are accounted for as part of ongoing operations.

140103. Accrued environmental restoration (cleanup) costs of the DoD relate to General Property, Plant, and Equipment (PP&E), including acquired land, and Stewardship Land, as those major asset categories are described in Chapter 6 of this Volume. Environmental restoration activities may be conducted at operating installations, base realignment and closure (BRAC) installations, or at formerly used defense sites (FUDS).

140104. Environmental restoration cost measurements (estimates) may be prepared at the installation or other organizational level. Cost estimates prepared for this purpose shall include, on a current cost basis, the anticipated costs of the level of effort required to affect the restoration, as well as the costs of complying with associated applicable legal and/or regulatory requirements. Such cost estimates should be based on the current technology available. Cost estimates shall be revised when there is evidence that significant changes in the cost estimates have occurred (e.g., changes in scope, ownership, regulation, or technology), or as appropriate when preparing annual reports to Congress. As a minimum, long-term cost estimates shall be adjusted (upward or downward) annually, through indexing, to maintain them on a current cost basis (i.e., as if acquired in the current period).

140105. Environmental restoration estimates are subject to audit. Cost estimate preparation may involve the application of specialized methods, accumulation and study of historical costs, and the conduct of technical analyses. Estimating tools used must be verified, validated, and determined to be reasonably accurate. Organizations that prepare cost estimates must retain adequate documentation to identify data sources, estimating method accreditation (including parametric models) and rationale used (see Key Accounting Requirement Number 8 in

Chapter 3 of Volume 1 of this Regulation). Documentation of management review also must be retained.

140106. Cost estimates for some aspects of cleanup activity (e.g., studies, investigations, remedial actions, or monitoring) may be specific amounts or a range of amounts. If some amount within a range is considered a better estimate than any other estimate, that amount should be used. If no amount within a range is considered a better estimate than other estimates, then the minimum amount in the range should be used.

140107. Cost estimates for restoration activities should only be offset by estimated cash proceeds when the proceeds are permitted to be retained and used by the organization that will fund the disposal costs.

140108. Environmental restoration liability estimates that are material at the reporting level, as identified in Section 01016 of Chapter 1 of Volume 6B of this Regulation, shall be recorded in the accounting system and reported in the financial statements as of the report date.

1402 ACCOUNTING POLICY FOR ACCRUED ENVIRONMENTAL RESTORATION (CLEANUP) COSTS FOR GENERAL PP&E AND STEWARDSHIP LAND

140201. Environmental Restoration (cleanup) liabilities shall be measured as described in paragraph 140202 and recognized as described in paragraph 140204 of this Chapter, as of the reporting date (e.g., fiscal year-end), for locations the DoD is legally obligated to cleanup (environmental restoration) and for locations the Department has entered into agreements to cleanup.

140202. The Office of the Deputy Under Secretary of Defense (Environmental Security) (ODUSD(ES)) issues policy and management guidance addressing most environmental restoration (cleanup) efforts involving the DoD:

A. The Defense Environmental Restoration Program includes active installations and FUDS, and the Base Realignment and Closure Restoration Program for BRAC installations. Environmental restoration (cleanup) activities are further categorized as installation restoration, other hazardous waste (which includes the clearance of ordnance and explosive wastes at FUDS property and of munitions left on closed, transferred, or transferring ranges), and building demolition/debris removal (BD/DR). Management and cost estimating guidance is contained in the document titled, "MANAGEMENT GUIDANCE FOR THE DEFENSE ENVIRONMENTAL RESTORATION PROGRAM."

B. The ODUSD(ES) management guidance details essential installation level site inventory and reporting requirements (e.g., site identifiers, status, and cost-to-complete estimates). These data requirements are used in preparing installation and FUDS Site Management Action Plans (MAPs) and BRAC Cleanup Plans (BCPs). The ODUSD(ES) uses this information for several purposes including the preparation of budgetary requests and the Defense Environmental Restoration Program Annual Report to Congress. These site inventories and related estimated cost

data also shall be used by the DoD Components as the baseline for environmental restoration (cleanup) liability measurement (i.e., the current cost to acquire the required services as described in Section G of the management guidance cited in the preceding paragraph).

★140203. Estimated environmental restoration costs for General PP&E, and stewardship land that are probable and reasonably estimable shall be recognized as expense (Account 6800) and a liability established. The liability will be reduced as cleanup costs are paid (including payments for assets acquired for use in environmental restoration activities). Alternatively, the annual accumulation entry may be reversed at the opening of the subsequent fiscal year. In that event, payments will be charged to expense (Account 6100), and the revised expense (Account 6800) and liability estimates will be recognized at the next fiscal year-end. Figure 14-1 illustrates the most common liability account entries associated with the recognition of a future funded expense (Account 6800) and the necessary expense reversal upon the performance of restoration work. Sample entries to record the associated operating expenses/program costs (Account 6100) covered by available budgetary resources are in Section 1706 of Chapter 17 of this Volume. When an environmental restoration cost-to-complete estimate is revised (e.g., based on a new estimate or through indexing), the cumulative effect of the change shall be recognized as an expense in the current accounting period and the corresponding liability adjusted.

1403 ACCOUNTING POLICY FOR ACCRUED ENVIRONMENTAL RESTORATION (CLEANUP) COSTS FOR POTENTIALLY RESPONSIBLE PARTY SITES

140301. Potentially responsible sites are contaminated areas that require the DoD to determine the extent to which it or other parties bear responsibility. If the DoD has entered, or is required to enter, into an agreement to provide environmental restoration, such liabilities that are reasonably estimable, shall be measured (as described in this paragraph) and recognized. When a responsibility determination will be resolved in the future, the likelihood of loss must be classified as “probable,” “reasonably possible,” or “remote.” When the likelihood of loss is not reasonably estimable but at least reasonably possible, the nature of the contingency shall be disclosed in the financial statements. When the likelihood of loss is probable and reasonably estimable, the contingency shall be measured and recognized. Restoration cost estimates should include the following cost elements, as appropriate:

A. Studies, plans and designs, restoration activities, remedial actions, and operations (to include operating and maintenance costs of remedial systems), and the costs of contractors, engineers, and consultants.

B. Facilities, machinery, and equipment dedicated to a restoration effort that do not have alternative uses, and their associated operating and maintenance costs.

C. Compensation and benefits of government personnel that devote significant time directly to an environmental restoration effort, to include security and surveillance.

D. Long-term monitoring.

- E. Site closeout and deletion from the National Priority List, where appropriate.

CHAPTER 15

EQUITY1501 GENERAL

★ Equity accounts represent the net investment of the U.S. Government in the Department of Defense (DoD). As such, it includes all operations of DoD activities, including appropriated activities, working capital funds, and trust funds. The balances in the equity accounts represent the difference between assets and liabilities. The general accounting policy to account for the equity of the U.S. Government in the DoD is contained in this chapter.

★1502 ACCOUNTING POLICY FOR EQUITY

★ 150201. Activities financed by appropriations shall show the results of their operations as reductions to the Unexpended Appropriations account on a transaction basis and as changes in the Cumulative Results of Operations account with respect to the equity effect of transactions. The Unexpended Appropriations account is increased for the receipt of appropriations or other appropriation like resources and reduced for amounts expended for assets or operating expenses, and any appropriation withdrawals. The Cumulative Results of Operations account is increased by revenues and the value of assets transferred in and reduced by expenses requiring current resources, expenses not requiring current resources, and expenses recorded which are not currently funded.

★ 150202. Activities whose operations are financed by revenue sources, generally defined as exchange revenue, shall have their results of operations reflected as increases or decreases to the Cumulative Results of Operations account which will include transfers in of assets which are recognized as financing sources. Appropriations received for a specific funding purpose will be accounted for in the Unexpended Appropriations account until used as a financing source.

★1503 RECOGNITION IN FINANCIAL STATEMENTS

★ 150301. The components of net position include Unexpended Appropriations (unobligated balances and undelivered orders) and Cumulative Results of Operations and shall be shown in the consolidated balance sheet. The amounts of unobligated balances available and unavailable shall be disclosed in the footnotes to the financial statements.

★ 150302. Unexpended Appropriations. This amount includes the portion of the entity's appropriations represented by undelivered orders and unobligated balances. Decreases in Unexpended Appropriations occur as expenditure accruals using appropriated funds are recognized and recorded, and when unobligated amounts are withdrawn, rescinded, or canceled. Increases occur when appropriations are received or Unexpended Appropriation amounts are transferred in.

★ 150303. Cumulative Results of Operations. This amount represents the net results of operations since inception. There no longer will be direct postings to equity for transactions such as donations and transfers in and out of assets without reimbursement. Such transactions are recorded in the revenue accounts and closed to this account at year end. In addition, there no longer will be a segregation of cumulative amounts for future funding requirements (such transactions now are recorded as an expense and closed to this account at year end).

1504 ACCOUNTING FOR EQUITY

★ A. The transactions discussed frequently will require a compound entry; that is, entries must be made in both the proprietary (asset, liability, and equity) accounts and the budgetary accounts. Entries to these equity accounts (3000 series) normally require compound entries to budgetary accounts in the 4000 series of accounts. Those budgetary entries are shown, where applicable, within this chapter. Entries which affect direct program Expended Authority (Paid and Unpaid) must also include postings to Appropriations Used (Revenue) and Unexpended Appropriations (Equity). Additional information on budgetary accounts not covered in this chapter are included in Volume 3, “Budget Execution - Availability and Use of Budgetary Resources” to this “Department of Defense Financial Management Regulation.”

★ B. The transactions illustrated in the text represent the U.S. Government Standard General Ledger at the control account level. Frequently, the control accounts are summary accounts and the reader must consult Volume 1, “General Financial Management Information, Systems, and Requirements,” and Chapter 7 to this Regulation to determine the general ledger subsidiary account most appropriate for posting a specific transaction.

★ 150401. Unexpended Appropriations (Account 3100).

★ A. This account reflects the amounts appropriated by the Congress, which have not been expended. Such appropriations include operation and maintenance, military personnel, construction, procurement, research and development, etc. Unexpended Appropriations (formerly Appropriated Capital) is the proprietary equity account used to record funds made available by the Congress. The amounts recorded in this account include appropriations, withdrawals, and purchase of assets and operating expenses incurred during the year.

★ B. The following entries illustrate the normal proprietary and budgetary entries to this account.

★ 1. The following compound entry is used to record Unexpended Appropriations when an appropriation is realized and a treasury warrant is issued.

Dr	1010	Fund Balance With Treasury
	Cr	3100 Unexpended Appropriations

and

Dr 4119 Other Appropriations Realized
Cr 4450 Unapportioned Authority

★ 2. During the budget execution process, appropriations (direct program funds) are used to pay for goods and services received by the DoD. The use of appropriations should be recognized as a financing source when accompanied by an entry to Expended Authority - Paid or Unpaid, and also must be accompanied by a reduction in the Unexpended Appropriation balance. The following compound entry illustrates the use of this account: (Note: for appropriated funds, revenues, expenses, gains and losses are closed into account 3310 “Cumulative Results of Operations”--not 3100 “Unexpended Appropriations.”)

Dr 3100 Unexpended Appropriations
Cr 5700 Appropriations Used

and

Dr 4801 Undelivered Orders - Unpaid
Cr 4901 Expended Authority - Unpaid

and

Dr 6100 Operating Expenses/Program Costs
Dr 1700 General Property, Plant, and Equipment, Net
Cr 2110 Accounts Payable

★ 150402. Appropriated Capital Funding Canceled Payables (Account 3105).

★ A. This account is used to record appropriated capital funding payment of accounts payable, which had been canceled under requirements of Public Law 101-510.

 B. At the end of the fifth year following the expiration of an account, Public Law 101-510 requires that both the obligated and unobligated balances of an appropriation shall be canceled and will no longer be available for obligation or expenditure for any purpose. Upon cancellation, the following budgetary and proprietary entries shall be made to cancel the unpaid balance of expended authority.

Dr 4971 Downward Adjustments of Prior Year Unpaid Undelivered Orders
Cr 4350 Canceled Authority

and

Dr 2110 Accounts Payable
Cr 1010 Fund Balance With Treasury

C. To establish the payable in the current year.

Dr 6800 Future Funded Expenses
Cr 2960 Accounts Payable Canceled

D. When the bill is received in the current year, the following entry is made in the canceled year appropriation books.

Dr 4350 Canceled Authority
Cr 4201 Total Actual Resources - Collected

E. Simultaneously, in the unexpired paying appropriation, the following entry must be recorded to establish an accrued expenditure, accounts payable, record the expense, and record resources used in an unexpired appropriation available for the same general purpose as the canceled account.

CHAPTER 16

REVENUES, EXPENSES, GAINS, AND LOSSES1601 GENERAL

160101 This chapter outlines the accounting principles and policy DoD activities shall follow to account for revenues, expenses, gains, and losses. Revenues are discussed in detail in Chapter 18 of this Volume; expenses and losses are discussed in detail in Chapter 17 of this Volume.

160102 The guidance in this chapter implements the accounting principles and policy that shall be followed by DoD Components.

1602 ACCOUNTING POLICY FOR
REVENUES, EXPENSES, GAINS,
AND LOSSES

160201 Revenues are amounts earned as a result of normal operations while gains generally relate to all other transactions resulting in a net gain. They normally result from the sale of, or reimbursement for, goods and services provided to DoD activities, other Federal Government Agencies and to non-Federal Government organizations. However, in some limited cases they may consist of interest income and profits from the sales of securities.

160202 Revenues shall be recorded at their gross amount while gains are shown net of related costs.

160203 The basis for recording an amount as a revenue shall be the delivery of goods and services as evidenced by documentation of performance, a billing to the ordering activity, or the establishment of an accrual evidenced by constructive delivery or percentage of completion.

160204 In certain situations, delivery to customers may be spread over several accounting periods and a billing does not occur until final delivery is made. In such cases, revenue shall be recognized each time a partial delivery is made with a corresponding debit entry to the appropriate noncurrent accounts receivable account.

160205 Collections resulting from the sale of assets such as equipment shall not be treated as revenues by DoD Components that are not established to sell goods and services to other Federal Government Agencies or to non-Federal Government organizations. Such collections are a partial recovery of the asset and shall be treated as such. Asset disposals, after considering any accumulated depreciation and cash collections, result in a gain or loss on disposal.

160206 Refunds are recoveries of over payments and, as such, are not revenue. Refunds result from errors in paying invoices or returned items to vendor.

160207 Expenses and losses are the use of resources during an accounting period in carrying out DoD's mission. These can result from rendering services, delivering or producing goods, or carrying out other activities. Expenses relate to normal operating activities, while losses generally relate to all other transactions resulting in a net loss.

160208 The distinction between expenses and losses is a matter of classification in the general ledger accounts and their presentation in financial statements. Expenses are commonly reported at their gross amount while losses are shown net of related proceeds.

CHAPTER 17

EXPENSES AND MISCELLANEOUS ITEMS1701 GENERAL

170101 Purpose. This chapter prescribes guidance to account for expenses incurred in carrying out Department of Defense operations.

170102 Overview. An expense is a recognition of the portion of an outlay applicable to the current accounting period, or other use of a resource, or the incurring of a liability (or a combination of these events) as a result of the DoD's efforts to perform its missions.

170103 Expenses are the natural culmination of any DoD Component's operations. They occur as a part of normal, routine operations, and not an extraordinary or an unexpected event such as destruction through natural disasters or war. They are an application of budgetary resources made available to DoD Components without regard to the period of availability of the account. Goods and services ordered and received are recorded in the budgetary accounts as accrued expenditures and in the proprietary accounts as an expense or an asset, such as a capital item, or an inventory item. The proprietary accounts maintain financial control over the resources provided to the Department of Defense and assure full accountability once the budget execution process has been completed. Full financial control over all material, labor, supplies, etc., shall be maintained until consumed (expensed), sold or transferred to another Federal Agency in accordance with statutory authority. For Defense business operations fund activities, expenses are incurred in providing goods and services to customers. Figure 17-1 on the following page illustrates the relationship between the budgetary accounts and the expense accounts.

170104 Expenses are classified as to specific categories, such as accounts to record depreciation, amortization, bad debt and interest expenses.

170105 A miscellaneous item is a gain or loss not expected to be incurred during a normal operating cycle. As such, they are not reflected in reports as a current expense but are classified and reported as nonrecurring items, extraordinary items, or unusual items. An example of a miscellaneous item would be a gain or loss resulting from the disposal of unusable equipment. A gain could be a miscellaneous gain whereas a loss on disposal would be a miscellaneous loss.

170106 The treatment of expense items by Defense Business Operations Fund activities is different from the treatment accorded to expenses related to appropriation funded activities. For Defense Business Operations Fund activities expenses flow through the "Work in Process" Account to the "Cost of Goods" Account.

1702 ACCOUNTING POLICY FOR
EXPENSES AND MISCELLANEOUS
ITEMS

170201 The Department of Defense is accountable for its stewardship in expending resources necessary in carrying out its missions. Examples of operating expenses include those for personnel, contractual services, and material. Also included is an allocation of prior capital outlays (depreciation/amortization) when such information is necessary for management decision-making purposes, to meet external reporting requirements, or to recover costs of operations.

170202 Particular attention is to be given to expenses incurred by research and development programs, or related to the search for knowledge and the conversion of knowledge into use for DoD missions.

ACCRUED EXPENDITURES PAID AND
EXPENSE ACCOUNTS RELATIONSHIPS

When goods or services purchased are paid for they are recorded as an Accrued Expenditure-Paid in budgetary accounts. In proprietary accounts, they are recorded either in an account such as fixed assets (if capitalized) or inventory, or as an expense. Those items recorded as an asset are ultimately consumed in the DoD Component's operation. Items initially recorded as an expense may, especially at DBOF depot maintenance activities, be transferred to work in process until such time as an item is completed.

Figure 17-1

A. Expenses incurred for research and development shall be recorded and reported as an expense in the period incurred.

B. Costs for property, plant, or equipment acquired or constructed for a particular research and development project are to be capitalized if the acquisition cost is over \$50,000 and the items have a life expectancy of more than 2 years. When the project is completed, these items shall be disposed of in accordance with the guidance contained in Chapter 7 of this Volume. Chapters 1 and 6 of this Volume provide accounting guidance for capitalizing and depreciating or amortizing assets.

1703 ACCOUNTING FOR EXPENSES

170301 The following sections discuss each type of expense. The sections are categorized as to operating/program expenses, interest expenses, benefit program expenses, cost of goods sold, applied overhead, and other expenses. Unless otherwise stated, these accounts shall be applicable to all DoD Components. Closing entries are not illustrated; these entries are contained in Chapter 16 of this Volume.

170302 The accounting entries for operating/program expenses are, for the most part, the same. Accordingly, each of the expense accounts is first discussed in a logical grouping and the accounting entries associated with those groupings are then presented. These groupings are:

- A. Accounts 6111-6115 -- payroll expenses
- B. Accounts 6116-6124 -- general expenses
- C. Accounts 6125-6126 -- depreciation expenses
- D. Account 6127 -- depletion expense
- E. Account 6128 -- amortization expense
- F. Account 6129 -- bad debt expense
- G. Account 6130 -- annual leave

170303 The use of the accounts discussed in this Chapter by appropriated, business operations fund and trust fund activities is summarized as follows:

- A. Appropriated Fund Activities. All

accounts are available for use except the following:

- 1. 6310 Interest Expenses on Borrowing From Treasury
- 2. 6600 Applied Overhead
- 3. 6900 Other Expenses
- 4. 7191 Inventory Gains
- 5. 7192 Investment Gains
- 6. 7291 Inventory Losses or Adjustments
- 7. 7292 Investment Losses
- 8. 7500 Distribution of Income-Dividend
- 9. 7600 Changes in Actuarial Liability

B. Defense Business Operations Fund activities. The 6100 series accounts may be used to systematically accumulate costs. All other accounts are available for use as necessary depending upon the specific business area, except the following:

- 1. 6310 Interest Expense on Borrowing from Treasury
- 2. 6320 Interest Expenses on Federal Securities
- 3. 6400 Benefit Program Expenses
- 4. 7500 Distribution of Income-Dividend
- 5. 7600 Changes in Actuarial Liability

C. Trust Fund activities. All accounts are available for use as necessary depending on the specific trust fund, except the following:

- 1. 6310 Interest Expenses on Borrowing From Treasury
- 2. 6320 Interest Expenses on Federal Securities
- 3. 6600 Applied Overhead
- 4. 7500 Distribution of Income-Dividend
- 5. 7191 Inventory Gains
- 6. 7291 Inventory Losses

170304 For expense transactions that pass through an accounts payable or accrued payroll account, the budget account entry to be made is provided in Table 17-1.

170305 In some instances, an immediate cash outlay is made at the time the expense is incurred. This is the situation when the expense is incurred through the use of an imprest fund. To ensure that the budgetary and the proprietary accounts are posted in the same accounting period, imprest funds shall be reimbursed at

least once during each accounting period. The budgetary account entry to be made for immediate cash outlay situations is provided in Table 17-2.

170306 Expenses (Account 6000) "Expenses" is the control account for all expenses. As such, it is a summary general ledger account intended for general financial statement purposes. No transactions are posted to this account.

170307 Operating/Program Expenses (Account 6100)

A. "Operating/Program Expenses" is a summary account to control subsidiary accounts established to accumulate operating expenses for personnel, travel, communications, contractual services, etc. As such, no transactions are posed to this account.

B. Expenses shall be identified to the programs to which they relate. Accordingly, accounting systems shall have the ability, at a

minimum, to report expenses by budget program line, the Future Years Defense Plan, the force structure, and organizational unit.

170308 Group A: Accounts 6111-6115 - Payroll Expenses

A. Personnel Compensation-Civilian (Account 6111)

1. " P e r s o n n e l Compensation-Civilian" is used to record the gross compensation for personal services rendered by federal civilian employees and non-federal personnel. Compensation expenses included in this account are those for full time permanent; other than full time permanent; special personal services payments (which includes payments for reimbursable work performed for other agencies for services of civilian and military personnel; payments to the Civil Service retirement and disability fund for reemployed annuitants); and other personnel compensation.

Cr 4940 Accrued Expenditures-Paid-Reimbursable Program

TABLE 17-2

2. Awards made to employees such as those for suggestions, performance bonuses, special act awards, and productivity gain sharing programs are increases in payroll compensation. the DoD productivity gain sharing (PGS) program permits up to a maximum of 50 percent of achieved PGS savings to be paid to eligible employees. Subject to the 50 percent ceiling, the PGS program allows considerable flexibility in determination of the amount and form of payment--monetary or compensated absence (administrative leave). DoD activities develop their individual organization-wide PGS plans based on their mission functions. PGS plans should include a specified effort to be on board to be eligible to receive a share of the PGS payout. PGS plans should also provide specifics as to whether an employee remains eligible or forfeits his/her share if the employee leaves the organization prior to the payout. If the plan and conditions permit, employees may elect to receive administrative leave, or cash payment, or a combination of administrative leave and pay. The administrative leave option may be granted at the discretion of the activity commander based upon workload requirements at the time. The period of time for which administrative leave may be granted to an employee will be derived by dividing the value of the employee's gain share award by his/her hourly rate plus and average factor for benefits.

3. This account shall be used by all DoD activities. Revolving fund activities may use this account to accumulate civilian personnel costs for work in process or construction in progress. Trust fund activities that need to account for personnel related expenses also may use this account.

4. Table 17-3 illustrates the use of this account.

B. Personnel Compensation-Military (Account 6112)

1. "Personnel Compensation-Military" is used to record the earned basic, incentive and special pays of military personnel. Included are extra pay based on environmental conditions and basic

allowances for subsistence and quarters. Excluded are cost of living allowances for locations outside the contiguous 48 states and the District of Columbia, which is recorded in account 6114, Personnel Benefits-Military. Also excluded are payments made to other Agencies for services of military personnel on reimbursable detail, that are posted to account 6120, "Other Services."

2. This account shall be used by those DoD activities which account for the cost of military personnel appropriations.

3. Table 17-3 illustrates the use of this account

C. Personnel Benefits-Civilian (Account 6113)

1. "Personnel Benefits-Civilian" is used to record the benefits paid directly to DoD civilian personnel and payments to other funds for the benefit of the employees. It excludes DoD reimbursements for reemployed annuitants, i.e., payments by an agency employing an annuitant that reimburses the Civil Service retirement and disability fund for the annuity paid to that employee as required by P.L. 94-397 (5 U.S.C. 8339, 8344). These are recorded in account 6111, "Personnel Compensation-Civilian."

2. This account shall be used by all DoD activities. Revolving fund activities may use this account to accumulate civilian personnel costs for work in process or construction in progress. Trust fund activities that need to account for personnel related expenses also may use this account.

3. Table 17-4 illustrates the use of this account.

D. Personnel Benefits-Military (Account 6114)

1. "Personnel Benefits-Military" is used to record the benefits paid directly to military personnel. Included are allowances for uniforms, reenlistment bonuses, cost of living allowances paid to personnel on duty outside the

contiguous 48 States and the District of Columbia, dislocation and family separation allowances and personal allowances. Allowances for items such as hazardous duty, flight pay and environmental conditions are excluded; these are considered part of gross pay. DoD Component contributions to the military retirement, social security, the Serviceman's Group Life Insurance and educational benefits programs are charged to this account.

2. This account shall be used only in those accounting systems that are used to record obligations for military pay.

3. Table 17-4 illustrates the use of this account.

E. Benefits for "Former Personnel" (Account 6115)

1. "Benefits for "Former Personnel" is used to record amounts paid to former DoD personnel or their survivors during the current period. Included in the account are retirement benefits (excluding foreign nationals that is recorded in account 2114, Accounts Payable-Public-Non-current), severance pay, unemployment compensation, and the DoD's payment to the Employees Health Benefits Fund for annuitants.

2. This account shall be used by all DoD activities that account for benefit payments to former DoD civilian employees and their survivors. Revolving fund activities may

use this account to accumulate civilian personnel costs for work in process or construction in progress. Trust fund activities that need to account for personnel related expenses also may use this account. Benefit payments to retired military personnel and their survivors are recorded in Account 6400, "Benefit Program Expenses."

F. Table 17-5 illustrates the use of this account.

G. Sources of entries to this account include payroll vouchers and journal vouchers.

170309 Group B: Accounts 6116-6124 - General Expenses

A. Travel and Transportation of Persons (Account 6116)

1. "Travel and Transportation of Persons" is used to record the expenses related to transporting employees and others, including public transportation fares, per diem allowances, and other related expenses that are paid directly by the Department of Defense to the traveler or the organization providing the travel transportation.

2. This account shall be used by all DoD activities. Revolving fund activities may use this account to accumulate costs for work in process or construction in progress. Trust fund activities that need to account for such expenses also may use this account.

TABLE 17-5

B. Transportation of Things (Account 6117)

1. "Transportation of Things" is used to record the expenses incurred to transport equipment, material, animals, deceased employees and for the care of such items while being transported. Vendor transportation charges associated with purchased items are excluded; these are charged to the general ledger accounts associated with the purchased items. Included are freight and express charges by common carrier and contract carrier; trucking and other local transportation charges for hauling, handling, and other services incident to local transportation, including contractual transfers of supplies and equipment; mail transportation, including parcel post postage; and, transportation of household goods related to permanent change of station.

2. This account shall be used by all DoD activities. Revolving fund activities may use this account to accumulate costs for work in

process or construction in progress. Trust fund activities that need to account for such expenses also may use this account.

C. Rents, Communications, and Utilities (Account 6118)

1. "Rents, Communications, and Utilities" is used to record the expenses incurred for possession and use of land, structures or equipment owned by others and charges for communication and utility services. It includes direct charges for rental of space and rent related services assessed by the General Services Administration as rent, formerly known as standard level user charges (but excludes payments for services such as extra protection, extra cleaning or extra alterations, which are charged to account 6120, "Other Services"); rental charges to others for leased space, land, and structures; communication expenses for telephone and other wire services, and microwave and satellite communications; utility service charges for heat, light, power, water, gas,

electricity, and other utility services; and, miscellaneous charges under purchase rental agreements for equipment (but excludes payments under lease-purchase contracts for constructing buildings). Rental charges for transportation equipment are recorded as a "Transportation of Things" expense, Account 6117.

2. This account shall be used by all DoD activities. Revolving fund activities may use this account to accumulate costs for work in process or construction in progress. Trust fund activities that need to account for such expenses also may use this account.

D. Printing and Reproduction (Account 6119)

1. "Printing and Reproduction" is used to record expenses incurred for printing, reproduction, composition and binding operations provided by U.S. Government and commercial printers and photographers.

2. This account shall be used by all DoD activities. Revolving fund activities may use this account to accumulate costs for work in process or construction in progress. Trust fund activities that need to account for such expenses also may use this account.

3. When necessary to meet management or external reporting requirements, subsidiary accounts shall be established to accumulate expenses by type (i.e., printing, reproduction, etc.).

E. Other Services (Account 6120)

1. "Other Services" is used to record expenses incurred for contracts that are not appropriately charged to another expense account. Excluded from this account are rental expenses paid to GSA, travel and transportation services and lease contracts that are properly capital leases as explained in Chapter 7 of this Volume and contracts for the delivery of personal property. Included are repair and alteration expenses that are not capitalizable in accordance with the guidance of chapter 1 of this Volume; expenses incurred for storage and care

of vehicles and storage of household goods, including those associated with a permanent change of station; contractual expenses for board, lodging, and care of persons, including hospital care (except for travel items that are recorded in account 6116); ADP custom software contract expenses covering development of software in accordance with current budget criteria.

2. This account shall be used by all DoD activities. Revolving fund activities may use this account to accumulate costs for work in process or construction in progress. Trust fund activities that need to account for such expenses also may use this account.

F. Supplies and Materials (Account 6121)

1. "Supplies and Materials" is used to record the cost of supplies and material, including chemicals, fuel, clothing, food, ammunition and explosives, office supplies, publications, and ADP supplies and materials consumed in operations. Amounts recorded in this account exclude supplies and materials that are either incorporated into or consumed in producing an end product that is capitalized as an inventory item or as a fixed asset. Supplies and materials consumed in producing an end product are recorded as work in process or construction in progress as a direct material charge or as overhead.

2. This account shall be used by all DoD activities which receive materials and supplies for consumption in operations. Revolving fund activities may use this account to accumulate costs for work in process or construction in progress. Trust fund activities that need to account for such expenses also may use this account.

G. Equipment (not capitalized) (Account 6122)

1. "Equipment (not capitalized)" is used to record the acquisition costs of equipment purchased that do not meet the capitalization criteria in Chapter 1 of this Volume.

2. This account shall be used by all DoD activities. Revolving fund activities may use this account to accumulate costs for work in process or construction in progress. Trust fund activities that need to account for such expenses also may use this account.

H. Grants, Subsidies, and Contributions (Account 6123)

1. "Grants, Subsidies, and Contributions" is used to record grants and subsidies such as those authorized by law for National Guard training facilities and contributions made to further or enhance the interest of national defense. Charges to this account also include taxes paid by the Department of Defense as a result of agreements with taxing authorities and payments in lieu of taxes.

2. In those instances involving the contribution of DoD-owned assets, care must be taken to remove from the accounts not only the capitalized cost of the contributed asset, but also any accumulated depreciation related to the assets before recording the donation. In such cases, the donated value shall be the book value and no gain or loss shall be recognized on the transaction.

3. This account shall be used by all DoD activities. Revolving fund activities may use this account to accumulate costs for work in process or construction in progress. Trust fund activities that need to account for such expenses also may use this account.

I. Insurance Claims and Indemnities (Account 6124)

1. "Insurance Claims and Indemnities" is used to record payments to veterans and their survivors for death or disability; claims and judgments arising from court decisions, and abrogations of contracts; claims arising from military operations; and personal injury or death claims.

2. This account shall be used by all DoD activities that support the processing and payment of claims and indemnities. fund

activities may use this account to accumulate costs for work in process or construction in progress. Trust fund activities that need to account for such expenses also may use this account.

J. Table 17-6 illustrates the most common entries used for this account.

2. Sources for entries to this account include completed travel orders, passenger tickets and transportation requests issued; travel claims approved, billings from common carriers, invoices, receiving reports, lease/use providers of personnel transportation services, documents authorizing grants, subsidies and contributions, adjudicated claims, journal vouchers, and disbursement vouchers.

170310 Group C: Accounts 6125-6126 - Depreciation Expenses

A. Depreciation of Equipment (Account 6125)

1. "Depreciation of Equipment" is used to record the allocation of the cost of equipment, including ADP equipment and assets acquired under capital leases used during an accounting period. The amounts to be recorded as depreciation shall be determined in accordance with the guidance contained in Chapters 1, 6, and 7 of this Volume.

2. This account shall be used by appropriated fund activities when a management decision is made that depreciation accounting is necessary. Revolving fund activities shall account to accumulate costs for work in process or construction in progress. Trust fund activities that need to account for such expenses also may use this account.

B. Depreciation of Real Property (Account 6126)

1. "Depreciation of Real Property" is used to record the allocation of the cost of real property (buildings, structures, and other depreciable facilities) used during an accounting period. The amounts to be recorded as depreciation shall be determined in

accordance with the guidance contained in Chapters 1 and 6 of this Volume.

2. This account shall be used by appropriated fund activities when a management decision is made that depreciation accounting is necessary. Where depreciation is required to meet the requirements for cost recovery, the asset use charge shall be applied in accordance with the provisions of Volume 11.

3. Defense Business Operations Fund activities shall use this account to accumulate costs for work in process or construction in progress. Trust fund activities that need to account for such expenses also may use this account.

C. Table 17-7 illustrates the common entries used for this account.

D. Sources for entries to this account are journal vouchers supported by worksheets showing the basis for depreciation computations.

170311 Group D: Account 6127 -- Depletion Expense

A. Depletion of Natural Resources (Account 6127)

1. "Depletion of Natural Resources" is used to record the estimated value of natural resources extracted or consumed during the current accounting period.

2. This account shall be used by DoD fund activities when a management decision is made that depletion accounting is necessary. DoD Components shall consult with the DFAS, when the decision to record depletion expenses is made for DoD assets. Where depletion is required to meet the requirements

170312 Group E: Account 6128 -
Amortization Expense

A. Amortization of Leasehold
Improvements and Other Intangible Assets
(Account 6128)

1. "Amortization of Leasehold Improvements and Other Intangible Assets" is

used to record the allocation of improvements made to properties held under lease as well as the allocation of the value of other assets to the current accounting period. The amounts to be recorded as an amortization expense shall be determined in accordance with the guidance contained in Chapter 7 of this Volume. This account also shall be used to record the estimated loss on acquired collateral.

2. This account shall be used by appropriated and revolving fund activities when a management decision is made that amortization accounting is necessary. Where amortization is required to meet the requirements for cost recovery, the asset use charge shall be applied in accordance with the provisions of Volume 11.

170313 Group F: Account 6129 -
Bad Debt Expense

A. Bad Debts (Account 6129)

1. "Bad Debts" is used to record estimated amounts of uncollectible receivables during the accounting period.

2. This account also shall be used to record bad debts that are in excess of estimated uncollectible receivables.

3. Normally, estimates of uncollectible accounts receivable shall be limited to

those collectible from the public. When experience does not indicate otherwise, Components shall record a bad debt expense using an annual percentage rate of .001 of the current outstanding receivables balances from the public.

4. This account shall be used by all DoD activities. Revolving fund activities may use this account to accumulate costs for work in process or construction in progress. Trust fund activities that need to account for such expenses also may use this account.

5. Guidance contained in Volume 3 of this Regulation shall be followed when recording obligations to cover dishonored receivables.

6. Table 17-10 illustrates the most common entries used for this account.

7. Sources for entries to this account include journal vouchers supported by worksheets showing computations of estimated bad debts.

170314 Group G: Account 6130 - Annual Leave

A. Annual Leave (Account 6130)

1. "Annual Leave" is used to record the expense incurred by DoD Components for annual leave earned by civilian and military employees.

2. This account shall be used by all DoD activities. Revolving fund activities may use this account to accumulate costs for work in process or construction in progress, except that business operations funds shall not record the annual leave expense for military personnel. Trust fund activities that need to account for such expenses also may use this account.

3. Table 17-11 illustrates the most common entries used for this account.

170315 Interest Expenses (Account 6300)

A. "Interest Expenses" is a summary control account used to record interest expenses incurred by DoD Components as a result of late payments of accounts and loans payable, and the current interest accruing on amounts owed to

others.

B. This account is used for financial reporting purposes only. No entries are posted to this account.

C. This account shall be used by all DoD activities. Revolving fund activities may use this account to accumulate costs for work in process or construction in progress. Trust fund activities that need to account for such expenses also may use this account.

170316 Interest Expenses on Borrowing From Treasury (Account 6310)

A. "Interest Expenses on Borrowing From Treasury" is used to record interest payments on borrowings from the Treasury.

B. The Department of Defense does not have current borrowing authority. Accordingly, this account shall not be used by DoD Components.

170317 Interest Expenses on Securities (Account 6320)

A. "Interest Expenses on Securities" is used to record the interest expense incurred by DoD Components authorized to issue securities.

B. No DoD activity is authorized to issue federal securities. Accordingly, no entries shall be posted to this account.

**ACCOUNTING ENTRIES FOR ACCOUNT 6130 -

170318 Other Interest Expenses (Account 6330)

A. "Other Interest Expenses" is used to record all interest expenses incurred by DoD activities as a result of late payments of accounts payables, loans, mortgages and other liabilities.

B. This account shall be used by all DoD activities. Revolving fund activities may use this account to accumulate costs for work in process or construction in progress. Trust fund activities that need to account for such expenses also may use this account.

C. The account shall be supported by subsidiary accounts to show the types of transactions (i.e., accounts payables, loans, mortgages, etc.) for which interest expenses were incurred.

D. Table 17-12 illustrates the most common entries used for this account.

E. Sources for entries to this account include journal vouchers with supporting documentation showing the computation of interest expenses and disbursement vouchers.

170319 Benefit Program Expenses (Account 6400)

A. "Benefit Program Expenses" is used to record payments made to retired military personnel and their survivors. As a general rule, these payments are made from the military retirement fund. Chapter 14 of this Volume provides guidance on accounting for military retirement.

B. This account shall be used only to account for benefit payment made by the Military Retirement Trust Fund and the DoD Education Benefits Trust Fund.

C. Table 17-13 illustrates the most common entries used for this account.

170320 Cost of Goods Sold (Account 6500)

A. "Cost of Goods Sold" is used to record the cost of goods or services sold from stock, by Defense Business Operations Fund activities, or by other DoD activities authorized to provide services or material to other Federal Government Agencies, including other Components, or non-Federal Government organizations.

**ACCOUNTING ENTRIES FOR ACCOUNT 6330 -

B. This account shall be used by Defense Business Operations Fund activities. Appropriated fund activities shall also use this account to support reimbursable programs when necessary. Trust fund activities that need to account for products delivered to other organizations also may use this account.

C. Work-in-process or construction-in-progress accounts shall be used to accumulate the costs of goods or services in accordance with guidance contained in Chapters 4 and 6 of this Volume. The amounts recorded in these account series, as well as amounts recorded in applicable inventory accounts, shall be the basis for determining the amounts to be recorded as cost of goods sold.

D. Table 17-14 illustrates the most common entries used for this account.

E. Sources for entries to this account are journal vouchers with supporting worksheets or schedules showing the computation of cost of goods sold, shipping documents, and billing documents.

170321 Applied Overhead (Account 6600)

A. "Applied Overhead" is used to record the amount of overhead distributed to work-in-process or construction-in-progress

accounts. As such, this account shall be used by DoD revolving fund activities, and other activities operating a substantial reimbursable program.

B. For guidance on the use of this account see Chapters 20 and 21 of this Volume.

170322 Other Expenses (Account 6900)

A. "Other Expenses" is used to record those expenses that cannot be classified to a specific expense account. DoD Components shall not use this account without the approval of the DFAS.

1704 ACCOUNTING FOR MISCELLANEOUS ITEMS

170401 "Miscellaneous Items" consists of those items that are not a normal part of day-to-day operations of DoD Components. The categories under this heading, with the exception of prior-period adjustments, are adjustments to current period operations.

170402 Seven broad categories are included in this grouping: ordinary gains and losses, extraordinary items, prior-period adjustments, distributions of income, dividends, and changes in actuarial liabilities. The following paragraphs discuss the accounts within each of these categories.

**ACCOUNTING ENTRIES FOR ACCOUNT 6500 -

TABLE 17-14

170403 Gains (Account 7100)

A. "Gains" is a control account to report gains on the disposal of DoD assets. The account is a summary account used for financial reporting purposes. No entries are made to this account.

1. This account shall be used by all DoD activities.

B. There are two subsidiary accounts under this control account; "Gains on Disposition of Assets," and "Other Gains." "Other Gains" consists of inventory, investment, and other miscellaneous gains.

170404 Gains on Disposition of Assets (Account 7110)

A. "Gains on Disposition of Assets" is used to record the gains resulting from the sale of DoD property. This gain is determined after considering acquisition cost, any accumulated depreciation, and any costs associated with the disposition.

B. This account shall be used by all DoD activities authorized to dispose of DoD property.

C. Table 17-15 illustrates the most common entries used for this account.

D. Sources for entries to this account include property disposal reports and cash receipt documents.

170405 Other Gains (Account 7190)

A. "Other Gains" is a control account used for financial reporting purposes. No entries are posted to this account.

170406 Inventory Gains (Account 7191)

A. "Inventory Gains" is used to record gains in inventory resulting from identifying assets not previously recorded. Such gains are generally identified as a result of taking physical inventories. They may also result from price adjustments.

B. Identification of such gains indicates a need to review existing internal controls over the receipt and recording of inventory transactions.

C. This account shall be used only by Defense Business Operations Fund activities within the Supply Management business area and the Defense Commissary Agency.

D. Volume 11B of this Regulation provides a fuller description of this account.

170409 Losses (Account 7200)

A. "Losses" is a summary control account used for financial reporting purposes only.

B. This account shall be used by all DoD activities. Revolving fund activities may use this account to accumulate losses. Trust fund activities that need to account for such losses also may use this account.

C. No transactions are posted to this account.

170410 Losses on Disposition of Assets (Account 7210)

A. "Losses on Disposition of Assets" is used to record the loss incurred on the disposition of DoD-owned assets. Such losses can result from the sale or destruction of assets.

B. This account ordinarily shall be used only by DoD activities authorized to dispose of DoD property. However, any DoD Component having control over personal and real property may incur such losses due to events beyond their control. This account shall be used to record such losses.

C. Table 17-18 illustrates the most common entries used for this account.

D. Sources for entries to this account include collection documents, authorizations to dispose of assets, journal vouchers with supporting worksheets showing the loss computation, and reports of survey.

170411 Other Losses (Account 7290)

A. "Other Losses" is a summary account used for financial reporting purposes. No transactions shall be posted to this account.

B. This account shall be used by all DoD activities.

170412 Inventory Losses or Adjustments (Account 7291)

A. "Inventory Losses or Adjustments" is used to record losses in inventory resulting from physical inventories or discrepancies. Losses from physical inventories are those that result from shortages discovered when physical inventories are taken and reconciled with the inventory accounts. Discrepancies are inventory losses occurring during operations through shrinkage, spoilage and deterioration, etc. Price adjustments reflecting a lower standard price also are recorded in this account.

B. This account shall be used only by Defense Business Operations Fund activities within the Supply Management business area and the Defense Commissary Agency.

C. Identification of such losses, particularly those identified as a result of physical inventories and theft, indicate a need to review internal controls over inventory. See Chapter 4 of this Volume for additional guidance on conducting physical inventories and conducting reports of survey.

D. Volume II B of this Regulation provides a fuller discussion of this account.

E. Sources for entries to this account include journal vouchers with supporting documentation showing the basis of adjustments, and reports of survey.

170413 Investment Losses (Account 7292)

A. "Investment Losses" is used to record losses realized by DoD Components on the sale or redemption of investment; (including securities).

B. This account shall be used by those DoD activities responsible for administering trust and retirement funds.

C. Table 17-19 illustrates the most common entries used for this account.

D. Sources for entries to this account include journal vouchers with worksheets computing the loss realized, and collection vouchers.

170414 Other Miscellaneous Losses (Account 7293)

A. "Other Miscellaneous Losses" is used to record those losses that are not classifiable to specific loss accounts.

B. This account shall be used by all DoD activities.

C. Table 17-20 illustrates the most common entries used for this account.

D. Sources for entries to this account include journal vouchers with worksheets computing the loss realized, and reports of survey.

170415 Extraordinary Items (Account 7300)

A. "Extraordinary Items" is used to record costs or income so unusual in type or amount as to be accorded special treatment in the accounts or to be accorded separate disclosure in financial statements. Examples include earthquakes, hurricanes, fires and other natural disasters.

B. This account shall be used with the approval of the Office of the Deputy Under Secretary of Defense (Comptroller/Financial Management) /Deputy Chief Financial Officer.

C. Table 17-21 illustrates the most common entries used for this account.

**170416 Prior Period Adjustments
(Account 7400)**

A. "Prior Period Adjustments" is used to record those transactions that relate to prior periods. The transactions may be either gains or losses; income or expenses.

B. This account shall be used by all DoD activities.

C. Table 17-22 illustrates the most common entries used for this account.

D. Sources for entries to this account include journal vouchers with worksheets supporting the computation of the adjustment amount.

**170417 Distribution of Income - Dividend
(Account 7500)**

A. "Distribution of Income - Dividend" is used to record income distributions resulting from operations or interest on investments.

B. This account normally shall not be used by DoD Components. Should the situation arise requiring such distributions, authorization to use this account should be obtained from the Office of the Deputy Under Secretary of Defense (Comptroller/Financial Management) /Deputy Chief Financial Officer.

**170418 Changes in Actuarial Liability
(Account 7600)**

A. "Changes in Actuarial Liability" is used to record increases or decreases in liabilities determined on an actuarial basis. For the Department of Defense, this applies primarily to the military retirement fund.

CHAPTER 18

★ REVENUES, OTHER FINANCING SOURCES, AND GAINS1801 GENERAL

★ 180101. Purpose. This chapter sets forth the accounting policy to be used to account for revenues, other financing sources, and gains.

★ 180102. Overview. For the purposes of this chapter, revenues are defined as inflows of resources that the Government demands, earns, or receives by donation. Revenue comes from two sources: exchange transactions and nonexchange transactions. Other financing sources result from the use of appropriated funds, the receipt of transfers, and the recording of imputed financing. Exchange revenues arise when a government entity provides goods and services to the public or to another government entity for a price, or more specifically, the income resulting from completing customer orders. Nonexchange revenues arise primarily from the exercise of the government's power to demand payments from the public, such as taxes, duties, fines, and penalties. Nonexchange revenue also includes donations. For all activities, income includes interest and dividends earned that are credited to the account financing current operations.

★1802 ACCOUNTING POLICY FOR REVENUES, OTHER FINANCING SOURCES, AND GAINS

★ 180201. Revenue Recognition. Revenues shall be recognized when something of value is provided to the public or another government entity at a price; that is, when the customers accounting entity acknowledges a claim against its resources, or the performing accounting entity has an enforceable claim.

★ A. Exchange Revenue. Exchange revenue and gains are inflows of resources to a government entity that the entity has earned. They arise from exchange transactions, which occur when each party to the transaction sacrifices value and receives value in return. That is, exchange revenue arises when a government entity provides something of value to the public or another government entity at a price.

★ 1. Revenue from exchange transactions should be recognized when goods or services are provided to the public or another government entity at a price.

★ 2. Revenue from specific types of exchange transactions should be recognized as follows:

★ a. When services are provided to the public or another government entity (except for specific services produced to order under a contract), revenue should be recognized when the services are performed.

★ b. When specific goods are made to order under a contract (either short or long term), or specific services are produced to order under a contract (either short or long term), revenue should be recognized monthly based on the ratio that the costs incurred to date on that order bear to the total costs estimated to be incurred on the order when it is completed. If a loss is probable (more likely than not), revenue should continue to be recognized in proportion to the estimated total cost and costs should continue to be recognized when goods and services are acquired to fulfill the contract. Thus, the loss should be recognized in proportion to total cost over the life of the contract.

★ c. When goods are kept in inventory so that they are available to customers when ordered, revenue should be recognized when the goods are issued to the customer.

★ d. When services are rendered continuously over time or the right to use an asset extends continuously over time, revenue should be recognized in proportion to costs incurred or the use of the asset, as appropriate.

★ e. When an asset other than inventory is sold, any gain (or loss) shall be recognized when the asset is delivered to the purchaser.

★ 3. Interest on Treasury Securities held by Trust Funds and Special Funds. The source of balances for some trust funds and special funds may not be predominantly nonexchange revenue. For example, the main source of balances for two major trust funds, the Civil Service Retirement and Disability fund and the Department of Defense (DoD) Military Retirement Trust Fund, consists of exchange revenue and other financing sources. In such exceptional cases, the interest should be classified in the same way as the predominant source of funds, as exchange revenue.

★ B. Nonexchange Revenue. Nonexchange revenues are inflows of resources that the government demands or receives by donation. Such revenue should be recognized when a specifically identifiable, legally enforceable claim to resources arises, to the extent that collection is probable (more likely than not) and the amount is reasonably estimable. Within the Department, nonexchange revenues consist primarily of donations, i.e., voluntary gifts of resources to a government entity by a nonfederal entity. Donations may be financial resources, such as cash or securities, or nonfinancial resources such as land or buildings. Within the DoD, revenue arising from donations should be recognized for those inflows of resources which meet recognition criteria for assets and should be measured at the estimated fair market value of the contribution. In cases of donation of assets which will be classified as National Defense property, plant, and equipment (PP&E), heritage assets, or stewardship land, since such PP&E is expensed if purchased, no amount is recognized if it is received as a donation. Correspondingly, no revenue is recognized for such donations.

★ C. Other Financing Sources. Other financing sources provide inflows of resources that increase results of operations during the reporting period and include appropriations used, transfers of assets from other government entities, and financing imputed

with respect to any cost subsidies. Financing outflows may result from transfers of the reporting entity's assets to other government entities or from exchange revenues earned by the entity but required to be transferred to the General Fund or another government entity. Unexpended appropriations are recognized separately in determining net position but are not financing sources until used.

★ 1. Appropriations, until used, are not a financing source. They should be recognized in capital as "unexpended appropriations" (and among assets as "funds with Treasury") when made available for apportionment even if the amount has not been fully apportioned. Unexpended appropriations should be reduced for appropriations used and adjusted for other changes in budgetary resources, such as rescissions and transfers. The net increase or decrease in unexpended appropriations for the period should be recognized as a change in net position of the entity. When used, appropriations should be recognized as a financing source in determining net results of operations. Appropriations are used in operations when goods and services are received or benefits and grants are provided. Goods and services (including amounts capitalized) are considered received when a liability is established. Benefits are considered to be provided when the related liability is established. Grants are considered to be provided when grantees meet the requirements that allow them to use the grants.

★ 2. Imputed financing. Government entities often receive goods and services from other government entities without reimbursing the providing entity for all the related costs. In addition, government entities often incur costs, such as for pensions, that are paid in total or in part by other entities. These constitute subsidized costs to be recognized by the receiving entity to the extent required by other chapters in this Volume. An imputed financing source should be recognized equal to the imputed cost. This offsets any effect of imputed cost on net results of operations for the period. Within the DoD, imputed costs refer to military personnel costs, pensions, other retirement benefits, other postemployment benefits, and environmental cleanup costs not reimbursed to the entity administering the fund when the administering fund is outside the DoD reporting entity. The DoD reporting entities are identified in Volume 6 of this Regulation.

★ 3. Transfers. An intragovernmental transfer of cash or of another capitalized asset without reimbursement changes the resources available to both the receiving entity and the transferring entity. The receiving entity should recognize a transfer-in as an additional financing source in its result of operations for the period. Similarly, the transferring entity should recognize the transfer-out as a decrease in its result of operations. The value recorded should be the transferring entity's book value of the asset. If the receiving entity does not know the book value, the asset should be recorded at its estimated fair value as of the date of transfer.

★ a. The PP&E that is expensed (i.e., stewardship PP&E) may be transferred from one government entity or DoD Component to another. If the asset was classified as stewardship PP&E in its entirety by both the transferring entity and the recipient entity, the transfer does not affect the net cost of operations or net position of either entity and, therefore, it is not a revenue, a gain or loss, or other financing source.

★ b. However, if the asset that is transferred was classified as general PP&E for the transferring entity but stewardship PP&E for the recipient entity, it is recognized as a transfer-out (a negative other financing source) of capitalized assets by the transferring entity. If the asset that is transferred was classified as stewardship PP&E for the transferring entity but general PP&E for the recipient entity, it is recognized as a transfer-in (an other financing source) of capitalized assets by the recipient entity.

★ D. Gains. When a transaction with the public or another government entity at a price is unusual or nonrecurring, a gain should be recognized rather than revenue so as to differentiate such transactions. Gains result from the sale, exchange, trade or disposition of government assets (with the exception of inventory). As a general rule, any difference between the sales proceeds in excess of the book value of the assets is recognized as a gain when the asset is sold. This general rule applies to the sale of PP&E; receivables; investments; and other assets where the selling entity is entitled to retain the proceeds of the sale. In addition, the distinction between revenues and gains is a matter of classification in the general ledger accounts and their presentation in financial statements. Revenues are commonly reported at their gross amount while gains are shown net of related book value.

★ 180202. Revenue Measurement.

★ A. Exchange Revenue. The measurement basis for revenue from exchange transactions should be the actual price that is received or receivable under the established pricing arrangements.

★ B. Nonexchange Revenue. Nonexchange revenue should be measured by the collecting entities, but should be recognized by the entities legally entitled to the revenue (the recipient entities). Revenue arising from donations should be recognized for those inflows of resources which meet recognition criteria for assets and should be measured at the estimated fair value of the contribution.

★1803 PRESENTATION IN FINANCIAL STATEMENTS

★ 180301. Exchange Revenue. Exchange revenue should be recognized in determining the net cost of operations on the reporting entity's "Statement of Net Costs" during the period. The exchange revenue should be recognized regardless of whether the entity retains the revenue for its own use or transfers it to other entities. The components of the net cost calculation should separately include the gross cost of providing goods or services that earned exchange revenue less the exchange revenue earned, and the resulting difference (reimbursable program). The components of net cost also should include separately the gross cost of providing goods, services, benefit payments, or grants that did not earn exchange revenue (direct program).

★ 180302. Nonexchange Revenue. Nonexchange revenue should be recognized in determining the entity's operating results on the "Statement of Changes in Net Position" during the reporting period.

★ 180303. Other Financing Sources. Other financing sources should be recognized in determining the entity's operating results on the "Statement of Changes in Net Position" during the reporting period.

180304. Revenues shall be recorded in the financial records, collected promptly, and deposited in the appropriate Treasury account. Amounts received in advance of performance, however, shall be accounted for as unearned revenues until performance is accomplished in accordance with Chapter 13 of this Volume.

★ 180305. Revenues shall be classified according to the type of revenues earned; exchange, nonexchange, and other financing sources.

180306. Revenues from Foreign Military Sales (FMS) transactions shall be handled in accordance with FMS accounting procedures in Volume 15 of this Regulation.

180307. When revenues are generated by providing goods and services, the cost of the goods and services provided shall be recorded as a cost of goods sold. Use of the cost of goods sold account is discussed in Chapter 17 of this Volume.

180308. When appropriated funds furnish goods and services on a reimbursable basis and the amounts collected are returned to miscellaneous receipts accounts (unless specific legal authority exists to retain such collections), the collections shall be treated as a transfer out to other government agencies. The expenses incurred in providing the good or service shall be recorded in the appropriate expense accounts and shall not be reduced even though the collection is deposited to miscellaneous receipts.

1804 ACCOUNTING FOR REVENUES AND FINANCING SOURCES (ACCOUNT 5000)

180401. This section contains the procedures for recording revenues realized by DoD Components.

★ A. The transactions discussed frequently will require a compound entry; that is, entries must be made in both the proprietary accounts and the budgetary accounts. Entries to these proprietary accounts (5000 series) normally require compound entries to budgetary accounts in the 4000 series of accounts. Those budgetary entries are shown, where applicable.

★ B. Additional information on budgetary accounts is not covered in this chapter but are included in Volume 3, "Budget Execution – Availability and Use of Budgetary Resources," to this Regulation.

★ 180402. Accounting Entries.

★ A. Exchange Revenues. Revenues earned are amounts earned and collected for property sold or services furnished either to the public or another federal accounting entity.

Generally, exchange revenues earned shall recover the cost elements for goods or services provided, however, other billing prices may be established when specifically authorized by a DoD issuance (e.g., directive or instruction). Exchange revenues shall be accounted for separately by the accounting entity having responsibility for collection. Appropriate billing documents indicating the specific property delivered or services rendered, quantities, dollar amounts, and reference to each customer order shall be maintained.

★ 1. Revenue From Goods Sold (Account 5100). “Revenue from Goods Sold” is used to record the value of the selling price of inventory billed to DoD Components. When goods are kept in inventory so that they are available to customers when ordered, revenue should be recognized in the same accounting period that the goods are delivered to the customer. Generally, it is at the point of sale that compound entries must be made to record the performance and earnings in both the proprietary (asset, liability, and equity accounts) and the budgetary accounts. Performers (DoD activities providing goods and/or services at cost) include Defense Working Capital Fund (DWCF) activities, revolving funds within the Military Department reporting entities, revolving funds within the “Other Defense Organizations” reporting entity, and the U.S. Army Corps of Engineers. Customers of the Department include any DoD Component, organization, office or other element; non-DoD federal government agencies; others officially representing the federal government; and members of the public (as specified by law). Customer orders (funded requests for goods and services) provide budgetary resources to finance reimbursable operations, consequently, customer orders must be obligations of a federal government activity unless otherwise specified by law. Each party receives and sacrifices something of value. Exchange revenues are recorded through the following entry:

Dr	6500	Cost of Goods Sold
	Cr	1520 Inventory, Net

and

Dr	1310	Accounts Receivable
	Cr	5100 Revenue From Goods Sold

and

Dr	4251	Reimbursements and Other Income Earned - Receivable
	Cr	4221 Unfilled Customer Orders Without Advance

★ 2. Revenue From Services Provided (Account 5200). “Revenue from Services Provided” is used to record revenue earned by revolving fund activities from the sale of services, e.g., including sale of power, transportation. Generally, it is at the point of sale that compound entries must be made to record the performance and earnings in both the proprietary (asset, liability, and equity accounts) and the budgetary accounts. When services are provided to the public or another government entity, revenue should be recognized in the same accounting period that the services are performed. Performers include DWCF activities, revolving funds

within the Military Department reporting entities, revolving funds within the “Other Defense Organizations” reporting entity, and the U.S. Army Corps of Engineers. Customers of the Department include any DoD Component, organization, office or other element; non-DoD federal government agencies others officially representing the federal government; and members of the public (as specified by law). Customer orders (funded requests for goods and services) provide budgetary resources to finance reimbursable operations, consequently, customer orders must be obligations of a federal government activity unless otherwise specified by law. Each party receives and sacrifices something of value. The proceeds are an exchange revenue.

★ a. Sale of services by Industrial Type Operations. Below is an entry to record the performance of work or provision of services and associated cost of the goods sold. Industrial-type operations, primarily depot maintenance activities, routinely perform tasks that take more than a month and transfer the expense to a work in process account so that costs may be matched to revenue upon completion of the task. A typical accounting entry to record the completion of a task previously recorded in work in process is:

Dr	6500	Cost of Goods Sold
	Cr	1526 Inventory - Work in Process

and

Dr	1310	Accounts Receivable
	Cr	5200 Revenue From Services Provided

and

Dr	4251	Reimbursements and Other Income Earned - Receivable
	Cr	4221 Unfilled Customer Orders Without Advance

★ b. Sale of Services by Other Revolving Fund Activities. Some revolving fund activities, primarily those involved in the provision of service-type operations, do not transfer the expense to a work in process account but bill customers based upon a predetermined rate at month or period end. A typical entry to record the recognition or revenue for those activities is:

Dr	1310	Accounts Receivable
	Cr	5200 Revenue From Services provided

and

Dr	4251	Reimbursements and Other Income Earned - Receivable
	Cr	4221 Unfilled Customer Orders Without Advance

★ 3. Interest Revenue (Account 5310). Represents revenue received by DoD Components that administer retirement plans, education benefit plans, insurance plans, and

other annuity programs that invest in U.S. Treasury securities. Interest earned represents interest on invested funds which were derived primarily from exchange transactions which should be classified in the same manner as the predominant source of the invested balances. For example, invested balances for the DoD Military Retirement Trust Fund are predominantly derived from exchange revenue and the interest earned on those balances should be classified as exchange revenue. The interest received should be deducted from gross cost in determining the net cost of operations on the “Statement of Net Costs” (in contrast, interest earned from funds primarily derived from nonexchange sources should be classified as nonexchange revenue (shown below) and be shown on the “Statement of Changes in Net Position”).

Dr	1340	Interest, Penalty, and Administrative Fees Receivable
	Cr	5310 Interest Revenue

★ 4. Benefit Program Revenue (Account 5400). Represents revenue received by DoD Components that administer retirement plans, insurance plans, and other annuity programs. Employees of the federal government provide service to their employer in exchange for compensation, of which some is received currently (the salary); and some is deferred (pensions, retirement health benefits, and other retirement benefits). The financing of these benefits may include contributions paid by the employer entity to the retirement fund and is an inflow of resources to the retirement fund as part of this exchange transaction. It is a payment by the employer entity in exchange for the future provision of a pension or other retirement benefit to its employees. Therefore, it is an exchange revenue of the entity that administers the retirement plan and, thus, is an offset to that entity’s gross cost in calculating its net cost of operations.

Dr	1310	Accounts Receivable
	Cr	5400 Benefit Program Revenue

★ 5. Insurance and Guarantee Premium Revenue (Account 5500). Represents Revenue earned by DoD Components that administer insurance plans and guarantee programs. For example, the U.S. Army Corps of Engineers is self-insured and collects premiums for insurance on revolving fund assets. The premiums are recorded in this category of exchange revenue and any interest earned from this exchange revenue is categorized as exchange revenue under Interest Revenue, above.

Dr	1010	Fund Balance With Treasury
	Cr	5500 Insurance and Guarantee Premium Revenue

★ 6. Other Revenue (Account 5900). Within the DoD, other revenue represents exchange transactions generated by appropriated fund activities in the sale of goods and services and trust fund/special fund activities (other than a revolving fund) through the receipt of funds for a specific purpose.

★ a. Appropriated Fund Activities. The cost of providing goods or services is defrayed in whole or in part by selling the goods or services provided. Performers

★ 1. Donated Revenue (Accounts 5600 and 5610). Within the DoD, revenue arising from donations should be recognized for those inflows of resources which meet recognition criteria for assets and should be measured at the estimated fair value of the contribution. Donations may be financial resources, such as cash or securities, or nonfinancial resources such as land or buildings and are recorded as in the following examples:

★ a. Donated Revenue - Financial Resources (Account 5600). Donations of financial resources consist mainly of cash and securities and should be recorded in the following manner:

Dr	1010	Fund Balance With Treasury
	Cr	5600 Donated Revenue - Financial Resources

(for cash and equivalent monetary items received from contributors)

and/or

Dr	1610	Investment in U.S. Government Securities Issued by Public Debt
Dr	1620	Investments in Securities Other than Public Debt Securities
	Cr	5600 Donated Revenue - Financial Resources

(to record securities received as donations from contributors)

★ b. Donated Revenue - Nonfinancial Resources (Account 5610). Donations of nonfinancial resources consist mainly of land, buildings or other assets and their fair market value should be recorded in the following manner:

Dr	1700	General Property, Plant and Equipment, Net
		or
Dr	1900	Other Assets, Net
	Cr	5610 Donated Revenue - Nonfinancial Resources

(to record land, buildings and other assets received as donations from contributors)

★ 2. Interest Revenue (Account 5310). Represents revenue received by DoD Components that administer trust and deposit funds that invest in U.S. Treasury securities. Interest earned represents interest on invested funds which were derived primarily from nonexchange transactions which should be classified in the same manner as the predominant source of the invested balances. For example, invested balances for the U.S. Army Corps of Engineers' Harbor Maintenance Trust Fund are predominantly derived from nonexchange revenue and the interest earned on those balances should be classified as nonexchange revenue. The interest received should be classified as nonexchange revenue and be shown on the "Statement of Changes in Net Position."

Dr 1010 Fund Balance With Treasury
Cr 5310 Interest Revenue

3. Penalties and Fines Revenue (Account 5320). Accounting for receivables shall include provisions for accruing interest, penalty, and administrative charges on delinquent accounts from the public (excluding federal agencies, nonappropriated fund activities, state and local governments). The DoD activities holding delinquent accounts receivable are to accrue and collect interest, penalty, and administrative charges for deposit directly to the applicable Treasury receipt accounts. The accrual of interest, penalty, and administrative charges are nonentity transactions classified as nonexchange revenue. The accrual involves a compound entry to recognize the revenue and an offsetting entry to recognize the custodial transaction. The Penalties and Fines Revenue (Credit balance) is offset by the Collections for Others (debit balance), shown in subparagraph 5, below, account on the “Statement of Changes in Net Position.”

Dr 1340 Interest, Penalty, and Administrative Fees Receivable
Cr 5320 Penalties and Fines Revenue

4. Collections for Others (Account 5990). This is a offset to account 5320, Penalties and Fines Revenue which must be made when the posting to account 5320 is made, as shown above. Postings to this account are used to record a liability to Treasury for fines, penalties, and administrative charges assessed on overdue accounts receivable amounts collected on another entity’s behalf.

Dr 5990 Collections for Others
Cr 2400 Liability for Deposit Funds and Suspense Accounts

★ C. Other Financing Sources. Financing sources, other than exchange and nonexchange revenues, provide inflows of resources that increase results of operations during the reporting period and include appropriations used, transfers of assets from other government entities, and financing imputed with respect to any cost subsidies. Financing outflows may result from transfers of the reporting entity’s assets to other government entities or from exchange revenues earned by the entity but required to be transferred to the General Fund or another government entity. Unexpended appropriations are recognized separately in determining net position but are not financing sources until used. Revenues from other financing sources should be shown on the “Statement of Changes in Net Position.”

★ 1. Appropriations Used (Account 5700). Appropriations are used in operations when goods and services are received or benefits and grants are provided. Goods and services (including amounts capitalized as well as the exchange of cash for another asset) are considered received when a liability is established which is accompanied by an entry to Expended Authority - Paid or Unpaid. Benefits are considered to be provided when the related liability is established. Grants are considered to be provided when grantees meet the requirements that allow them to use the grants. Appropriations should be recognized as a

financing source in determining net results of operations. The following entry illustrates use of this account:

Dr	6100	Operating Expenses/Program Costs
Dr	1521	Inventory Purchased for Resale
Dr	1750	Equipment
Cr	2110	Accounts Payable

and

Dr	3100	Unexpended Appropriations
Cr	5700	Appropriations Used

and

Dr	4801	Undelivered Orders - Unpaid
Cr	4901	Expended Authority - Unpaid

★ 2. Transfers (Accounts 5720 and 5730). The following accounts are used to record the transfers of cash or capitalized assets between DoD Components without the receipt of a direct appropriation or transfer document being received from the Office of Management and Budget (OMB). The receiving entity should recognize a transfer-in as an additional financing source in its result of operations for the period. Similarly, the transferring entity should recognize the transfer out as a decrease in its result of operations. Transfers do not include Stewardship PP&E previously expensed by the transferring activity which will continue to be used as Stewardship PP&E by the receiving activity. In such cases, the movement of property accountability for stewardship PP&E does not affect the results of operations for either the losing or gaining entity.

★ a. Financing Sources Transferred In Without Reimbursement (Account 5720). Transfers in from others is used to record cash or the net book value, or fair market value if net book value is unknown, of property transferred in from another federal or DoD activity without reimbursement. When assets transferred in have been subject to depreciation or amortization, the accumulated depreciation or amortization shall be transferred together with the acquisition value of the asset.

Dr	1010	Fund Balance With Treasury
		or
Dr	1750	Equipment
Cr	5720	Financing Sources Transferred In Without Reimbursement

★ b. Financing Sources Transferred Out Without Reimbursement (Account 5730). Transfers out to others is used to record cash or the net book value, or fair market value if net book value is unknown, of property transferred to another federal or DoD activity without reimbursement. When assets transferred in have been subject to

depreciation or amortization, the accumulated depreciation or amortization shall be transferred together with the acquisition value of the asset.

Dr	5730	Financing Sources Transferred Out Without Reimbursement
Cr	1010	Fund Balance With Treasury
		or
Cr	1750	Equipment

★ 3. Imputed Financing Sources (Account 5780). To record military personnel costs, pensions, other retirement benefits, other postemployment benefits, and environmental cleanup costs not reimbursed to the entity administering the fund when the administering fund is outside the DoD reporting entity. The DoD reporting entities are identified in Chapter 6, Volume 6, of this Regulation.

Dr	6730	Imputed Costs
Cr	5780	Imputed Financing Sources

★1805 ACCOUNTING FOR MISCELLANEOUS ITEMS

★ Miscellaneous items consists of those items that are not a normal part of day-to-day operations of DoD Components. The categories under this heading normally are adjustments to current period operations. The following paragraphs discuss the accounts within each of these categories.

★ 180501. Gains (Account 7100). “Gains” is a control account to report gains on the disposal of DoD assets. The account is a summary account used for financial reporting purposes. No entries are made to this account. There are two subsidiary accounts under this control account; “Gains on Disposition of Assets,” and “Other Gains.” “Other Gains” consists of inventory, investment, and other miscellaneous gains.

★ 180502. Gains on Disposition of Assets (Account 7110). This account is used to record the gains resulting from the sale of DoD PP&E. This gain is determined after considering acquisition cost, any accumulated depreciation, and any costs associated with the disposition. This account shall be used by all DoD activities authorized to dispose of DoD property. Sources for entries to this account include property disposal reports and cash receipt documents. The following entry illustrates the most common entries used for this account.

★	Dr	1739	Accumulated Depreciation on Buildings, Improvements, and Renovations
	Dr	1759	Accumulated Depreciation on Equipment
	Dr	1010	Fund Balance With Treasury
	Cr	1730	Buildings, Improvements, and Renovations
	Cr	1750	Equipment
	Cr	7110	Gains on Disposition of Assets

★ 180503. Other Gains (Account 7190). This account is used to record the gain on assets (other than PP&E) resulting from events other than disposition, such as investment gains and miscellaneous gains. Sources for entries to this account include journal vouchers supported by documentation computing the increased value of inventory and results of physical inventories, collection vouchers, and authorizations to dispose of DoD-held securities and DoD-owned assets.

★ A. Investment gains are recognized by DoD activities responsible for administering trust fund to record the gains realized by DoD Components on the sale or redemption of investments (including securities).

CHAPTER 19

COST IDENTIFICATION1901 GENERAL190101 Purpose

A. The 6000 series of the DoD Uniform Chart of Accounts provides for the identification of the annual cost to operate the Department of Defense. This chapter prescribes the basic standards for identifying costs incurred to accomplish a specific cost objective. Title 2 of the General Accounting Office (GAO) Policy and Procedures Manual For Guidance of Federal Agencies requires Federal Agencies to implement policy established by the Cost Accounting Standards Board (CASB) when a policy is not specifically covered in Title 2 and is applicable to agency operations. The next section identifies cost accounting policy governing the allocation of cost that are applicable to the Department of Defense. Policies that are applicable to cost accounting modules but that are contained in other chapters of this Regulation are identified in section 1903. of this chapter.

B. The objective of cost accounting is to accumulate and record all the elements of cost incurred to accomplish a cost objective; i.e., to carry on an activity or operations, or to complete a unit of work of a specific job. The cost objective must be discrete enough and described in writing to such a level of detail to form a basis to establish cost centers and output products. The bottom line is that the cost accountant must be able to translate the measurement requirements into terms of source documents, allocation techniques, and such other cost accounting techniques as may be required to meet the management requirement. Establishing a cost objective is necessarily a management decision and is essential to the accumulation or allocation of costs to a cost objective. There may be a series of intermediate cost objectives which, when combined, equal the final cost objective. For example, the final cost objective may be the cost to manufacture a truck; intermediate cost objectives might be the cost of the motor, body,

etc. Certain costs are classified and assigned directly as a direct cost to the cost objective being costed, while others are grouped as indirect costs for the subsequent allocation to the unit. The cost objective may vary from a large program or activity to a smaller specific cost objective, such as a work order, a manufactured product, or a part of a construction cost objective project. Management decides the cost objective for which cost is to be accumulated.

C. The cost identification techniques described in this chapter have a utility whenever management wants to measure productivity, determine the cost of a particular management objective, determine the cost to be billed to a customer, etc.

D. The cost of a product or service may be obtained either through establishing a formal cost accounting module or through the use of cost finding procedures. A formal cost accounting module should be established when management decides that such information must be continuously accumulated, recorded, and controlled by a formal cost accounting module. Cost finding procedures shall be designed to accomplish an end result that would approximate the results that would have been obtained if a formal cost accounting system was in operation. Therefore, the policy in this chapter shall be taken into consideration when cost finding procedures are established.

190102 Overview

A. A critical step in the cost identification process is establishment of the purpose for the cost accumulation. If the purpose is billing a customer, then reference should be made to Volume 11 for guidance on the cost elements that are reimbursable. If the purpose is to accumulate the total cost of performing an operation for the purpose of cost comparisons with industry, then all cost elements, including military labor, and other

unfunded costs should be accumulated. This means that when the full cost to the Federal Government is needed it may be necessary to add in costing rates prescribed by higher authority. For example, OMB uses an unfunded retirement rate for cost comparison purposes in OMB Circular No. A-76.

B. In any given year, the obligations and outlays incurred may be less than, equal to, or greater than the costs recognized for that period. The differences are due to such things as increases or decreases in inventories, undelivered orders, depreciation, amortization, or other changes in certain resources. The difference in concept lies in the distribution of these different measures (costs and obligations) over a period of time. Table 19-1, using the purchase of inventory materials, illustrates these timing differences. These stages can occur in a different sequence.

C. Cost accounting modules must be integrated with the overall accounting system,

and this is accomplished by having multiple cost elements related to one or more accounts in the general ledger. An organization operating a formal cost accounting module shall use Account 1581, "Work in Process-In-House," (WIP) or Account 1721, Construction in Progress-In-House, to control the cost accounting module. Accordingly, increases to the WIP accounts shall be offset by decreases to asset accounts (e.g., inventory held for sale) or increases to liability accounts (e.g., Accounts Payable). Upon completion of a customer's requirements, the decrease to or relief of the WIP account shall be offset by increasing some other Inventory (e.g., inventory held for sale) or the Cost of Goods Sold account. Cost accounting systems constitute a module of the general accounting system. An activity may subdivide the WIP control account in any manner that management decides is necessary to control the costs. Accordingly, the subdivisions could be by cost center or cost element.

<u>TRANSACTION STAGES</u>				
<u>TRANSACTION</u>	<u>WHEN ORDER IS PLACED</u>	<u>WHEN MATERIALS ARE RECEIVED</u>	<u>WHEN MATERIALS ARE USED</u>	<u>WHEN BILL IS PAID</u>
	<u>OBLIGATION</u>	<u>ACCRUED EXPENDITURE</u>	<u>COST OR EXPENSE</u>	<u>OUTLAY</u>
Order for materials is placed.	Obligation is recorded as an undelivered order and a decrease to the uncommitted/unobligated budgetary resources (see Volume 3).			

<u>TRANSACTION STAGES</u>				
<u>TRANSACTION</u>	<u>WHEN ORDER IS PLACED</u>	<u>WHEN MATERIALS ARE RECEIVED</u>	<u>WHEN MATERIALS ARE USED</u>	<u>WHEN BILL IS PAID</u>
	<u>OBLIGATION</u>	<u>ACCRUED EXPENDITURE</u>	<u>COST OR EXPENSE</u>	<u>OUTLAY</u>
Materials are received or constructively received.		This is recorded in the proprietary accounts as an account payable, and as an increase in the inventory accounts. It is recorded in the budgetary accounts as a decrease to undelivered orders and a increase to accrued expenditures unpaid. (see Volume 3 and Chapter 19 of this Volume).		
Materials are used or consumed.			Cost is recorded in the proprietary accounts as a decrease in inventory and a charge to the applicable expense account or work in process account (see Chapters 4 and 18 of this Volume).	

<u>TRANSACTION STAGES</u>				
<u>TRANSACTION</u>	<u>WHEN ORDER IS PLACED</u>	<u>WHEN MATERIALS ARE RECEIVED</u>	<u>WHEN MATERIALS ARE USED</u>	<u>WHEN BILL IS PAID</u>
	<u>OBLIGATION</u>	<u>ACCRUED EXPENDITURE</u>	<u>COST OR EXPENSE</u>	<u>OUTLAY</u>
Payment is made for the materials.				Outlay is recorded in the proprietary accounts as a reduction of accounts payable and a reduction to cash. In the budgetary accounts it is recorded as a decrease to accrued expenditures unpaid and an increase to accrued expenditures paid. (see Volume 3 and Chapter 2 of this Volume).

TABLE 19-1

1902 COST ACCOUNTING STANDARDS

Public Law 100-679 (41 U.S.C. 422) requires certain contractors and subcontractors to comply with Cost Accounting Standards. Appendix B, "Cost Accounting Preambles and regulations," to the Federal Acquisition Regulation contains a statement of the Cost Accounting standards. Additionally, the Cost Accounting Standards are codified in 48 Code of Federal Regulation (CFR), Chapter 99. Following is a brief explanation of the published Cost Accounting standards and is not intended to be used as a reference source.

190201 Consistency in Estimating, Accumulating and Reporting Costs (CASB Standard 401)

A. A DoD Component's practices used in estimating costs for proposed reimbursable orders shall be consistent with cost accounting practices used in accumulating and reporting actual costs. Consistency in applying cost accounting practices is necessary to assure that reimbursable orders are executed within the amounts obligated in the records of the ordering activity and to assure that comparable transactions are treated alike. With respect to individual jobs, the consistent application of cost

accounting practices facilitates the preparation of reliable cost estimates used in pricing work and their comparison with the costs of performance of the resulting job. Such comparisons provide one important basis for financial control over costs during job performance and aid in establishing accountability for performance in the manner agreed to by both parties. The comparisons also provide an improved basis for evaluating estimating capabilities.

B. The grouping of homogeneous costs and estimates prepared for proposed work purposes shall not be deemed an inconsistent application of the standard when actual costs are accumulated and reported in greater detail by the cost accounting module during job performance.

190202 Consistency in Allocating Costs Incurred for the Same Purpose (CASB Standard 402)

A. Each type of cost shall be allocated only once and on only one basis to any job or other cost objective. The criteria for determining the allocation of costs to a product, job, or other cost objective shall be the same for all similar objectives. Adherence to this standard is necessary to guard against the over charging of some cost objectives and to prevent double counting. Double counting occurs most commonly when cost items are allocated directly to a cost objective without eliminating like cost items from indirect cost pools that are allocated to that cost objective.

B. All costs incurred for the same purpose in like circumstances, are either direct costs only or indirect costs only with respect to final cost objectives. No final cost objective shall have allocated to it as an indirect cost any cost, if other costs incurred for the same purpose, in like circumstances, have been included as a direct cost of that or any other final cost objective. Further, no final cost objective shall have allocated to it as a direct cost any cost, if other costs incurred for the same purpose, in like circumstances, have been included in any indirect cost pool to be allocated to that or any other final cost objective.

190203 Allocation of Home Office (Headquarter's General and Administrative Expenses to Segments (CASB Standard 403))

A. General. The Department of Defense is organized into three primary organizational levels - Departmental, Intermediate, and Installation. This standard applies to general and administrative (G&A) expenses, not otherwise accumulated by the formal cost accounting module, that benefit or were incurred on behalf of an operation whose cost is being measured by a formal cost accounting module. For cost identification purposes, management shall identify the functional areas and related expenses incurred on behalf of, or for the benefit of another segment, that are necessary for allocation. These expenses shall be allocated to the benefiting or causing segments pursuant to consistently followed accounting practices.

1. Headquarters G&A expenses shall be allocated on the basis of the beneficial or causal relationship between supporting and receiving activities. Such expenses shall be allocated directly to segments to the maximum extent practical. Expenses not directly allocated, if significant in amount and in relation to total headquarters management expenses, shall be grouped in logical and homogeneous expense pools and allocated pursuant to paragraph 190203.C, below. Such allocations shall minimize to the extent practical the amount of expenses that may be categorized as residual (those of managing the organization as a whole). Residual expenses shall be allocated pursuant to paragraph 190203.D, below.

2. No segment shall have allocated to it as an indirect cost, either through a homogeneous expense pool or the residual expense pool, any cost, if other costs incurred for the same purpose have been allocated directly to that or any other segment.

B. Expense Grouping Requirements. Separate expense groupings shall ordinarily be required to implement this standard. The number of groupings shall depend primarily on the variety and significance of service and management functions performed. Ordinarily,

each service or management function shall be separately identified for allocation by means of an appropriate allocation technique. However, it is not necessary to identify and allocate different functions separately, if allocation in accordance with the relevant requirements of paragraph 190203.C, below, can be made using a common allocation base. For example, if the personnel department provides personnel services for some or all of the segments (a centralized service function), and also establishes personnel policies for the same segments (a staff management function), the expenses of both functions could be allocated over the same base, such as the number of personnel, and the separate functions do not have to be identified. Where the expense of a given function is to be allocated by means of a particular allocation base, all segments shall be included in the base unless:

1. Any excluded segment did not receive significant benefits from, or contribute significantly to, the cause of the expense to be allocated.

2. Any included segment did receive significant benefits from, or contribute significantly to, the cause of the expenses in question.

C. Homogeneous Expenses. The following paragraphs provide criteria for allocation of homogeneous groups of management expenses:

1. Centralized Service Functions. Centralized service functions performed by a staff office for its segments consist of specific functions which, but for the existence of a staff office, would be performed or acquired by some or all of the segments individually. Expenses of centralized service functions performed by a staff office for its segments shall be allocated to segments on the basis of the service furnished to or received by each segment. Examples include centrally performed personnel administration and centralized data processing.

- a. The allocation of centralized service functions shall be governed by a hierarchy of preferable allocation techniques that represent beneficial or causal relationships. The preferred representation of such relationships is a measure of the activity of the organization performing the function. Service functions are usually labor oriented, machine oriented, or space oriented. Measures of the activities of such functions can be expressed in terms of labor hours, machine hours, or square footage. Accordingly, costs of these functions shall be allocated by use of a rate, such as a rate per labor hour, rate per machine hour or cost per square foot, unless such measures are unavailable or impractical to ascertain. In these latter cases, the basis for allocation shall be a measurement of the output of the service function. Output is measured in terms of units of end product produced by the service function, for example, number of printed pages for a print shop, number of purchase orders processed by a purchasing department, number of hires by an employment office.

- b. Where neither activity nor output of the supporting function can be practically measured, a surrogate for the beneficial or causal relationship must be selected. Surrogates used to represent the relationship are generally measures of the activity of the segments receiving the service; for example, for personnel services reasonable surrogates would be number of personnel, labor hours, or labor dollars of the segments receiving the service. Any surrogate used should be a reasonable measure of the services received, and logically, should vary in proportion to the services received.

- c. Some typical centralized service function pools, together with illustrative allocation bases that could be used in appropriate circumstances are listed below. The selection of a base shall be governed by the beneficial or causal relationship criteria established in subparagraphs 190203.C.1.a and b, above.

<u>CENTRALIZED SERVICE FUNCTIONS</u>	<u>ILLUSTRATIVE ALLOCATION BASIS</u>
1. Personnel administration	1. Number of personnel, labor hours, payroll, number of personnel actions.
2. Data processing services	2. Machine usage or time, number of reports.
3. Centralized purchasing	3. Number of purchase orders, contracting value of purchases, number of items.
4. Centralized warehousing	4. Square footage, value of material, volume.
5. Transportation service	5. Actual or standard rate per hour, mile, passenger mile, or similar unit.
6. Central telephone service	6. Usage costs, number of instruments.

2. Staff Management of Certain Specific Activities of Segments. Staff management or policy guidance to segments is commonly provided in the overall direction or support of the performance of discrete segment activities such as personnel, production, and engineering (see paragraph 190206.D, below). The expenses incurred by a headquarters office for staff management or policy guidance functions that are significant in amount, and in relation to total staff management expenses, shall be allocated to

segments receiving more than a minimal benefit over a base, or bases, representative of the total specific activity being managed. Some typical pools, together with illustrative allocation bases, which could be used in appropriate circumstances are listed below. Other bases for allocating headquarters expenses to segments may be used if they are substantially in accordance with beneficial or causal relationships specified in subparagraph 190203.A.1, above, and the criteria in this paragraph.

<u>STAFF MANAGEMENT OF SPECIFIC ACTIVITIES</u>	<u>ILLUSTRATIVE ALLOCATION BASIS</u>
1. Personnel management	1. Number of personnel, labor hours, payroll, number of personnel actions.
2. Production policies (quality control, industrial engineering, production, scheduling, tooling, etc.)	2. Production cost input, production direct labor.
3. Engineering policies	3. Total engineering costs, engineering direct labor, number of drawings.
4. Material purchasing policies	4. Number of purchase orders, value of purchases.

3. Line Management of Particular Segments or Groups of Segments. Line management is considered to consist of management or supervision of a segment or group of segments as a whole. The expense of

line management shall be allocated only to the particular segment or group of segments that are being managed or supervised. If more than one segment is managed or supervised, the expense shall be allocated using a base or bases

representative of the total activity of such segments.

4. Central Payments or Accruals.

Central payments or accruals are those that, but for the existence of a number of segments, would be accrued or paid by the individual segments. Common examples include centrally paid or accrued pension costs, group insurance costs and payrolls paid by a headquarters on behalf of its segments. Central payments or accruals that are made by a support office on behalf of its segments shall be allocated directly to segments to the extent that all such payments or accruals

of a given type or class can be identified specifically with individual segments. Any such types of payment or accruals that cannot be identified specifically with individual segments shall be allocated to benefited segments using an allocation base representative of the factors on which the total payment is based. Some typical pools, together with illustrative allocation bases that could be used in appropriate circumstances, are listed below. Other bases may be used if they are substantially in accordance with beneficial or causal relationships specified in subparagraph, 190203.A.1, above, and the criteria in this paragraph.

<u>CENTRAL PAYMENTS OR ACCRUALS</u>	<u>ILLUSTRATIVE ALLOCATION BASIS</u>
1. Pension expenses	1. Payroll or other factor on which total payment is based.
2. Group insurance expenses	2. Payroll or other factor on which total payment is based.
3. Personnel unemployment and injury compensation expenses	3. State agency and Department of Labor notices of payment, billing, or other factor on which total payment is based.

D. Residual Expenses.

1. Residual expenses are expenses that are the result of managing the organization as a whole and are not identifiable with specific activities or segments. Residual expenses include functions such as exercising oversight, direction, and control of organizations through policy, program, resource, or providing technical, administrative, or logistic support essential to an operation. Typical residual expenses are those commonly performed by management headquarters and headquarters support activities, and any staffs that are not identifiable with specific activities of segments.

2. Residual expenses which are not identifiable with specific activities or segments, shall be allocated to all segments by means of a base representative of the total activity of such segments using the two factor formula described below. This formula takes into account two broad areas of management

concern, that is, the personnel of the organization and the capital invested in the organization. The percentage of the residual expenses to be allocated to any segment pursuant to the formula is the arithmetical average of the following two percentages for the same period:

a. The percentage of the segment's payroll dollars (Accounts 6111 and 6112) to the total payroll dollars of all segments.

b. The percentage of the average net book value of the sum of the segment's tangible capital assets (1700 and 1800 account series) plus inventories (1500 account series) to the total average net book value of such assets of all segments. Property held primarily for leasing to others shall be excluded from the computation. The average net book value shall be the average of the net book value at the beginning of the organization's fiscal year and the net book value at the end of the year.

190204 Accounting for Unallowable Costs (CASB Standard 405). An unallowable cost is a cost that should have been a direct charge to a customer. However, because of management error, a cost overrun occurred that the customer was unable to finance. Such costs cannot be included in billings to other activities, either as a direct charge or as part of an indirect charge. In the case of revolving funds the amount of such unallowable costs should be accumulated, and represents a reduction to the fund corpus. If the cost is material, a supplemental appropriation to replace working capital may be necessary.

190205 Cost Accounting Standard 405--Accounting for Unallowable Costs. An unallowable cost is any cost which, under the provisions of any pertinent law, regulation, or contract, cannot be included in prices, cost reimbursements or settlements. These costs, even though not normally charged as a reimbursable expense, shall nevertheless, if material and when directed by the Under Secretary of Defense (Comptroller), be accounted for as a cost of operations.

190206 Cost Accounting Period (CASB Standard 406)

A. DoD activities shall use the October 1 to September 30 fiscal year as the cost accounting period, except that:

1. The costs of an indirect function that exists for only a part of a cost accounting period may be allocated to cost objectives of that same part of the period if the cost is material in amount, accumulated in a separate indirect cost pool, and allocated on the basis of an appropriate direct measure of the activity or output of the function during that part of the period. For example, an organization whose cost accounting period is the fiscal year, installs a computer service center and begins operations on February 1. If the operating expense related to the new service center is expected to be material in amount, it shall be accumulated in a separate indirect cost pool, and shall be allocated to the benefiting cost objectives on the basis of measured usage. The total operating expenses of the computer service

center for the 8-month part of the cost accounting period may be allocated to the benefiting cost objectives of that same 8-month period.

2. A transitional cost accounting period shall be used whenever a change of fiscal year occurs.

B. An organization shall follow consistent practices in selecting the cost accounting period or periods in which any types of expense and any types of adjustment to expense (including prior period adjustments) are accumulated and allocated. The consistent practices requirement shall include appropriate practices for deferrals, accruals, and other adjustments to be used in identifying the cost accounting periods among which any types of expenses and any types of adjustments to expenses are distributed. If an expense, such as insurance or employee leave, is identified with a fixed, recurring, annual period that is different from the organization's cost accounting period, this standard permits continued use of that different period. Such expenses shall be distributed to cost accounting periods in accordance with the organization's established practices for accruals, deferrals, and other adjustments.

C. The same cost accounting period shall be used for accumulating costs in an indirect cost pool as for establishing its allocation base. Indirect cost allocation rates, based on estimates, that are used for the purpose of expediting the closing of jobs that are terminated or completed prior to the end of a cost accounting period need not be those finally determined for that cost accounting period. They shall, however, be developed to represent a full cost accounting period, except as provided in paragraph 190204.A, above.

190207 Use of Standard Costs for Direct Material and Direct Labor (CASB Standard 407)

A. An organization operating a formal cost accounting system may use standard costs for estimating, accumulating, and reporting costs of direct material and direct labor only when all of the following criteria are met:

1. Both standard and actual costs are entered into the books of account.

2. Standard costs are compared to actual costs at the end of each accounting period and a variance calculated.

3. Standard costs and related variances are appropriately accounted for at the level of the production unit.

4. Practices with respect to the setting and revising of standards, use of standard costs, and disposition of variances are stated in writing and are consistently followed.

B. An organization's written statement of practices with respect to standards shall include the bases and criteria (such as engineering studies, experience, or other supporting data) used in setting and revising standards; the period during which standards are to remain effective; the level (such as ideal or realistic) at which material quantity standards and labor time standards are set; and the conditions (such as those expected to prevail at the beginning of a period) that material price standards and labor rate standards are designed to reflect.

1. Where only either the material price or material quantity is set at standard, with the other component stated at actual, the result of the multiplication shall be treated as material cost at standard. Similarly, where only either the labor rate or labor time is set at standard, with the other component stated at actual, the result of the multiplication shall be treated as labor cost at standard.

2. A labor rate standard may be set to cover a category of direct labor only if the functions performed within that category are not materially disparate and the employees involved are interchangeable with respect to the functions performed.

3. A labor rate standard may be set to cover a group of direct labor workers who perform disparate functions only under either one of the following conditions:

a. When the group of workers all work in a single production unit yielding homogenous outputs (in this case, the same labor rate standard shall be applied to each worker in that group), or

b. When that group of workers, while performing their respective functions, forms an integral team (in this case, a labor rate standard shall be set for each integral team).

C. Material shall be recorded at acquisition price in the applicable cost accounts at the time of acquisition. Material price standards in the cost accounting module may be used and their related variances recognized at the time the material cost is allocated to production units.

D. Labor cost variances shall be recognized at the time labor cost is introduced into production units. Labor rate variances and labor time variances may be combined into one labor cost variance account. A separate labor cost variance shall be accumulated for each production unit.

E. An organization's established practice with respect to the disposition of variances accumulated by production unit shall be in accordance with one of the following subparagraphs:

1. Variances are allocated to cost objectives (including ending in-process inventory) at least annually. Where a variance related to material is allocated, the allocation shall be on the basis of the material cost at standard, or where outputs are homogenous, on the basis of units of output. Similarly, where a variance related to labor is allocated, the allocation shall be on the basis of the labor cost at standard or labor hours at standard, or where outputs are homogenous, on the basis of units of output.

2. Variances that are immaterial may be included in appropriate indirect cost pools for allocation to applicable cost objectives.

3. When a standard costing system is used by an appropriation account for the purpose of billings, it shall apply the variance to all billings. This procedure ensures that actual costs are fully recouped on a current basis. The variance shall not be carried forward to the next accounting period.

4. When this standard is used in a Defense Business Operations Fund, and the standard is a stabilized rate, any over or under applied variance recovery may be carried forward for recovery in the next year.

190208 Cost Accounting Standard 408 -- Accounting for Costs of Compensated Personal Absence.

A. The costs of compensated personal absence (illness, vacation, holidays, jury duty, military training or other absence for which compensation is paid directly to an employee) shall be assigned to the cost accounting period or periods in which the entitlement was earned.

B. The costs of compensated personal absence for an entire cost accounting period shall be allocated pro-rata on an annual basis among the final cost objectives of that period.

190209 Cost Accounting Standard 409 -- Depreciation of tangible Capital Assets

A. The depreciable cost of tangible capital asset (or group of assets) shall be assigned to cost accounting periods in accordance with the following criteria:

1. The depreciable cost of a tangible capital asset shall be its capitalized cost less its estimated residual value.

2. The estimated service life or a tangible capital asset (or group of assets) shall be used to determine the cost accounting periods to which the depreciable cost will be assigned.

B. The annual depreciation cost of a tangible capital asset (or group of assets) shall be allocated to cost objectives for which it provides service in accordance with the following criteria:

1. Depreciation costs may be charged as a direct cost only if depreciation costs of all like assets used for similar purposes are charged in the same manner.

2. Depreciation costs charged to service or general and administration cost centers shall be included in the allocated costs of those centers.

3. Depreciation costs of capital assets used within a production cost center but which are not charged directly to a cost objective shall be included as an indirect cost of that center.

190210 Allocation of Business Unit General and Administrative Expense to Final Cost Objectives (CASB Standard 410)

A. Business unit general and administrative (G&A) expenses shall be allocated to final cost objectives based on their beneficial or causal relationship. These expenses represent the cost of the management and administration of the business unit as a whole. The standard also provides criteria for the allocation of headquarters expenses received by a segment to the cost objectives of that segment. This standard shall increase the likelihood of achieving objectivity in the allocation of expenses to final cost objectives and comparability of cost data among business units in similar circumstances.

B. Business unit G&A expenses shall be grouped in a separate indirect cost pool that shall be allocated only to final cost objectives.

1. G&A expenses of a segment incurred by another segment shall be removed from the incurring segment's G&A expense pool. They shall be allocated to the segment for which the expenses were incurred on the basis of the beneficial or causal relationship between the expenses incurred and all benefiting or causing segments. If the expenses are incurred for two or more segments, they shall be allocated using an allocation base common to all such segments.

2. The G&A expense pool may be combined with other expenses for allocation to final cost objectives provided that:

a. The allocation base used for the combined pool is appropriate both for the allocation of the G&A expense pool under this standard and for the allocation of the other expenses.

b. Provision is made to identify the components and total of the G&A expense pool separately from the other expenses in the combined pool.

3. Expenses that are not G&A expenses and are insignificant in amount may be included in the G&A expense pool for allocation to final cost objectives.

C. The G&A expense pool of an business unit for a cost accounting period shall be allocated to final cost objectives of that cost accounting period by means of a cost input base representing the total activity of the business unit.

1. The base selected shall be the one that best represents the total activity of a typical cost accounting period and shall include all significant elements of that cost input that represent the total activity of the business unit. The base selected may be total cost input, value added cost input, or single element cost input. The determination of which cost input base best represents the total activity of an business unit must be judged on the basis of the circumstances of each organization unit.

a. A total cost input base is generally acceptable as an appropriate measure of the total activity of an business unit.

b. Value added cost input shall be used as an allocation base when inclusion of material and subcontract costs would significantly distort the allocation of the G&A expense pool in relation to the benefit received, and when costs other than direct labor are significant measures of total activity. A value added cost input base is total cost input less material and subcontract costs.

c. A single element cost input base, e.g., direct labor hours or direct labor dollars, that represent the total activity of an business unit may be used to allocate the G&A expense pool when it produces equitable results. A single element base may not produce equitable results when other measures of activity are also significant in relation to total activity. A single element base is inappropriate when it is an insignificant part of the total cost of some of the final cost objectives.

2. The cost input shall include those expenses that by operation of this standard are excluded from the G&A expense pool and are not part of a combined pool of G&A expenses and other expenses allocated using the same allocation base.

D. Headquarters expenses received by a segment shall be allocated to segment cost objectives as follows:

1. Expenses related to the management and administration of the receiving segment as a whole shall be included in the receiving segment's G&A expense pool.

2. Expenses related to the management and administration of specific activities of segments shall be allocated to the segment cost objectives in proportion to the beneficial or causal relationship between the cost objectives and the expenses, if such allocation is significant, in amount. When a beneficial or causal relationship for expenses is not identifiable with segment cost objectives, the expenses may be included in the G&A expense pool.

E. Any costs that do not satisfy the definition of G&A expense, but that have been classified by an business unit as G&A expenses, can remain in the G&A expense pool unless they can be allocated to business unit cost objectives on a beneficial or causal relationship that is best measured by a base other than a cost input base.

F. Where a segment performs headquarters functions and also performs as an operating segment having a responsibility for final cost objectives, the expense of the

headquarters functions shall be segregated. These expenses shall be allocated to all benefiting or causing segments, including the segment performing the headquarters functions, pursuant to written and consistently followed accounting practices for the allocation of headquarters expenses to segments.

G. For purposes of allocating the G&A expense pool, items produced or worked on for stock or product inventory shall be accounted for as final cost objectives as follows:

1. When items are produced or worked on for stock or product inventory in a given cost accounting period, the cost input to such items in that period shall be included only once in the computation of the G&A expense allocation base and in the computation of the G&A expense allocation rate for that period, and shall not be included in the computation of the base or rate for any other cost accounting period.

2. A portion of the G&A expense pool shall be allocated to items produced or worked on for stock or product inventory in the cost accounting period or periods in which such items are produced at the rates determined for such period.

190211 Accounting for Acquisition Costs of Material (CASB Standard 411)

A. An organization operating a formal cost accounting module shall have, and consistently apply, written statements of accounting procedures and practices for accumulating the costs of material and for allocating costs of material to cost objectives.

B. The cost of units of a category of material may be allocated directly to a cost objective provided the cost objective was specifically identified at the time of purchase or production of the units.

C. The cost of material that is used solely in performing indirect functions, or is not a significant element of production cost, whether or not incorporated in an end product, may be allocated to an indirect cost pool. When

significant, the cost of such indirect material not consumed in a cost accounting period shall be established as an asset at the end of the period by reducing the indirect cost pool by a corresponding amount.

D. Except as provided in paragraphs 190207.B and 190207.C, above, the cost of a category of material shall be accounted for in material inventory records.

1. Material cost shall be the acquisition cost as specified in chapter 4 of this Volume of a category of material, whether or not a material inventory record is used.

2. The purchase price of material shall be adjusted by extra charges incurred or discounts and credits earned. Such adjustments shall be charged or credited to the same cost objective as the purchase price of the material, except that when it is not practical to do so, the organization's policy may provide for the consistent inclusion of such charges or credits in an appropriate indirect cost pool.

E. In allocating to cost objectives the costs of a category of material issued from a DoD-owned material inventory, the costing method used shall be selected in accordance with chapter 4 of this Volume, and shall be used in a manner that results in systematic and rational costing of issues of material to cost objectives. The same costing method shall, within the same business unit, be used for similar categories of materials.

190212 Cost Accounting Standard 412 -- Composition and Measurement of Pension Cost. This standard does not apply to the Defense Business Operations Fund as it is not responsible for accounting for the pension cost of its employees.

190213 Cost Accounting Standard 413 -- Adjustment and Allocation of Pension Cost. This standard does not apply to the Defense Business Operations Fund as it is not responsible for accounting for the pension cost of its employees.

190214 Cost Accounting Standard 414 -- Cost of Money as an Element of the Cost of Facilities Capital. The cost of capital committed to facilities shall be charged by the Defense Business Operations Fund to non-Federal Government customers when authorized by regulations pertaining to those sales. Volume 11 provides instructions on the computation and application of interest on investment in assets.

190215 Accounting for the Cost of Deferred Compensation (CASB Standard 415)

A. Deferred compensation is a payment to be made by a component to compensate an employee in a future cost accounting period or periods for services rendered in one or more cost accounting periods prior to the date of the receipt of compensation by the employee.

B. The cost of all deferred compensation, except for annual leave, sick leave, and pension cost for which specific guidance is provided in paragraph 190211.C, below, shall be assigned to the cost accounting period in which the obligation to compensate the employee occurs. In the event no obligation is incurred prior to payment, the cost of deferred compensation shall be the amount paid and shall be assigned to the cost accounting period in which the payment is made.

C. The obligation for the cost of deferred compensation is deemed to have occurred when all of the following conditions have been met. However, for awards that require that the employee perform future service in order to receive the benefits, the obligation is deemed to have been incurred as the future service is performed for that part of the award attributable to such future service.

1. There is a requirement to make the future payments that cannot be unilaterally avoided.

2. The deferred compensation award is to be satisfied by a future payment of money.

3. The amount of the future payment can be measured with reasonable accuracy.

4. The recipient of the award is known.

5. If the terms of the award require that certain events must occur before an employee is entitled to receive the benefits, there is a reasonable probability that such events shall occur.

D. If the cost of deferred compensation can be estimated with reasonable accuracy on a group basis, including consideration of probable forfeitures, such estimate may be used rather than separate computations for each employee. The present value, of the future benefits, shall be used as the measurement of the amount of the cost of deferred compensation.

190216 Accounting for Insurance Costs (CASB Standard 416). The United States Government is a self-insuring entity. Consequently, the Cost Accounting Standard, Part 416, is not applicable.

190217 Cost Accounting Standard 417 -- Cost of Money as an Element of the Cost of Capital Assets Under Construction. The cost of money used to construct a capital asset shall not be capitalized as part of the cost of that asset unless loans were obtained by the Department of Defense specifically for the construction of those assets.

190218 Allocation of Direct and Indirect Costs (CASB Standard 418)

A. An business unit operating a formal cost accounting module shall have a written statement of accounting policies and practices for classifying costs as direct or indirect that shall be consistently applied.

1. In accounting for direct costs, an business unit shall use actual costs, except that:

a. Standard costs for material and labor may be used as provided in paragraph 190205, above.

b. An average cost or pre-established rate for labor may be used provided that:

(1) The functions performed are not materially disparate and employees involved are interchangeable with respect to the functions performed.

(2) The functions performed are materially disparate but the employees involved either all work in a single production unit yielding homogeneous outputs, or perform their respective functions as an integral team. Whenever average cost or pre-established rates for labor are used, the variances, if material, shall be disposed of at least annually by allocation to cost objectives in proportion to the costs previously allocated to these cost objectives.

(3) The level of compensation for the employees involved does not vary considerably.

2. Labor or material costs specifically identified with one of the particular cost objectives listed in subparagraph 190208.C.1.b, below, shall be accounted for as direct labor or direct material costs.

B. Indirect costs shall be accumulated in indirect cost pools that are homogeneous.

1. An indirect cost pool is homogeneous if each significant activity whose costs are included therein has the same or a similar beneficial or casual relationship to cost objectives as the other activities whose costs are included in the cost pool. It is also homogeneous if the allocation of the costs of the activities included in the cost pool result in an allocation to cost objectives that is not materially different from the allocation that would result if the costs of the activities were allocated separately.

2. An indirect cost pool is not homogenous if the costs of all significant activities in the cost pool do not have the same or a similar beneficial or causal relationship to cost objectives and, if the costs were allocated separately, the resulting allocation would be materially different. In determining whether amounts of costs are material or immaterial, the following criteria shall be considered where appropriate; no one criterion is necessarily determinative:

a. The absolute dollar amount involved. The larger the dollar amount, the more likely that it shall be material. Whether or not a dollar amount is large, and therefore material, depends on its relative weight. A cost amount might be material for a contract for the production of bolts, but the same cost amount could be immaterial for a contract for the production of a rocket motor.

b. The amount of job cost compared with the amount under consideration. The larger the proportion of the amount under consideration to job cost the more likely it is to be material.

c. The relationship between a cost item and a cost objective. Direct cost items, especially if the amounts are themselves part of a base for allocation of indirect cost, shall normally have more impact than the same amount of indirect costs.

d. The cumulative impact of individually immaterial items. It is appropriate to consider whether such impacts:

(1) Offset one another.

(2) Tend to be in the same direction and hence to accumulate into a material amount.

e. The cost of administrative processing of any adjustment modification. If the cost to process exceeds the amount to be adjusted, it is less likely the amount shall be material.

3. A homogeneous indirect cost pool shall include all indirect costs identified with the activity to which the pool relates.

C. Pooled costs shall be allocated to cost objectives in reasonable proportion to the beneficial or causal relationship of the pooled costs to cost objectives in accordance with the following criteria:

1. If a material amount of the costs included in a cost pool are costs of management or supervision of activities involving direct labor or direct material costs, resource consumption cannot be specifically identified with cost objectives. In that circumstance, a base shall be used that is representative of the activity being managed or supervised.

a. The base shall be determined by applying the following criteria. All significant elements of the selected base shall be included.

(1) A direct labor hour base or direct labor cost base shall be used, whichever in the aggregate is more likely to vary in proportion to the costs included in the cost pool being allocated, except that:

(2) A machine-hour base is appropriate if the costs in the cost pool are comprised predominately of facility-related costs, such as depreciation, maintenance, and utilities.

(3) A units-of-production base is appropriate if there is common production of comparable units.

(4) A material cost base is appropriate if the activity being managed or supervised is a material related activity.

b. Indirect cost pools that include material amounts of the costs of management or supervision of activities involving direct labor or direct material costs shall be allocated to:

(1) Final cost objectives.

(2) Goods produced for stock or product inventory.

(3) General research and development and bid and proposal projects when required to be specifically identified for cost accounting purposes.

(4) Cost centers used to accumulate costs identified with a process cost system (i.e., process cost centers).

(5) Goods or services produced or acquired for other segments of the organization and for other cost objectives of an business unit.

(6) Self-construction, fabrication, betterment, improvement, or installation of tangible capital assets.

2. If the cost pool does not contain a material amount of the costs of management or supervision of activities involving direct labor or direct material costs, resource consumption can be specifically identified with cost objectives. The pooled cost shall be allocated based on the specific identifiability of resource consumption with cost objectives by means of one of the following allocation bases: a resource consumption measure, an output measure, or a surrogate that is representative of resources consumed. The base shall be selected in accordance with the following criteria taking into consideration the individual circumstances:

a. The best representation of the beneficial or causal relationship between an indirect cost pool and the benefiting cost objectives is a measure of resource consumption of other activities of the indirect cost pool.

b. If consumption measures are unavailable or impractical to ascertain, the next best representation of the beneficial or causal relationship for allocation is a measure of the output of the activities of the indirect cost pool. Thus, the output is substituted for a direct measure of the consumption of resources. The use of the basic unit of output shall not reflect the proportional consumption of resources in

circumstances in which the level of resources consumption varies among the units of output produced. When a material difference results, either the output measure shall be modified or more than one output measure shall be used to reflect the resources consumed to perform the activity.

c. If neither resources consumed nor output of the activities can be measured practically, a surrogate that varies in proportion to the services received shall be used to measure the resources consumed. Generally, such surrogates measure the activity of the cost objectives receiving the service.

d. Allocation of indirect cost pools that benefit one another may be accomplished by use of the cross-allocation (reciprocal) method, the sequential method, or another method, the results of which approximate those achieved by either of the methods cited in this paragraph.

e. Where the activities represented by an indirect cost pool provide services to two or more cost objectives simultaneously, the cost of such services shall be prorated between or among the cost objectives in reasonable proportion to the beneficial or causal relationship between the services and the cost objectives.

D. Use of pre-established rates for indirect costs.

1. Pre-established rates, based on either forecasted actual or standard cost, may be used in allocating an indirect cost pool.

2. Pre-established rates shall reflect the costs and activities anticipated for the cost accounting period. Such pre-established rates shall be reviewed at least annually, and revised as necessary to reflect the anticipated conditions.

3. Where variances of a cost accounting period are material, these variances shall be disposed of by allocating them to cost objectives in proportion to the costs previously allocated to these cost objectives by use of the pre-established rates.

4. If pre-established rates are revised during a cost accounting period, and if the variances accumulated to the time of the revision are significant, the cost allocated to that time shall be adjusted to the amounts that would have been allocated using the revised pre-established rates.

E. To the extent that any cost allocations are required by the provisions of other Cost Accounting Standards, such allocations are not subject to the provisions of this standard.

F. This standard does not cover accounting for the costs of special facilities where such costs are accounted for in separate indirect cost pools.

190219 Cost Accounting Standard 419. There is no cost accounting standard 419.

190220 Cost Accounting Standard 420 -- Accounting for Independent Research and Development Costs and Bid and Proposal Costs

A. Independent research and development costs incurred in a cost accounting period shall not be assigned to any other cost accounting period except as may be permitted pursuant to other provisions of existing laws, regulations and other controlling factors.

B. Bid and proposal costs incurred in a cost accounting period shall not be assigned to any other cost accounting period.

CHAPTER 20

JOB ORDER COST ACCOUNTING2001 GENERAL200101 Purpose

A. The purpose of a job order cost accounting system is to assign and accumulate costs for each job, i.e., an order, a contract, a unit of production, or a batch. Job order costing should be used if the production or service is being performed to meet customer specifications or requirements, if different components are made for inventory, or projects are undertaken to construct real property. Job order costing allows more control, less estimation, and more direct and reliable allocation of costs.

B. The determination as to the need for a formal job order cost accounting module is necessarily a management decision. The decision to establish such a module should be based upon a recurring need for cost accounting information. This chapter discusses how to establish a job order cost accounting module, the type of source documents required, typical management reports produced by the module, and possible uses of the reports.

200102 Overview

A. A formal job order cost accounting module provides cost identification for determining the cost of accomplishing a specific task, such as the cost incurred to overhaul a truck, repair a roof, launch a test vehicle, perform an R&D project, or overhaul 100 generators. The decision to assign a job number to single or multiple units, or single or multiple tasks, depends upon the dollar value of the costs to be incurred, the location at which the task is to be performed, and the commonality of effort to be performed. For example, when tanks are being

overhauled, each tank may be assigned a job order number. However, when the job is to overhaul tank treads, hundreds of treads may be included in a single job order.

B. The management information provided by a job order cost accounting system is a tool that aids management in the guidance of activities and in the attainment of the objective of producing a maximum of goods and services at minimal costs. The formal cost accounting module is normally designed to accumulate those costs that are under the control of local management. Typically, management controls all costs that are funded by appropriations or funds provided to the accounting entity. These costs are referred to as funded costs. If a formal cost accounting module is to be used as a basis for billings to other Federal Agencies, or the public, provision must be made for the addition of unfunded costs such as military labor, items obtained from inventory on a free issue basis, and civilian retirement costs not financed by the employee or the Department of Defense.

2002 JOB ORDER COST ACCOUNTING SYSTEM

200201 The job order cost accounting system is subsidiary to, and must be integrated with, the general accounting system. For example, the system's subsidiary job cost ledger (job order cost sheets see paragraph 200404, below) is controlled by general ledger accounts.

200202 The principal general ledger control accounts are the Work in Process-In-House, Construction in Progress-In House, and Cost of Goods Sold accounts. Table 20-1 illustrate typical general ledger account entries.

**JOB ORDER COST/
GENERAL ACCOUNTING INTERFACE**

- A. Dr 1581 Work in Process-In-House
Dr 1721 Construction in Progress-In House
Cr 2211 Accrued Payroll-Civilian

To record labor cost incurred for work in process.

- B. Dr 1581 Work in Process-In-House
Dr 1721 Construction in Progress-In House
Cr 1521 Inventory Held for Sale

To record material and supplies issued to specific job orders.

- C. Dr 1581 Work in Process-In-House
Dr 1721 Construction in Progress-In House
Cr 6600 Applied Overhead

To record applied overhead.

(NOTE: This entry normally would be used only by Defense Business Operations Fund activities which used standard overhead rates. Appropriation funded activities that find it desirable to implement a job order cost accounting system for reimbursable work would apply overhead at a predetermined rate with a corresponding reduction of appropriate expense accounts. See paragraph 200403, below, for treatment of overhead.)

- D. Dr 6500 Cost of Goods Sold
Dr 1521 Inventory Held for Sale
Dr 1766 Equipment Not in Use
Dr 1730 Buildings
Dr 1740 Other Structures and Facilities
Cr 1581 Work in Process-In-House
Cr 1721 Construction in Progress-In House

To record completion and delivery to a customer.

TABLE 20-1

2003 ESTABLISHING THE JOB ORDER

200301 Job Orders Categories. Job orders are established in terms of the nature and type of work to be performed. Following are examples of the criteria that may be used to establish job order categories.

A. End Items. A separate job order should be established for work performed on

stand alone end items such as airplanes or trucks.

B. Real Property Construction. A separate job order should be established for each real property construction project.

C. Real Property Maintenance. A separate job order should be established for each real property maintenance project.

D. Low Dollar Like Items. A job lot is normally used when low dollar like items are placed into the process at the same time. However, the estimated cost of any job lot order may not exceed \$750,000. If the estimated cost is greater than \$750,000, a separate job order should be established for each \$750,000 increment.

200302 Identification of Job Order. Management determines the services or products to be costed, schedules work in the production departments, and forwards the order to cost accounting. The cost accounting department then assigns a job order number to each identified cost objective. The job order number is a control feature for identifying each job and is a means of accumulating departmental labor, material, and overhead cost by job order. As work progresses production departments report costs incurred by job order number. The information is forwarded to the cost accounting department where the costs are recorded on separate job order cost ledgers (subsidiary job cost ledger). A summary work in process cost schedule for all open job order numbers will be prepared and forwarded to the accounting department for posting to the general ledger control accounts Work in Process-In-House and Construction in Progress- In- House. The supporting detail for these accounts is identified and maintained by the job order number on individual job order cost ledgers. As production departments complete a job order, the cost accounting department calculates the total cost for the job and prepares a summary schedule for the accounting department. The accounting department prepares the general ledger control account entry transferring the appropriate amount from Work in Process-In-House and Construction in Progress accounts to the Cost of Goods Sold or applicable asset accounts. The detail support for these general ledger accounts is identified and maintained by job order numbers assigned to completed job order cost sheets.

230303 Identifying Productive Direct Labor Hours. Management identifies those employees whose work constitute labor hours within the production department. These hours are totaled and then estimated idle time hours and leave

hours are deducted. The result is total departmental productive hours that are used as a denominator in the determination of the actual shop rate (see paragraph 200305, below). The standard and actual shop rates are discussed in the following paragraphs.

200304 Standard Shop Rate

A. Management uses cost accounting and engineering studies to develop an earned standard shop rate for each production department's labor hours. As an alternative to developing this rate, management can decide to use the prior period actual shop rate as the current period standard shop rate. The purpose of the standard shop rate is threefold. First, it permits a standard cost for work performed to be billed to customers. Second, it allows for the costing of products when manufactured rather than when actual costs are determined. Third, it functions as a performance measurement tool. Management uses the standard shop rate to measure a department's cost-effectiveness or to identify its inefficiencies. The measurement compares actual shop rate cost data to standard shop rate cost data (see paragraphs 200306 and 200307, below). The resulting variance identifies cost efficiency or inefficiency.

B. Defense Business Operations Fund activities develop an annual stabilized job order shop rate. The annual adjustment for Defense Business Operations Funds includes a factor to recoup unrecovered prior year costs, if any.

C. Appropriation funded activities should develop a shop rate for each accounting period. The standard shop rate consists of direct labor, indirect labor, and indirect material cost. In addition to the standard shop rate, general and administrative expenses should be allocated to customers in order to identify all costs associated with the job order. Typically the shop rate is calculated by taking last years shop rate and accelerating it for pay wage rates giving consideration to staff changes.

200305 Actual Shop Rate

A. As part of the management and accounting process, an actual shop rate is

prepared for each production department. The rate consists of direct labor, indirect labor, and indirect material costs obtained from the same data base used to prepare the general ledger control account entries. The sum of these costs is divided by the actual productive labor hours incurred (see paragraph 200303, above), and the result is the actual shop rate.

B. Unfunded cost (see paragraph 200311, below) financed by other organizations or by prior appropriations should be added to

the shop rate charges and billed to non-DoD ordering activities or considered in making cost effectiveness comparisons. In addition, general and administrative expenses (see paragraph 200309, below) should be charged customers in order to recover all cost associated with the job order. Table 20-2 illustrates the determination of a typical actual shop rate for appropriation funded activities. Volume 11 of this Regulation provides guidance for determining types of costs to be recovered from customers, including indirect costs and general and administrative expenses.

DEPARTMENTAL ACTUAL SHOP RATE		
	AMOUNT	SHOP RATE
<u>FUNDED COSTS:</u>		
Direct Labor	\$ 4250	
Direct Material	300	
Overhead:		
Indirect Labor	250	
Indirect Material	200	
Subtotal	\$ 5000	
<u>UNFUNDED COSTS:</u>		
Military Labor	\$ 500	
Civilian Retirement	900	
Free Issue Material	523	
Subtotal	\$ 1923	
Subtotal Funded and Unfunded	\$ 6923	
Depreciation @ 4%	\$ 277	
TOTAL FUNDED AND UNFUNDED	\$ 7200	
Department's Productive Labor Hours	180 hours	= \$ 40

TABLE 20-2

200306 Variance Determination

A. As part of the management process, the cost accounting department compares the earned standard rate to the actual rate. The difference between standard and

actual rates is a variance. A favorable variance shows that the production department is operating in an efficient manner. An unfavorable variance alerts management that corrective action may be required.

B. In the event an organization processes a job order at the standard rate and a variance occurs, action must be taken to either apply the variance to the various job orders that have been processed, and if necessary, to adjust the shop rate. When the decision to adjust the

shop rate is made, the recalculation must provide for the amortization of any accumulated favorable or unfavorable variances. The variance percentage is determined by dividing the job order actual cost by the earned standard cost as illustrated in the following example:

DETERMINATION OF VARIANCE

The variance is determined by dividing the actual shop rate by the earned standard shop rate.

$$\frac{\text{Actual Shop Rate}}{\text{Earned Standard Shop Rate}} = \text{Variance}$$

$$\frac{\$40}{\$28.80} = 139\%$$

EXAMPLE: The job order cost sheet for job #111 shows that 50 hours have been accumulated in the production department. The computation of the customer charge follows:

$$(50 \text{ hours} \times \$28.80 \times 139\%) = \$2002$$

200307 Variance Analysis

A. Activities using standard costs must analyze the variance account for each standard and determine the causes for a variance. The variances relate to direct costs, overhead, and general and administrative expenses. The variances associated with these categories are discussed in paragraphs 200307.B. through 200307.D, below. Table 20-7 provides a chart for identifying possible causes of variances.

B. Direct costs. Normally, there are four distinct reasons for a direct cost variance that must be analyzed. Labor rate variances, labor time variances, material price variance and material quantity variances may occur whenever labor or material resources are charged to a job on a standard cost basis. Careful analysis is necessary because of the interrelationships of the variances. For example, a lower labor rate might result in higher labor hour content, or it might result in excessive material usage because lower skilled workers spoil more material. Thus, it is important when conducting a variance review to identify all of the possible interrelationships.

C. Overhead. Overhead variances may be classified as to overhead spending and overhead volume. Careful analysis is necessary because of the interrelationships of the variances. An unfavorable overhead variance may result from using equipment that is technically obsolete or which has become worn out, and requires additional maintenance to keep it operating. This would result in an unfavorable overhead expense variance.

D. General and Administrative Expenses

1. These costs can be analyzed in a manner similar to overhead. The analysis would be directed toward determining whether general and administrative expenses are in line with budget.

2. General and administrative expenses occur at three levels--the installation, the intermediate command and the headquarters command. As a general rule, not recognizing intermediate and headquarters command level general and administrative expenses in determining the cost of an end product should not result in a material understatement of cost

since the amounts allocated would be comparatively insignificant (such expenses would be incurred even if the item or service were not produced). When it is necessary to recognize such expenses in developing the cost of an end item or service, the guidance contained in Volume 11 of this Regulation should be followed.

200308 Subsidiary Accounts. Each production and support department shall maintain the capability to array data in sufficient detail necessary to satisfy management information requirements. Subsidiary cost accounts may be established to assist in costing a product or service. For example, it may be necessary to accumulate direct labor, direct material and

overhead in separate subsidiary accounts. Accounting information is posted to the subsidiary accounts as it becomes available via labor distribution reports, material reports, and overhead worksheets.

200309 General and Administrative Expenses. The general and administrative (G&A) expenses are accumulated in the activities indirect cost centers and charged to customers by equitably prorating the expense to job orders. A rate is established in order to prorate the expense to the customer job orders. Customers are billed for the general and administrative expense allocated to their job orders when required in accordance with the guidance contained in Volume 11 of this regulation. A typical allocation is illustrated in the following example:

EXAMPLE: The activities general and administrative expenses incurred by indirect cost centers during the period are:

INDIRECT COST CENTER	AMOUNT
A	\$ 100
B	50
C	100
D	<u>250</u>
Total G & A Expenses:	\$ <u>500</u>

The job order costs incurred for the accounting period are:

JOB ORDER NUMBER	COST INCURRED
101	\$ 500
102	1000
103	2500
104	1000
Total Job Order Cost:	\$ <u>5000</u>

FORMULA FOR GENERAL AND ADMINISTRATIVE RATE DETERMINATION

$$\frac{\text{General \& Administrative Expense}}{\text{Total Job Order Cost Incurred}} = \text{Rate}$$

$$\frac{\$ 500}{\$ 5000} = 10\%$$

The general and administrative rate is applied to the job order cost in order to distribute the expense to the customers as illustrated in the following example:.

<u>JOB ORDER NUMBER</u>	<u>JOB ORDER COST</u>	<u>RATE</u>	=	<u>G & A EXPENSE ALLOCATED</u>
101	\$ 500	10%	=	\$ 50
102	1000	10%	=	100
103	2500	10%	=	250
104	1000	10%	=	<u>100</u>
Total General & Administrative Expense				\$ <u>500</u>

SCHEDULE OF AMOUNTS BILLED TO CUSTOMERS

<u>JOB ORDER NUMBER</u>	<u>JOB ORDER COST</u>	<u>G & A EXPENSE ALLOCATED</u>	<u>AMOUNT BILLED TO CUSTOMER</u>
101	\$ 500	\$ 50	\$ 550
102	1000	100	1100
103	2500	250	2750
104	<u>1000</u>	<u>100</u>	<u>1100</u>
TOTAL	\$ <u>5000</u>	\$ <u>500</u>	\$ <u>5500</u>

200310 Source Documents Required. The principle cost categories charged to the production departments include direct labor, direct material, contract, and overhead (includes indirect labor and material costs).

A. Labor Source Documents. Source documents for labor costs are job/labor distribution tickets. The job/labor distribution ticket is coded with the job order identification number. The ticket accumulates the total employee labor hours by job within a department. The employees' time by job and pay rate information is obtained from the job/labor distribution tickets and used to

prepare the departmental shop rate. Job/labor distribution tickets can be prepared by a supervisor or by workers if initialed by a supervisor. In addition, employee hours may be recorded mechanically by a time clock on a time card as employees punch in and out as they start and stop on each job, or they may be recorded manually by a timekeeper. As an internal control procedure, job/labor distribution ticket hours are compared to total hours. At the end of each pay period, the civilian payroll system summarizes the hours worked as reported on approved time cards, obtains pay rate data from the personnel system, and calculates gross and net pay based on payroll and withholding

authorizations for each employee. A labor distribution report that identifies payroll cost by department based upon the job order identification number is prepared using the pay computed by the pay system. This distribution computation may be part of the pay system or it may be included in the cost accounting module. The responsibility for determining who shall perform the labor distribution is a management function.

B. Material Source Documents. There are many source documents that are used to identify material costs. This paragraph discusses some of the more common documents:

1. DD Form 1348, "DoD Single Line Item Requisition System Document (Manual)". This form is prepared by the department requesting material and coded with the job order/department identification number. The form is forwarded to the installation supply officer for approval and to determine the supply availability through the Military Standard Requisitioning and Issue Procedure (MILSTRIP). When the applicable material is dropped from inventory, it is charged to work in process. Chapter 4 of this Volume provides guidance to be followed in determining the price of material that is released from inventory.

2. Contract Source Documents. Included in this category are contracts and purchase orders used to purchase material from vendors. When material is received, an appropriate inventory and accounts payable accounts are posted. When inventory items are requisitioned and placed into production, the material is costed to a specific job and recorded to the Work in Process-In-House account (see paragraph 200402.C, below, for the accounting treatment).

C. Overhead Source Documents. Overhead costs pertain to the allocation of supporting department costs to producing departments. Overhead costs are allocated through use of worksheets that summarizes and allocates supporting department expenses to production departments. Various methods for allocating overhead include direct labor hours, direct labor cost, machine hours, or material cost.

The method chosen must be used consistently from one period to the next in order to permit meaningful comparisons.

200311 Accumulation of Unfunded Cost. The formal cost accounting module captures the costs that are funded in the current operating installation budget. Costs that are financed by another organization's or activity's appropriations are referred to as unfunded costs. This paragraph provides guidance for identifying unfunded costs for DoD components operating under direct appropriation procedures.

A. Military Labor

1. DoD Components operating a formal cost accounting system that employ military personnel shall maintain a record of the grade and number of hours worked by military personnel for each job in the department. These hours are then extended at standard military composite rates in accordance with the guidance in Volume 11 of this Regulation. These costs shall be charged to non-DoD ordering activities or considered in making a cost comparison to organizations that have no assigned military personnel.

2. DoD Components performing work for non-DoD activities shall recoup military fringe benefits by applying a percentage surcharge to military pay/costs and billed as part of direct costs. The military labor costs and fringe benefit costs shall be charged to non-DoD customers in accordance with guidance contained in Volume 11 of this Regulation. Volume 11 also provides guidance to be followed by the Military Departments in determining the hourly rates. Guidance on the disposition of amounts collected are also contained in Volume 11.

B. Unfunded Civilian Retirement Costs. DoD Components operating a formal cost accounting system that employ civilian personnel shall apply the unfunded retirement percentage rate, specified in Volume 11, to the civilian labor cost when formulating the actual shop unfunded cost rate. The additional percentage rate is intended to recoup unfunded civilian retirement cost. These costs should be charged to non-DoD

ordering activities or considered in making cost comparisons. Guidance on the disposition of amounts collected are also contained in Volume 11.

C. Unfunded Material

1. In accordance with the guidance contained in Volume 11, material includes both inventory and equipment in use. The activity losing the material or equipment shall account for the transfer by reducing the appropriate asset and equity accounts in accordance with the guidance contained in chapters 4, 6, and 15 of this Volume. The accounting entry should reflect acquisition cost and any accumulated depreciation for equipment in use. If the activity receiving the material operates a production facility, it shall adhere to the following procedures and use the prescribed forms. A

DD Form 1348 is the source document for requesting unfunded material. The DoD Component should insert the appropriate department code identification number and quantities ordered when preparing the form. Logistic centers or supply activities should issue material cost information to the Components via a non-interfund or unfunded pricing document. The noninterfund or unfunded pricing document provides material price and quantity information.

2. DoD Components shall classify unfunded material, also known as free issue material, received as either consumable material or equipment. Consumable material shall be included in calculating the unfunded portion of the shop rate. DD Form 1348 is the source document for requesting unfunded material or equipment. The DoD Component shall insert the appropriate department code identification number and quantities ordered when preparing the form. Logistic centers should issue material or equipment cost information to the Components via a non-interfund or unfunded pricing document. The non-interfund or unfunded pricing document provides material or equipment cost and quantity information.

D. Unfunded Depreciation. DoD Components operating production facilities that do not have the capability to calculate depreciation on an item by item basis shall apply a 4 percent asset use charge to total costs to recoup depreciation on sales to non-federal customers in accordance with the guidance contained in Volume 11.

2004 PRODUCTION COST COMPONENTS

Production cost consists of direct labor, direct material, and overhead. Direct labor is labor used to transform various components into a finished product or service. The labor must be directly attributed to the job order. Direct material is that material specifically charged to the job. It has a sufficiently large value to be worth charging to the job and to be identified as a major cost element of the finished product or service. Normally, only the more significant items are classified as direct material. Production overhead consists of all indirect costs considered to be associated with the production or service processes other than general and administrative expenses. Typically, production overhead costs include, but are not limited to, indirect material or supplies, indirect labor, facility and equipment depreciation, repairs, maintenance, and occupancy costs.

200401 Direct Labor

A. Labor is used to produce products or services either directly or indirectly. Direct labor costs are those that can be identified specifically with a product or service (see paragraph 200403.B, below, for a discussion of indirect labor). Civilian and military personnel labor distribution rates shall be established in accordance with the guidance contained in Volume 11.

B. Job tickets and time cards are used as a means of ascertaining the labor cost and of distinguishing between direct labor and indirect labor. During each pay period, job tickets are summarized and direct labor costs are distributed to each job through use of the standard shop rate. The labor cost incurred in each department is accumulated on the job order cost ledger.

C. At the end of each pay period, the payroll is calculated, posted to general ledger accounts, and recorded in the appropriate job order cost ledgers (subsidiary job cost ledger).

Table 20-3 illustrates typical general ledger account payroll entries. Indirect labor is also illustrated since it is also a part of payroll expense:

To record the indirect labor applied at standard rates.

TABLE 20-3

200402 Direct Material

A. Direct material costs are those incurred for raw materials, parts, subassemblies, components, and supplies that can be identified specifically for use in producing the product or performing the service. Direct materials and supplies owned by the performing activity, acquired from a Defense Business Operations Fund, or from an inventory account financed by appropriated funds, shall be charged to a job order in accordance with applicable costing procedures. Purchased materials and supplies shall be charged to a job order at acquisition cost plus the cost of transportation. Customer furnished materials should be accounted for, and reported to customers separately, and should be related to specific end products or services in such a manner as may be required by customers.

B. Materials received are charged to a general ledger inventory control account. Individual material accounts are maintained for each class of materials in a subsidiary ledger. Materials requisitioned and transferred to production are the basis for debits to the proper job order cost sheets in the subsidiary job cost ledger and credits to the material accounts in the subsidiary ledger.

C. At the end of the accounting period, requisitions are summarized. The material requisitioned is classified as either direct material or indirect material. The direct material is debited to the control account for Work in Process-In-House or Construction in Progress-In House and credited to the general ledger inventory control account. The indirect material is debited to the applied overhead control account and credited to the general ledger

inventory control account. Table 20-4 illustrates the purchase of material and the posting to the accounts. Since the material expense is usually

distributed to the accounts in a compound entry, the indirect material allocation is also shown.

DIRECT MATERIAL ENTRIES

1. Dr 1521 Inventory Held for Sale
Cr 2114 Accounts Payable-Public-Current

To record the purchase of inventory.

2. Dr 1581 Work in Process-In-House
Dr 1721 Construction in Progress-In House
Cr 1521 Inventory Held for Sale

To record cost of direct material placed in production.

(NOTE: When material is requisitioned it is charged to the applicable job order. The value of material issued for all job orders should be equal to the costs recorded in the work in process account for materials issued to production.)

3. Dr 6600 Applied Overhead
Cr 1521 Inventory Held for Sale

To transfer actual indirect material costs.

4. Dr 1581 Work in Process-In-House
Dr 1721 Construction in Progress-In House
Cr 6600 Applied Overhead

To record applied cost of indirect material.

TABLE 20-4

200403 Indirect Labor, Materials, and Overhead

A. Indirect labor is not directly identified with a single job order, but is identified with two or more job orders. Indirect labor includes all personnel costs of the department not charged as direct labor, including supervision and administration within the department, as well as nonproductive time. The indirect costs should be accounted for by whatever organizational units are supervising the cost control of operations and are responsible for allocating costs equitably to cost objectives,

products, or services (see paragraph 200401.C, above, for the accounting entry).

B. Indirect materials are not directly identified with a single job order, but are identified with two or more job orders. Indirect material includes all material and supplies not charged as direct materials and supplies to the job order. The indirect material cost is distributed to job order cost ledgers through use of the standard shop rate. Supplies and small quantities of materials, put into the production process, that cannot be charged economically to a job order, should be charged to the department

as an indirect cost (see paragraph 200402.C, above, for the accounting entry).

C. Production overhead includes the cost of items such as equipment depreciation, maintenance of equipment, power, other service department charges, indirect labor, materials, or supplies not charged as direct cost to a department. Supervision costs allocable to several job orders are charged to a job order as indirect cost i.e. production overhead. Supplies and small quantities of materials that are consumed in the production process, but cannot be traced without undue difficulty directly to production, should be charged to a job order as indirect costs, i.e., production overhead.

D. Overhead is applied to work in process or construction in progress at established rates. During the accounting period actual overhead is accumulated in the Applied Overhead account. At the close of the accounting period there may be an over or under applied balance, depending on whether the rate established at the beginning of the accounting period was too high or too low. The balance is closed to the appropriate net results of operations account, and the applied overhead rate for the subsequent year is adjusted to reflect the need to recover underapplied overhead or to redistribute overapplied overhead. Table 20-5 illustrates the accumulation of actual overhead and to apply overhead to work in process or construction in progress:

TABLE 20-5

200404 Job Order Cost Sheets

A. The job order cost sheet is the key document for accumulating direct material, direct labor, and overhead cost in a job order cost module. As each job is accepted and scheduled, it is assigned an identification number and a separate job order cost sheet is prepared. When the work is completed, the cost accounting department calculates the job cost and transfers the appropriate cost to the Cost of Goods Sold account or to an appropriate asset account.

B. As production begins, materials are requested and a materials requisition form is prepared. The requisition form serves as the basis for posting material costs to the job order cost sheet. In addition, the various stores requisitions serves as the basis for posting entries to the materials inventory and work in process accounts (see paragraph 200402.C, above, for accounting entries).

C. Personnel working in production departments prepare job/labor distribution tickets that designate time spent on the various jobs. These tickets are the basis for recording labor costs on job order cost sheets through use

of the shop rate (see paragraphs 200304 and 200305, above). At the end of the pay period, the job/labor distribution tickets are summarized and show the jobs worked on by each employee. The job/labor distribution ticket provide the basis for posting direct and indirect labor cost entries to work in process and applied overhead accounts (see paragraph 200401.C, above, for accounting entries).

D. Applied overhead is allocated to individual jobs on the basis of predetermined shop rates. The cost accounting department

calculates the amount of overhead to be recorded on the job order cost sheet through use of the shop rate (see paragraphs 200304 and 200305, above).

E. The job order cost sheet is totaled when the job is completed. The job's cost is then transferred from the Work in Process-In-House or Construction in Progress-In-House accounts to the Cost of Goods Sold or applicable asset account when the item is completed and delivered to a customer as illustrated in Table 20-6.

TABLE 20-8

CHAPTER 21

PROCESS COST ACCOUNTING2101 GENERAL

210101 Purpose. The determination as to the need for a formal process cost accounting module in an accounting system is necessarily a management decision. The decision to establish such a module should be based upon a recurring need for cost accounting information. The cost accounting standards that shall be implemented when a decision has been made to establish a formal process cost accounting module are in Chapter 19 of this Volume. This chapter discusses how to establish a process cost accounting module, the type of source documents required, typical management reports produced by the module, and possible uses of these reports.

210102 Overview

A. A formal process cost accounting module provides a cost identification method for determining, reporting, analyzing, and controlling the cost of a particular process or series of processes. It classifies, records, presents, and interprets in a significant manner, the material, labor, and overhead expenses necessary to produce a product or service.

B. The management information provided by a process cost accounting module is a tool that aids management in the guidance of activities and in attaining the objective of producing a maximum of goods and services at the least amount of costs. The formal cost accounting module is normally designed to accumulate

those costs that are under the control of local management. Typically the system manager controls all costs that are funded by appropriations for funds provided to the accounting entity. These costs are referred to as funded costs. Chapter 20, paragraph 200311, of this Volume provides guidance for accumulating unfunded cost. If a formal cost accounting module is to be used as a basis for billings to other organizations, other Federal Departments or the public, then provisions must be made for the addition of unfunded cost, such as military labor, items obtained from inventory on a free issue basis, and civilian retirement cost not financed by the employee or Department of Defense appropriations. Volume 11 of this Regulation provides guidance on the cost elements that are billed to various organizations.

2102 INTERFACE WITH GENERAL ACCOUNTING SYSTEM

210201 A formal process cost accounting module must be fully integrated with other modules of the general accounting system, i.e., it must interface with the payroll and fund control modules. Cost accounting module subsidiary accounts are controlled by general ledger accounts.

210202 The principal general ledger control accounts used with a process cost accounting module are the Inventory Held for Sale and the Work in Process-In-House accounts. Table 21-1 illustrates accounting entries for such accounts.

**ACCOUNTING ENTRIES FOR
INVENTORY FOR AGENCY OPERATIONS

To record the relief of work-in-process of the completed products to inventory or customer.

TABLE 21-1

2103 ESTABLISHING THE PROCESS COST ACCOUNTING MODULE

210301 Identification of Cost Centers.

A. Normally, the first step in establishing the process cost accounting module is to request an industrial engineering evaluation of the production processes and flows. This step requires an analysis of the work to be accomplished and a determination of the most logical, efficient, and economical sequence of production and support operations. Production operations are then consolidated into logical cost centers to perform specific tasks that produce an identifiable and measurable output. Production operations are designated as direct cost centers and support operations are designated as indirect cost centers. For example, a chemical product may require three distinct operations: blending, distilling, and packaging. The blending of ingredients may be assigned to one production cost center while the distillation process is assigned to another production cost center. Finally, the product packaging is assigned to a third production cost center. As the chemical product is completed, it is

transferred from the last production cost center to the customer and the associated cost is posted to the Cost of Goods Sold account.

B. The functions of personnel, recruitment, plant maintenance, and accounting may be grouped into indirect cost centers. Each cost center is assigned an identification number that is subsidiary to the general ledger control account Work in Process-In-House. This identification number is entered on all contracts, inventory item requisitions, and labor distribution source documents to result in the accumulation of cost center incurred costs.

210302 Identification of Product to be Produced. The second step in establishing the process cost accounting system is to determine the specific products to be produced and the definition of what constitutes output in terms of a product for each cost center. For those products to be produced, an industrial engineer determines the direct labor and material requirements for each stage of the process and identifies the measurable unit of output for each cost center. For example, chemical products may be measured in terms of the number of gallons

blended, distilled, and packaged by the various production cost centers.

210303 Establishing Standard Cost per Unit.

A. Frequently there is a third step performed by the industrial engineers--the establishment of an standard cost for output units of production cost centers. The standard cost, when compared to the actual unit production cost, can be used by management to measure the cost efficiency of a cost center or to determine if various inefficiencies have entered into the system. The difference between actual cost and standard cost is termed a variance. Management should investigate both favorable and unfavorable variances to determine their cause. A favorable variance shows that the cost center is operating in an efficient manner. An unfavorable variance alerts management that attention is required. In the event an organization prices products at the standard cost and a variance occurs, the standard cost must be adjusted by the variance in order to recover actual cost. The variance is determined by dividing total actual cost of the cost center by the total standard cost. For example, if cost center A had actual cost of \$20,000, and had produced 1000 items with a standard cost of \$15.00 per unit for a total standard cost of \$15,000, then the variance would be 33.3 percent. This variance indicates the cost center is not operating efficiently. Billings at standard cost would also have to be multiplied by 133.3 percent to recover actual cost (i.e., $\$15.00 \times 133.3\% = \20.00).

B. A different costing procedure may be followed by revolving fund organizations that use stabilized prices. These organizations may simply accumulate the variances and recover them as part of the following year's standard price.

210304 Source Documents Required. The principal categories of cost charged to the production cost centers are direct labor, direct material, contract, and overhead (includes indirect labor and indirect material costs).

A. Labor Source Documents. Source documents for labor costs are time cards. Time cards are coded with the cost center

identification number and accumulate the total labor hours worked by employees assigned to the cost center. Hours may be recorded mechanically by a time clock as employees punch in and out daily, or they may be recorded manually by workers or a timekeeper. At the end of each pay period, the civilian payroll system summarizes the hours worked as reported on approved time cards, obtains pay rate data from the personnel system and calculates gross and net pay, based on payroll and withholding authorizations for each employee. A labor distribution report that identifies payroll cost by cost centers based upon the cost center identification number is prepared using the pay computed by the pay system. This distribution computation may be part of the pay system or it may be included in the cost accounting module. The responsibility for determining who shall perform the labor distribution is a management function.

B. Material Source Documents. There are many source documents that are used to identify material costs. This paragraph discusses some of the more common documents:

1. DD Form 1348, "DoD Single Line Item Requisition System Document (Manual)". This form is prepared by the activity requesting material and is coded with the cost center identification number. The form is forwarded to the installation supply officer for approval and to determine the supply availability through the Military Standard Requisitioning and Issue Procedure (MILSTRIP). When the applicable material is issued, it is charged to the account and recorded in the subsidiary account established for the cost center. Chapter 4 of this Volume provides guidance to be followed in determining the price of material that is released from inventory.

2. Contracts and Purchase Orders. Contracts and purchase orders are another major category of source documents used to purchase material from vendors. When the material is received, an accounts payable is established and applicable amounts are entered into the Work in Process-In-House subsidiary account for the cost center. Contract and purchase orders are entered directly into the

Work in Process-In-House account rather into the Inventory Held for Sale account because the materials are purchased expressly for a particular job. Direct application is preferable to commingling the materials with other materials in the Inventory Held for Sale Account.

3. Transfer Tickets. Transfer tickets are used when production units are transferred from one cost center to another cost center. The cost center transferring production units prepares the transfer ticket and the receiving cost center signs for receipt of the material. The transfer ticket contains the number of production units being transferred. A copy of this document is provided to the cost accounting office that records the movement of material.

C. Overhead Source Documents. Overhead costs pertain to the allocation of costs incurred by indirect cost centers to producing cost centers. This cost is allocated through use of a worksheet prepared by the accounting office. The worksheet summarizes and allocates indirect cost center expenses to direct cost centers. Various methods for allocating overhead include: direct labor hour basis, direct labor cost basis, machine hour basis, or the material cost basis. The method chosen must be used consistently from one period to the next in order to permit meaningful comparisons. The direct labor hour basis method for allocating indirect cost center expenses to direct cost centers is illustrated below:

ALLOCATION WORKSHEET

The total indirect cost center expenses for the period are \$48,000 dollars. Cost center A used 1200 direct labor hours, cost center B used 900 direct labor hours, and cost center C used 300 direct labor hours during the period.

FORMULA:

$$\frac{\text{Indirect Cost Center Expenses}}{\text{Total Direct Labor Hours All Cost Centers}} = \text{Factor}$$

ILLUSTRATION:

$$\frac{\$48,000 \text{ dollars}}{2400 \text{ direct labor hours}} = \$20 \text{ per Hour}$$

Cost Center	Direct Labor Hours		Factor Per Hour		Amount Allocated
A	1200	X	\$20	=	\$24,000
B	900	X	20	=	18,000
C	300	X	20	=	6,000
Totals	<u>2400</u>				<u>\$48,000</u>

Footnote: Material can be added at the beginning of the period, during the period, or during a certain point in the process, e.g., when 50% complete.

210305 Number of Units Produced

A. The number of units still in process within a process cost center are expressed in terms of equivalent production units. The calculation of equivalent production inventory is based upon a physical inventory to determine the production status. For example, if the cost center had 100 units that were 75% complete for material and labor, 50 units that were 50% complete for material and labor, and 30 units

that were 10% complete for material and labor, the equivalent production units would be 103 $([100 \times 75\% = 75] + [50 \times 50\% = 25] + [30 \times 10\% = 3])$.

B. The ending inventory of production units are added to the sum of production units transferred out, minus the beginning inventory of equivalent production units to determine the total number of units produced during the accounting period by the department. The calculation is illustrated below:

UNITS PRODUCED WORKSHEET

	NUMBER OF UNITS
Transferred Units	1100
Equivalent Units	103
Sub Total	<u>1203</u>
Less: Beginning Equivalent Units	<u>(100)</u>
Total Production This Month	<u>1103</u>

C. An illustration of the use of standard cost to evaluate production efficiency or problems follows:

	UNIT COST		NUMBER OF UNITS		COST
Standard Costs					
Labor	\$ 50	x	1103	=	\$ 55150
Material	35	x	1103	=	38605
Overhead	<u>15</u>	x	1103	=	<u>16545</u>
Total Standard Cost	\$100	x	1103	=	<u>\$111300</u>
Actual Costs					
Labor					\$ 60000
Material					35000
Overhead					<u>20000</u>
Total Actual Cost					<u>\$115000</u>
Variance					<\$ <u>3700</u> >

210306 Variance Analysis

Chapter 20, paragraph 200307 of this Volume provides guidance for various analyses.

Table 20-7 in Chapter 20 of this Volume provides a chart for identifying possible causes of variances.

210307 Subsidiary Accounts. Each cost center should maintain the capability to array data in sufficient detail necessary to satisfy management information requirements. Cost center subsidiary accounts may be established within individual cost centers in order to cost a product or service. For example, it may be necessary to accumulate direct labor, direct material, and overhead in subsidiary accounts. Accounting information is posted to the cost center subsidiary accounts as it becomes available via labor distribution reports, material reports, and overhead worksheets.

2104 MONTH END REPORTS

Month-end production cost reports produced by a process cost accounting system in operation at a Defense Component operating under direct appropriation procedures with three production cost centers is illustrated in Table 21-2. The illustration is presented to clarify the concepts and methodologies previously discussed in this chapter.

PROCESS COST ACCOUNTING REPORT FOR THE MONTH OF XXXX, 19XX UNITS PRODUCED

<u>PART A: UNIT PRODUCTION</u>								
	COST CENTER A		COST CENTER B		COST CENTER C		TOTAL UNITS	
Beginning Inventory	100		200		100		100	
Transferred During Month	500		500		500		500	
Units to be Accounted for	600		700		600		600	
Ending Inventory	100		200		100		100	
Production During Month	500		500		500		500

CHAPTER 22

COST FINDING2201 GENERAL

220101 Purpose. This chapter provides a cost determination method to be used when a job order or a process cost accounting system is not part of the DoD Component's formal accounting system. The guidance in this chapter is to be followed by DoD Components that find it is necessary to use cost-finding techniques to determine the costs related to performing a service, to be recovered for goods or services, or to obtain cost information for decision-making and information purposes, such as productivity measurement. Normally, an organization that operates a formal cost accounting system will only use cost finding techniques to identify unfunded costs. However, even these organizations, from time to time, and on special occasions, may have a requirement to use these techniques.

220102 Overview

A. Chapter 19 of this Volume prescribes the basic policy for measuring and allocating costs. This chapter applies that basic policy to cost finding, establishes cost-finding documentation policy, and describes generally recognized cost finding techniques and their potential application within the Department of Defense. The guidance contained in this chapter can be applied to situations when batch processed tasks or functions are involved as well as to specific document process functions.

B. Cost finding is an approach used in the absence of a formal cost accounting system to estimate the actual costs incurred to provide a service, produce a product, or to obtain cost information for periodic decision making and information purposes. It is available for use by those DoD activities that do not have a formal cost accounting module as part of their accounting system, but who periodically provide reimbursable services or products to other DoD Components, Federal Agencies, or to the public.

Cost finding may also be necessary when the cost of an item has not been recorded in the accounting system and the item is being transferred, sold, or recorded in the accounting system for the first time or when measuring productivity.

C. The proper application of cost finding requires knowledge of cost accounting and of the organizational functions associated with the final and intermediate cost objectives. Accordingly, personnel assigned to cost-finding projects should have cost accounting experience as well as an understanding of the organizations involved.

2202 POLICY220201 Documentation

A. The application of cost-finding techniques shall be preceded by a clear requirements statement that describes:

1. The cost objectives (both intermediate and final) to which cost finding techniques are to be applied.
2. The organizations involved in performing the cost objectives and the tasks performed by each organization.
3. The cost elements that are applicable.
4. A plan that includes the specific cost finding techniques to be utilized and the criteria to be followed in selecting the specific cost finding technique to be used.
5. A description of how those techniques will accomplish the cost objective.

B. The statement and the work papers accumulating applicable cost elements shall be retained for review for the same length

of time as documentation used in support of billings to the public.

C. A case study is presented as addendum 1 to illustrate the application of the material discussed in this chapter. Discussions in the chapter are at the micro level. When a different approach might be usable to develop necessary data to establish the costs associated with a different cost objective (at the macro level, for example), information will be presented on the alternative approaches.

220202 Identification of Cost Objectives

A. For the purpose of this chapter, cost objectives are defined as either functions or work units for which management decides to identify, measure, and accumulate costs. Cost objectives shall be sufficiently discrete and described in writing to such a level of detail to form a basis to identify the specific function or product to be costed.

B. Careful attention must be paid to identification of cost objectives. When the cost objective is identified as being at a macro (an organizational level, for example) level, the amount of effort required to determine the relevant costs and the associated quantitative data should be less refined than if the cost objective were identified as being at the micro (a specific function or operation) level. At the macro level, it is possible that the accounting system, through the use of coding structures and the general ledger operating program expense accounts listed in Chapter 7, of Volume 1, of this Regulation, can provide much of the required financial data to establish relevant cost information. At the micro level, it probably will be necessary to use one of the methods described in paragraph 2203, below, to determine the time required to perform the cost objective and develop relevant cost information.

C. In addition, the classification of organizations as either direct or indirect (actually involved in performing the cost objective or performing as a support organization, respectively) is dependent on identifying cost objectives. At the macro level, as a general rule, all staff organizations will be classified as

indirect, and all line organizations will be classified as direct. At the micro level, it is conceivable that a staff organization, or element thereof, could be classified as a direct organization. The distinction between the macro and micro levels will be an important consideration in complying with OMB productivity requirements discussed in section 2204 of this chapter. The bottom line is that the cost accountant must be able to translate the measurement requirements into terms of source documents, allocation techniques, and other such analysis techniques as may be necessary to meet the management requirement. Establishing a cost objective is a management decision and is essential to the proper application of cost finding techniques to a cost objective.

D. For cost finding purposes, identifying and describing cost objectives take on special importance. Within the Department of Defense, cost finding techniques will probably be used to compare costs of different organizational units or operations performing the same cost objective, or in measuring productivity, and to measure the cost of performing a particular operation, among other things. For example, the costs to issue a check at an accounting station might be compared with the same costs at other accounting stations. In such situations, cost-finding techniques serve as a tool in identifying more efficient methods of performing a given task. Cost objectives may also be used to compare organizational efficiency, for example, the costs for an intermediate objective, such as processing a personnel action at a personnel office, might be compared with other personnel offices.

220203 Identification of Organizations Involved

A. Once the cost objectives have been identified, personnel assigned to identify the costs associated with the cost objective may proceed to the next step: identifying the organizational units contributing resources to the cost objective. Generally, the units will be within the activity itself (the installation level; and, within the installation, the supply unit, the transportation unit, administration, etc.).

B. The initial task is to classify the installation-level organizational units as direct or indirect. A unit that is responsible for actually performing the work is a direct unit. A unit that provides support or performs an administrative function is an indirect unit. Care must be taken to assure that organizational units are not classified as both direct and indirect for the same cost objective.

1. The process of classifying an organization as either direct or indirect may change as different cost objectives are identified and analyzed. Attempts to retain the same classification for different cost objectives may result in erroneous cost determinations, thus leading to misleading and faulty management decisions.

2. Indirect organizations shall be identified using the criteria cited in paragraph 190203 of chapter 19, of this Volume. An organization that is classified as indirect will not always be recognized in the computation of costs for a final cost objective. At the macro level, staff organizations generally will be recognized as an indirect organization and the related costs allocated among direct organizations. At the micro level, materiality and usefulness will be determining factors.

C. The organizational units can be classified through use of an iterative process or through the use of organizational charts or tables, depending on the final cost objective. The iterative process consists of a series of questions designed to establish the relationship that each organization unit has with the product or service for which cost-finding techniques are being developed (Figure 22-1 is a suggested list of such questions). First, the organizational units directly involved in the process are identified. Then the organizational units providing indirect functions to the direct organizational units are identified. This second category is also identified and arrayed through an iterative process consisting of a series of questions designed to establish the relationship of supporting activities to direct line organizations. The procedure is repeated until all organizational units are classified as direct or indirect for all identified cost objectives.

D. In order to determine which organizations are involved, it is necessary to identify the flow of actions related to the cost objective and the related intermediate cost objectives.

E. It is important to understand that the organizational activities involved in a particular cost objective or interim cost objective can cross organizational lines of responsibility.

220204 Identification of Cost Elements

A. An important aspect of any cost finding technique is identifying the direct and indirect cost elements applicable to the product or service. Both the direct and indirect activities may have the same cost elements. The difference is in the allocation of all applicable indirect costs (factory burden). Chapters 19 and 20 of this Volume provide guidance to determine factory burden.

B. Care must be taken to assure that all cost elements are identified. The first step is to identify all possible cost elements and then to determine which cost elements are significant. The operating program general ledger expense accounts 6111 through 6130, which are described in Chapter 18 of this Volume are used in this example. Figure 22-2 shows the potential application of each account to the direct and indirect activities. After the potential applications are identified, a decision must be made as to which cost elements are sufficiently significant as to warrant separate consideration.

C. After developing the statistical cost data, the individual or group responsible for applying cost finding to the cost objective can make a decision as to the significance of each cost element in the final determination. It is important to remember that the information is, at this point, only raw data. Decisions must be made as to the relevance and materiality of each cost element to the cost objective. Materiality is associated with whether excluding the data could distort the computed value for the final cost objective.

**SUGGESTED LIST OF QUESTIONS
TO BE USED WHEN IDENTIFYING AND
CLASSIFYING PARTICIPATING ORGANIZATIONS**

What organizations are involved in the final and intermediate cost objectives?

Which organization has primary responsibility for the final cost objective?

Which organizations perform intermediate cost objectives?

Which organization acts in a support role to the organization(s) performing the final or intermediate cost objectives.?

Which specific organization units will be involved either directly or as a support function?

What are the specific tasks performed by each of the identified organizations?

What is the order in which the organizations involved perform their delegated responsibilities?

FIGURE 22-2**220205 Application of Prescribed Rates**

A. The purpose of using cost-finding techniques is to determine that all applicable cost elements are addressed in computing the final cost. When the purpose is the preparation of an internal report or an external report for another Federal Agency or non-federal organization, the guidance contained in Volume 11 of this Regulation shall be followed to assure that all applicable costs are considered. When the purpose is to establish the cost of an activity associated with the Security Assistance Program, the guidance contained in Volume 15 of this Regulation, shall be followed.

B. The following rules shall be applied when determining the individual costs of intermediate and final cost objectives:

1. Civilian direct labor costs are computed using step 5 of the applicable pay grade for GS- and GM-series personnel. For Wage Board employees, use step 4 of the applicable pay grade. Amounts included as direct labor costs shall recognize only productive time; that is, the time actually used to perform the function. All other time is indirect labor time, and is included in overhead (factory

burden). Actual costs may be used, if known, provided appropriate documentation is available to support their substitution.

2. Civilian personnel benefits costs are computed using the rates contained in Volume 11 of this Regulation.

3. Military personnel costs are costed using the rates for each applicable military grade at standard military composite rates in accordance with guidance in Volume 11 of this Regulation.

4. Both military and civilian labor shall be analyzed as to productiveness. Productive labor (labor that is actually chargeable to jobs) shall be recorded as direct labor. Indirect labor (labor that cannot be charged to a specific job) shall be recognized in computing overhead (factory burden). Chapters 19 through 21 of this Volume provide guidance in computing overhead.

5. Direct material cost is determined using standard prices unless the actual cost of the material is known from vendor invoices.

6. Other costs that can be directly related to the cost objective are determined using documents such as vendor invoices, travel vouchers, etc.

7. Indirect costs are based on algorithms that are used to prorate the overhead costs to the cost objective based on factors such as the ratio of direct labor costs for the cost objective to total labor costs for the installation.

220206 Identification of Source Documents

A. Before the values for each cost can be determined, the source documents for the required data must be identified and copies obtained, together with the locations at which the documents are maintained. In addition, it will be necessary to determine the quantities of documents involved, especially if the cost objective is to determine average unit costs for a certain action.

B. When the final cost objective is to determine the cost of performing one single event, the specific documents involved must be identified. When the cost objective is much broader (for example, determining the average cost of issuing checks without regard to whom they are issued), identification of the specific documents involved may not be as significant as the operating costs (including the materials and supplies used) of the organizational units directly involved in the process.

220207 Selection of the Appropriate Cost-Finding Technique. The development of a final cost for the cost objective can be made using one of several different techniques or a combination thereof. The decision as to the method used will often depend on the purposes for which the cost objective has been established. Those cost objectives established to determine costs to meet a statutory or a recurring use need could require the use of cost-finding techniques with a higher degree of precision than those cost objectives established to meet an internal management need. Section 2203., below, describes various techniques that may be useful in cost finding.

2203 COST-FINDING TECHNIQUES

220301 Observation

A. The observation technique is normally used when the specific effort to be costed or a similar effort is currently in process. The first step is to complete the requirements statement required by paragraph 220201, above. The observer then physically follows the product or service through the various performing organizations, documenting the following:

1. Various events incident to performance.
2. The grade levels of personnel directly working on the effort.
3. The length of time spent on the activity.
4. Direct material used.
5. Indirect material used.
6. Types of support received from other organizational units.
7. Any other factors that have an impact on the cost of producing the product or performing the service.

A traditional flow chart of the entire process may be helpful in organizing, visualizing, and understanding the particular process under review. The process flow shown in addendum 1 of this chapter illustrates the data gathered through the use of this technique.

B. The observer then lists all of the identified cost elements and computes the cost of each element using the general ledger expense accounts shown in figure 22-1.

C. Any other assumptions shall be carefully and accurately documented so that users of the resulting information will have a better understanding of the process used.

220302 Statistical Sampling

A. This technique is normally used when there is a large volume of similar type work being performed on a continuous task basis. An example of the use of this technique is packing, crating, and handling costs incurred at the depot level. A random sample of items is selected and a special job order tag is attached to each item selected when it is initially placed into the performance cycle. All personnel who come into physical contact with the items are required to record their organization, pay grade, length of time involved, and type and quantity of material or supplies used. Completed tags are returned to the personnel conducting the study who ensure that all tags have been returned and properly completed.

B. All of the cost elements identified to the cost objective are assigned a cost.

C. Resulting cost estimates shall be annotated to disclose the confidence level of the resulting estimate within a specific range.

220303 Independent Appraisal. The independent appraisal technique is normally used when the cost determination is made after the cost objective has been completed, and there is no similar product being produced. Normally, the effort would be accomplished by an engineer or an individual who is an expert in the production process. Under this procedure, a list of all resources involved in fabricating the product or performing the service is made. Each resource is then analyzed to establish a reasonable input cost. The total cost of the applied resources represents a reasonable estimate of costs incurred in the cost objective.

220304 Commercial Cost. This technique is normally used in connection with incidental activities carried out during a DoD mission requirement. In these circumstances, the application of normal full cost to the production of a product or provision of service would not be representative of the incurred cost. An example would be a Navy carrier transporting a disabled foreign aircraft to a repair facility incident to the performance of its normal mission. In this case, a determination of the

commercial charge to transport the disabled aircraft might be more representative of the allocable cost incurred by the Navy vessel.

220305 DELPHI Technique. This technique is useful in those instances when the more traditional cost estimation techniques cannot be applied to a cost objective. Accordingly, it is probably the least precise estimating technique, but one that is still useful if another technique is not available.

A. This technique uses a series of estimates made by a group of experts that is refined as subsequent estimates are made. For example, five construction experts might be given the task of estimating the costs associated with a new construction technique. These experts would be given the initial parameters of the project such as location; required specifications; geographical, environmental, time, and political constraints; and, any other known relevant data at the time of project initiation. Each group member would then develop an initial estimate of component costs and reconvene to discuss their individual analyses. After discussion, each expert would be asked to refine their estimate based on what was learned at the meeting. The evaluation process would be repeated by each participant to arrive at a revised estimate. The process would be repeated as often as necessary, until the group achieved consensus that the estimate at hand was the best available, given the uncertainty of the nature of the project and dissimilarity with other efforts in their experience.

B. This technique is probably more useful in determining what some new product or service should cost rather than determining the actual cost of an existing product or service. However, some of the principles involved may be helpful.

220306 Memorandum Records. This technique is an informal method for gathering cost data and should only be used in those cases when the value of the cost data is of little significance. It involves the preparation of memoranda documenting estimates of costs for a specific product or service. It should not be used when significant decisions are to be based on the cost

estimates derived or when other more accurate methods are available. It is useful as a cost accumulating tool for those low priority, low value projects or products when it is known that some cost data may be required in the future. However, in this case, a traditional cost accounting system is too costly or too cumbersome relative to the underlying effort.

220307 Analysis of Responsibility Center/Cost Center. This technique can be helpful in those cases where good organizational costs are available through some responsibility center or cost center organizational structure. Costs associated with the center can be allocated to a product or service of the center as a way to estimate at least part of the cost of that product or service.

220308 Combination of Cost-Finding Techniques. Nothing in this chapter prevents the use of more than one of these techniques, if such a use results in a more cost-effective or more accurate estimate of the cost information requirement. The techniques can also be used to augment data that is generated by a conventional cost accounting system. It is important to remember what the cost data requirement is and to generate or utilize the cost accumulation system or method that gives the highest quality cost data at the lowest information accumulation cost. A cost finding technique that is not described here can also be used, as long as it conforms with the general requirement for reliability in relation to the value of the cost data.

220309 Determination of Time and Cost

A. After the required time to perform each element of the final and intermediate cost objectives is determined, the costs associated

with each element must be determined. In addition, since real and capitalized personal property is involved, the contribution of these assets must also be determined. The extent to which the computations are necessary will depend on the accuracy measured in performing each action. Figure 22-2 in paragraph 220204 of this chapter illustrates the form that can be used to determine the total costs associated with a final cost objective.

B. Personnel costs are obtained from the following sources:

1. Civilian Personnel. Pay scales issued by the Office of Personnel Management.

2. Military Personnel. Standard military composite pay rates issued by the Military Departments. These standard rates recognize fringe benefits.

3. Civilian Personnel Fringe Benefits. These are determined using the add-on factors in Volume 11 of this Regulation.

C. Depreciation and Amortization of Capitalized Personal Property. Refer to Chapters 1 and 6 of this Volume, and Volume 11, Part III, of this Regulation for the Defense Business Operations Fund.

D. Depreciation and Amortization of Real Property. Refer to Chapters 1 and 6 of this Volume, and Volume 11, Part III, of this Regulation for the Defense Business Operations Fund.

ADDENDUM 1
CASE STUDY
Determination of the Costs
Associated With Paying A Contractor Invoice

This case study demonstrates the application of the various requirements contained in this chapter to determining the costs associated with paying a contractor invoice. The situation selected was chosen as being typical of the types of operations occurring within the Department of Defense for which comparisons between organizations can be made.

Paragraph 220201 of this chapter requires a clear statement that identifies the cost objectives to which cost-finding techniques are to be applied and the cost finding techniques to be applied, among other things. Such a statement is presented in Figure 22-3.

The intermediate cost objectives related to the final cost objective are listed in Figure 22-4. The list is at the summary level and serves as a basis for identifying the processes which must be examined in detail. The compilation is based on the guidance contained in paragraph 220202 of this chapter.

The organizational elements and their relationship to the intermediate and final cost objectives are identified in Figure 22-5. As described in paragraph 220203 of this chapter, it is developed using the organization chart and descriptions of organization functions. It also categorizes the installation's organizational units as direct (those that are involved in the final cost objective) and indirect. Those classified as indirect provide varying degrees of support to the organizational units that are identified as direct. It is not necessary for all direct activities to be a part of the same organizational activity.

The process flow associated with paying a contractor invoice, as described in paragraph 220203 of this chapter is illustrated in Figure 22-6. A comparison of this process flow chart with the organization chart in Figure 22-5 will identify organizations that may not be shown on the organization chart. For example, the contract administration activity is not shown on the organization chart and could be a part of supply operations. Similarly, the mail room might be part of base operations. These situations arise when the organization chart is at a higher level than the operation being costed.

The organizational activities realigned as direct and indirect for the purposes of this cost finding study are shown in Figure 22-7. This chart is provided as a basis for clearly identifying which activities are to be classified as direct activities, as described in paragraph 220203 of this chapter.

The cost elements to be considered in determining the relevant costs associated with this task are identified in Figure 22-8. They are based on figure 22-1 in paragraph 220204 of this chapter.

The personnel assigned to the direct activities associated with paying a contractor's invoice are listed in Figure 22-9. This information is necessary to support the determination of personnel costs as described in paragraph 220204 of this chapter.

Statistical information as to the equipment, real property, and supplies and materials used in performing the final and intermediate cost objectives is provided in Figure 22-10. In addition, the equipment is subdivided between capitalized and expensed equipment.

The personnel rates associated with the personnel assigned to the direct organization activities are summarized Figure 22-11. The costs associated with the final and intermediate cost objectives using the guidance in paragraph 220205 of this chapter concerning application of prescribed rates are computed and shown in Figure 22-12.

The source documents associated with the intermediate and final cost objectives are listed in Figure 22-13. Copies of each of these documents would be obtained and included as supporting documentation in the working papers associated with the cost finding task, as required in paragraph 220206 of this chapter.

A compilation of the time required to perform each of the various actions associated with processing a contractor invoice for payment is shown in Figure 22-14. The civilian or military grade for each person involved in the process, as well as the equipment used and the time each equipment was used also is identified. The requirements contained in paragraph 220207 of this chapter are addressed in Figure 22-14.

The costs associated with paying a contractor invoice are summarized in Figure 22-15.

ADDENDUM 1
STATEMENT OF PURPOSE
Determination of Costs
To Pay A Contractor's Invoice

A. **PURPOSE**

This effort is undertaken to determine the cost incurred by one DoD organization to pay a contractor's invoice. The information is required to identify the various types of activities involved and the related costs for comparison with similar costs incurred by other DoD organizations.

B. **COST OBJECTIVES**

The intermediate and final cost objectives associated with this effort include those required to administratively process contract documents, receiving reports and invoices and issue a check.

C. **ORGANIZATIONS INVOLVED**

Those organizational activities directly involved in processing the contract, processing invoices, mailing documents, and issuing checks will be classified as direct activities. All other activities are considered as indirect activities.

D. **COST ELEMENTS**

The cost elements in Volume 11 of this Regulation applicable to other Federal Agencies will be accumulated. The following cost elements to be identified for the purposes of this task include personnel (civilian and military), personnel benefits, communications, and supplies and materials.

E. **APPROACH**

Cost finding shall be used to establish the cost to pay a contractor invoice. Observation and questions shall be used to establish the sequence of observations. Time measurement shall be used to establish the time required to perform each action in the process. These techniques are considered the best approach because preliminary indications are that each action requires only a few minutes of any employees' time. In addition, the use of specific material, equipment and documents can be readily identified and measured. Personnel costs shall be based on hourly rates obtained from pay scales for civilian personnel, and standard military composite rates for military personnel.

FIGURE 22-3

ADDENDUM 1
FINAL AND INTERMEDIATE COST OBJECTIVES
TO PAY A CONTRACTOR INVOICE

FINAL COST OBJECTIVE:

Pay a contractor invoice

INTERMEDIATE COST OBJECTIVES:

Establish voucher file

Maintain voucher file

Receive receiving reports

Receive invoices

Compare invoice to receiving reports and contracts

Check to see whether proposed payment requires additional funding

Check to see if right of offset exists against amounts due the Government by the contractor

Prepare payment voucher

Schedule voucher for payment

Print check

Mail check

Record payment

Figure 22-4

ADDENDUM 1

ADDENDUM 1
ORGANIZATION HIERARCHY ASSOCIATED WITH
FINAL AND INTERIM COST OBJECTIVE

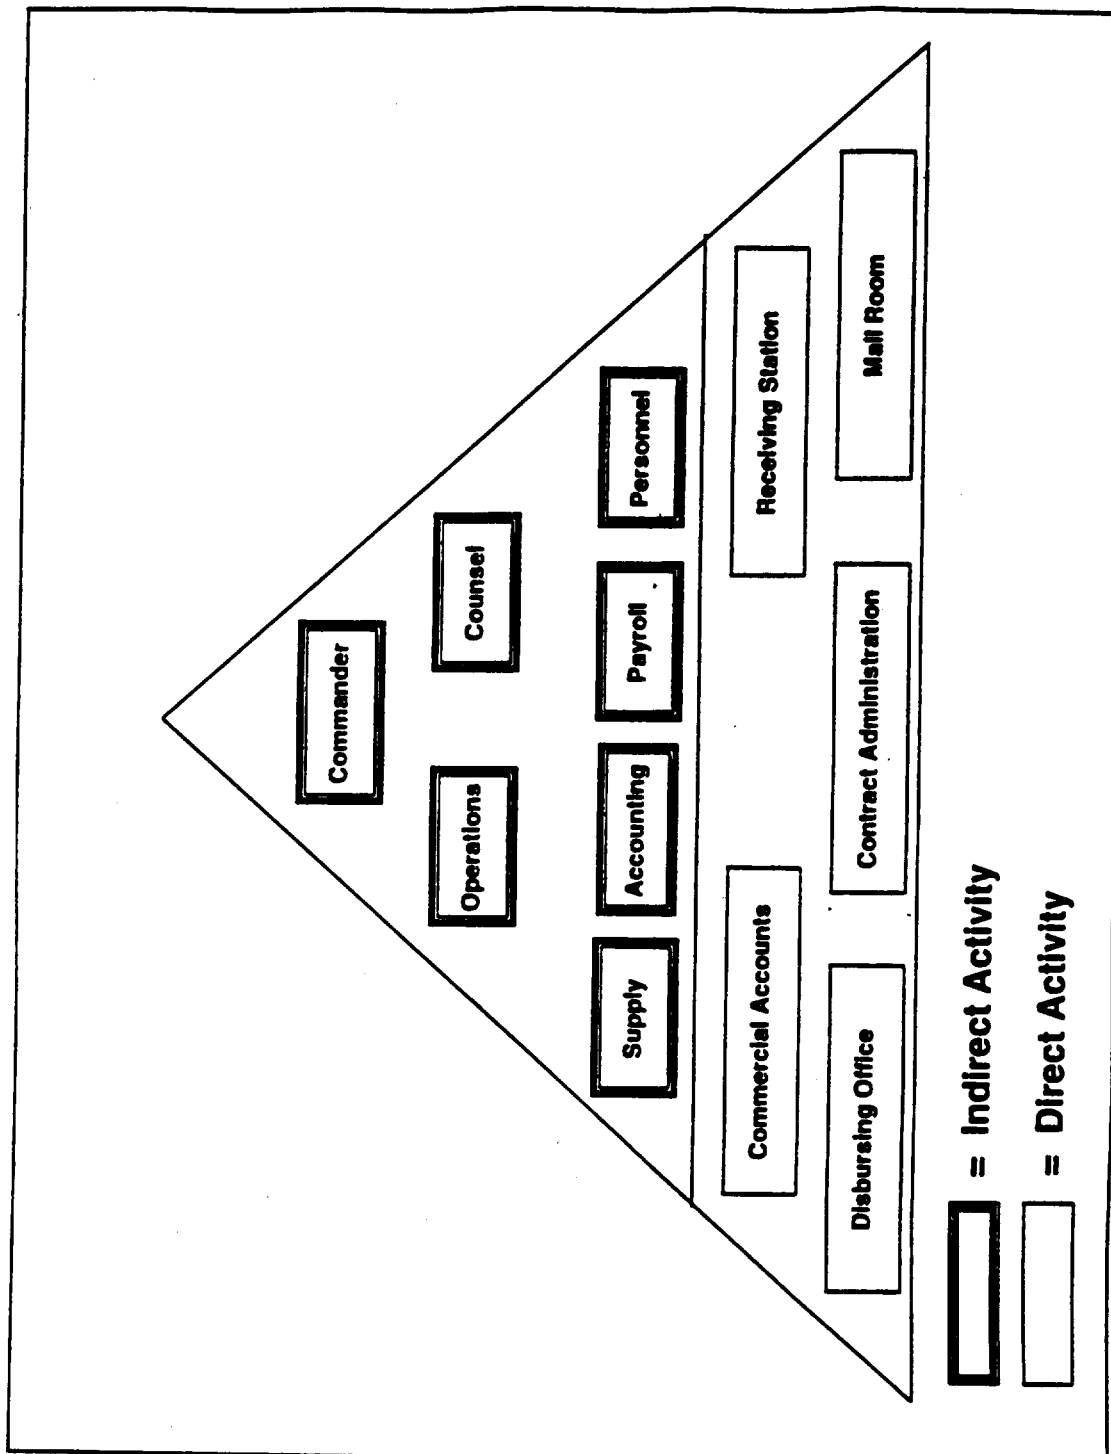

FIGURE 22-7

ADDENDUM 1
COST ELEMENTS

The cost elements potentially associated with the cost of issuing a check to a contractor are summarized as follows:

- (1) Personnel costs, both military and civilian.
- (2) Personnel benefits, both military and civilian.
- (3) Communications (telephone).
- (4) Supplies and materials.
- (5) Postage.
- (6) Utilities.
- (7) Equipment (depreciation).
- (8) Buildings (depreciation).
- (9) Leasehold improvements (amortization)
- (10) ADP Software (amortization)

ADDENDUM 1
EQUIPMENT AND REAL PROPERTY USED BY DIRECT ACTIVITIES
ASSOCIATED WITH FINAL COST OBJECTIVE
(CONTINUED)

Real Property:

1. Office space is converted warehousing constructed during 1956. Conversion was made in 1978 at a cost of \$755,000. Total amount of warehousing space converted was 35,768 sq. ft.
2. The receiving station is located in another warehouse constructed in 1961 at a cost of \$1,547,277.
3. Total warehouse space is 295,480 sq. ft. The office space occupied by the receiving stations was constructed at that time. No improvements have been made to the space since original construction.

Material and Supplies:

1. Standard price per 1,000 of any contract package (includes forms, instructions, and supporting addenda) is \$250.
2. Standard price per 1,000 of receiving report forms (DD 250) is \$35.
3. Standard price per 1,000 of legal size envelopes is \$9.50.
4. Standard price per 1,000 blank check stock is \$12.80.
5. Standard price of any accounting form, including voucher schedules is \$15.50.
6. Standard monthly prorated cost of office supplies is \$125. This includes adding machine tapes, correspondence paper, pencils, pens, etc.

Expensed Equipment:

1. When necessary, expensed equipment (desks, chairs, etc.) would have a prorated monthly charge of \$50 per office. This is a composite rate for all expensed office equipment.

Figure 22-13

<u>ADDENDUM 1</u> <u>TIME REQUIREMENTS</u> <u>TO PAY A CONTRACTOR INVOICE</u>	
	TIME REQUIRED (IN MINUTES)
<u>COMMERCIAL ACCOUNTS:</u>	
1. Receives contract from Contract Administration. Date and time stamps and sends to voucher clerk. (Date and time stamp machine used: 10 seconds) (GS-5 Secretary)	4
2. Establish contract file and insert contract. (Typewriter used: 1 minute) (Rotary Index File used: 15 seconds) (GS-6 Voucher examiner clerk)	7
<u>RECEIVING STATION:</u>	
1. Receives material and counts. (GS-3 Receiving clerk)	10
2. Prepares DD 250. (GS-3 Receiving clerk)	5
3. Delivers to Receiving Station Supervisor. (GS-3 Receiving clerk)	2
4. Receiving Stations Supervisor approves and sends to Commercial Accounts. (GS-8 receiving Station Supervisor)	8
<u>COMMERCIAL ACCOUNTS:</u>	
1. Receives receiving report from Receiving Station Supervisor; date and time stamps; sends to voucher examiner clerk. Date and time stamp machine used: 10 seconds) (GS-5 Secretary)	6
2. Voucher examiner clerk pulls contract file; reviews receiving report to assure that material received is what was ordered; determines that coding is correct. (Adding machine used: 20 seconds) (Rotary Index File used: 15 seconds) (GS-6 Voucher examiner clerk)	12

<u>ADDENDUM 1</u> <u>TIME REQUIREMENTS</u> <u>TO PAY A CONTRACTOR INVOICE</u>	
	TIME REQUIRED (IN MINUTES)
<u>MAIL ROOM:</u>	
1. Receives envelope from contractor; opens it; places in Commercial Accounts mail pouch (GS-3 Mail clerk)	4
2. Mail clerk delivers to Commercial Accounts. (GS-3 Mail clerk)	22
<u>COMMERCIAL ACCOUNTS:</u>	
1. Receives mail pouch from mail clerk; removes invoice from mail pouch; date and time stamps; sends to voucher examiner clerk. (Typewriter used: 2 minutes) (GS-5 Secretary)	7
2. Voucher examiner clerk pulls contract file; reviews invoice to assure that invoice agrees with contract and receiving report; determines that coding is correct. (Adding machine used: 22 seconds) (Rotary Index File used: 11 seconds) (GS-6 Voucher examiner clerk)	9
3. Audits voucher and prepares voucher for payment. (Adding machine used: 18 seconds) (GS-6 Voucher examiner clerk)	8
4. Schedules voucher for payment. (Typewriter used: 2 minutes, 35 seconds) (GS-6 Voucher examiner clerk)	5
5. Forwards voucher, together with supporting documents to supervisor for approval. (GS-6 Voucher examiner clerk)	3
6. Commercial Accounts supervisor approves voucher and gives to secretary for transmittal to the disbursing office. (GS-8 Supervisor)	4
7. Secretary gives voucher and supporting documents to Captain. (GS-5 Secretary)	2
8. Captain reviews, approves, and returns to secretary	6
9. Secretary inserts in disbursing office pouch. (GS-5 Secretary)	2
10. Voucher clerk delivers pouch to disbursing office. (GS-6 Voucher examiner clerk)	12
<u>DISBURSING OFFICE:</u>	
1. Receives pouch from voucher examiner clerk; opens pouch; delivers payment schedule to disbursing clerk. Date and times stamps documents. (Date and time stamp machine used: 10 seconds) (GS-3 Clerk)	3

<u>ADDENDUM 1</u> <u>TIME REQUIREMENTS</u> <u>TO PAY A CONTRACTOR INVOICE</u>	
	TIME REQUIRED (IN MINUTES)
2. Disbursing clerk reviews and schedules for check writing; gives package to supervisor for approval. (Typewriter used: 3 minutes, 18 seconds) (GS-5 Disbursing clerk)	6
3. Disbursing supervisor reviews and approves; gives to Captain. (GS-6 Supervisor)	4
4. Captain reviews, approves, and returns to disbursing supervisor.	4
5. Disbursing supervisor gives to Sergeant (E-5). (GS-6 Supervisor)	2
6. Sergeant gets blank check from safe; prepares check writer; prints check; gives to disbursing supervisor (Check writer used: 54 seconds)	18
7. Disbursing supervisor gives to Captain (GS-6 Supervisor)	2
8. Captain signs check and returns to disbursing supervisor.	3
9. Disbursing supervisor gives to Corporal (E-3). (GS-6 Supervisor)	2
10. Corporal prepares envelope and puts check in envelope.	4
11. Clerk receives envelop from Corporal and delivers to Mail Room. (GS-3 Clerk)	13
12. Corporal gives supporting documentation to disbursing supervisor.	4
13. Disbursing supervisor gives documents to clerk. (GS-6 Supervisor)	2
14. Clerk returns documents to Commercial Accounts. (GS-3 Clerk)	13
<u>COMMERCIAL ACCOUNTS:</u>	
1. Secretary receives documents from clerk; date and time stamps. (Date and time stamp machine used: 8 seconds) (GS-5 Secretary)	2
2. Secretary gives to voucher examiner clerk who files documents in contract file. (Rotary Index File used: 17 seconds) (GS-6 Voucher examiner clerk)	12

Figure 22-14

<u>ADDENDUM 1</u> <u>SUMMARY OF THE COSTS</u> <u>ASSOCIATED WITH FINAL COST OBJECTIONS</u> <u>ISSUE CHECK TO CONTRACTOR</u>		
<u>PERSONNEL COSTS (INCLUDING BENEFITS):</u>		
Military (6112,6114)	\$ 8.34	
Civilian (6111,6113)	34.56	
Total Personnel Costs		\$ 42.90
<u>CAPITAL EXPENSES:</u>		
Depreciation - Personal Property (6125)	-0-	
Depreciation - Real Property (6126)	-0-	
Amortization - Real Property Improvements (6128)	-0-	
Amortization - ADP Software (6128)	-0-	
Total Capital Expenses		-0-
<u>OTHER EXPENSES:</u>		
Travel of Persons (6116)	-0-	
Transportation of Things (6117)	-0-	
Rent, Communications, Utilities (6118)	-0-	
Printing and Reproduction (6119)	-0-	
Contractual Services (6120)	-0-	
Supplies and Materials (6121)	-0-	
Equipment (not capitalized 6122)	-0-	
All other expenses(6129, 6130, 6300, 6900)	-0-	
Total Other Expenses		-0-
TOTAL COSTS ASSOCIATED WITH FINAL COST OBJECTIVE		\$ 42.90

Note: Capital expenses and other expenses were not computed because neither category contributed a value that would meaningfully affect the outcome. Microfiche machines are used periodically when the number of documents ready to microfiche total several hundred. The Rotary Index files are used constantly and the amount of time allocable to document retrieval associated with a particular check is measured in terms of less than one minute. Real property occupied represented approximately 2 percent of total space and if allocated to the cost objective based on time required to process a check would be substantially less than \$1. Similarly the value of other expenses would be substantially less than \$1 (the standard price of the blank check would be \$.0128).

The general ledger accounts that are the source for the amounts reported are shown in parentheses.

Figure 22-15

CHAPTER 23

COST DISTRIBUTION FOR INFORMATION TECHNOLOGY FACILITIES2301 PURPOSE

230101 The purpose of this chapter is to provide accounting requirements and guidance applicable to cost distribution for information technology facilities. The term "information technology facility" (ITF) is used in this chapter in lieu of data processing facility, data processing installation, central design activity, computer center, data center, etc. It encompasses all resources used to provide data or information processing and telecommunications services. The chapter provides instructions for accounting for the full costs of operating ITFs, as required by OMB Circular No. A-130, "Management of Federal Information Resources."

230102 The identification of obligation data or service costs related to ITF operations can provide important information to organizational managers, ITF managers, and users that may result in more efficient operation and use of the ITF. Such information can show trends by which the efficiency of the services may be measured. Also, the cost identification process can demonstrate utilization and cost trends, develop user profiles, isolate information technology costs, improve planning, and become an important element in management's overall evaluation of the ITF. Obligation or cost data can be used to support budget exhibits and provide the information needed to support management decisions related to ITFs.

2302 REQUIREMENTS

230201 DoD Component accounting systems shall provide sufficient accounting support to ITFs for them to identify obligations or operating costs applicable to their operations. ITFs shall identify costs applicable to services provided to users if (a) services are provided to more than one organizational or accounting entity, (b) it operates one or more general management computers, and (c) it has annual operating costs or obligations greater than \$5 million. An ITF

shall identify costs applicable to services provided to users if it has an annual reimbursable program of more than \$500 thousand.

230202 The cost identification guidance in this chapter also can be used to support management needs to identify ITF costs related to the life cycle of an Automated Information System (AIS). For example, management must identify AIS program development and procurement costs to determine if the major AIS threshold, as defined in DoD Directive 8120.1, has been exceeded.

230203 Services provided under emergency conditions or reciprocal backup agreements are excluded from the service costing requirement. Defense Business Operations Fund activities that operate ITFs shall follow the guidance contained in this chapter for the ITF function and chapters 19 through 21 of this Volume, as applicable, for other functions.

2303 REIMBURSEMENTS

The specific policy applicable to the billing for ITF services is contained in Volume 11 of this Regulation. Volume 11 shall be followed to determine if an ITF should bill for its services and at what price. This chapter provides guidance to identify all costs associated with ITF services regardless of any billing requirements.

2304 DEFINITIONS

The following are definitions for certain terms used within this chapter:

230401 Cost Center. A logical or physical grouping of one or more similar services for the purpose of identifying obligations or developing the cost identification for the services. Services are grouped into cost centers in order to (a) normalize between services that use similar resources with different capabilities; (b) apply surcharges and discounts to services; (c) identify

costs for different classes of the same service; or (d) identify obligations. A software design team in a central design activity is an example of a cost center. One or more cost centers will make up an ITF. A cost center also can be referred to as a service center.

230402 Costs

A. Direct Costs. Any item of cost that is easily and readily identified to a specific unit of work or output within the ITF cost centers. Direct costs may include civilian and military personnel costs, supplies, materials, contract services, etc. (See Volume 11 of this Regulation.)

B. Indirect Costs. An item of cost that is incurred for more than one specific unit of work or output within the ITF, and, therefore, cannot easily and readily be identified to a single item and must be allocated. There are numerous allocation methods that can be used; however, indirect costs are normally allocated based on total direct costs or total direct labor costs. An example of indirect costs is the management personnel of a computer operations room that provides for the development, implementation and administration of all policy guidance and procedures for the computer operations room.

C. General and Administrative Costs (G&A). An item of cost that supports the total operation of the ITF not just selected cost centers. There are numerous allocation methods that can be used; however, G&A costs are normally allocated based on total direct costs or total direct labor costs. Examples of G&A costs are the front office of the ITF, administrative staffs, or general maintenance and repair expenses.

230403 General Management Computer. A general management computer is a digital computer that is used for any purpose other than as a part of a process control system, space system, mobile system, or equipment that is an integral part of a weapon or weapons system. Excludes equipment involved with intelligence activities and cryptologic national security activities.

230404 Information Technology Facility (ITF). An information technology facility is an organizationally defined set of personnel, hardware, software, and physical facilities, operated within or on behalf of the Department of Defense, a primary function of which is the operation of information technology. An ITF includes:

A. The personnel who operate computers or telecommunications systems; develop or maintain software; provide user liaison and training; schedule computers, prepare and control input data; control, reproduce, and distribute output data; maintain tape and disk libraries; provide security; and provide direct administrative support to personnel engaged in these activities.

B. The owned or leased computer and telecommunications hardware, including central processing units; associated peripheral equipment such as disk drives, tape drives, printers, and consoles; data entry equipment; telecommunications equipment including control units, terminals, modems, and dedicated telephone and satellite links provided by the facility to enable data transfer and access to users. Hardware acquired and maintained by users of the facility is excluded.

C. The software, including operating system software, utilities, sorts, language processors, access methods, data base processors, and similar multi-user software required by the facility for support of the facility and/or general use by users of the facility. All software acquired or maintained by users of the facility is excluded.

D. The physical facilities, including computer rooms, tape and disk libraries, stock-rooms and warehouse space, office space, and physical fixtures.

230405 Obligations. Amounts of orders placed, contracts awarded, services received, and similar transactions during a given period that will require payments during the same or a future period. Obligations are directly related to budget authority received for a given fiscal year, and the amounts of budget authority obligated

are reported monthly in budget execution reports. (See chapter 4 Volume 6 of this Regulation.)

230406 Service. A service is any work done by the ITF for a user or group of users.

230407 Unit of Service. A unit of service is the end product or unit used to measure the amount of service received by users. Examples of service units are central processing unit (CPU) time for a CPU service, pages printed for a printing service, direct labor hours expended to develop a software application or checks processed for a payroll service. The unit of service selected should be an accurate unit of the dominant type of work performed by the ITF. If a single unit cannot be determined, then the possibility of dividing the work into multiple services should be considered. For example, preparing a report by an ITF can require CPU time, data storage and retrieval, and printing. Total cost for the report may involve summing costs of each required service.

230408 User. A user is an individual, organizational or functional entity that receives ITF services. A user may be internal or external to the DoD Component.

2305 IDENTIFICATION OF OBLIGATION /COST DATA

The identification and recording of obligation or cost data for ITFs shall be in accordance with Volume 3 of this Regulation. Because detailed information on recording and reporting obligations and costs are contained throughout this Regulation, guidance will not be repeated here. Accounting support must be provided to ITFs so that they can identify obligation or cost data and report it when required.

2306 IDENTIFICATION AND ALLOCATION OF COSTS

230601 The identification and allocation of costs is a process by which the costs incurred by the ITF for providing its services are collected by function and related to the service unit being supported. The costs of direct functions are

directly related to the service unit they support. However, an allocation process is used to properly relate indirect and G&A costs to the appropriate service units. A full description of the allocation process must be documented. A description (including a schematic) of the allocation process that shows the relationships of the various cost center indirect and G&A costs should be available for review by appropriate authority and for user understanding of the allocation process.

230602 All costs associated with the operation of an ITF shall be distributed to the appropriate service units. Charges must be equitable to resources consumed and priority requested. Dedicated services are to be identified to specific users. For multi-user services, workload measurement tools should be used to insure ITF costs are equitably charged to users for all service units consumed. Within the ITF, further breakdowns shall be made to specific cost centers. Costs within these centers should be determined within a documented cost element structure. See figure 23-1 for a breakdown of potential information technology cost elements associated with an ITF. The identification and allocation process should be established by knowledgeable and informed people who are familiar with the particular ITF operation.

230603 The identification and allocation process must be reviewed periodically to ensure that no service has been inadvertently omitted or unnecessarily included.

230604 Where appropriate, e.g., cost center or completion of a process, specific units of service shall be established to produce a rate for each type of service provided. Figure 23-2 is an example of the possible types of information technology services being performed and their related unit(s) of service and workload measurements.

230605 All direct costs associated with an ITF shall be identified to the applicable function, service and cost centers. (See paragraph 230402.A, above, figure 23-3, and Volume 11 of this Regulation.)

230606 Indirect cost pools shall be established for each cost center to identify the indirect costs associated with each product or service within the cost center. These costs shall be allocated periodically based on an acceptable allocation method such as total direct costs or total direct labor costs. The allocation method applied must be documented.

230607 A G&A cost pool shall be established for an ITF. Applicable costs shall be identified to the G&A cost pool and periodically allocated based on an acceptable allocation method such as total direct and indirect costs. The allocation method applied must be documented.

230608 Indirect and G&A costs shall be evaluated periodically to verify cost type (that is, indirect or overhead), and adjust allocations to the applicable service units as necessary.

230609 A record shall be maintained to identify the users of an ITF and the services provided to each user. The total output of an ITF should be reconcilable with the work accomplished or produced by the ITF for each customer. Statements of charges or identification of ITF services to users shall be derived from records kept by the ITF. These records are needed for billing, verification of cost allocations, and for future planning and budgeting.

230610 Management control procedures for implementing this chapter are to be established and documented.

2307 RATE COMPUTATION

230701 Figure 23-4, "Information Needed to Define the Current Environment," provides some suggested actions or questions to be answered that may be helpful before beginning to develop rate computations.

230702 When developing rates, these points should be understood:

A. Services and their unit(s) of service should be easily understood by the ITF users.

B. Services should represent a significant portion of the ITF's work, and the

unit(s) of service should be a valid measure of the amount of work performed.

C. Services are not limited to equipment based units. Other services, especially personnel based services, are often costly and should be identified.

D. When possible, services that are transaction or output based should be selected so that the users can easily understand them.

E. Services and the cost collection/allocation process should be reviewed periodically to insure that rates are an accurate reflection of what it costs the ITF to provide each service. Policies and procedures need to be in place to facilitate this process.

230703 Rate development should follow a sequential procedure. Identified below are five basic steps that should be taken:

A. Step 1. Identify all costs associated with the ITF. The examples, Figures 23-5 and 23-5A provide sample cost data for two ITFs; one a central design activity (CDA) and the other a data processing installation (DPI). For ease in demonstration, only one productive cost center, along with the general and administrative cost center, was identified for each and is representative of an annual period. Additionally, the cost in each productive cost center is identified by the direct and indirect amounts.

B. Step 2.

1. For each productive cost center, identify the direct costs of each product and service by service unit. This is achieved by identifying the direct cost of all functions performed in support of products/ services produced and relating those costs to the service unit(s) supported. Note that the CDA has a service unit for customer direct pass through items. This includes travel, costs for testing, contractor support services, etc., performed for specific customers that should be reimbursed by the benefiting customers only.

2. Additionally, the units of work/workload should be identified since they are paramount in determining the level of resources required to support them. Initially, this may have to be estimated by informed personnel; however, after a given period of time, the information should be systematically gathered and documented from workload job accounting software packages and/or labor tracking systems as applicable. The total direct cost of each service unit and the associated units of work/workload for the DPI and CDA have now been determined. (See Figure 23-6)

C. Step 3. Indirect costs of each productive cost center must be allocated to the service units produced/supported in that cost center. Indirect rates for this allocation process are calculated by dividing the total indirect cost by the allocation base selected. In Figure 23-7, the allocation base selected is total direct costs for the DPI and direct labor costs for the CDA. Once the indirect rates have been calculated, they are used to allocate the indirect cost to each service unit supported within the cost centers. For the DPI, this is achieved by multiplying the total direct cost of each service unit by the indirect rate. For the CDA, this is achieved by multiplying the total direct labor costs of each service unit by the indirect rate. The example shows that the total indirect costs of \$475,000 and \$442,500 for the DPI and CDA respectively, have been fully allocated to all service units supported within each organization. The total indirect costs of each service unit/output for the DPI and CDA have now been determined.

D. Step 4. General and administrative (G&A) costs must be allocated to all services produced within the ITF. The G&A rate for this allocation process is calculated by dividing the G&A costs by the allocation base selected. In Figure 23-8, the allocation base selected for both the DPI and CDA is total direct plus indirect costs. Once the G&A rate is calculated, it is used to allocate the G&A costs to all service units provided by the ITF. This is achieved by multiplying the total direct plus indirect cost of each service unit by the G&A rate. The example shows that the total G&A costs of \$495,600 and \$403,200 for the DPI and CDA respectively, have been fully allocated to all service units supported within each organization. The total direct, indirect and G&A costs of each service unit for the DPI and CDA has now been determined.

E. Step 5. Establish the rate for each unit of service by dividing the total direct, indirect and G&A costs (Step 4) of each service unit by the associated units of customer work/workload required (Step 2). These rates incorporate the total costs of all cost centers in producing each product and service and the related service unit(s). Such rates should be verified periodically because they form the basis by which a customer is billed (in accordance with the reimbursement policy found in volume 11 of this Regulation) or by which costs can be identified and allocated for planning or budgeting (e.g., operating an automated information system (AIS) within a DPI or developing and/or modernizing an AIS within a CDA). (See Figure 23-9)

POTENTIAL COSTS ASSOCIATED WITH AN ITF

Personnel. Both civilian and military persons who manage and perform information technology (IT) functions. This includes work such as development and maintenance of computer software, operation and management of in-house data processing centers and departments, data preparation, electronic output reproduction and distribution, equipment maintenance, and contract management. It also includes persons performing IT related custodial services, security, and building maintenance. This also includes other personnel related costs for leave, holiday, fringe benefits, training, travel, and recruiting.

Equipment. Nonrecurring expenditures for acquisition and recurring costs for rental and leasing of computers, associated on-line and off-line IT equipment, and special purpose IT furniture. If the dollar value of equipment and its projected service life meet the capitalization criteria set forth in Chapter 1 and 6 of this Volume, or Volume 11B of this Regulation, depreciation may be applicable.

Computer Software. Nonrecurring expenditures for acquisition, development, and conversion and recurring expenses for rental and leasing of all types of software--operating, multipurpose, and application. If the dollar value of the software and its projected life meet the capitalization criteria in Chapter 1 and 6 of this Volume, or Volume 11B of this Regulation, depreciation may be applicable.

Space Occupancy. Funded and unfunded costs for (1) rental and lease of buildings and general office furniture, (2) building maintenance, (3) regular telephone service and utilities, and (4) custodial services and security.

Supplies. Expenditures for non-capital office supplies and general and special purpose data processing materials. Special purpose supplies are those prepared for one or a few applications. IT data storage media may be considered either supplies or items of equipment.

Contracted Services. Expenditures and contracting expenses for:

(1) Technical and consulting services for agency-operated computer facilities and equipment, including equipment maintenance; security and custodial services for computer facilities; finance and accounting; and advice on the acquisition, selection, and use of computer facilities or software.

(2) Computer system services and off-line equipment services such as key data entry, report reproduction, and testing.

(3) Analysis, design, programming, documentation, and testing for development, modification, conversion, and maintenance of computer software.

(4) Data communications network services, associated telecommunications line charges, channel lease and rental, equipment rental and maintenance, and telecommunications system analysis and design.

Services from Other Units or Agencies. The costs of other governmental agencies or organizational elements for those services cited under "Contracted Services," above.

Intra-agency Services and Overhead. The costs of normal agency support services and overhead, either billed or allocated, and the costs of central ADP management, policy, and procurement services.

FIGURE 23-3

INFORMATION NEEDED TO DEFINE THE CURRENT ENVIRONMENT

1. Describe the ITF hardware and software configuration.
2. Provide an organization chart that identify the lowest organizational entity within the activity.
3. List of functions performed by organizational entity.
4. Describe the various types of processing done (local applications, batch, on-line, real-time, etc.).
5. What are the staffing levels for the ITF (number of management personnel, programmers, analysts, operators, etc.)?
6. Provide an inventory listing of the ITF's hardware and software.
7. Explain how the ITF supports the various components within the agency, and provide numbers for the various types of users within each component.
8. Identify the products and services provided.
9. Does the ITF provide services to any outside users? If so, how many outside users are there and what percentage of the ITF workload does each comprise?
10. Identify customers and whether the ITF is being reimbursed by them for services provided. If yes, identify the amount by customer.
11. Have IT/ITF costs been isolated within the budget? To what level of detail?
12. What type of capacity planning currently is done? What are workload estimates based on? How often are these estimates updated?
13. Identify the prior year actual operating cost and any approved programmed budget changes.
14. Ascertain whether hardware/software is owned or leased.
15. Identify the workload measurement tools to collect the applicable utilization data, e.g. labor distribution system for a design activity.

FIGURE 23-4

SUMMARY OF CHANGES

Department of Defense Financial Management Regulation, Volume 5

Definitions

Definition 2. Adds a new definition for accountable individual.

Definition 15. Updates the definition of certifying officer to add pecuniary liability associated with certifications.

Definition 23. Revises the definition of commander to include United States Property and Fiscal Officer (National Guard).

Definition 27. Defines contingency operations.

Definition 29. Updates the definition of control to advise that authority to issue control checks terminated effective September 30, 1998.

Definition 35. Revises the definitions of currency use payments and U. S.-owned foreign currency, reflecting the fact that the Treasury requirement to make annual determinations of excess currencies was removed by Public Law 101-624.

Definition 40. Provides additional information on a delinquent debt.

Definition 47. Clarifies that checks are issued on the United States Treasury vice the Treasurer of the United States.

Definition 51. Defines Department of Defense (DoD) activities.

Definition 57. Revises the definition of Electronic Funds Transfer (EFT).

Definition 61. Defines facsimile signature.

Definition 62. Defines Financial Electronic Data Interchange (FEDI).

Definition 70. Revises the definition of an imprest fund.

Definition 85. Expands the definition of the On-Line Payment and Collection System (OPAC).

Definition 86. Adds a definition for operating location (OPLOC).

Definition 88. Defines original signature.

Definition 99. Expands the definition for a physical loss of funds.

Definition 104. Adds a definition for replacement check due to the elimination of control checks.

Definition 108. Adds a definition for safekeeping custodial officer.

Definition 111. Revises the definition of a spoiled check due to the elimination of control checks.

Definition 115. Updates the definition of Treasury General Account to make it consistent with the Treasury Financial Manual.

Definition 116. Updates the definition of U.S.-owned foreign currency to remove the references to excess and near-excess currency.

Definition 123. Corrects definition of a voided check.

Chapter 1

Subparagraphs 010202.A.1, 010202.C.1 and 010202.E.1. Revises these subparagraphs to identify the military pay system as Defense Joint Military Pay System (DJMS) and the Marine Corps Total Force Pay System (MCTFS) vice JUMPS.

Section 0103. Adds a new section establishing pre- and post-payment audit requirements for disbursement vouchers. Former sections 0103 through 0106 are renumbered 0104 through 0107 accordingly.

Subparagraphs 010403.B.2 and B.3, paragraph 010404, subparagraph 010502.A, 010502.B.2, paragraph 010503, subparagraph 010604.H. Changes were made to these paragraphs to reflect the transfer of General Accounting Office functions in regards to determining the responsible office for claims advance decisions, requests for relief of liability and waivers.

Subparagraph 010403.C.2. Adds the requirement for disbursing officers (DOs) to implement mandatory internal controls to facilitate successful EFT payments.

Paragraph 010505. Clarifies that only DFAS DOs are required to follow the DFAS Internal Management Control Program. It does, however, require that DOs in other DoD Components establish internal controls consistent with the guidance prescribed in this paragraph.

Chapter 2

Subparagraph 020102.E. Brings this subparagraph into agreement with section 0702 concerning check ordering/reordering timeframes.

Subparagraph 020105.B and paragraph 020106. Requires that the Department of the Treasury be notified upon commencement of disbursing operations or upon a change in designation or location of disbursing station symbol number.

Subparagraph 020201.C.3. Adds a Treasury Department requirement that once a disbursing station symbol number is deactivated, the symbol may not be used for any purpose other than

transactions necessary to settle the account. Former subparagraphs 020201.C.3 through 020201.C.6 are renumbered as 020201.C.4 through 020201.C.7.

Section 0203. Changes title to reflect the inclusion of all accountable positions in the guidance given for holding public funds.

Subparagraph 020305.A. Modifies this paragraph to advise all DOs to request at least one deputy DO position and that the DO must personally sign the request for all deputy positions.

Subparagraph 020305.C. Requires that the separation of duties provisions in paragraph 010506 are maximized when appointing deputy DOs.

Subparagraph 020402.A.8. Reiterates the Treasury Department requirement that deposit fund account **F3880 must be cleared as expeditiously as possible.

Paragraph 020901. Revises paragraph to state that section 0209 prescribes DoD policies and procedures for use of imprest funds.

Paragraph 020902. Revises paragraph to state the authority, effective date, and specific DoD policy on imprest funds. The revision provides the procedures and criteria for exceptions to, or deviations from the policy. The revision also provides alternatives to be used for making small purchases in lieu of imprest funds.

Paragraph 020903. Revises paragraph to be consistent with the policy for establishment of imprest funds as stated in paragraph 020902.

Subparagraph 020904.A. Corrects grammatical error.

Subparagraph 020904.B. Corrects grammatical error.

Subparagraph 020904.B.1. Revises subparagraph to be consistent with paragraph 020903 regarding declaration of overseas contingencies.

Subparagraph 020904.C. Corrects grammatical error.

Subparagraph 020904.C.4.a. Clarifies the restriction on use of imprest funds to make travel advances.

Subparagraph 020905.A. Specifies that the document approving establishment of an imprest fund must be kept on file with the document appointing the imprest fund cashier and prescribes the distribution of the documents.

Subparagraph 020905.B. Requires that a signed copy of the document approving establishment of an imprest fund and a signed copy of the document appointing the imprest fund cashier must be furnished to the disbursing officer to obtain an advance of funds.

Subparagraphs 020905.C, 020906.B, 020906.F.4, and 020906.G. Corrects grammatical errors.

Subparagraph 020906.I. Revises subparagraph to be consistent with the authority to establish an imprest fund as stated in paragraph 020902.

Paragraph 020907. Designates the Director for Financial Commerce, OUSD(C), as the approval authority through the Deputy Director for Finance, DFAS, for establishment of an imprest fund depository demand withdrawal account.

Subparagraph 020907.J. Makes the distribution of SF 1149 (Statement of Designated Depository Account) consistent with the authority to approve and establish an imprest fund as stated in 020902.

Paragraph 020908. Revises paragraph to make procedures for requesting deviation from imprest fund policies consistent with the policy stated in paragraph 020902.

Section 0210. Adds a new section titled Accommodation Checks. Renumbers sections 0210 and 0211 as 0211 and 0212 respectively.

Section 0211. (Formerly section 0210). Deletes the restriction on alternate paying agents in the absence of paying agents.

Section 0212. Former Section 0212 titled Certifying Officers deleted. Certifying Officer data is now located in chapter 33, August 1998.

Chapter 3

Subparagraph 030101.C. Specifies that EFT is the prescribed method of payment within the United States and its possessions.

Paragraph 030103. Revises this paragraph to specifically indicate that deputies, agents, and cashiers referenced therein refer only to deputies, agents, and cashiers of the disbursing officer.

Paragraph 030104. Clarifies that imprest funds and change funds are not to be included in the disbursing officer's request for cash holding authority.

Subparagraph 030105.A. Clarifies the inclusion of all deputies, agents, and cashiers of the disbursing officer when determining cash requirements.

Subparagraphs 030105.A.3 and 030105.A.4. Replaces the terms "frequent traveler" and "non-frequent traveler" with "cardholder" and "non-cardholder".

Subparagraph 030201.D.1. Clarifies the guidelines for submission of a cash verification team report.

Subparagraph 030302.B.3. Clarifies disbursing office security requirements.

Subparagraph 030305.B. Clarifies the meaning of paid vouchers representing cash to include vouchers representing payments and collections.

Subparagraph 030404.D. Specifies that unannounced inspections of change funds are required at least quarterly.

Section 0306. Deletes specific references to the American Express Travelers Check program and makes the information generic throughout.

Chapter 4

Subparagraphs 040105.B, 040105.D, and 040105.E. Adds restrictions for cashing multiple party checks.

Paragraph 040102 and subparagraph 040201.C. Includes credit unions among the list of financial institutions that issue negotiable instruments which disbursing officers are authorized to cash.

Subparagraph 040104.K. Adds the Under Secretary of Defense (Comptroller) requirement to provide cash to overseas branches of federal credit unions on DoD installations.

Subparagraph 040201.D.1.b.2. Deletes the restriction on having a two-lined stamp.

Section 0403. Clarifies the accountability of dishonored checks and brings the section (specifically paragraphs 040301, 040302, and 040303) in compliance with GAO guidance.

Section 040401. Clarifies the information in regards to offsetting gains and losses against the appropriate fiscal year.

Figure 4-2. Provides an example of DD Form 2761 (Personal Check Cashing Agreement),

Chapter 5

Subparagraph 050102.B. Clarifies the purpose and use of general depositaries for consistency with the Treasury Financial Manual.

Paragraph 050205. Combines former paragraphs 050205 and 050206 and incorporates Treasury Department requirements for reporting large deposits as announced in Transmittal Letter Number 563, dated April 16, 1996. The remainder of the section is renumbered accordingly creating new paragraphs 050206 through 050210.

Subparagraph 050301.A. Clarifies general preparation procedures for the SF 215, Deposit Ticket.

Section 0504. Rewrites the entire section on Deposit Reconciliation in lieu of new Treasury Guidelines.

Paragraph 050505. Updates the address for the Bureau of the Public Debt.

Paragraph 050705. Adds a paragraph of miscellaneous cases involving counterfeit or altered U. S. currency.

Chapter 6

Subparagraph 060301.A. Clarifies that wrongful conduct that results in a physical loss of funds is treated as a major loss, regardless of the amount involved. Also, specifies the same as it relates to disbursing personnel.

Paragraph 060307. Deletes the reference to the deposit fund account **F3878.

Paragraph 060401, subparagraphs 060402.C, 060402.C.1, 060402.C.2, paragraph 060503, and figure 6-1. Changes the dollar amount considered to be a minor loss of funds from \$25 to \$300.

Subparagraphs 060402.C.1.1 and 060402.C.2.o. Adds the requirement for a statement by the accountable individual as part of the investigatory report for a loss of funds.

Subparagraph 060402.G. Provides the appeal (rebuttal) process for individuals held liable for small losses.

Paragraph 060601. Changes the deposit fund account appropriation.

Paragraph 060601 and subparagraph 060602.F. Includes instructions for recording the final disposition of overages on the DD Form 2667.

Paragraph 060702.E.4, 060801, 060803, 060902, 060903, 061002, and figure 6-2. Changes were made to these paragraphs to reflect the transfer of General Accounting Office functions in regards to determining the responsible office for claims advance decisions, requests for relief of liability and waivers.

Paragraphs 061001 and 061003. A sentence was deleted from each paragraph which implied that the appointment of an investigating officer is optional when considering requests for relief.

Figure 6-4. Changes the example to reflect the clarification made to paragraph 060301.A.

Chapter 7

Paragraph 070103, 070104.B, and 070110. Deletes references to control checks.

Paragraph 070109. Deletes the requirement for a quarterly inventory.

Paragraph 070201. Adds quantity requirements for ordering U. S. Treasury check stock and Treasury check printing order cancellation notification requirements.

Paragraph 070202. Expands the emergency check process guidance for creating emergency check stock and its use under emergency conditions.

Subparagraph 070203.A. Updates the notification procedures for the shipment of Treasury checks by the printing contractor.

Paragraph 070302. Revises paragraph to incorporate Treasury requirements for reporting large disbursements as announced in Transmittal Letter Number 563, dated April 16, 1996.

Chapter 8

Section 0802, figure 8-2. Deletes references to control checks.

Subparagraph 080201.A. Changes the marking for a spoiled check. Spoiled checks no longer are sent to the Treasury Department; therefore, control numbers are no longer needed.

Subparagraphs 080201.B and 080203.C. Reflects the Treasury Department maximum size stipulation for shredded U. S. Treasury checks.

Subparagraph 080203.C.3. Changes the disbursing officer's file retention requirement for the Certificate of Destruction for U. S. Treasury checks.

Subparagraph 080403.A.2. Deletes the requirement to use registered mail for returning undelivered checks to the disbursing officer.

Subparagraph 080506.B. Clarifies some conditions for issuing a recertified check.

Paragraphs 080302, 080507, 080508, subparagraph 080508.B.7, paragraphs 080511, 080512, table 8-1, and table 8-2. Changes information therein necessitated by the Defense Check Reconciliation Module.

Subparagraphs 080508.A and 080705.A. Provides information for obtaining and using a perforated version of the SF 1184 (Unavailable Check Cancellation).

Chapter 9

Sections 0901 and 0902. These two sections are rewritten to reflect the requirement to use the Defense Check Reconciliation Module for check issue reporting.

Subparagraph 090403.B. Includes telephone numbers that cannot be used on check issue summary reports.

Paragraph 090404. The term "OPLOC" (operating location) replaces "FIPC" (financial input processing center) in specifying where Navy and Marine Corps check-issue reports are submitted.

Paragraphs 090405 through 090408. Removes references to control checks.

Chapter 10

Paragraph 100102. Revises paragraph to expand the definition of receipts.

Subparagraph 100105.B. Includes **X6875, deposit fund account, as a valid fund for depositing collections.

Subparagraph 100302.B. Clarifies information on clearing component bills.

Paragraph 100304. Cites the budget clearing account vice the deposit fund account when processing overages.

Paragraph 100307.C. Gives a more specific reference concerning safeguarding collections and supporting documents.

Subparagraph 100401.C. Cites the budget clearing account vice the deposit fund account when processing collections. Also cites provisions for using the Treasury Miscellaneous Receipt Account.

Chapter 11

Paragraph 110101. Specifies that EFT is the prescribed method of payment for all government disbursements within the Department of Defense.

Subparagraph 110102.A. Allows facsimile copies of travel vouchers and supporting documentation to be used in lieu of originals.

Subparagraph 110102.C. Identifies a more specific reference concerning storing vouchers.

Subparagraph 110302.A. Includes the SF 1081 as a form that may be used to disburse funds from the budget clearing account **F3875.

Section 1106. Adds a new section to incorporate Treasury Department requirements for advance reporting of large disbursements by check or EFT, advance reporting of U. S. military EFT payrolls, and daily reporting of EFT payments to vendors.

Section 1107. Adds a new section addressing paying invoices with the government purchase card, currently known as the International Merchant Purchase Authorization Card (IMPAC).

Chapter 12

Paragraph 120101, subparagraphs 120104.B and 120104.C, paragraph 120202, subparagraphs 120203.C and 120203.D, paragraph 120204, and subparagraph 120304.F. Revises these paragraphs to remove references to excess and near-excess currencies. Public Law 101-624

removed the requirement for the Treasury Department to make determinations of excess and near-excess currencies.

Paragraph 120201. Adds new subparagraph 120201.C to provide citation for specific financial policies and procedures prescribed by the USD(C).

Paragraph 120202. Subparagraphs 120202.B and 120202.C deleted. Subparagraph 120202.A renumbered as paragraph 120202.

Subparagraph 120203.A. Revises first sentence to state that consultation with the Treasury Department should be only when there are deviations.

Subparagraph 120203.B. Revises subparagraph to correct the requirement to indicate that all international agreements do not have to be notified to Director for Financial Commerce.

Subparagraph 120203.C. Renumbers subparagraph as paragraph 120204 to align the text with the section.

Subparagraph 120203.D. Renumbers subparagraph as paragraph 120205 to align the text with the section.

Paragraph 120204. Renumbers existing paragraph as subparagraph 120205.E since the delegation falls under the travel and transportation procedures.

Chapter 13

Paragraph 130302. Deletes the reference to excess and near-excess currencies in accordance with Public Law 101-624 which removed the requirement for the Treasury Department to make determinations of excess and near-excess currencies.

Subparagraph 130306.B. Updates the address and phone number for Citibank as it pertains to depositing instruments drawn on foreign banks payable in U. S. dollars through foreign banks.

Paragraph 130309. Revises the handling procedures for mutilated or unfit foreign currency.

Section 1304. Rewrites the entire section to clarify procedures for determining the Treasury Department prevailing rate of exchange for foreign currency. Additionally, deletes figure 13-3 and renumbers former figure 13-4.

Chapter 14

Paragraph 140102. Updates the address and phone number for the Financial Management Service as it pertains to requesting a limited depositary account.

Paragraph 140303. Adds the requirement to review local banking laws and Status of Forces Agreements when mailing checks outside of the country where the limited depository account is located.

Paragraph 140403 and subparagraph 140403.A. Removes references to control checks.

Chapter 15

Paragraphs 150104 and 150307. Deletes references to excess and near-excess currencies in accordance with Public Law 101-624 which removed the requirement for the Treasury Department to make determinations of excess and near-excess currencies.

Chapter 18

Subparagraph 180201.D. Removes the reference to control checks.

Chapter 19

Subparagraph 190102.A and paragraph 190105. Clarifies when DOs or their primary deputies are required to perform actual cash counts of negotiable instruments.

Subparagraph 190102.C. Adds a new provision to address submission of the DD Form 2665 by deputies, agents, and cashiers at remote locations.

Paragraphs 190104 and 190301. Clarifies that deputies, agents, and cashiers need to submit DD Forms 2665 only for the days during which they transact business.

Subparagraph 190204.H. Clarifies the requirements and procedures for reporting OPAC transactions on the DD Form 2657.

Subparagraph 190305.E. Adds information to clarify that subagent funds are to be included on the DD Form 2665.

Subparagraph 190309.E. Removes the reference to control checks.

Subparagraph 190503.A.6. Clarifies the requirements and procedures for reporting OPAC transactions on the SF 1219.

Subparagraphs 190506.C through 190506.C.4. Deletes these paragraphs because the Summary Report is no longer required.

Section 1906. Adds a new section to incorporate Treasury Department requirements for reporting large deposits and disbursements of military pay, military retired pay, and vendor pay by EFT.

Chapter 20

Paragraphs 200101 and 200204 and subparagraph 200403.G. Specifies that using registered or certified mail is not required when shipping disbursing officer reports and records.

Paragraph 200203 and subparagraph 200303.A. Deletes the reference to registry receipts for disbursing officer reports and records since shipment by registered or certified mail is no longer required.

Paragraph 200301, subparagraphs 200303.B, 200303.C, and 200303.D. Deletes the requirement to submit original vouchers.

Subparagraph 200303.C. Specifies that using registered or certified mail is not required when shipping disbursing officer vouchers.

Paragraphs 200501 and 200502. Changes the requirements for submitting financial reports for Navy disbursing officers.

Subparagraphs 200502.A and 200502.B. Deletes these subparagraphs as no longer applicable due to the change of requirements in paragraph 200502.

Chapter 22

Section 2201. The change directs a shared responsibility when the settlement function for a deactivated disbursing office is transferred between DFAS Centers.

Chapter 23

Paragraph 230402 and subparagraph 230402.C. Deletes references to excess and near excess currencies in accordance with Public Law 101-624 which removed the requirement for the Treasury to make determinations of excess and near-excess currencies.

Subparagraph 231001.E. Removes the requirement that military personnel must submit requests for release of savings bonds over an original signature only.

Chapter 24

Section 2402. Extensively updates the information on EFT. Paragraph 240201 is rewritten. New paragraph 240202 provides the implementing guidance to administer the DoD financial policy for mandatory EFT of all Federal payments. Former paragraph 240202 is renumbered as 240203. A new paragraph, 240204, is added to incorporate Treasury Department requirements for advance reporting of large disbursements by EFT. Former paragraph 240203 is renumbered as 240205 and additional mandatory EFT guidance is added. Lastly, another new paragraph, 240206, is added providing procedures to account for EFT payments that are returned by financial institutions.

Paragraph 240301. Updates the paragraph to reflect the new payment guidelines for vendors.

Section 2404. Adds a new section Government Purchase Cards.

Section 2405. Renumbers former section 2404 which is retitled Plastic Card Collections. The information therein is revised in its entirety.

Section 2406. Renumbers former section 2405.

Section 2407. Renumbers former section 2406 and updates the entire section concerning instructions and procedures for OPAC.

Chapter 25

Changes made throughout the chapter to reflect the transfer of General Accounting Office functions in regards to determining the responsible office for claims advance decisions, requests for relief of liability and waivers.

Chapter 26

Rewrites entire chapter to reflect substantial changes in the Automated Teller Machine (ATM) system.

Chapter 27

Changes made throughout the chapter to reflect changes in the ATM system.

Chapter 28

Paragraph 280101. Corrects reference to sovereign debt collection procedures.

Paragraph 280217. Adds additional information on collecting delinquent debts. Also adds a reference to the new figure 28-1.

Chapter 29

Section 2901. Adds new section which reiterates the applicability of the debt management procedures. Renumbers the rest of the chapter accordingly.

Subparagraph 290203.I. Deletes former subparagraph 290203.I and renumbers 290203.J.

Paragraph 290301. Clarifies the use of financial statements within the debt record.

Chapter 30

Section 3001. Adds new section which reiterates the applicability of the debt management procedures. Renumbers the rest of the chapter accordingly.

Paragraphs 300205, 200206, and 300405. Revises procedures for processing salary offsets for debts.

Paragraphs 300404, 300501, and 300503. Eliminates redundant procedures concerning validation and confirmation of debts by a DoD Component, or other federal agency, from which salary offset was requested.

Chapter 31

Section 3101. Adds new section which reiterates the applicability of the debt management procedures. Renumbers the rest of the chapter accordingly.

Paragraphs 310102, 310107, 310203, and 310204. Changes the word “will” to “may” in each instance concerning compromise or suspension of debt.

Paragraph 310303 and subparagraph 310303.C. Revises some information on debt close out.

Chapter 32

Section 3201. Adds new section which reiterates the applicability of the debt management procedures. Renumbers the rest of the chapter accordingly.

Appendix A

Subparagraphs A.2.f, A.2.g, B.4, B.4, B.15.a through B.15.g and C.4. Revises information therein to reflect the changes in the ATM system.

Appendix B

Adds a new address for the Head Office of the Federal Reserve Bank of New York.

Updates the information for the Jacksonville, FL branch of the Atlanta Federal Reserve.

Appendix C

Paragraph D and subparagraph E.3. Updates information due to the transfer of General Accounting Office functions in regards to determining the responsible office for claims advance decisions, requests for relief of liability and waivers.

Appendix D

Adds a new appendix, Navy Disbursing Operations, addressing Navy-unique disbursing functions.

Appendix E

Add a new appendix identifying the responsible offices for claims, advance decisions, requests for relief of liability and waivers.

FOREWORD

This Volume of the "Department of Defense Financial Management Regulation" is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures," dated November 15, 1992. It governs financial management by establishing and enforcing requirements, principles, standards, systems, procedures, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the Department of Defense. It directs financial management requirements, systems, and functions for all appropriated, working capital, revolving, and trust fund activities. In addition, it directs statutory and regulatory financial reporting requirements.

Volume 5 of the "DoD Financial Management Regulation" establishes policies and procedures for "Disbursing." This Volume applies to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff, the Combatant Commands, the Inspector General of the Department of Defense, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components").

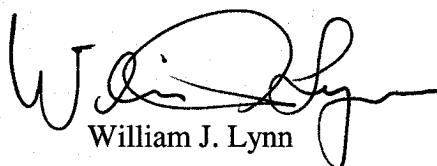

This Volume of the Regulation is effective immediately and is mandatory for use by all DoD Components. Heads of DoD Components shall ensure that it is adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives/regulations without the prior written approval of the Office of the Under Secretary of Defense (Comptroller).

The reporting requirements in this Regulation are exempt from licensing in accordance with paragraph E.4.f. of DoD 8910.1-M, "DoD Procedures for Management of Information Requirements," November 1986.

Recommended changes to and requests for deviations from or exceptions to the provisions of this volume of the Regulation should be forwarded through appropriate chain of command channels along with specific justification to:

Office of the Under Secretary of Defense (Comptroller)
Director for Financial Commerce
1100 Defense Pentagon
Washington, DC 20301-1100

All 15 volumes of the "DoD Financial Management Regulation" are available on the Internet at: <http://www.dtic.mil/comptroller/fmr/>. Printed or CD-ROM copies of the Regulation may be purchased through the Internet Homepage or directly from the Defense Automated Printing Service at 1401 S. Fern Street, Arlington, VA 22202, or by telephone at (703) 607-5212.

William J. Lynn

INTRODUCTION TO THE DOD FINANCIAL MANAGEMENT REGULATION

GENERAL

The DoD Financial Management Regulation identifies the policy, regulation, and procedures within the area of responsibility of the Under Secretary of Defense (Comptroller)(USD(C)). The Regulation is applicable to all DoD Components and consists of the following 15 volumes:

1. General Financial Management Information, Systems, and Requirements
2. Budget Formulation and Presentation
3. Budget Execution - Availability and Use of Budgetary Resources
4. Accounting Policy and Procedures
5. Disbursing Policy and Procedures
6. Reporting Policy and Procedures
7. Military Pay Policy and Procedures
8. Civilian Pay Policy and Procedures
9. Travel Policy and Procedures
10. Contract Payment Policy and Procedures
11. Reimbursable Operations Policy and Procedures
12. Special Accounts, Funds and Programs
13. Nonappropriated Funds Policy and Procedures
14. Administrative Control of Funds and Antideficiency Act Violations
15. Security Assistance Policy and Procedures

AUTHORIZATION

This Regulation is issued by the USD(C) under authority of Department of Defense Instruction 7000.14 “DoD Financial Management Policy and Procedures,” dated November 15, 1992.

PARAGRAPH NUMBERING SYSTEM

The paragraph numbering system of this Regulation is consistent for all 15 Volumes. The six digit paragraph number and its subparagraph designators are formulated as follows:

DEFINITIONS

1. Accommodation Exchange. The exchange of Treasury checks or U.S. dollar instruments for U.S. dollars (i.e. check cashing). Also, the exchange of U.S. dollars or dollar instruments for foreign currency for the convenience of authorized personnel, or where permitted, the exchange of foreign currencies for U.S. dollars or dollar instruments.
- ★2. Accountable Individual. As used in this Volume, the term “Accountable Individual” includes all personnel, whether military or civilian, who are certifying officers, accountable officials as defined in chapter 33, and disbursing officers. The term also includes deputy disbursing officers, agents, cashiers and other employees who by virtue of their employment are responsible for or have custody of government funds.
3. Administrative Hearing. In this context, the examination of debt documentation done in lieu of an oral hearing. Administrative hearings will be made by hearing officials who have been authorized to hold hearings for debts being reviewed.
4. Administrative Offset. In this context, the withholding of money payable by the United States to, or held by the United States for, a debtor to satisfy a debt the debtor owes the United States. Administrative offset includes offset from salary (pay).
5. Agent (of a Disbursing Officer). An individual who is acting under a formal letter of appointment from the disbursing officer. Agents are not authorized to sign U.S. Treasury checks. The duties of an agent usually consist of making cash payments and collections, performing check cashing services, and preparation of financial documents. Agents may be authorized to sign such other official documents attesting to transactions made by the agent as specifically designated in the appointment. In certain instances, the DFAS Centers may approve Treasury check issue authority for a disbursing agent who meets the minimum qualification requirements of a deputy disbursing officer and who is, in fact, appointed as a deputy.
6. Annuity. An annuity is the monthly benefit payable to an annuitant or survivor annuitant.
7. Authorized Personnel. All individuals authorized to purchase goods, supplies, and services from facilities controlled or sponsored by the U.S. Government that operate in a designated military payment certificate (MPC) area. U.S. Government facilities and personnel authorized to hold and use MPCs are categorized in Military Department and Combatant Command regulations. Encompasses all military and civilian personnel under the jurisdiction of the Department of Defense as well as authorized dependents either collocated with sponsors or located at safehaven areas during emergency evacuations.
8. Automated Teller Machines at Sea. A pay delivery system aboard Naval vessels that accepts an electronic transfer of net pay and allowances due to each account holder. The funds are then delivered at various machines located throughout the vessel.

9. Basic Agreement. An intergovernmental agreement negotiated with the government of a friendly nation that states, in general terms, the policies of Public Law 89-265, and authorizes the implementation of those provisions by mutual consent.

10. Canceled Check

a. Available Check. A check which is in the possession of the disbursing officer and is canceled due to non-entitlement or because it is mutilated or undeliverable.

b. Unavailable Check. A properly vouchered and issued check which is not held by the disbursing officer or payee (not received by payee, lost, or destroyed).

c. Mass Canceled Check. A Treasury check issued prior to October 1, 1989, which was automatically canceled by the Treasury Department if not cashed by October 1, 1990.

d. Limited Payability Canceled Check. A Treasury check issued on or after October 1, 1989 which is automatically canceled by the Treasury Department if not cashed within 12 months from the date of issue.

11. Cancellation. The process whereby an issued check that has not been presented for payment is put in a paid status in the Treasury Department's Check Payment and Reconciliation System.

12. Ca\$h-Link Identification Number. A nine-digit identification number used by the Federal Reserve Banks (FRB) and their branches as a part of their deposit reporting and cash concentration system. All deposits to an FRB or branch must indicate this nine-digit identification number in block 3 of the deposit ticket instead of the disbursing station symbol number. The identification number is derived by adding four leading zeroes to the symbol number and calculating a check-digit for the ninth position.

13. Cashier. A cashier can be a military member or DoD civilian employee designated by the disbursing officer to perform duties involving the handling of public funds. The recruitment, screening, and selection of persons for cashier positions should be accomplished with primary regard to the sensitive nature of the position.

14. Certificated Air Carrier. A U.S. air carrier that has been issued a certificate of public convenience and necessity under the provisions of Title 49, United States Code, section 1371.

★15. Certifying Officer. An individual designated to attest to the correctness of statements, facts, accounts, and amounts appearing on a voucher, or other documents. A certifying officer is pecuniarily liable for payments in accordance with 31 U.S.C. 3528.

16. Change Fund Custodian. A change fund custodian operates from an appropriated fund sales activity (e.g., dining hall, hospital, commissary) and is responsible for safeguarding the funds provided and may be held pecuniarily liable for any loss of the change fund.

17. Check Issue Discrepancies

a. General. A check issue discrepancy occurs when the issue amount reported by the disbursing office differs from the amount for which the check actually was issued as evidenced by the printed amount on the check itself when presented for payment.

b. Check Issue Overdraft

(1) Treasury Check. A check issue overdraft occurs when the amount printed on a check and paid by the Treasury is greater than the issue amount of that check as reported by the DO on the check issue report. A check issue overdraft also occurs when the amount printed on a check and paid by the Treasury is greater than the amount due as shown on the payment voucher.

(2) Limited Depositary Check. A check issue overdraft occurs when the amount printed on a check and paid by the Limited Depositary bank is greater than the issue amount of that check as reported by the DO on the check issue report. A check issue overdraft also occurs when the amount printed on a check and paid by the Limited Depositary bank is greater than the amount due as shown on the payment voucher.

a. Check Issue Underdraft

(1) Treasury Check. A check issue underdraft occurs when the amount printed on the check and paid by the Treasury is less than the issue amount of that check as reported by the DO on the check issue report. A check issue underdraft also occurs when the amount printed on a check and paid by the Treasury is less than the amount due as shown on the payment voucher.

(2) Limited Depositary Check. A check issue underdraft occurs when the amount printed on the check and paid by the Limited Depositary bank is less than the issue amount of that check as reported by the DO on the check issue report. A check issue underdraft also occurs when the amount printed on a check and paid by the Limited Depositary bank is less than the amount due as shown on the payment voucher.

18. Check Status Inquiry. An inquiry by a government agency as to the payment status of a check or a request for a copy of a check.

19. Claimability. The length of time a payee can present a claim of non-receipt, loss, or theft of a U.S. Treasury check to a government agency. Claims continue to be valid on an underlying obligation until expiration of the statute of limitations, normally for 6 years. If the payee's right to entitlement to funds has expired, the claim is denied.

20. Coin. Metallic specie representing either U.S. dollars and foreign currency units, fractional amounts, or multiples thereof.

21. Collection Agent. A collection agent is an individual who has been designated to perform duties relating to the collection of official funds, including funds held as safekeeping deposits, at a point other than a disbursing office. The individual designated as a collection agent must perform the collection duties under the general supervision of and as prescribed by the appointing officer. Responsibility for duties and functions should be segregated between receipt of funds, recordkeeping, determination of amount owed, and making demands on the debtor, so as to minimize opportunities for unauthorized, fraudulent, or otherwise irregular acts. Collection agents should not be involved with billing or accounting for funds received. Additionally, disbursing office personnel will not be designated as collection agents. A collection agent is appointed by the local commander.

22. Collections. All acquisitions of U.S. and foreign currencies except those acquired by the United States through purchase with dollars or accommodation exchange transactions.

★23. Commander. The term "Commander" as used in this Volume refers to a commander-in-chief, base or installation commander, commanding officer, officer-in-charge, director of the servicing DFAS Center, United States Property and Fiscal Officer (National Guard), or equivalent civilian head within the chain of command of the activity or individual concerned.

24. Consent. A term which means that a debtor has agreed to salary or administrative offset. Consent may be implied or in writing.

25. Continental United States (CONUS). Unless otherwise qualified, this term means the 48 contiguous states and the District of Columbia.

26. Contingency. As designated by the Chairman, Joint Chiefs of Staff (CJCS), an emergency involving military forces caused by natural disasters, terrorists, subversions, or by required military operations. Due to the uncertainty of the situation, contingencies require plans, rapid response, and special procedures to ensure the safety and readiness of personnel, installations, and equipment.

★27. Contingency Operation. A military operation designated by the Secretary of Defense in which members of the Armed Forces are or may become involved in military actions, operations, or hostilities against an enemy of the United States or against an opposing military force; or results in the call or order to, or retention on, active duty of members of the Uniformed Services under section 688, 12301(a), 12302, 12304, 12305, or 12406 of Title 10, chapter 15 of Title 10, or any other provision of law during a war or during a national emergency declared by the President or the Congress.

28. Contributed Currencies. Refers to currencies made available to the United States by foreign governments for administrative expenses of the Security Assistance Program in accordance with mutual security bilateral agreements.

★29. Control Check. A check without a preprinted serial number used to replace prenumbered check stock that is spoiled for any reason. Control checks are numbered in the bottom center with a control number. Authority to issue control checks terminated effective September 30, 1997.

30. Convening Authority. This term as used in appendix C, and the term "commander" as used in Chapter 6, in relation to the authority to appoint an investigating officer(s) or board(s) of officers to conduct investigations of losses of funds are synonymous. The "commander/convening authority" responsible for appointing an officer(s) or board(s) of officers to conduct investigations for losses of funds is the commander in the disbursing officer's chain-of-command who has command authority over all accountable individuals involved in a fiscal irregularity.

31. Country Use Currency. Currency in the custody of the participating foreign government which may be expended under mutual agreements for loans and grants within the country involved and is not controlled under the dollar appropriation process.

32. Credit Card Collections. A government-wide network established by the Treasury Department to enable the federal government to accept credit cards from the public to collect payment for sales, services, debts, etc.

33. Creditor Component or Agency. Any DoD Component, federal agency, or other official organization owed money or property.

34. Currency. Paper money in the form of U.S. dollars, foreign banknotes, and military payment certificates.

★35. Currency Use Payments (CUP). Foreign currency comprising a part of the purchase price of U.S. products or services (most generally U.S. surplus agricultural commodities) that, by agreement between the two nations, will remain in that country and be spent by that country.

36. Current Limited Depositary Check. A check unpaid and outstanding against the Limited Depositary checking account for any time less than one full fiscal year after the fiscal year in which the check was issued.

37. Debt. Any debt is any amount of money or any property owed to a DoD Component by any person, organization, or entity except another U. S. Government agency. Debts include insured or guaranteed loans and any other amounts due from fees, leases, rents, royalties, services, sales of real or personal property, or overpayments, penalties, damages, interest, fines and forfeitures, and all other claims and similar sources. Delays in processing employee elected coverage or a change in coverage under federal benefits programs and delays in processing ministerial adjustments are not normally considered debts if processing delays did not exceed 2 monthly or 4 biweekly pay periods. Fines and forfeitures arising under the Uniform Code of Military Justice are not subject to the due process provisions of this regulation. Amounts due a nonappropriated fund instrumentality are not debts owed the United States unless specifically included by this regulation.

38. Debt Compromise. The settlement of a debt for less than the full amount owed.

39. Default. The result when a debtor fails to make a debt payment by the due date.

★40. Delinquent Debt. The result if, after any dispute over the examination or amount of the Government's claim has been resolved administratively, it has not been paid by the due date specified in the initial demand letter, normally within 30 days, unless other satisfactory payment arrangements have been made by that date. A debt is delinquent any time thereafter if a debtor fails to satisfy obligations under a payment agreement. After receipt of that initial letter, there is a debt or claim, however, that debt would not be considered delinquent until any dispute over the existence or amount of the Government's claim has been resolved administratively and the claim is not paid by the specified due date.

41. Deposits-In-Transit System. A Treasury Department system that identifies, notifies, and possibly charges or credits disbursing officer (or bank) deposit discrepancies back to the disbursing officer.

42. Deputy Disbursing Officer. An individual appointed by the disbursing officer to act in the name of and for that disbursing officer to perform any and all acts relating to the receipt, disbursement, custody, and accounting for public funds. The disbursing officer making the appointment may restrict the acts a deputy is authorized to perform.

43. Direct Deposit System. Refers to the Electronic Funds Transfer of net pay and allowances, travel, and savings allotments for civilian or military personnel to their personal bank account. For military personnel, dependent's allotments may also be included.

44. Disbursing Agent. An agent to the disbursing officer that has not been appointed as a deputy disbursing officer. Generally, a disbursing agent operates a permanently located disbursing office of considerable size that is geographically separated from the disbursing officer's office, however the use of disbursing agents is not restricted to geographic separation from the DO.

45. Disbursing Office. An activity or the organizational unit of an activity whose principal function consists of the disbursement and collection of public funds. The term "disbursing office" includes both tactical and non-tactical disbursing activities. Each disbursing office will have a disbursing officer and at least one deputy position. Disbursing offices within DoD formerly were referred to as Finance and Accounting Offices (FAO), Accounting and Finance Offices (AFO), and Finance Offices (FO).

46. Disbursing Officer (DO). A military member or a civilian employee of a DoD Component designated to disburse moneys and render accounts according to laws and regulations governing the disbursement of public moneys.

★47. Disbursing Station Symbol Number (DSSN). A four-digit number assigned to each disbursing office by the Treasury Department. The DSSN is an identification number that indicates authority to receive and disburse public funds and issue checks on the United States Treasury.

48. Dishonored Instrument. Any negotiable instrument (other than a Treasury check) that becomes dishonored (returned by a depository) for any reason.

49. Disposable Pay. That amount which remains after pay (salary) is reduced by amounts which are:

- a. required by law to be deducted;
- b. properly withheld for federal, state, and local income taxes;
- c. deducted as health insurance premiums;
- d. deducted as normal retirement contributions; and
- e. deducted as normal life insurance premiums.

50. Doctrine of Laches. A legal term that is based upon neglect or omission to do what one should, thus warranting presumption that one has abandoned right or claim. That is, if a payee neglects or fails to file a timely request, the payor can presume that the payee has abandoned the claim.

★51. DoD Activity. As used in this volume, this term refers to a ship, camp, post, station, base, activity, unit, installation, or facility operating within the Department of Defense.

52. DoD Component. Includes the Office of the Secretary of Defense; the Chairman, Joint Chiefs of Staff and the Joint Staff; the Inspector General of the Department of Defense; the Military Departments including the Coast Guard when assigned to the Department of the Navy; Defense Agencies; DoD Field Activities; the Combatant Commands; the Uniformed Services University of the Health Sciences; and, all non-appropriated fund instrumentalities.

53. Duplicate Check. Two checks issued by the same DSSN with the same serial number.

54. Electronic Certification. An automated function that permits the secure, accurate, and rapid communication and certification of payment data. Electronic certification eliminates the highly labor-intensive processing of paper documents and allows DoD Components to generate and certify voucher schedules on microcomputers, and transmit the data over telephone lines. Payments are verified and accepted using message authentication technology.

55. Electronic Commerce. A wide range of financial functions which are performed using data communications techniques.

56. Electronic Data Interchange (EDI). The exchange of standardized information between business partners typically communicated electronically between computers. It is DoD policy that DoD Component EDI applications shall conform to the American National Standards Institute (ANSI), Accredited Standards Committee (ASC) X12 standard.

★57. Electronic Funds Transfer (EFT). Transfer of funds, other than a transaction originated by cash, check, or similar paper instrument that is initiated through an electronic terminal, telephone,

computer, or magnetic tape for the purpose of ordering, instructing, or authorizing a financial institution or authorized payment agent to debit or credit an account. The term includes, but is not limited to, automated clearing house transfers, Fedwire transfers, and transfers made at automated teller machines and point-of-sale (POS) terminals. The Automated Clearing House (ACH) network has consumer and corporate formats. The Department of the Treasury has determined that payments made by government-sponsored charge card are to be considered EFT.

58. Emergency Condition. Any situation resulting from war, armed aggression, or other hostilities against U.S. personnel or interests; and sudden, extensive natural or manmade disasters.

59. Employee. Employees are current or retired civilians paid from appropriated funds.

60. Exchange-for-Cash Check. A check issued by a disbursing officer to obtain cash funds for disbursements or in exchange for cash for official or accommodation purposes.

★61. Facsimile Signature. An impression of a signature made by a rubber stamp and authenticated by the initials of the certifying officer or the designated individual. A facsimile signature may also be a metal plate or other mechanical contrivance.

★62. Financial Electronic Data Interchange (FEDI). The Debt Collection Improvement Act of 1996 requires most government payments to be made by EFT beginning January 1, 1999. The term Financial Electronic Date Interchange refers to the electronic transfer of payments, payment related information (advice of payment) or other financial documents in a standardized computer-readable format. The payment information is usually provided through the use of EDI transaction sites and may accompany the EFT payment or be sent separately and reassociated to the payment by the payee.

63. Foreign Currency Fund Account. Accounts established for recording foreign currency acquired without payment of U.S. dollars abroad and which may be expended with or without charge to dollar appropriations. The short title for these accounts is “FT” accounts.

64. Foreign Exchange. Identifies the conversion (exchange) of foreign currencies; i.e., the legal monetary unit of a foreign nation and negotiable instruments, such as travelers checks, money orders, and bank drafts, payable in such monetary units.

65. Fraudulent Claim. Any claim against the government involving the presentation of false information, or misrepresentation on the part of a claimant or any other party having an interest in a claim.

66. Functional Area. Each individual element of a disbursing office (also known as subject matter areas) responsible for specific types of transactions. For example: Accounts Control; Travel; Military Pay; Commercial Services; Civilian Pay; or Fiscal.

67. General Depository. The financial institution (also called Treasury's General Account (TGA) Depositories) designated by the Treasury Department to accept deposits of cash and checks from specifically authorized disbursing officers.

68. Holder-in-Due-Course. A person, financial institution, or business other than the original payee who, in good faith, takes possession of a check through endorsement. A claim to payment by a holder-in-due-course will be honored, even if the original payee is not due or entitled to the check.

69. Illegal, Incorrect, or Improper Payment. An illegal, incorrect, or improper payment is defined as:

- a. an overpayment of a payee;
- b. two or more payments to a payee for the same entitlement;
- c. a payment to the wrong payee;
- d. a U.S. Treasury check issue over-draft (in some instances);
- e. a negotiation of both the original and a substitute U.S. Treasury check;
- f. a negotiation of both the original and a recertified U.S. Treasury check;
- g. any payment based on fraudulent, forged, or altered documents prepared or presented by individuals who do not work in the disbursing office; or
- h. a payment made in violation of a regulation.

★70. Imprest Fund. A cash fund of a fixed amount established by an advance of funds, with or without charge to an appropriation, from a disbursing officer to a duly appointed cashier, for disbursement as needed in making cash payment for relatively small purchases.

71. Imprest Fund Cashier. An individual appointed by the local commander to make authorized cash payments for materials or services. An imprest fund cashier is required to maintain custody of public funds and to file periodic vouchers to account for and replenish the imprest fund. Disbursing personnel are not eligible for appointment as imprest fund cashiers.

72. Irregularity in a Disbursing Officer's Account. Denotes any action (or lack thereof), event, practice, or circumstance that causes an out of balance condition in the financial accountability to the United States of the disbursing officer and/or deputies, agents, and cashiers to whom public funds have been entrusted.

73. Limited Depository. A U.S. or foreign commercial bank designated by the Treasury Department to receive deposits from disbursing officers for credit to their official limited depository checking accounts.

74. Limited Depositary Account. A checking account in a foreign currency maintained in a limited depositary by a disbursing officer in his or her name. Limited depositary accounts also may be referred to as operating accounts.
75. Lockbox. A collection and processing service provided by a financial institution to accelerate cash flow to Treasury's General Account (TGA).
76. Member. Military personnel on active duty or retired (including those receiving retainer pay) from active duty in a Military Service and Reserve Component personnel on active duty or retired.
77. Military Payment Certificate (MPC). An instrument (scrip) denominated in U.S. dollars that is used as the official medium of exchange at U.S. military establishments in overseas areas that are designated as "MPC Areas." MPCs are implemented, circulated, converted, withdrawn, and accounted for by series number. The notes of each MPC series have distinctive designs, colors, symbols, and numbering with each denomination (\$1.00, \$5.00, \$10.00 and \$20.00) within a series being a different color. Each note shall bear the statement "For use only in U.S. military establishments by U.S.-authorized personnel in accordance with applicable rules and regulations" and shall contain special coding or markings to verify its authenticity.
78. Military Payment Certificate (MPC) Area. A particular foreign country or other geographic or geopolitical area that has been officially designated as such by the USD(C).
79. Military Payment Certificate (MPC) Conversion. The authorized withdrawal of an MPC series currently in circulation as legal tender and the concomitant introduction and designation of a new MPC series as legal tender.
80. Military Payment Certificate (MPC) Reserve Series. MPCs of a series physically available but not placed in circulation as legal tender.
81. Military Post Office Addresses. Military post office addresses (APO and FPO) are required to be compatible with automated mail processing. The next to the bottom line will show a "Unit" or "Postal Service Center" number followed by a box number (if appropriate). This line will equate to the U.S. Postal Service's standard street address and apartment number format. The bottom line is required to be compatible with the U.S. Postal Service's standard city, state, ZIP Code format.
- a. APO and FPO replaces the "city" name.
 - b. The "state" abbreviation is shown below.
- (1) AE is the state designator for military post offices located in Canada, Europe, Africa, and the Middle East. For example, APO New York is now APO AE and FPO New York is FPO AE.

(2) AA is the state designator for military post offices located in Central and South America. For example, APO Miami is now APO AA and FPO Miami is FPO AA.

(3) AP is the state designator for military post offices located in Alaska and the Pacific area. For example, APO San Francisco and APO Seattle are now APO AP and FPO San Francisco and FPO Seattle are FPO AP.

82. Ministerial Adjustment. Any non-discretionary pay adjustment such as an adjustment prescribed by statute or regulation.

83. Non-tactical Disbursing Activity. Any disbursing activity permanently assigned to a post, camp, station, base, etc., and not subject to mobilization or deployment.

84. Officer or Military Officer. Includes all commissioned and warrant officers (appointed officers) of the Uniformed Services.

★85. On-Line Payment and Collection System (OPAC). An automated intragovernmental system, operated by the Treasury Department, and used for billing services and supplies.

★ a. OPAC Adjustments. A reversal of a transaction by the receiving agency up to but not to exceed the amount of the original transaction. Receiving agencies cannot reject OPAC transactions that have been processed by the Treasury Department. Adjustments are reported in the accounting month in which they are processed in OPAC.

★ b. OPAC Billing Agency. Generally, the agency originating a collection or receiving a payment transaction. NOTE: In the Treasury Department's Disbursing and Adjustment menu screens, the billing agency location code (ALC) represents the originator of the transaction.

★ c. OPAC Corrections. Refers to erroneous reporting on the SF 1219 (Statement of Accountability). The error can be caused by amounts being over or understated or by the failure of an agency to record the transaction in the proper month of accountability.

★ d. OPAC Customer Agency. The agency originating a payment or receiving a collection transaction. NOTE: In the Treasury Department's Disbursing menu screen, the customer ALC represents the agency receiving the transaction. In the Treasury Department's Adjustment menu screen, the Billing ALC of Original Bill field represents the agency receiving the adjustment transaction.

★86. Operating Location. A DFAS location within the United States under the command and control of a DFAS Center, performing finance and accounting functions in support of consolidation. Operating locations were established to house the consolidation efforts, missions, and functions of over 300 former defense accounting offices into a reduced number of locations.

87. Oral Hearing. An informal oral proceeding held by a hearing official with representatives of the creditor agency, the debtor or representative, and witnesses present.

- ★88. Original Signature. A manual signature in permanent dark blue, blue-black, or black ink.
89. Out of Service Debtor. A former civilian employee, a former member of the Armed Forces, or any other individual who is not receiving any compensation from the federal government.
90. Outstanding Check. A check is identified as outstanding when the Treasury Check Payment and Reconciliation (CP&R) system has the check recorded as issued but not paid.
91. Overage of Funds. Funds held in an amount greater than the amount shown to be on hand by the daily accountability records.
92. Overseas. For purposes of this Regulation, any area located outside the states of the United States, the District of Columbia, or the Commonwealth of Puerto Rico.
93. Paid Status. A check is identified as paid when it has been presented to the U.S. Treasury for payment through the banking system, reported as a void (zero value issue), or when it has been canceled.
94. Pay (Salary). In this Regulation, pay and salary have the same meaning. They include basic, special, incentive, retired, or retainer pay, consultant's fees, and any other authorized pay and allowances.
95. Pay Period. Pay periods are normally biweekly for civilians working for federal agencies; monthly for active duty military personnel and all retirees; or periodically based on completion of active or inactive duty for training for Reserve personnel.
96. Payability. The length of time a U.S. Treasury check can be negotiated.
97. Paying Agency. The DoD Component or other federal agency authorizing or disbursing payment.
98. Paying Agent. A military member or DoD civilian employee appointed by the commander to act as an agent of a disbursing officer. The purpose of a paying agent is to make specific payments, currency conversions, or check cashing transactions from funds temporarily advanced to the agent by the disbursing officer. Paying agents are individuals whose regular duties do not involve disbursing functions and who are not organizationally located in the disbursing office. They are appointed to the position of paying agent as a collateral duty and will be under the exclusive supervision of the disbursing officer in all matters concerning custody and disposition of funds advanced to them. They will comply with all instructions and regulations pertaining to their paying agent duties as issued by the disbursing officer. All payments or currency conversions made by a paying agent are made for and in the name of the disbursing officer making the appointment. Funds advanced to a paying agent are held at personal risk by the paying agent and must be accounted for to the disbursing officer immediately upon completion of the transaction(s) for which advanced.

★99. Physical Loss of Funds. A physical loss of funds is defined as:

- a. a loss of official cash by theft, embezzlement, unexplained disappearance, or cash handling errors;
- b. a loss of paid vouchers and/or negotiable instruments from a disbursing office;
- c. a loss of an official deposit en route from a disbursing office to a depository or after confirmation by a depository;
- d. any payment based on fraudulent, forged, or altered documents prepared or presented by individuals, both accountable and non-accountable disbursing personnel, who work in the disbursing office;
- e. a loss or theft of cash from an imprest fund;
- f. a failure to obtain (or loss of) official receipts and/or documents representing cash;
- g. a loss or destruction by fire, accident, or natural disaster;
- h. stale or unidentifiable DO suspense account charges (DITS); or
- i. losses associated with counterfeit currency transactions.

100. Prevailing Rate of Exchange. The most favorable rate that would be legally available to the U.S. Government for the acquisition of foreign currencies for its official expenditures and accommodation exchange transactions.

101. Recertified Check Payment. A replacement payment using a U.S. Treasury check bearing a different check serial number from the original check. A recertified check may be issued to replace any lost, stolen, or destroyed original check (except holder-in-due-course), regardless of the disbursement purpose (e.g., pay, travel, or vendor payment).

102. Reconsideration. A creditor organization review of the written debt record. The review will consider debtors' submissions and will result in a new determination as to debt validity and amount and propriety of an offset schedule established other than by agreement with a debtor.

103. Recovered Check. An original check which is returned to, or recovered by, the disbursing officer after it has been canceled by submission of an SF 1184 (Unavailable Check Cancellation). A recovered check can also be a recertified check which is returned to or recovered by the disbursing officer after the original check which it replaced has been negotiated by the payee.

★104. Replacement Check. A check issued to replace a check that:

- a. has been classified as voided;
- b. has not been reported to the Treasury Department as a check issue; and
- c. is uncashable or imperfect due to mutilation or misprint during the issue process.

A replacement check will be issued using the next available check in the series and format used for the voided check.

105. Routine Pay Adjustment. The correction of an overpayment to a member resulting from clerical or administrative error or delay in processing pay documents that is discovered and corrected (that is, collection action is completed) within no more than 2 monthly or 4 biweekly pay periods after the date the overpayment was originally made.

106. Salary Offset. The collection of a debt from the current salary (pay) of a debtor under 5 U.S.C. 5514 authority.

107. Settlement Office. A disbursing office designated to clear any outstanding transactions and/or deficiencies from the accounts of predecessor disbursing officers. The disbursing officer assigned to the settlement office is referred to as settlement officer.

★108. Safekeeping Custodial Officer. A military member or DoD civilian employee Department appointed in writing by the commander to perform all functions associated with the custody and control of all personal funds and valuables held in safekeeping as prescribed in chapters 26 and 27 of this Volume.

109. Small Differences. Refers to any check issue discrepancy (involving a Treasury check) that is \$1 or less.

110. Special Drawing Right (SDR). An international reserve asset created by the International Monetary Fund (IMF) to supplement the existing reserve assets of its member countries. The SDR is the IMF's unit of account and SDRs may be used by members in transactions with the IMF, other member countries, and other authorized holders. Since January 1, 1981, a basket of five currencies (the U.S. dollar, Deutschmark, French franc, Japanese yen, and Pound sterling) serves as the basis for determining both the valuation and the interest rate of the SDR.

★111. Spoiled Check. A check that:

- a. has been reported to the Treasury Department as a valid check issue;
- b. has been returned by the payee as uncashable due to mutilation or defect;
- c. represented a valid payment to the payee; and

- d. is less than one year old.

A spoiled check shall be replaced with a recertified check and rendered non-negotiable by typing or stamping on the face of the check the words: "SPOILED - NON-NEGOTIABLE: RECERTIFIED CHECK ISSUED UNDER CHECK NUMBER _____."

112. Supplemental Agreement. The local operating procedures formulated and used by the commanders of the armed forces of two friendly foreign nations, whose governments have signed a basic agreement, as contemplated under Public Law 96-436. Such procedures shall be used in territories of mutual concern to provide each other with emergency financial support, under the policies of the basic agreement. Supplemental agreements may be entered into by commanders of unified or separate armed forces, as considered appropriate.

113. Tactical Disbursing Activity. Any tactical unit (including Navy ships) that is authorized to provide disbursing services under an assigned Disbursing Station Symbol Number (DSSN) and is subject to movement from one location to another. Some tactical disbursing activities provide disbursing services on a full-time basis (as in the case of Navy ships). Others perform disbursing services only while in a deployed (or mobilized) status. When not deployed, the DSSNs are held in reserve in an inactive status to be activated on short notice as required.

114. Tolled. A term meaning "to suspend or stop temporarily", as the statute of limitations is tolled.

★115. Treasury General Account (TGA). Those designated commercial banks that specifically have been authorized by the Treasury Department to maintain a demand account in the name of Treasury entitled "Treasury's General Account" for the purpose of accepting deposits.

★116. U.S.-Owned Foreign Currency. Currency of a foreign country that is:

- a. owned by the United States;
- b. available in the country of issuance to pay obligations of the United States within that country; and
- c. disbursed by the U.S. Treasury disbursing officer in the country concerned, either directly to a contractor or to a DoD disbursing officer, as appropriate.

117. Uncurrent Limited Depositary Check. A check drawn on a limited depositary that is unpaid and outstanding against the limited depositary checking account for at least one full fiscal year after the fiscal year in which the check was issued, except where the laws of the country in which the limited depositary is located provide that the negotiable period of a check is shorter.

118. Undeliverable Check. A check that is not delivered to the payee within 60 days after the month of issue.

119. United States. Unless otherwise qualified, means the 48 contiguous states, the District of Columbia, and the States of Alaska and Hawaii.

120. United States Use Currency. Currency usually expended through the dollar appropriation process to pay U.S. obligations abroad; to pay for U.S. technical, scientific, and other programs; and to make sales for dollars to U.S. citizens and nonprofit organizations in selected countries.

121. Valuables. Any articles or things or representations of value in which the United States has any interest, or in connection with which it has any obligation or responsibility.

122. Vendor Express. A Treasury Department term for the Electronic Funds Transfer to a company or corporate bank account of the payment due a vendor for rendering goods or services to the government

★123. Voided Check. A check that is:

- a. prenumbered with a serial number;
 - b. voided for any reason prior to reporting as a check issue by the disbursing officer;
- and
- c. reported as a zero dollar value issue.

CHAPTER 1

PURPOSE, ORGANIZATION, AND DUTIES0101 PURPOSE

★ 010101. Authority. This volume of the “Department of Defense Financial Management” Regulation is issued under the authority of reference (a) DoD Instruction 7000.14, “DoD Financial Management Policy and Procedures.” It governs all DoD disbursing policy by establishing and enforcing requirements, principles, standards, responsibilities, procedures, practices, and liability for disbursing officers (DOs), certifying officers and accountable officials throughout the Department.

010102. Recommended Changes. Forward recommended changes to this volume through channels to: Office of the Under Secretary of Defense (Comptroller) (USD(C)), Room 3E822, The Pentagon, Washington, DC 20301-1100.

010103. Requests for Deviation or Exceptions. Submit requests for deviations from or exceptions to the policies, procedures, and standards in this volume, with complete justification, through channels to: Office of the USD(C), Room 3E822, The Pentagon, Washington, DC 20301-1100.

★ 010104. Use of This Volume. Various paragraphs in this volume specify the use of specific Treasury Department symbols (e.g., **F3880, **X6875, or **F3875). In all instances, the double asterisk must be replaced by the appropriate DoD Component designator, i.e., 17 for Navy (including Marine Corps), 21 for Army, 57 for Air Force, or 97 for Defense, as appropriate. This volume also prescribes the use of specific forms. Some of these forms are currently used by the DoD Components. However, some of the DoD Components are using specific DoD Component forms in lieu of the prescribed forms. In many instances, these equivalent forms are generated by disbursing systems currently in operation. It is not necessary for the DoD Components to modify existing disbursing systems to incorporate the forms prescribed by this volume. Affected Components should continue to use existing automated systems and the forms they generate until all existing disbursing systems are replaced by a standard DoD disbursing system. However, all offices that manually prepare forms are required to begin using the forms prescribed herein as soon as supplies of the forms can be obtained through normal supply channels. Examples of forms provided in this volume are for illustrative purposes only. Under no circumstances should they be reproduced for use.

0102 ORGANIZATION

010201. Defense Finance and Accounting Service (DFAS). Pursuant to the authority vested in the Secretary of Defense under the provisions of 10 U.S.C. 113 (reference (b)), the DFAS was established as an agency of the DoD by DoD Directive 5118.5 (reference

(c)). The DFAS is under the direction, authority, and control of the Under Secretary of Defense (Comptroller) (USD(C)). The Director, DFAS is the principal DoD executive for finance and accounting requirements, systems, and functions identified in DoD Directive 5118.3 (reference (d)) and shall:

A. Direct finance and accounting requirements, systems, and functions for all appropriated, nonappropriated, working capital, revolving, and trust fund activities, including security assistance.

B. Establish and enforce requirements, principles, standards, systems, procedures, and practices necessary to comply with finance and accounting statutory and regulatory requirements.

C. Provide finance and accounting services for DoD Components and other Federal activities.

D. Direct the consolidation, standardization, and integration of finance and accounting requirements, functions, procedures, operations, and systems and ensure their proper relationship with other DoD functional areas.

E. Execute statutory and regulatory financial reporting requirements and render financial statements.

F. Approve the establishment or maintenance of all finance and accounting activities independent of the DFAS.

The mailing address for DFAS Headquarters is: Director, Defense Finance and Accounting Service, DFAS-HQ/___, 1931 Jefferson Davis Highway, Arlington, VA 22240-5291.

010202. Defense Finance and Accounting Service Centers. Effective January 20, 1991, the DFAS took operational control of the DoD Component's finance centers. Accordingly, each center was redesignated as a DFAS Center.

A. DFAS-Cleveland Center. The DFAS-Cleveland Center (formerly the Navy Finance Center, Cleveland, OH) is responsible for:

★ 1. Operation of the central site processing operations of the Defense Joint Military Pay System (DJMS) for the Navy.

2. Navy allotment program operations relating to payment of allotments and issuances of the U.S. Savings Bonds for all Navy members and retirees.

3. Examining and conducting a centralized program for the analysis of closed Navy master military pay accounts.

4. Payment of Federal income taxes withheld from Navy members and retirees.
5. Adjudication and payment of claims for military pay and allowances of Navy members and retirees.
6. Payment of drilling Naval Reservists.
7. Payment of retired military pay for all DoD Components and Fleet Reserve rolls.
8. Preparing and forwarding to the Treasury Department through DFAS Headquarters (Finance) (DFAS-HQ/F) requests from assigned Component(s) for establishment of disbursing offices.
9. Preparing and forwarding to the Treasury Department through DFAS-HQ/F requests from assigned Component(s) for a change in the designation or location of disbursing offices.
10. Preparing and forwarding to the Treasury Department through DFAS-HQ/F requests and notifications from assigned Component(s) for disestablishment of disbursing offices.
11. Maintaining files containing appointments, revocations, and specimen signatures of all assigned DOs and deputies.
12. Approving the use of check-signing machines and the certified facsimile signatures for all assigned DOs. After approval, notifying the DO that use of the check-signing machine and facsimile plate is authorized.
13. Providing copies of specimen signatures of assigned DOs to the Federal Reserve Banks on request.
14. Processing purchase orders for blank U.S. Treasury checks from all assigned DOs.
15. Reporting of financial information.
16. Accounting for Navy funds and property.
17. Consolidation of Navy and Marine Corps financial reports.

18. Providing a centralized service for clearance of exceptions against Navy DOs.
19. Processing requests for relief of liability from accountable officials.
20. Performing other accounting and disbursing functions as prescribed.

The mailing address is: Defense Finance and Accounting Service, Cleveland Center, DFAS-CL/___, Cleveland, OH 44199-2056.

B. DFAS-Columbus Center. The DFAS-Columbus Center (formerly Defense Finance Center, Columbus, OH) is responsible for:

1. Payment of vendor's invoices.
2. Payment of civilian payrolls.
3. Accounting for funds and property.
4. Preparing and forwarding to the Treasury Department through DFAS-HQ/F requests from assigned Component(s) for establishment of disbursing offices.
5. Preparing and forwarding to the Treasury Department through DFAS-HQ/F requests from assigned Component(s) for a change in the designation or location of disbursing offices.
6. Preparing and forwarding to the Treasury Department through DFAS-HQ/F requests and notifications from assigned Component(s) for disestablishment of disbursing offices.
7. Maintaining files containing appointments, revocations, and specimen signatures of all assigned DOs and deputies.
8. Approving the use of check-signing machines and the certified facsimile signatures for all assigned DOs. After approval, notifying the DO that use of the check-signing machine and facsimile plate is authorized.
9. Providing copies of specimen signatures of assigned DOs to the Federal Reserve Banks on request.
10. Processing purchase orders for blank U.S. Treasury checks from all assigned DOs.

11. Reporting of financial information.
12. Processing requests for relief of liability from accountable officials.
13. Performing other accounting and disbursing functions as prescribed.

The mailing address is: Defense Finance and Accounting Service, Columbus Center, DFAS-CO/__, Columbus, OH 43218-2317.

C. DFAS-Denver Center. The DFAS-Denver Center (formerly Air Force Accounting and Finance Center, Denver, CO) is responsible for:

- ★
1. Operation of the central site processing operations of the DJMS for the Air Force.
 2. Air Force allotment program operations relating to payment of allotments.
 3. Examining and conducting a centralized program for the analysis of closed Air Force personal financial records.
 4. Payment of Federal income taxes withheld from Air Force members.
 5. Adjudication and payment of claims for military pay and allowances for Air Force members.
 6. Payment of drilling Air Force reservists.
 7. Payment of civilian payrolls.
 8. Providing a centralized service for clearance of exceptions against Air Force DOs.
 9. Payment of annuitant pay.
 10. Examination and consolidation of Air Force DO's financial reports.
 11. Preparing and forwarding to the Treasury Department through DFAS-HQ/F requests from assigned Component(s) for establishment of disbursing offices.

12. Preparing and forwarding to the Treasury Department through DFAS-HQ/F requests from assigned Component(s) for a change in the designation or location of disbursing offices.

13. Preparing and forwarding to the Treasury Department through DFAS-HQ/F requests and notifications from assigned Component(s) for disestablishment of disbursing offices.

14. Maintaining files containing appointments, revocations, and specimen signatures of all assigned DOs and deputies.

15. Approving the use of check-signing machines and the certified facsimile signatures for all assigned DOs. After approval, notifying the DO that use of the check-signing machine and facsimile plate is authorized.

16. Providing copies of specimen signatures of assigned DOs to the Federal Reserve Banks on request.

17. Processing purchase orders for blank U.S. Treasury checks from all assigned DOs.

18. Reporting of financial information.

19. Processing requests for relief of liability from accountable officials.

20. Performing other accounting and disbursing functions as prescribed.

The mailing address is: Defense Finance and Accounting Service, Denver Center, DFAS-DE/____, 6760 E. Irvington Place, Denver, CO 80279-1500.

D. DFAS-Indianapolis Center. The DFAS-Indianapolis Center (formerly Army Finance and Accounting Center, Indianapolis, IN) is responsible for:

1. Operation of the central site processing operations of the DJMS for the Army.

2. Army allotment program operations relating to payment of allotments.

3. Examining and conducting a centralized program for the analysis of closed Army personal financial records.

4. Payment of Federal income taxes withheld from Army members.

5. Adjudication and payment of claims for military pay and allowances of Army members.
6. Payment of drilling Army reservists.
7. Providing a centralized service for clearance of exceptions against Army DOs.
8. Examination and consolidation of Army DO's reports.
9. Preparing and forwarding to the Treasury Department through DFAS-HQ/F requests from assigned Component(s) for establishment of disbursing offices.
10. Preparing and forwarding to the Treasury Department through DFAS-HQ/F requests from assigned Component(s) for a change in the designation or location of disbursing offices.
11. Preparing and forwarding to the Treasury Department through DFAS-HQ/F requests and notifications from assigned Component(s) for disestablishment of disbursing offices.
12. Maintaining files containing appointments, revocations, and specimen signatures of all assigned DOs and deputies.
13. Approving the use of check-signing machines and the certified facsimile signatures for all assigned DOs. After approval, notifying the DO that use of the check-signing machine and facsimile plate is authorized.
14. Providing copies of specimen signatures of assigned DOs to the Federal Reserve Banks on request.
15. Processing purchase orders for blank U.S. Treasury checks from all assigned DOs.
16. Reporting of financial information.
17. Processing requests for relief of liability from accountable officials.
18. Performing other accounting and disbursing functions as prescribed.

The mailing address is: Defense Finance and Accounting Service, Indianapolis Center, DFAS-IN/_
_, Column _____, 8899 E. 56th Street, Indianapolis, IN 46249-0833.

E. DFAS-Kansas City Center. The DFAS-Kansas City Center (formerly Marine Corps Finance Center, Kansas City, MO) is responsible for:

- ★
 - 1. Operation of the central site processing of the Marine Corps Total Force Pay System (MCTFS) for the Marine Corps.
 - 2. Marine Corps allotment program operations relating to payment of allotments.
 - 3. Examining and conducting a centralized program for the analysis of closed Marine Corps personal financial records.
 - 4. Payment of Federal income taxes withheld from Marine Corps members.
 - 5. Adjudication and payment of claims for military pay and allowances of Marine Corps members.
 - 6. Payment of drilling Marine Corps Reservists.
 - 7. Providing a centralized service for clearance of exceptions against Marine Corps DOs.
 - 8. Examination and consolidation of Marine Corps DO's reports.
 - 9. Reporting of financial information.
 - 10. Preparing and forwarding to the Treasury Department through DFAS-HQ/F requests from assigned Component(s) for establishment of disbursing offices.
 - 11. Preparing and forwarding to the Treasury Department through DFAS-HQ/F requests from assigned Component(s) for a change in the designation or location of disbursing offices.
 - 12. Preparing and forwarding to the Treasury Department through DFAS-HQ/F requests and notifications from assigned Component(s) for disestablishment of disbursing offices.
 - 13. Maintaining files containing appointments, revocations, and specimen signatures of all assigned DOs and deputies.

14. Approving the use of check-signing machines and the certified facsimile signatures for all assigned DOs. After approval, notifying the DO that use of the check-signing machine and facsimile plate is authorized.

15. Providing copies of specimen signatures of assigned DOs to the Federal Reserve Banks on request.

16. Processing purchase orders for blank U.S. Treasury checks from all assigned DOs.

17. Processing requests for relief of liability from accountable officials.

18. Performing other accounting and disbursing functions as prescribed.

The mailing address is: Defense Finance and Accounting Service, Kansas City Center, DFAS-KC/_ , Kansas City, MO 64197-0001.

010203. DoD Disbursing Offices. Commanders shall ensure that DOs in their command are following the provisions of this Volume.

010204. Disbursing Officers. The DO shall ensure that the operation of the disbursing activity follows the provisions of this Volume.

010205. Certifying Officers and Accountable Officials. Commanders shall ensure those certifying officers and accountable officials in their command are following the provisions of this Volume.

★0103 RANDOM REVIEW OF DISBURSEMENT VOUCHERS

010301. Examination Requirements

A. General. Overall guidelines for the administrative examination of disbursement vouchers is set forth in Title 7 of the General Accounting Office (GAO) Policy and Procedures Manual. These types of reviews are typically divided into either pre-or-post-payment examinations. The pre-payment phase is needed because internal controls are provided through administrative reviews made by disbursing officers prior to payment. The post-payment phase will begin when supervisory reviews and automated edit checks and computation methods have been demonstrated to provide adequate controls. The overall scope of pre-and post-payment reviews is to ensure the propriety of the voucher, the legality of the disbursement and the accuracy of the facts stated in the vouchers and supporting records. The following paragraphs set forth the requirements for both pre-and post-payment examinations of disbursement vouchers.

B. Sampling Techniques. Stratified statistical random sampling techniques will be used in the pre- and post-payment examination phase of disbursement vouchers. Pre- and post-payment examination procedures and accompanying statistical sampling plans will be approved by the Director, DFAS, or a designated representative, prior to implementation. The Director, DFAS, or a designated representative, will issue detailed implementing instructions for pre- and post-payment reviews and sampling plans for specific applications to DFAS Centers or Operating Locations (OPLOCs) and applicable DoD Components.

C. Reliance on Approved Statistical Sampling Procedures. Certifying officers who rely, in good faith, upon valid statistical procedures to certify a voucher for payment, established and approved by the Director, DFAS, or a designated representative, will not be liable for losses from the payment of a voucher not examined because of the sampling procedure used. A disbursing official shall not examine vouchers administratively for which he/she is responsible for approving or executing payment.

010302. Pre-Payment Examination Requirements. A pre-payment examination is defined as an administrative review that takes place just prior to the voucher being examined for payment. The overall scope of the review is to ensure that the voucher contains the necessary substantiation and documentation for lawful and proper payment. Under manual processing systems, the review will also encompass a verification for accuracy of computation. Some specific areas that should be examined include, but are not limited to:

- A. Validating that the payment is permitted by law and applicable regulation
- B. Obtaining the required administrative authorizations and approvals for payment
- C. Assuring that the request for payment is supported by basic documents
- D. Validating the correct name and address of the payee, as verified by the database
- E. Assuring that manual calculations are correct or appropriate and correct data is inputted to automated computation systems
- F. Charging all transactions properly to the correct appropriation
- G. Assuring that the appropriations are available at the time to support the disbursements
- H. Validating that special certificates or receipts are furnished and attached to the disbursement documents, as required

I. Preventing duplicate payments through proper manual or automated edits and checks

010303. Post-Payment Examination Requirements. A post-payment examination is defined as an administrative review that takes place following the payment of a voucher. These reviews normally will take place at the location where original returns are submitted to a servicing DFAS Center, OPLOC, or a centralized payment center. Also, these reviews will be performed by persons who are independent of the particular entity that prepared and disbursed the payments being examined. Some specific areas that should be examined include, but are not limited to the:

- A. Propriety of the voucher
- B. Legality of the disbursement
- C. Accuracy of the facts stated in the vouchers and supporting records

010304. Document Retention for Examination Purposes. Disbursement vouchers and original documentation prepared at locations other than a DFAS Center or OPLOC should be maintained at the originating location for a period of 6 years and 3 months.

010305. Statistical Sampling Plan. Any statistical sampling plan for pre-and post-payment review of disbursement vouchers will be approved by the Director, DFAS, or a designated representative. Sampling plans must be methodically sound and adhere to technical guidelines set forth in professional texts and publications (both Federal and non-Federal) on the subject matter. All sampling plans submitted for approval will first be reviewed and approved (or in most cases, originally prepared) by a qualified statistician. Once established, sampling and examination plans should be prepared in such a manner as to be implemented and administered by individuals at the functional level. As changes occur in the population under review, whether procedural, technological, or otherwise, quite often audit and accompanying sampling plans must change as well. Statistics collected from sampled population must be periodically analyzed and the sample design adjusted accordingly to reflect most recent trends and any changes in characteristics of the population. The Director, DFAS, or a designated representative, periodically will review statistics and population characteristics from pre- and post-payment examinations to ensure the sample design remains valid, reliable, and most appropriate for the purpose of examination.

010306. Responsibilities. The Director, DFAS, or a designated representative, is responsible for approving any statistical sampling and examination plans for disbursement vouchers. The Director, DFAS, will ensure that approved sampling and examination plans are implemented at those locations for which DFAS is responsible. DoD Component officials will ensure that statistical sampling and examination plans, as approved by the Director, DFAS, or a designated representative, are implemented at locations for which the DoD Component official is responsible.

★0104 DISBURSING OFFICER DUTIES AND AUTHORITY010401. Keeping of Public Funds

A. General. DOs are required to keep safely all the public funds collected by them or otherwise placed in their possession and custody. Lending, using, depositing in banks, or exchanging for other funds except as specifically allowed by law is prohibited. DOs are required to safeguard public funds until ordered by the proper authority to transfer or pay out the funds. When such orders for transfer or payment are received, DOs shall faithfully and promptly make the transaction directed. DOs shall do and perform all other duties as fiscal agents of the the Treasury Department which may be imposed by law or regulations made in conformity to law. In case of disaster, DOs shall secure and preserve the accounts of all personnel, public money, and such other papers and property, in the order of their importance, as circumstances permit.

B. Deposit of Public Funds. Except as otherwise authorized by law and by regulations, it is the duty of every DO to deposit funds in excess of amount authorized to be held at personal risk with an authorized depository of the United States without delay.

010402. Accounting and Reporting. Every DO is required to maintain detailed records of all transactions. These records shall be available for examination by authorized representatives of the Secretary of the Defense and the Comptroller General of the United States. Every DO is further required to submit periodic financial reports.

010403. Specific Authority for Disbursements

★ A. Authority. Public funds shall be received and disbursed by order of, or on proper authority of, the commander, when sanctioned by 31 U.S.C., sections 3321 and 3325 (reference (e)).

B. Legality and Propriety

1. Sanction of Law. Transactions involving payments shall be examined for legality, propriety, limitations, and time frames under the statutes governing the various classes of expenditures and for validity under general provisions of law. There is no authority to disburse public funds to satisfy demands which are of doubtful validity or which should be supported by judicial action.

★ 2. Sanction of Decisions. Effective June 30, 1996, the Legislative Branch Appropriations Act, 1996, Public Law 104-53, transferred the claims settlement functions of the General Accounting Office to the Office of Management and Budget (OMB). OMB

further delegated these functions. Effective October 19, 1996, the Comptroller General's authority under 31 U.S.C. 3529 (reference (e)), to issue advance decisions to agency officials on such transferred claims settlement functions was also transferred pursuant to the General Accounting Office Act of 1996, Public Law 104-316, to the agencies to which OMB delegated the claims settlement functions. Appendix E contains a listing of functions transferred and the responsible offices. DOs are governed by advance decisions and decisions issued on doubtful claims by the authorities listed in Appendix E. Decisions issued are binding on the DOs with respect to the specific issue or claim involved. Decisions rendered by the Comptroller General prior to the transfer of authority are considered useful guidance and are not precedential. Questions concerning the use of appropriated funds are still under the cognizance of the Comptroller General.

★ 3. Sanction of Regulations. A valid regulation issued by the head of an executive department providing for the payment of money under certain conditions by DOs has binding force on the accounting officers of the General Accounting Office. To be valid, a regulation must be reasonable and shall be consistent with the law.

C. Substantiating Vouchers

1. Written Record of Transaction. Unless otherwise provided by law, each transaction conducted by an officer, agent, or employee of the Government of the United States, which when completed shall require the payment of money from the U.S. Treasury or payment to be made by a DO or agent of the Government of the United States, shall be evidenced by a written or printed signed document or series of documents which shall consist of a complete record of the transaction. Each statement of fact contained in such document or documents is to be certified or otherwise verified by a person who, in regular line of duty, has knowledge of the fact or facts certified or otherwise verified by that person, and who, when certification is made, shall state in the certification that the individual has personal knowledge of the facts certified or otherwise verified.

★ 2. Electronic Transactions. The Federal Reserve System (FRS) and the twelve Federal Reserve Banks (FRBs) act as the Treasury's fiscal agent in disbursing by electronic methods. Each disbursing office that processes disbursements by electronic methods shall have a detailed written agreement with the servicing FRB. These agreements contain detailed instructions for controlling tape delivery to the servicing FRB, tape remaking procedures, credit routines, file label requirements, and other details explaining each office's unique requirements. Local operating instructions must be written to implement these requirements. The DO must implement mandatory internal controls for confirmation that the FRB received the EFT payment files successfully and in accordance with the payment schedule. Further guidance on electronic transactions is identified in Chapter 24 of this volume.

3. Additional Evidence. The DO is not required to make payment on merely formal evidence. If the facts do not justify payment, a reasonable explanation or the submission of further evidence should be required.

★ 010404. Alternatives Available in Connection with Questionable Payments. Upon the determination that a matter concerning the receipt or disbursement of public money is questionable in regard to the appropriate public law, previous Comptroller General decisions, court rulings or regulations, a request for clarification shall be addressed to the DFAS Headquarters via the servicing DFAS Center. When, in the opinion of the DO or certifying officer, the matter requires a decision rather than a clarification of existing regulations or decisions, a request for advance decision shall be initiated. Procedures for requesting an advance decision are outlined in chapter 25 of this volume. Refer to Appendix E for the responsible offices on advance decision requests.

★0105 ACCOUNTABILITY AND RESPONSIBILITY

010501. Nature of Accountability

A. General. Accountable individuals are held personally and pecuniarily liable for their acts involving the expenditure of public funds. A DO or other accountable individual shall be charged with all funds received for the Government. Credit shall be received from the General Accounting Office for all public funds expended in accordance with laws and regulations, substantiated and certified in the required form, and accompanied by legal evidence. Credit shall be withheld for irregular, erroneous, or unsupported transactions. Detailed accounts shall be maintained for examination as to their correctness.

B. Knowledge of Laws Governing Disbursements. All accountable individuals, whose duties pertain to the disbursement of public funds, shall take scrupulous care to ensure that all applicable laws are strictly observed.

C. Responsibility for Acts of Another. DOs are accountable for illegal, improper, or incorrect payments or for errors in their accounts even though they may have relied on deputies, agents, and cashiers and the errors were caused by the deputies, agents, and cashiers. A request for relief of the liability for such payments and errors shall be submitted by the DO and may also be required by the deputy, agent, or cashier who made the illegal, incorrect, or improper payment or error. Note: Disbursing officers are not liable for payments properly certified by certifying officers even though those payments may prove to be illegal, improper or incorrect. Certifying officers are accountable for illegal, improper or incorrect payments made as a result of their certification even though they may have relied on other accountable officials or automated payment systems. Certifying officers may request relief of liability for such payments as provided in chapters 6 and 33 of this volume.

D. Payment on Forged or Fraudulent Vouchers or Pay Receipts. A DO is accountable for a payment made on a forged or fraudulent voucher or pay receipt even though not a participant or beneficiary in the fraud. Relief of liability for such payments may be requested by the DO and the deputy, agent, or cashier who made the payment.

010502. Relief of Liability

★ A. General. The Comptroller General of the United States shall relieve disbursing officers and certifying officers of the Department of liability for deficiencies in their account upon a finding that the statutory standards for relief are met as prescribed by 31 U.S.C. 3527 and 31 U.S.C. 3528 (reference (e)). Where a loss (either a physical loss or an illegal, incorrect, or improper payment), is incurred by a disbursing or certifying officer, the determination of the Secretary of Defense that relief should be granted is binding on the Comptroller General.

B. Statutory Standards

1. Physical Loss. The statutory standards for relief of liability for a physical loss are that the:

- a. Official was carrying out official duties when the loss or deficiency occurred.
- b. Loss or deficiency was not the result of an illegal, incorrect, or improper payment.
- c. Loss or deficiency was not the result of fault or negligence by the official.

★ 2. Illegal, Incorrect, or Improper Payments. The statutory standards for relief of liability for illegal, incorrect, or improper payments are:

- a. Statutory Standards for a Disbursing Official
 - (1) The payment was not the result of bad faith or lack of reasonable care; and
 - (2) Diligent collection efforts by the disbursing officials and the agency were made.

- b. Statutory Standards for a Certifying Official
 - (1) The certification was based on official records and the official did not know, and by reasonable diligence and inquiry could not have discovered, the correct information; or
 - (2) That the obligation was incurred in good faith;

and (3) That no law specifically prohibited the payment;

(4) That the U.S. Government received value for payment.

(5) Diligent collection efforts were made to recover the payment.

c. Standards for Accountable Officials. See chapter 33 of this Volume.

C. Delegation of Authority

1. Secretary of Defense. The Secretary of Defense has delegated authority to the Director, DFAS to make determinations and recommendations with respect to the granting of relief from pecuniary liability pursuant to 31 U.S.C. 3527 (reference (e)).

2. Director, DFAS. The Director, DFAS has delegated authority to the Directors of the DFAS Centers to make determinations and recommendations with respect to the granting of relief from pecuniary liability pursuant to the authority contained in 31 U.S.C. 3527 (reference (e)) and this Volume. In instances where the accountable individual operates from the DFAS Center, the DFAS Deputy Director for Finance grants or denies relief.

D. Requests for Relief. Procedures and documentation requirements for submission of requests for relief of liability are outlined in chapter 6 of this volume.

★ 010503. Decisions Rendered. A certifying officer or DO certifying or making payments in accordance with advance decisions issued by the appropriate authority, as outlined in Appendix E, is not liable for such payments.

★ 010504. Turnover of Funds Upon Relief. When a DO is relieved of duties because of transfer or any other reason other than deactivation of the disbursing station symbol number (DSSN), all fund account records, public funds, and property shall be turned over to the relieving DO.

★ 010505. Internal Management Controls. Disbursing officers of the DFAS are required to implement and abide by the requirements of the DFAS Internal Management Control Program as set forth in the current edition of DFAS 5010.38-R, Internal Management Control Program. Disbursing officers of other DoD Components or their activities must implement internal controls consistent with the guidelines outlined in this paragraph.

A. Effective internal control procedures depend largely on eliminating opportunities to conceal errors or irregularities. This, in turn, depends on assigning work so that no one individual controls all phases of a transaction.

B. Separation of duties creates a situation that should preclude errors or attempts at fraud or embezzlement from going undetected. Key duties such as authorizing, approving, and recording transactions; issuing or receiving assets; making payments; preparing checks and check signing; certification of funding; and reviewing or auditing shall be assigned to separate individuals to minimize the risk of loss to the Government to the greatest extent possible. The DO should not be assigned duties that create a potential conflict of interest. For example: A payment is made under the DO's DSSN which results in a request for a waiver of indebtedness. If the DO also supervises those individuals involved in the adjudication of requests for waivers, he or she is placed in a position of influence over the decision of the waiver. It also eliminates his or her pecuniary liability for an illegal, incorrect, or improper payment. Appropriate separation of duties is not always practical or possible due to time constraints, manpower shortages, or the use of mechanized systems. For example, payments and collections through the On-Line Payment and Collection (OPAC) system can occur outside the disbursing work center without weakening internal controls because the payee is always another Federal agency and recovery of an erroneous payment is assured. Other situations can require closer scrutiny. The commander and the DO shall: be aware of situations where valid, long-standing separation of duties cannot be achieved, recognize that internal controls have been weakened as a result of such; and make every effort to compensate for loss of the internal control. Unique situations resulting in an inability to separate appropriate responsibilities should be reported to the applicable DFAS Center, together with a request for a waiver and recommendations for compensating for the loss of the internal control.

C. Close review of IMC plans, policies, adequacy, compliance, and effectiveness will be the subject of all inspections and audits conducted in all disbursing offices.

★ 010506. Receipts for Payments. A receipt is required for all cash payments. A receipt is not required for payments made by check drawn by the DO except when required by law or contract. In no case shall receipt for payment be taken in duplicate. In all cases of cash payment, the exchange of currency and the receipt for it shall be simultaneous. Practices requiring receipts in advance of actual cash payments are prohibited. The accountable individual making the cash payment shall positively identify the payee. If the payee is not known personally, the accountable individual making the payment shall examine an appropriate identification card which includes both the payee's picture and signature. A comparison of the payee's signature should be made with that appearing on the identification card. For military personnel, the DD Form 2 (Armed Forces Identification Card) or DD Form 2A (Armed Forces Identification Card (Reserve)) should be used. The responsibility for identifying the payee may not be delegated.

★ 010507. Receipts for Collections. Receipts for collections shall be signed personally by the DO or an agent whose designated duties include receipt of collections.

★0106 RESTRICTIVE REQUIREMENTS

010601. Payment of Compensation. The use of public funds for the payment of compensation to any commission, council, board, or other similar body is prohibited by 31 U.S.C. 1346 (reference (e)) unless the creation of the body has been specifically authorized by law.

010602. Accounting for Premiums on Sales of Public Moneys or Securities. Under 31 U.S.C. 3341 (reference (e)), no DO of the United States shall either directly or indirectly sell or dispose of to any person for a premium any Treasury Department note, draft, warrant, or any other public security not of the officer's private property. Further, no officer shall sell or dispose of the proceeds of such note, draft, warrant, or security in the hands of the officer for disbursement without depositing the premium and the proceeds in the officer's accounts to the credit of the United States.

010603. Advances, Prepayments, and/or Overpayments. Except as otherwise authorized under 31 U.S.C. 3324 (reference (e)), advances, prepayments, and overpayments of public monies are prohibited. Certain advances and prepayments are permitted by this volume and Volumes 7, 8, 9, and 10 of this Regulation; Joint Travel Regulations; and Joint Federal Travel Regulations.

010604. Payments to Third Parties

A. General. Subject to the specific exceptions cited in subparagraphs 010604.B through 010604.I, below, the payment of money to a person to whom the United States is not indebted is not authorized. Also, such payment is prohibited even though the claimant to whom the amount is due requests that payment be made to another person.

B. Levy and Distraint for Delinquent Taxes. Salaries and wages of officers and employees of the U.S. Government, including all members of the Armed Forces, are subject to levy and distraint for delinquent federal taxes as prescribed by 26 U.S.C. 6331 (reference (f)). An attachment for other than delinquent Federal taxes cannot be enforced against public money in the hands of a DO and no trustee process, garnishment, or injunction can be recognized by officers of the government with respect to money due creditors of the United States.

C. Payments to Bankruptcy Trustees. A civilian employee or military member may file a chapter 7, 11, or 13 petition in bankruptcy under Public Law 95-598 (reference (g)). During the bankruptcy proceedings that follow, the Bankruptcy Court may order the individual's pay to be forwarded to the Bankruptcy Trustee. Such payments are proper, and DOs incur no additional liability as a result. If the individual is indebted to the United States as the result of a debt incurred prior to the filing of the bankruptcy petition, a setoff against the individual's pay through the date prior to the filing date of the bankruptcy petition should be effected where otherwise appropriate and authorized. The usual percentage restrictions on such a setoff are inapplicable to this situation. Debts that are not completely liquidated shall be

collected in accordance with procedures required by the Bankruptcy Act. Debts incurred after the filing of the bankruptcy petition are collected in the usual manner.

D. Successor in Interest. Payments due contractors may be made to court-appointed trustees, receivers, or other legal representatives under the conditions set forth in Volume 10 of this Regulation.

E. Assignment of Claims. Amounts due or to become due under contracts which provide for payments aggregating \$1,000 or more may be assigned under the procedures outlined in Volume 10 of this Regulation.

F. Authorized Withholdings and Allotments of Pay. Deductions from military and civilian payrolls for various purposes, such as retirement, taxes, health benefits, group life insurance, allotments, and voluntary payments for child support or alimony, and other purposes are provided for by statutory authority.

G. Drawing of Checks in Favor of Financial Organizations for the Credit of Persons' Accounts. Checks in payment of salaries and wages of military members and civilian employees may be drawn in favor of financial organizations for the credit of persons' accounts as prescribed in 31 U.S.C. 3332 (reference (e)) and Volumes 7 and 8 of this Regulation. An example would be: Merchants National Bank, Cr: Tsgt John Doe, Account Number: 346-839, Taylor, MI 04180.

★ H. Garnishment of Pay for Child Support, Alimony, and Commercial Debts. Salaries and wages of military members and civilian employees are subject to garnishment for child support and alimony as prescribed in Public Law 93-647 (reference (h)). Garnishments against civilians' salaries and wages or involuntary allotments against military members' salaries and wages for commercial debts (non-child or spousal support) are authorized as prescribed in Public Law 103-94 (reference (bn)).

I. Withholding of Contract Payments. Payment is to be made to the Department of Labor for amounts owed by contractors to employees under a contract as prescribed in Volume 10 of this Regulation.

010605. Equitable Claims. Claims which are not founded on contracts, either expressed or implied, but upon merely equitable or moral grounds, can be paid only after direct authorization by the Congress. The General Accounting Office has no authority to give credit for such payments even though they are claimed on equitable grounds.

010606. Insurance Fees. The government is self insured (or bonded); therefore, a DO or any of the agents of the DO are not authorized to insure public funds or property.

010607. Municipal Services. In the absence of specific statutory authority, a DO is not authorized to pay for municipal services such as police and fire protection if those services are required to be provided to private citizens at no cost.

★0107 PUNITIVE PROVISIONS

010701. Misuse of Public Funds

A. Disbursing Officers. DOs who convert to their own use, loan, exchange for other funds, or deposit public funds entrusted to them, except as authorized by law, are guilty of embezzlement. DOs who withdraw public funds from the Treasury Department or other public depository for any purpose not prescribed by law, or who wrongfully transfer the public funds entrusted to them, are guilty of embezzlement. Such officers are subject to fine, imprisonment, or both.

B. Agents. Individuals charged as agents who are responsible for the safekeeping of public funds and who loan, convert to their own use, deposit, or exchange for other funds, except as provided by law, any portion of those public funds, are guilty of embezzlement and subject to fine, imprisonment, or both.

010702. Failure to Deposit. Accountable individuals who have funds of the United States in their possession or under their control for the purpose of safekeeping, transfer, or disbursement, and who fail to deposit with the Treasury Department or other authorized depository as required by the Secretary of the Treasury, the Secretary of Defense, or the General Accounting Office, are guilty of embezzlement and subject to fine, imprisonment or both.

010703. Misrepresentation of Payment Amounts. Any person charged with the payment of any appropriation who pays a sum less than that required by law, and requires the recipient of the payment to receipt or give a voucher for an amount greater than what was actually paid, is guilty of an embezzlement.

010704. Failure to Render Accounts. Any officer, employee, or agent of the United States who neglects or refuses to make a report which is required at stated times by any Act of Congress or regulation, shall be subject to fine.

010705. Embezzlement of Public Funds, Property, or Records. Under 18 U.S.C. 653 (reference (i)), DOs or any other accountable individuals shall be guilty of an embezzlement if they in any manner convert funds to personal use; loan funds with or without interest; deposit public funds entrusted to them in any place or in any manner, except as authorized by law; or for any purpose not prescribed by law, withdraw from the U.S. Treasury or any authorized depository, transfer, or apply any portion of the public funds entrusted to them. Persons who embezzle, steal, or knowingly convert to their own use or the use of another; or without authority sell, convey, or dispose of any record, voucher, funds, or thing of value of the United States shall be subject to fine, imprisonment or both. Further, persons who receive, conceal, or convert such

items to their own use or gain, knowing them to have been embezzled, stolen, or converted, are likewise subject to the above punishments.

010706. Falsification of Accounts. Any DO or other accountable individual who with intent to deceive, mislead, injure, or defraud the United States or any person, makes in their accounts or records any false or fictitious entry or record of any matter relating to or connected with their duties is subject to the penalties prescribed by 18 U.S.C. 1001 (reference (i)).

010707. Withholding Pay of Persons in Arrears to the United States

A. Statutory Authority. Under 5 U.S.C. 5512 (reference (j)), the pay of individuals in arrears to the United States shall be withheld until the individuals have accounted for and paid into the U.S. Treasury all sums for which they may be liable.

B. Applicability

1. General. The law applies only to persons who have been entrusted with public funds and who have failed to account for those funds. It does not apply to ordinary debtors of the United States. The fact that charges of embezzlement or other crimes or negligence are not brought against a person in connection with a deficit of public funds does not, of itself, serve to remove the requirement that the person restore the amount for which they are accountable. The findings of a court are not necessarily conclusive as to the amount of the shortage for which the person is accountable. Persons accountable for public funds are accountable for the total of such funds in their possession, in cash or in valid documents representing cash. The portion of such funds which they cannot produce or satisfactorily account for, comprises the amount of the shortage for which they may be held liable.

2. Military Personnel. For instructions covering the withholding of the pay of military personnel in connection with a deficit of public funds or public property, see Volume 7 of this Regulation.

3. Civilian Employees. For instructions covering the withholding of the pay of civilian personnel in connection with a deficit of public funds and public property see Volume 8 of this Regulation.

C. Right of Setoff. The right of setoff shall govern all cases in which a person is both creditor and debtor to the government in any form as prescribed in 31 U.S.C. 3702 and 31 U.S.C. 3728 (reference (e)).

010708. Conspiracy to Defraud the Government. Any person who enters into any agreement or conspiracy to defraud the United States by obtaining or aiding to obtain the payment or allowance of any false, fictitious, or fraudulent claim shall be subject to fine, imprisonment or both as prescribed by 18 U.S.C. 286 (reference (i)).

010709. False, Fictitious, or Fraudulent Claims

A. Penalty. Whoever makes or presents to any person or officer in the civil or military service of the United States, or to any department or agency thereof, any claim upon or against the United States, or any department or agency thereof, knowing such claim to be false, fictitious, or fraudulent, shall be fined, imprisoned, or both as prescribed by 18 U.S.C. 287 (reference (i)).

B. Forfeiture of Unpaid Claims. Under 28 U.S.C. 2514 (reference (k)), a claim against the United States shall be forfeited to the United States by any person who corruptly practices or attempts to practice any fraud against the United States in the proof, statement, establishment, or allowance thereof. Fraudulent claims against the United States may be submitted in connection with civilian and military pay and allowances, contracts and purchase orders, reimbursement of personal funds expended on official business around the permanent duty station, loss and damages, as well as temporary duty and permanent change-of-station travel. A separate determination of fraud shall be made for each item individually claimed on the appropriate claim form.

C. Paid Claims. The forfeiture of claims described above has no application to a claim which has been paid or to the recovery of monies paid out as a result of fraud. However, in any case where payment of an item of pay or allowances is wrongfully obtained, whether through fraud, misrepresentation, or otherwise, such payment is an illegal, incorrect, or improper payment and shall be recouped as prescribed by 28 U.S.C. 2514 (reference (k)) and 41 Comptroller General Decision 285 (1961) (reference (l)).

TABLE OF CONTENTS**CHAPTER 2 DISBURSING OFFICES, OFFICERS, AND AGENTS**

- 0201 Establishment of a Disbursing Office
- 0202 Deactivation of a Disbursing Office
- ★0203 Disbursing Officers, Deputies, and other Accountable Positions
- 0204 Commencing and Relief from Disbursing Duty
- 0205 Change in the Status of Disbursing Officers or Deputies
- 0206 Agents of Disbursing Officers
- 0207 Collection Agents
- 0208 Change Fund Custodian
- 0209 Imprest Funds
- ★0210 Accommodation Checks
- ★0211 Alternate Agents

CHAPTER 2

DISBURSING OFFICES, OFFICERS, AND AGENTS0201 ESTABLISHMENT OF A DISBURSING OFFICE

020101. Request for Establishment. Except for tactical disbursing activities, a disbursing office will be established only with the concurrence of the Director, DFAS. Tactical disbursing activities will be activated, organized, reorganized, deployed or inactivated by the applicable Military Service with advice to the servicing DFAS Center. All requests to establish disbursing offices at new activities, or at activities receiving disbursing service from another source shall be submitted by memorandum through the requesting activity's chain of command to the servicing DFAS Center.

020102. Information to be Included in the Request. All requests for establishment shall include the following information:

- A. Reason establishment of the office is considered necessary.
- B. Prospective workload of office in terms of number of military personnel to be serviced, civilian personnel to be paid, and commercial vouchers to be settled. If military or civilian personnel are to be paid, include information on the automated payroll system proposed for the activity.
- C. Proposed date for establishment.
- D. Name, location, and distance to the nearest FRB or branch. If there is no FRB or branch within a reasonable distance of the proposed office, the name, location, and distance to the nearest general depository, if any, should be furnished.
- ★ E. Estimated number of U.S. Treasury checks required for the first year of operation and whether checks will be procured through normal requisition or if an emergency supply will be required.
- F. Name, Social Security number (SSN), and rank or grade of proposed DO, if known.
- G. Estimate of monthly cash requirements.
- H. Include information on any other automated disbursing system planned to be implemented in the disbursing office.

020103. Recommendation by DoD Component Commander. When the establishment of a disbursing office is considered necessary for the efficient functioning of the activity, the DoD activity commander shall endorse the request to indicate concurrence and provide any additional information considered necessary. In all cases, the DoD activity commander should provide justification stating why an additional disbursing office is required and why the disbursing operation cannot be conducted by an existing disbursing activity.

020104. Approval for Establishment. The servicing DFAS Center will review the request and recommendations; obtain concurrence or non-concurrence from DFAS Headquarters for non-tactical disbursing activities, take necessary actions to obtain a DSSN from the Treasury Department; and, advise the commander whether establishment of the requested disbursing office is authorized.

020105. Disbursing Station Symbol Number (DSSN)

A. Assignment. The servicing DFAS Center shall obtain a DSSN from the Treasury Department for all approved disbursing activities. The commander will be advised of the assigned DSSN when notified that establishment of the disbursing office is authorized.

★ B. Change in Designation or Location. The disbursing office shall keep the assigned DSSN until revoked or rescinded by the servicing DFAS Center. Any proposed changes in the designation or location (mailing address) of the activity subsequent to the assignment of the DSSN, must be coordinated with the Department of the Treasury, Check Reconciliation Branch, Financial Management Service, via the servicing DFAS Center.

C. Usage of DSSN. The DSSN shall appear on all payment and collection vouchers, on U.S. Treasury checks, and on limited depository checks.

★ 020106. Reporting Activation of a Disbursing Office. The DO who activates a disbursing office shall notify the Department of the Treasury, Check Reconciliation Branch, Financial Management Service via the servicing DFAS Center by memorandum immediately upon commencement of disbursing operations. Also, provide a copy of the memorandum to DFAS-Disbursing and Cash Management Office (DB), Kansas City, MO 64197-0030. The memorandum shall include the name of the activity, the DSSN assigned, the name and rank or grade of the DO, and the opening date of the account.

020107. Employer Identification Number (EIN). DOs shall obtain, from the local Internal Revenue Service office, an EIN for reporting tax information.

020108. Equipment, Publications, and Blank Forms

A. Check-signing Machines. DOs are authorized to use check-signing machines. An activity issuing more than the prescribed minimum of 2,000 checks per month may procure/obtain and use such a machine commensurate with their work load. DOs issuing

less than the prescribed minimum of 2,000 checks per month may request approval from the servicing DFAS Center to procure (obtain) and use a check-signing machine. See Chapter 7 of this volume for machine specifications, signature plate requirements, and ordering procedures.

B. Publications. It is essential that publications which govern the operation of a disbursing office be kept current and remain in the office for reference purposes. Posting of all changes received shall be made promptly.

C. Supply of Blank Forms. An estimate of the type and quantity of blank forms necessary to sustain the actual or anticipated volume of business shall be prepared. The estimate shall be updated periodically to avoid stockpiling of seldom used forms.

D. Miscellaneous Office Supplies. Miscellaneous office supplies such as rubber stamps and stationery shall be requisitioned using normal supply procedures.

0202 DEACTIVATION OF A DISBURSING OFFICE

020201. Permanent Deactivation (Closure)

A. General. The policies and procedures in this section shall be followed when a disbursing office is deactivated.

B. Designation of a Settlement Office. The servicing DFAS Center shall be responsible for designating another disbursing office to handle any uncleared transactions for the deactivating office after deactivation has occurred. This designated disbursing office hereafter shall be called the settlement office.

C. Notification of Deactivation. The DO shall notify all affected activities upon deactivation of a disbursing office, as follows:

1. Notify all affected activities, agencies, commercial concerns (including depositories when applicable), and individuals of the date of the deactivation of the disbursing office and the name and location of the settlement office to which all accounts will be transferred.

2. Notify the Treasury Department through the servicing DFAS Center that the DSSN is being deactivated. Indicate in the memorandum the date of deactivation, the office to which the accounts and records have been forwarded for settlement, and the last check number issued under the deactivated symbol. Include the date and check number of the last check signed by each deputy in cases where a separate series of checks is assigned to deputies at branch disbursing offices. Also, provide a copy of the memorandum to DFAS-DCMO/DBA, Kansas City, MO 64197-0030.

★ 3. Once a DSSN has been deactivated, it may only be used for settlement purposes. If the DSSN is ever to be reopened, the DO must request and receive U.S. Treasury approval for reactivation as described in paragraphs 020105 and 020106. The Treasury Department must assign a new check range.

★ 4. Request the commander to terminate the appointment of all agents that the commander was responsible for appointing.

★ 5. Terminate all deputy, agent, and cashier appointments.

★ 6. Request the commander terminate the DO's and all agents' authority to hold cash at personal risk.

★ 7. Clear all outstanding agent, imprest fund cashier, and change fund custodian advances.

D. Deposits. Deposit all currency, coin, negotiable instruments, and limited depository account balances to the credit of the U.S. Treasury on an SF 215 (Deposit Ticket).

E. Deposit Fund Account Balances. Transfer to the designated settlement office any balance in a deposit fund account which could not be cleared prior to deactivation of the disbursing office. A detailed list of the persons owed or funds to be reimbursed along with any documents or backup information shall be submitted with the SF 1081 (Voucher and Schedule of Withdrawals and Credits) to the settlement office. The SF 1081 shall be used to adjust the general ledger for the amount of funds transferred.

F. Undeliverable Checks. The DO shall cancel all undeliverable checks. Checks forwarded by other DOs that are undeliverable will be returned to the forwarding DOs for cancellation.

G. Blank Treasury Check Stock. The DO shall destroy all remaining blank check stock as prescribed in Chapter 8 of this volume and report the checks on the SF 1179 (Month End Check Issue Summary) and level 8 check issue report as VOIDS (zero dollar value issues).

H. Blank Bond Stock and Validating Stamps. The DO shall send all unused blank bonds and validating stamps directly to the FRB from which the bonds were received and shall notify the FRB that the bond issuing agent's appointment has been terminated.

I. Undelivered Bonds. The DO shall dispose of all undelivered savings bonds as prescribed in Chapter 23 of this volume.

J. SF 1219 (Statement of Accountability). When a disbursing office is deactivated the DO shall prepare and submit an SF 1219 covering the period from the first day of the accounting period through the close of the last business day and marked **FINAL**.

K. SF 1179 (Month End Check Issue Summary). When a disbursing office is deactivated the DO shall prepare and submit an SF 1179 covering the period from the first day of the accounting period through the close of the last business day and marked **FINAL**. The SF 1179 shall include all checks issued during the accounting period as well as all blank check stock which must be destroyed and reported as VOIDS (zero dollar value issues) as prescribed in chapter 8 of this Volume.

L. Check Signing Machine. If any of the disbursing office equipment is in excellent condition, the DO shall notify the servicing DFAS Center so that the Center can advise other disbursing offices of the equipment available. Every effort should be made to transfer useable equipment to another disbursing office where it can continue to be utilized. If no other disbursing offices need the equipment, the DO shall turn over the equipment to the servicing property disposal office. See Chapter 7 of this Volume for disposition of signature plates.

M. Retained Records. The DO shall send the retained records to the designated settlement office as prescribed in Chapter 22 of this volume.

Note: DOs preparing an office for deactivation have a responsibility to ensure that no discrepancies exist in their accountability. The servicing DFAS Center reviews all accounts transferred to settlement offices and has the authority to order collection action to be taken against the relieved DO who submitted a disbursing account to a settlement office with unresolved deficiencies in accountability (i.e., dishonored personal checks, unconfirmed deposits, physical losses of funds, and unresolved open debit items in **F3875 and **F3880 clearing accounts) for which no relief or corrective action was taken.

020202. Temporary Deactivation. Occasionally, temporary deactivation of a disbursing office is necessary. For example, a ship undergoing extensive overhaul for a period of several months may arrange for disbursing service from a shore activity. In order to eliminate the necessity of submitting monthly financial and checking account reports during the period of inactivity, the DO shall deposit all currency, coin, and negotiable instruments; close the limited depositary checking account, if applicable; properly dispose of all undeliverable checks; submit the memorandum required for deactivation of disbursing offices with additional information that the account is closed only on a temporary basis; and, retain blank U.S. Treasury check stock for use when the disbursing operation is reactivated. Inventory and storage requirements specified in chapter 7 of this Volume apply. The disbursing account may be reopened at any time under the same DSSN by submitting the report of commencement of disbursing operations. Note: A disbursing account cannot be temporarily closed if any cash or documents representing cash are on hand. Any assets on hand, including deficiencies such as dishonored checks or losses of funds require submission of the monthly SF 1219.

★0203 DISBURSING OFFICERS, DEPUTIES, AND OTHER ACCOUNTABLE POSITIONS**020301. Persons Authorized to Have Custody of Public Funds**

A. General. To ensure proper security and accounting for public funds and fix responsibility for custody and authorized disposition, it is necessary to limit the number of persons who are authorized to receive, maintain custody, and disburse or otherwise dispose of public funds.

B. Accountable Positions. Except as otherwise specifically provided, the function of regularly receiving and maintaining custody of public funds shall be performed only by DOs and their duly appointed deputies, agents, and cashiers in respect to all public funds; personnel designated to distribute salary checks or savings bonds; and individuals appointed by the commander as imprest fund cashiers, collection agents, change fund custodians, or paying agents in connection with functions which are not the direct responsibility of a DO.

C. Exceptions

1. General. It is not required that every person who may, on occasion, receive or maintain custody of public funds be designated formally to fill one of the positions listed in subparagraph 020301.B, above. Public funds may be received at times, at locations, and under circumstances which preclude any advance arrangement for their receipt and at some activities collections are so infrequent that it is impracticable to have a formal designation in effect. When funds are received by other than those individuals formally designated, it is required that the funds be forwarded promptly to the DO serving the activity or to another individual formally designated to receive them. DOs and agents responsible for property and the funds derived therefrom need not formally designate all or any substantial number of their subordinates to receive or maintain custody of public funds even though the entire staff of the activity performs functions closely associated with public funds. It is sufficient that formal designations be made for those individuals who regularly receive and maintain custody and control of public funds and who have the opportunity to act independently in respect to the custody, movement, and disposition of such funds.

2. Specific Exceptions. Individuals who perform only the following functions in connection with public funds shall not be appointed formally to an agent position:

- a. Sales personnel in retail outlets and mess cashiers.
- b. Mailroom employees and messengers who may handle public funds on occasion in connection with their regular duties.

c. Personnel receiving public funds exclusively in the form of checks drawn payable to a DoD Component.

d. Personnel who handle funds as assistants to holders of accountable positions but who do not sign receipts holding themselves accountable for the funds.

020302. Restrictions on and Exceptions to Duty Assignments of Individuals Handling Public Funds

A. Restrictions. Individuals performing duties as disbursing agents, cashiers, paying agents, collection agents, change fund custodians or imprest fund cashiers involving the custody or disbursement of public funds shall not be concurrently appointed to other accountable positions involving the handling or custody of or accountability for other funds.

B. Exceptions

1. Disbursing officers at DFAS Centers and consolidated OPLOCs may hold more than one DSSN. Each deputy appointed by the DO may serve as a deputy under one or more of the DSSNs assigned to the appointing DO. Likewise, a DO holding one or more DSSNs may serve concurrently as the deputy to one or more other DOs.

2. Disbursing officers aboard Navy vessels also may serve concurrently in other accountable positions such as ship's store officer or food service officer when the ship's manpower authorization does not provide supply corps officers for each accountable function.

3. When directed by appropriate authority in accordance with law and regulation, it shall be the duty of DOs aboard Navy vessels to accept, safeguard, account for, and dispose of personal funds and valuables received for safekeeping.

020303. Additional Duties. Except as specifically authorized in this volume, DOs shall not be assigned the additional duties of order approving authority, certification officer for claims for reimbursement and contingency funds, custodian of any fund, or other conflict of interest assignments.

020304. Appointment of a Disbursing Officer

A. Military Billet. When a military DO billet is approved, orders to the designated officer will be issued by the Component manpower center or local commander, as appropriate. A copy of the orders assigning military DOs and the required specimen signatures shall be provided to the servicing DFAS Center. Generally, a DO shall be an officer. However, the servicing DFAS Center may approve the appointment of senior enlisted personnel as DOs at smaller DSSNs.

B. Civilian Position. To be eligible for appointment as a DO, a civilian employee must have:

1. Experience as a DO or deputy; or,
2. Completed or agree to complete specific disbursing officer training courses or schools.

Grade levels of civilian DO positions shall be determined in accordance with standards established by the Office of Personnel Management. Appointment of a civilian employee as DO is accomplished by the commander in a formal Letter of Appointment. A copy of the Letter of Appointment and the required specimen signatures shall be forwarded to the servicing DFAS Center.

C. Qualifications. Civilian appointees must be U.S. citizens.

020305. Deputy Disbursing Officer

★ A. Request for Establishment of Deputy Positions. Except for DoD Component disbursing activities, the establishment of all deputy positions shall be approved by the servicing DFAS Center. The establishment of deputy positions for DoD Component disbursing activities shall be approved by the appropriate DoD activity commander. A DO normally should request at least one deputy DO position. The DO shall personally sign all requests for deputy DO positions. From a security standpoint, excessive numbers of individuals should not be allowed to have access to public funds. Commanders shall take appropriate steps to ensure that only the minimum number of deputy positions are requested at disbursing activities under their jurisdiction. The request for establishment of a deputy position shall include the circumstances that support the requirement for a deputy position. The request shall include:

1. The specific location where the deputy will serve.
2. The number of other deputies already serving.
3. The specific duties to be performed by the deputy.
4. An estimate of the monthly value of funds to be advanced, collected, and disbursed by the deputy.

B. Approval of Positions. The servicing DFAS Center shall advise the commander of the approval or disapproval of deputy positions in writing.

★ C. Eligible Individuals. Any officer, enlisted member, or civilian employee satisfactory to the DO may be appointed to the position of deputy DO. As prescribed in

paragraph 010506, separation of duties shall be maximized to comply with DFAS 5010.38-R, Internal Management Control Program.

D. Appointment. Deputy DOs are appointed by the DO with a formal letter of appointment addressed to the individual. The letter shall state the specific duties authorized to be performed by the deputy and include the statement "I acknowledge that I am strictly liable to the United States for all public funds under my control"; and a statement that the individual has been counseled as to the pecuniary liability and has been given written operating instructions. The appointee shall acknowledge acceptance of the appointment on the original and all copies of the letter of appointment. A copy of the letter of appointment with the required specimen signature forms and a copy of the approved request for establishment of the deputy position shall be provided to the servicing DFAS Center. These copies will be maintained along with the disbursing officer files.

E. Termination of Appointment. The DO may revoke the appointment of a deputy at any time for any reason. When the DO is relieved from disbursing duties, the appointment of all deputies shall be revoked by the DO. In all cases, the revocation of the deputy's appointment shall be by memorandum addressed to the deputy. A copy of the memorandum shall be forwarded to the servicing DFAS Center. If another individual will succeed the deputy, a copy of the letter of appointment and the required specimen signatures for the new deputy shall be forwarded with the copy of the memorandum of revocation.

020306. Submission of Signature Card and Specimen Signatures

A. Official Signature. Prior to commencing disbursing operations, a DO and all appointed deputies shall determine which of their given names or initials will comprise their official signature. This official signature shall be used on all checks, vouchers, official papers, and correspondence pertaining to the DoD, the General Accounting Office, and the Treasury Department. The official signature shall be furnished to the servicing DFAS Center by completion of the TFS Form 5583 (Signature Card) and TFS Form 3023 (Specimen Signatures). The signature on the TFS Form 5583 shall be certified by an officer whose signature is recorded with the servicing DFAS Center. The completed forms shall be forwarded to the servicing DFAS Center for recording. A permanent dark blue, blue-black, or black ink shall be used for manual signatures. The ink should not be subject to fading and not readily soluble in water. See figures 2-1 and 2-2. In addition to the above, three specimen official signatures are required to procure a signature plate. See subparagraph 070402.A for specific guidance.

B. Official Signatures to Other Depository. If checks are to be drawn on a depository other than the U.S. Treasury, the DO's official signature (as well as that of the deputy, if authorized to sign depository checks) shall be furnished to the depository. The forms shall be duly certified by an officer whose signature is known to the depository.

C. Change of Official Signature. The official signature of a DO or deputy, as provided to the servicing DFAS Center, shall not be changed without the written authority of the DFAS Center.

D. Furnishing Additional Signatures When Transferred to a New Station. It ordinarily will not be necessary to furnish another TFS Form 5583 on resumption of disbursing duty at a different disbursing activity since the original TFS Form 5583 becomes a permanent part of the servicing DFAS Center's records. However, since an individual's signature often changes over a period of years, the servicing DFAS Center may request additional signatures. When a DO or deputy frequently changes disbursing offices, the supply of specimen signatures furnished on TFS Form 3023 may become exhausted since a specimen signature is filed under each DSSN used and specimen signatures are furnished to different banks on request for their use in cashing and processing checks and savings bonds. In this event, the servicing DFAS Center may request a DO or deputy to furnish an additional TFS Form 3023.

0204 COMMENCING AND RELIEF FROM DISBURSING DUTY

020401. Commencement of Disbursing Duty. A DO who activates a new disbursing office, reactivates a disbursing office that has been temporarily closed, or relieves another DO will forward a memorandum to the servicing DFAS Center immediately upon commencement of disbursing duties. The memorandum will include the name of the activity, the DSSN assigned, the name and rank or grade of the DO, the opening date of the account; the beginning and ending serial number of all blank Treasury checks; and, if applicable, the name and rank or grade of the relieved DO. For Navy DOs, a copy shall also be forwarded to the DFAS operating location to which the financial reports will be submitted.

020402. Relief From Disbursing Duty

A. Joint Action by Both the Relieved and the Relieving DO. Upon reporting for disbursing duty as relief of the DO, a date upon which relief actually will be effected shall be established (subject to approval by the commander). If possible, relief should take place on the last day of the month to eliminate the necessity of submission of two sets of financial reports in the same month. On the date relief is to take place, the following actions shall be taken by both the relieved and the relieving DOs:

1. Verify cash on hand.
2. Verify all other documents that support the SF 1219 as assets.
3. Verify and inventory all blank U.S. Treasury checks and prepare a letter of transfer of the checks. Both the relieved and the relieving DOs shall sign the transfer receipt document. The relieving DO is responsible for reporting all checks issued by the relieved officer that were not reported to the Treasury prior to the transfer of accountability and for resubmitting any rejected tapes containing data on checks issued by the relieved officer.

Therefore, the check numbers for which the relieving officer receipts should be included in the commencement of disbursing duties announcement memorandum. The first check in the series shall be the next sequential number after the last check listed on the relieved officer's last check issue report. The last check receipted for should be the same as the last check number previously ordered and received by the relieved officer. Any checks missing or out of numerical sequence should be researched immediately and voided if necessary.

4. Verify postal money orders on hand, if applicable.

5. Verify safekeeping deposits, if applicable.

6. Verify blank savings bond stock and validating stamps (if machine equipment is not used) and prepare a letter of transfer, if applicable. Both the relieved and relieving officer shall sign the transfer receipt document. Notify the FRB from which the savings bonds were received by forwarding a copy of the letter of transfer to the FRB.

7. When local regulations require, prepare a memorandum of relief for submission to the commander.

★ 8. Verify and transfer all backup documentation for open balances in deposit fund account **F3880. The Treasury Financial Manual, Volume 1, Part 4, paragraph 7070.55, requires that these accounts be cleared to the proper appropriations or funds as expeditiously as possible. For deposit account **F3880, the relieved DO must present a detailed list of individual subsidiary transactions supporting documentation or backup information and current status. Documented evidence must include certification that the DO or primary deputy personally reviewed the balances in the account within the last month as required by Chapter 8 of this volume.

B. Action by Relieved DO. Upon relief from disbursing duty, the following actions are required to be taken by the relieved officer:

1. Terminate all deputy, agent, and cashier appointments and clear all related DD Forms 1081.

2. Transfer all money accounts, books, property, vouchers, and other retained records to the relieving officer.

3. Prepare and submit a final SF 1219. The relieving DO shall sign a certificate of acceptance of total accountability on the SF 1219 as prescribed in Chapter 5, paragraph 050602. See figure 2-3.

4. Forward a copy of the relieving DO's commencement of disbursing duty memorandum (including copies of all the letters of transfer of the total accountability) with the final SF 1219 to the activity to which financial reports are submitted.

5. Prepare and forward a memorandum to the servicing DFAS Center advising the date and check number of the last check issued.

6. If it is anticipated that the signature plate will be used at a subsequent duty station, forward the plate to the servicing DFAS Center for safekeeping.

7. When a signature plate is withdrawn from service and is not to be used again, it shall be delivered to the servicing DFAS Center for destruction. When the plate has been destroyed, a properly executed certificate identifying the specific plate and date of destruction shall be furnished to the relieved DO.

8. Transfer custody of the check signing machine to the relieving officer, if applicable.

9. Verify balances in suspense accounts are properly documented.

10. A final accounting for savings bonds shall be made to the FRB if the DO is also designated as a bond issuing agent.

C. Action by Relieving DO. The provisions in this subparagraph pertain to the relieving DO upon transfer of accountability from the relieved officer. The relieving officer shall insure that all actions listed in this section are accomplished, documented, and verified prior to signing for the accountability. The actions listed below summarize the actions to be taken by a relieving DO prior to reporting to the new disbursing activity as well as actions required as part of the relief process:

1. Upon receipt of orders to disbursing duty, furnish specimen signatures to the servicing DFAS Center by completing TFS Forms 5583 and 3023. If signatures previously have been furnished as DO or deputy DO, submission of new specimen signatures is not required unless specifically requested or a change of official signature is desired. If, however, the relieved officer has a limited depository checking account, then specimen signatures shall be provided to the limited depository.

2. Contact the disbursing activity to determine if a check-signing machine is in use. Obtain all necessary information about the machine (e.g. make, model, and number of plates required). If the relieving officer has never had a signature plate, then provide specimen signatures to the servicing DFAS Center and request that it order the required plates in sufficient time to arrive prior to the actual date of relief. If a signature plate which is compatible with the check-signing machine is in safekeeping at the DFAS Center, then request that it be sent to the new disbursing office. If signature plates cannot be received or obtained prior to the actual date of relief, the relieving DO may request the servicing DFAS Center to authorize the use of the relieved DO's signature plates until new plates are received. This procedure is to allow continued efficient operations of the disbursing office. Under this procedure, pecuniary liability

for improper payments made on or after the date of assuming responsibility rests with the relieving DO.

3. Submit a memorandum of notification announcing the commencement of disbursing duties to the servicing DFAS Center.

4. Request appointment as a bond issuing agent, if required.

5. Appoint at least one deputy DO and submit the required copies of the appointment and signature cards to the servicing DFAS Center. Also, appoint agents, cashiers, and other internal designations as necessary.

6. Verify the adequacy of the safekeeping facilities for funds, blank checks, bonds, and other accountable documents. If the facilities are inadequate, report the deficiencies to the commander and request that proper facilities be provided.

7. Change the combination of all safes including those assigned to other accountable individuals.

8. Review on hand cash requirements. If the current cash authority continues to be valid, it may be retained by the new DO until the normal resubmission date. If not acceptable, a new cash holding authority shall be resubmitted by the new DO as soon as possible after taking over the account.

9. Order all required official publications not on hand.

10. Notify all serviced activities, agencies, commercial concerns, and individuals of the account holder change.

0205 CHANGE IN THE STATUS OF DISBURSING OFFICERS OR DEPUTIES

020501. Authorized Absence of DOs or Deputies at Branch Offices. During an authorized absence, the DO remains liable for the account until or unless the DO is officially transferred. The account need not be transferred unless, in the DO's judgment, the ability to effect proper supervision is impaired. The DO shall maintain an adequate system of controls to avoid errors and to take appropriate steps to ensure the implementation and effectiveness of those controls. In order for relief of liability to be granted, the DO shall show clearly what the procedures were and how they were implemented during the absence (e.g., the record shall show that any loss incurred was not the result of bad faith or lack of reasonable care).

020502. Death, Incapacity, or Removal of a DO from Duty for Cause

A. General. When a DO dies, is incapacitated, or is removed from disbursing duty for cause (including unauthorized absence), the deputy is authorized under 10 U.S.C. 2773

(reference (b)), to continue to disburse in the name of and under the accounts of the DO for a period of time not to extend beyond the last day of the second month following the month of death, incapacity, or removal. If there is more than one deputy, the commander shall designate one deputy as authorized to disburse in the name of the DO.

B. Responsibility of the Commander. The commander shall take the following action:

1. Seize and seal all disbursing spaces, keys, property, and safe(s) to ensure the security of the funds, property, and spaces involved.

2. Appoint a board of not less than three disinterested but qualified officers to take an inventory of the vouchers, funds, and property then on hand (see subparagraph 020502.C, below).

3. Based on the disbursing needs of the activity, take one of the following actions:

a. Appoint a suitable person to act as custodian of the vouchers, funds, and property of the disbursing office (see subparagraph 020502.D, below).

b. Appoint a suitable person (normally a deputy DO) to take charge of the vouchers, funds, and property involved and to perform the duties of the DO as Acting Accountable DO until a regular relief reports (or is appointed) or until the last day of the second month following the date of death, incapacity, or removal (see subparagraph 020502.E, below).

4. Notify the servicing DFAS Center by message of all actions taken. Provide an information copy to DFAS Headquarters, and for Navy disbursing offices, the applicable OPLOC receiving the DO's financial reports.

C. Responsibility of the Inventory Board. The board of officers appointed as prescribed in paragraph 020502.B.2, above shall take a complete inventory of all public funds, including advances to deputies, agents, and cashiers; vouchers evidencing receipt, transfer, or disbursement of funds; safekeeping deposits, if applicable; and property of the DO in the presence of the immediate custodians and the appointed custodian, acting accountable DO, or relief. All official records shall be verified to determine that the cash on hand is in agreement with the records and that all checks used in the current accounting period have been properly accounted for. Blank checks also shall be inventoried to determine if there are any blank checks missing. In the event a shortage or deficiency is discovered, the commander shall take the actions prescribed for losses of funds or deficiencies in the DO's account as prescribed in Chapter 6 of this volume. An original and four copies of the inventory shall be prepared and certified by all members of the board as a true and accurate inventory. The board of officers shall turn over to the appointed custodian, acting accountable DO, or relief, all public funds and property certified

on the inventory. The custodian, acting accountable DO, or relief shall receipt the original inventory and retain a copy. The original of the inventory shall be turned over to the commander by the board and each member of the board shall retain one of the remaining certified copies.

D. Responsibility of the Custodian. The custodian shall assume custody of the public funds and property held by the DO upon receipting on the original of the inventory. No transactions other than collections shall be conducted. Upon the return of the incapacitated DO or reporting of a new permanent DO as relief, the custodian and the DO shall inventory and transfer all vouchers, funds, and property as prescribed for relief procedures.

E. Responsibility of the Acting Accountable DO (Deputy). When authorized by the commander to continue the accounts of a DO as acting accountable DO, the deputy shall perform all official duties that would have been required of the DO. The deputy shall prepare and submit financial reports for the DO as of the date of the death, incapacity, or unauthorized absence of the DO. Only those vouchers actually paid by the former DO shall be included in the reports. The reports shall be submitted in the name of the former DO by the deputy; i.e., "John Hancock by G. C. Garland." The reports shall include information as to the date of death, incapacity, or unauthorized absence and the fact that transactions included were made by the DO. Vouchers for which checks have been drawn but not delivered shall be included in the first of the subsequent reports covering transactions made by the deputy. Subsequent financial reports shall be submitted at the normally prescribed times in the name of the former DO; shall be signed by the deputy as indicated above; and shall include an explanation that the reports include only transactions made by the deputy under authority of this subparagraph subsequent to the death, incapacity, or unauthorized absence of the former DO. The financial reports of transactions performed by an acting accountable DO shall not be merged with those of the officer for whom appointed, or with those submitted by the regular relief after the regular relief assumes duties. All checks drawn by the deputy should be signed in the manner normally used when the deputy signs checks. However, if the volume of checks warrants, the signature plate of the former DO may be used. The deputy, not the former DO or the estate of the former DO, shall be legally liable and responsible for all payments and official acts subsequent to the death, incapacity, or removal of the DO.

F. Responsibility of the Relief. If the commander appoints an individual as DO to relieve the deceased, incapacitated, or removed DO, the relieving officer shall be responsible for performing all actions required in section 0204 of this chapter. The relieving DO shall be responsible for rendering financial reports in his own name the same as any other DO.

G. Administration of the Accounts of an Incapacitated or Removed for Cause DO. The rights of a deceased, incapacitated, or removed DO, as well as the custodian, acting accountable DO, or relief shall be fully protected so that, in the event of differences discovered during settlement of the accounts, the responsibility may be assigned to the appropriate individual. The acting accountable DO or relief shall take the actions necessary to complete the vouchers, close the accounts, maintain custody of records, and render the final reports of the

former DO. Documents prepared in connection with the administration and settlement of the accounts of a former DO shall be signed as follows:

(Name of Disbursing Officer)

By _____
Acting (appointed per 10 U.S.C. 2773)

The commander may allow an incapacitated or removed DO a reasonable time to close the disbursing accounts and render the final accountability reports. If a DO is restored to duty following arrest, suspension, or other incapacity, the commander shall direct that a second inventory be taken by the restored DO and the custodian, acting accountable DO, or relief. The DO restored to duty or the relief shall be accountable only for the vouchers, funds, and property on hand when the inventory is taken. The custodian, acting accountable DO, or relief shall be accountable for all vouchers, funds, property, and transactions which took place from the date the original inventory was receipted.

H. Deputy at Branch Disbursing Office. In the event of the death, incapacity, unauthorized absence, arrest or other emergency absence of a deputy at a branch disbursing office, the DO shall be advised by the most expeditious means available. Depending upon the circumstances, the DO shall request the commander of the activity at which the branch office is located to appoint a board to take an inventory of the vouchers, funds, and property of the deputy and appoint a suitable person to take custody of the vouchers, funds, and property until inventory can be taken by the DO. If practical, the DO shall take an inventory of the vouchers, funds, and property in the presence of a competent witness.

0206 AGENTS OF DISBURSING OFFICERS

020601. General. Officers, enlisted members, or civilian employees satisfactory to the appointing officer, may be appointed to the position of disbursing agent, cashier, or paying agent. From a security standpoint, it is undesirable to allow excessive numbers of individuals to have access to public funds. Commanders and DFAS Centers shall take appropriate steps to ensure that only the minimum number of accountable positions are authorized at activities under their jurisdictions. Examination and inspection teams should review the number of accountable positions in use at disbursing activities and include comments and recommendations, as appropriate, in the report of examination or inspection. Accountable positions as agents of disbursing officers shall be established and approved locally by the commander. The individuals shall be appointed in writing by the appropriate appointing official as explained in the following paragraphs for each specific type of position. In all cases, the letter of appointment shall include the specific duties and limitations, effective date, duration of the appointment, and the name of the individual being relieved, if any. The appointed individual shall acknowledge appointment and acceptance of the position on the original and all copies of the letter of appointment and shall include the statement "I agree to hold myself accountable to the United States for all public funds

received." Letters of appointment shall be maintained in a permanent file at the activity to show the successive holders of each position and shall be retained for a period not less than 6 months after the individual ceases to serve in the position. Appointments as agents of disbursing officers are effective only while the DO continues to serve as DO of that activity. Appointments as agents of disbursing officers may be revoked by the appointing officer at any time. The revocation shall be in writing and shall include the effective date of the revocation. Except as provided in this volume, individuals appointed as agents of DOs are not authorized to serve concurrently in any other accountable position and shall not be charged with the handling or custody of any other funds.

020602. Disbursing Agents

A. Duties and Responsibilities. A disbursing agent is an agent to the DO who has not been appointed as a deputy DO. Normally, a disbursing agent operates a permanently located disbursing office of considerable size (i.e., most functional areas such as military pay, civilian pay, material, commercial services, etc., being present) that is geographically separated from the DO's office. In some instances a one or two person disbursing agent office may be established. However the use of disbursing agents is not restricted to geographic separation from the DO. Unlike the DO, or deputy DO, a disbursing agent cannot sign/issue Treasury checks (unless the appointment is changed from disbursing agent to deputy DO). See paragraph 020305, Deputy Disbursing Officer. A disbursing agent prepares disbursement and collection vouchers as an agent of the DO. Such vouchers become part of the DO's overall accountability.

B. Establishment of Position. Disbursing agent positions are established in writing by the major command or Defense Agency. When the duties of the position include the authority to sign/issue Treasury checks, see paragraph 020305.

C. Appointments to Position. The commander shall make written appointment of the individual who will fill the established disbursing agent position. The letter of appointment shall be issued in an original and two copies and shall contain the name and rank or grade of the agent; office where duties are to be performed; description of duties or job description to be performed; effective date of the appointment; acknowledgement of acceptance of the appointment and the statement "I agree to hold myself accountable to the United States for all public funds received"; and a statement that the individual has been counseled as to the pecuniary liability and has been given written operating instructions. This appointment must be coordinated with the parent DO.

020603. Cashiers

A. Selection Procedure. An officer, enlisted member, or a civilian employee, with working knowledge of the cash functions and operations, may be designated as cashier. The DO or disbursing agent should make a thorough investigation of the selectee to ensure that the individual is of unquestionable integrity. To accomplish this the DO or disbursing agent should examine personnel records and talk to the individual and other persons as necessary. In addition,

a credit report should be obtained if the service is available. Costs associated with obtaining a credit report are a valid charge to Operations and Maintenance (O&M) funds available to the DO. Credit reports shall be adequately safeguarded.

B. Duties and Responsibilities. Duties include disbursing, collecting, and accounting for cash. The cashier may also perform other duties as required, concerning the receipt, custody, safeguarding, and preparation of checks and U.S. savings bonds. To facilitate training and effectively utilize personnel, cashiers may perform other duties on days when they do not perform cashier functions.

C. Letter of Appointment. Cashiers shall be appointed in writing by the local DO or disbursing agent. The letter of appointment shall be issued in an original and two copies and shall contain the name and rank or grade of the cashier; office where duties are to be performed; description of duties or job description to be performed; effective date of the appointment; acknowledgement of acceptance of the appointment and the statement "I acknowledge that I am strictly liable to the United States for all public funds under my control"; and a statement that the individual has been counseled as to the pecuniary liability and has been given written operating instructions.

D. Distribution. The original of the acknowledged letter of appointment shall be delivered to the cashier; a copy to the office where duties are performed; and a copy to the appointing DO or disbursing agent.

E. Restrictions. A cashier is not authorized to:

1. Sign checks.
2. Accept checks drawn (and endorsed to the cashier) in the name of the DO or disbursing agent to procure cash and disburse for any purpose.
3. Prepare billing documents and make collections for these same items. This restriction also applies to agents performing cashier duties.
4. Prepare vouchers that will be paid later by the cashier.
5. Prepare vouchers on those days when cashier functions are performed.
6. Prepare DO accountability reports, where practical. If the cashier must prepare DO accountability reports, the DO or deputy (or disbursing agent) shall personally review the reports.

F. Letter of Termination. The DO or disbursing agent, as applicable, shall issue a letter of termination to the individual when the DO or agent is relieved or when the individual cashier's duties are terminated.

★ 020604. Paying Agents and Postal Paying Agents

A. Restriction on Appointment. Paying agents and postal paying agents may be appointed only when adequate payment, currency conversion, or check cashing service cannot be provided otherwise. Paying agents and postal paying agents shall not be appointed solely as a convenience when it is feasible for the transactions to be made by the DO, deputy, disbursing agents, or cashiers. In an unusual situation, such as payments or currency conversions at remote locations where use of checks is not feasible, the DO may request the commander of the remote location to appoint a paying agent or postal paying agent to make the payments for and in the name of the DO from funds advanced for that purpose. Paying agents and postal paying agents shall never be appointed or utilized over protest of the accountable DO. Paying agents and postal paying agents will not act as purchasing officers.

B. Appointment. Paying agents and postal paying agents shall be appointed in writing by the commander. The appointment letter shall contain the paying or postal paying agent's name, rank or grade, SSN, and duty station; the name, rank or grade, and station of the DO for whom the paying agent will act, and the DSSN; the duties and responsibilities of the agent; a description of the type of payments or currency conversions to be made by the paying agent; the maximum amount of funds to be advanced to the agent; the period of time the appointment covers; and, the agent's acknowledgement of acceptance of the appointment and the statement "I acknowledge that I am strictly liable to the United States for all public funds under my control"; and a statement that the individual has been counseled as to the pecuniary liability and has been given written operating instructions. Appointments may be for a specific transaction, for a definite period of time, or for an indefinite period of time. For an indefinite period, the paying or postal paying agent's designation shall continue until transferred or relieved of such duty by the appointing officer or until the DO is transferred or relieved from disbursing duty. In all cases, the paying or postal paying agent shall clear his or her account with the DO upon the transfer of the DO.

0207 COLLECTION AGENTS

020701. Establishment of Positions. The commander may approve and establish the position of a collection agent to receive funds derived from functions such as hospitalization fees and other charges at medical facilities; communications charges; rentals and other charges at housing developments; fees for research or reproduction of records; safekeeping deposits where the safekeeping function is not performed by the DO; and similar functions when deemed appropriate by the commander.

020702. Appointments. Appointments of collection agents remain in effect during the agent's service at the activity unless revoked by the appointing authority. The appointment

does not require reissue by successors to the positions of commander or other authorized appointing officer. Individual collection agents shall be appointed in writing by the appointing authority. The letter of appointment shall be issued in an original and two copies and shall contain the name and rank or grade of the collection agent; office where duties are to be performed; description of duties or job description to be performed; effective date of the appointment; acknowledgement of acceptance of the appointment and the statement "I acknowledge that I am strictly liable to the United States for all public funds under my control"; and a statement that the individual has been counseled as to the pecuniary liability and has been given written operating instructions. Individuals appointed as collection agents are not authorized to serve concurrently in any other accountable position and shall not be charged with the handling or custody of any other funds.

020703. Revocation of Appointment. The appointment of a collection agent may be revoked by the appointing authority at any time. The revocation shall be in writing addressed to the agent and shall include the effective date of the revocation.

0208 CHANGE FUND CUSTODIAN

020801. Duties and Responsibilities. The change fund custodian receives the change fund from the parent DO and uses the fund to make change in conjunction with sales transactions and, in some cases, for providing accommodation cash in exchange for a check made for more than the purchase amount. The change fund custodian is responsible for safeguarding the funds provided and may be held pecuniarily liable for any loss of the change fund.

020802. Establishment of Position. The commander of the sales activity establishes the position of change fund custodian.

020803. Appointments to the Position. The commander or designee of the activity; (e.g., commissary or hospital) shall appoint the individual who will fill the established position. The letter of appointment shall contain the custodian's acknowledgement of the appointment; the statement "I acknowledge that I am strictly liable to the United States for all public funds under my control"; and a statement that the individual has been counseled as to the pecuniary liability and has been given written operating instructions. The appointment shall be coordinated with the parent DO. Individuals appointed as change fund custodians are not authorized to serve concurrently in any other accountable position and shall not be charged with the handling or custody of any other funds.

0209 IMPREST FUNDS

★ 020901. General. This section prescribes DoD policies and procedures for using imprest funds to make small purchases of supplies or services. Detailed regulations concerning the establishment, use of, and accounting for imprest funds, including the responsibilities of designated imprest fund cashiers and alternates are contained in Part 4 of the Department of the

Treasury Financial Manual for Guidance of Departments and Agencies (reference (m)), U.S. General Accounting Office Policy and Procedures Manual for Guidance of Federal Agencies (reference (n)), and the Federal Acquisition Regulations (reference (o)).

★ 020902. Authority. The use of imprest funds for unclassified programs is not authorized for DoD activities. Exceptions to this policy are authorized for contingency and classified operations. Specific requests for deviations from, or exceptions to, this policy shall be submitted through command channels and the appropriate Service secretary to the Director, Financial Commerce, Office of the Under Secretary of Defense (Comptroller), 1100 Defense Pentagon, Room 3E831, Washington DC 20301-1100. Such requests must contain adequate justification and demonstrate that the use of the government-wide purchase card, government-wide travel card, or other reasonable alternatives are not feasible for the specific situation. In lieu of imprest funds, maximum use shall be made of the government-wide purchase card for micro-purchases of supplies and/or services and the government-wide travel card (i.e., an agency centrally billed account) should be used to facilitate travel payments formerly made from the imprest funds. A copy of the signed authorization to establish and maintain an imprest fund shall be kept on file by the DO/OPLOC and imprest fund cashier.

★ 020903. Amount of Imprest Funds. The maximum amount of any DoD imprest fund which has been approved by the OUSD(C), as prescribed in the previous paragraph, shall not exceed the estimated average monthly disbursements from the fund and in no case shall it exceed \$10,000. At least once each quarter, a review shall be made to determine the continuing need for each imprest fund established and whether the amount of the fund is in excess of actual needs based on the average monthly volume of expenditures. This review shall be accomplished as a part of the quarterly cash verification requirements prescribed in Chapter 3 of this volume. Imprest fund single transactions are limited to \$500. A single requirement totaling more than \$500 may not be split into multiple transactions to avoid the use of conventional purchasing techniques and procedures. Exceptions or waiver requests of the above limitations shall be submitted to the Director for Financial Commerce, Office of Deputy Chief Financial Officer as prescribed in the preceding paragraph. Copies of approvals of such requests must be retained for audit review. During periods of contingency operations, as specified by the Joint Chiefs of Staff (JCS), the designated area commander may increase the limitations on imprest fund transactions to \$2,500 and the ceiling on cash holdings may be increased to \$100,000 per imprest fund. During periods of specified contingency operations appointment of paying agents should be considered as an alternative to imprest funds, unless the appointment of paying agents would hinder the operation (e.g., due to a lack of contracting or procurement personnel).

020904. Uses of Imprest Funds

★ A. General. Each duly-authorized imprest fund shall be under the sole custody of one individual (i.e., any officer, enlisted person, or civilian employee who is not responsible for originating, approving, and processing requirements). Additionally, an alternate imprest fund cashier may be appointed with the same requirements as the principal cashier, however, the alternate is to act only in the absence of the principal. Both principal and alternate

shall be responsible financially to the DO from whom the fund was advanced. Each fund shall be operated on an imprest basis; i.e., the amount of the fund shall remain constant. The DO shall reimburse the imprest fund cashier for the exact amount of disbursements properly made and documented.

B. Conditions for Use. Duly-authorized imprest funds may be used for small purchases when:

★ 1. The transaction does not exceed \$500. When the purchase is in support of overseas contingencies declared by the JCS, as described above, the transaction must not exceed \$2,500.

2. The use of the imprest fund is considered to be advantageous to the government.

3. Supplies or services are available for delivery within 60 days whether at the contractor's place of business or at destination.

4. The purchase does not require detailed technical specifications or technical inspection.

★ C. Other Uses of the Imprest Fund. Duly-authorized imprest funds may also be used for the following:

1. Delivery charges associated with the purchase from the imprest fund when the contractor is requested to arrange for delivery. These charges include local delivery, parcel post (including cash on delivery (C.O.D.) postal charges) and line haul or inter-city transportation charges, provided the charges are determined to be reasonable and acceptance is in the best interest of the Government.

2. C.O.D. charges for supplies ordered for payment from the imprest fund.

3. Civilian volunteers for participation in approved medical research projects.

4. The imprest fund can be used for other expenditures not related to small purchases when such expenditures are authorized by other regulations. These expenditures include:

★ a. Travel advances when no DO is available in the immediate area to effect payment and use of the government-wide travel card is impractical.

b. Local travel expenses (i.e., mileage allowance for travel in and around the permanent duty station not under travel orders) when no DO is available in the immediate area to effect payment.

c. Transportation charges (not related to purchases).

d. Money orders when necessary:

(1) to transmit collections for deposit;

(2) to make approved one-time purchase of books and periodicals;

(3) for catalog type items; and

(4) for fees for inter-library loan of professional books.

e. Postage stamps.

f. Transportation passes or tokens.

D. Prohibited Uses of Imprest Funds. Imprest funds shall not be used for:

1. Payment of salaries and wages.

2. Travel advances or any other advances, except as authorized above.

3. Payment of travel claims (except for claims for local travel not under orders, when a DO is not available in the immediate area to effect payment as authorized above).

4. Payment of public utility bills.

5. Cashing of checks or any other negotiable instruments.

6. Purchase from contractors or contractor's agents who are military personnel or civilian employees of the government.

7. Purchase of foreign items unless the applicable decisions of exception and documentation are made prior to procurement.

8. Repetitive purchases from the same contractor when another method of purchase, such as a blanket purchase agreement, would be more appropriate.

9. Payment of spot awards.

020905. Imprest Fund Cashiers

★ A. Appointment. Imprest fund cashiers shall be appointed by the commander to make authorized cash payments for materials and nonpersonal services, maintain custody of funds, and file periodic vouchers to account for and replenish the imprest fund. The imprest fund cashier should be located organizationally and physically at a convenient location on the installation or activity for the purpose of making payments to vendors or carriers. DOs, disbursing office personnel, certifying officers, and individuals responsible for originating, approving and processing requirements are not eligible for appointment as imprest fund cashiers. In no event shall an imprest fund cashier (or alternate) have access to or control of more than one fund or be concurrently appointed to any other accountable position. Each appointment and termination or revocation of appointment shall be made in writing by issuance of a letter of appointment, termination, or revocation, as appropriate. The appointment document shall contain the following:

1. name and rank or grade of the individual and duty station;
2. identification of the disbursing station for which the cashier will act (including the accounting or fiscal station number assigned, if applicable);
3. description of specific duties to be performed;
4. effective date of the appointment;
 - a. amount and location of the fund;
 - b. the cashier's acknowledgement of acceptance of the appointment and the signed statement "I acknowledge that I am strictly liable to the United States for all public funds under my control"; and
 - c. a statement that the individual has been counseled as to the pecuniary liability and has been given written operating instructions.

The appointing document and approval for establishment of the imprest fund shall be maintained in a permanent file. Two copies of the documents shall be furnished to the cashier, and one copy each to the disbursing office and the installation or activity contracting office.

★ B. Advance of Funds to Imprest Fund Cashier. Funds to establish an imprest fund shall be advanced by the DO serving the activity to which the imprest fund cashier is attached. A signed copy of the document appointing the imprest fund cashier and a copy of the approval to establish the fund shall be furnished to the DO at the time the cashier first obtains the advance of funds. The advance shall be documented and receipted as prescribed in chapter 3 of

this volume. If the average monthly dollar value of the imprest fund purchases decreases and the authorized amount of the fund is greater than required, imprest fund cashiers shall draw only the amount of funds justified by the volume of purchases made. However, this will not be construed as a limitation on funds available to the imprest fund cashier when seasonal or other factors justify an amount greater than that indicated by this method of computation.

★ C. Safeguarding Imprest Funds. Cash and disbursement documentation shall be safeguarded properly at all times through the use of safes, locked cash drawers, etc., as prescribed in Chapter 3 of this volume. Imprest funds may not be commingled with other cash funds (e.g., disbursing funds, change funds, or cash receipts for other funds). Cashiers must be able to account for the full amount of funds being held at any given time. Receipts or subvouchers supporting temporarily unreimbursed expenditures from any imprest fund shall be under the accountability of the responsible imprest fund cashier, together with the cash on hand, in support of the total amount of the fund.

D. Alternate Imprest Fund Cashier. An alternate imprest fund cashier may be appointed to provide service during the absence of the principal cashier. Appointment requirements for principal cashiers shall apply to alternate cashiers. In planned absences of the principal cashier, cash may be advanced by the principal to the alternate in any amount up to the limit of the fund. The principal shall obtain a signed cash receipt from the alternate. Upon resumption of duties, the principal cashier shall return the cash receipt to the alternate after obtaining paid receipts, subvouchers and residual cash. In the unforeseen absence of the principal cashier, funds may be advanced to the alternate in the normal manner by the DO. These funds shall be in addition to the amount currently advanced to the principal cashier under the established fund, but shall not exceed the authorized amount of the fund. Upon return of the principal cashier, the alternate shall return paid receipts, subvouchers, and residual cash to the DO.

E. Revocation. Imprest fund cashier appointments may be revoked at any time. The revocation shall be in writing addressed to the cashier and show an effective date. A copy of the revocation shall be provided to the disbursing office and the contracting office.

020906. Imprest Fund Procedures

A. Purchases. Each purchase using imprest funds shall be based upon an authorized purchase requisition. Normally, orders to suppliers should be placed orally and without soliciting competition if prices are considered reasonable. Purchases shall be distributed equitably among qualified suppliers. Prompt payment discounts shall be solicited. Responsibility for determining requirements, making purchases, and receiving materials and services should be separated among several individuals. All payments from an imprest fund shall be made for goods and services that have been procured by personnel authorized in accordance with the Federal Acquisition Regulations (reference (o)). Imprest fund purchases need not be supported by a purchase order, unless they provide some advantage to the government such as vendor discounts. In these cases, a regular purchase order form endorsed "payment to be made in cash"

may be used. Receipts shall be secured for each payment made from imprest funds. Since purchases with imprest funds are of relatively small value, government tax exemption certificates shall not be required.

★ B. Receipt of Material. All material purchased through the imprest fund shall be delivered to a designated receiving activity. The receiver shall examine the material to ascertain that the quantities and items described on the purchase request document and the supplier's sales document are present and in satisfactory condition. If the material is acceptable, the receiver shall stamp the supplier's sales document "Received and Accepted," date and sign the document, and pass it to the imprest fund cashier for payment. A supplier's sales document, a DD Form 1155 (Order for Supplies or Services/Request for Quotations), or a DD Form 1348-1 (DoD Single Line Item Release/Receipt Document) may be used to record the receipt of purchases made from the imprest fund. When it is not practicable to obtain delivery of material at destination on a C.O.D. basis, advance arrangement may be made for the material to be picked up. The imprest fund cashier then may advance cash to an authorized individual to pick up and pay for the material. Necessary certification of receipt and acceptance of material shall be obtained on one of the documents as indicated above. Receipt for cash payment shall be made on the same document, which will serve as the imprest fund receipt. When prior arrangement for pick up of material is not practicable, the imprest fund cashier may advance cash to an authorized individual to make a proposed purchase.

C. Advance of Funds. Individuals receiving a cash advance from the imprest fund cashier shall be required to sign a receipt for cash. After purchase has been made, the individual shall return any unused cash to the imprest fund cashier with the necessary certifications of receipt, acceptance, and cash payment, at which time the imprest fund cashier shall "void" the receipt for cash. Cash so advanced should be accounted for daily, but under unusual circumstances, cash may be advanced for a longer period (not in excess of seven calendar days).

D. Certification of Cash Payment. The original receipt document (or a copy tendered as the original) presented to the imprest fund cashier for payment shall be stamped with a certification containing the following information:

1. Statement that cash payment was received in full.
2. Amount paid.
3. Date of payment.
4. Signature and title of supplier or supplier's agent receiving the cash payment.

Alterations or corrections to documents tendered for payment shall be initialed by the person making the change. Changes in the amount paid shall be initialed by the individual receiving payment.

E. Responsibilities of Imprest Fund Cashier. Pending receipt of material, the imprest fund cashier shall keep a file of purchase request documents covering imprest fund purchases. Prior to payment, or acceptance of the document tendered for settlement of an advance, the cashier shall verify the necessary certification of receipt and the supplier's billed price or the price paid. If the supplier's receipt for cash payment is not obtained for purchases of \$15 or less, the imprest fund cashier shall complete the cash receipt document and have the person receiving the fund sign this document. Receipt for U.S. parcel post C.O.D. charges should be obtained. When a receipt cannot be obtained for C.O.D. purchases, imprest fund cashiers located in foreign countries are authorized to certify on the receipt document, "Delivered by (name of post office or carrier) no receipt given." The C.O.D. label shall be removed from the parcel and affixed to the receipt document in support of the reimbursement voucher. Imprest fund cashiers at any location may accept a signed C.O.D. receipt to support the subvoucher if the carrier refuses to sign a government form. After completion of settlement transaction, each subvoucher shall be numbered consecutively beginning with one each fiscal year and this number placed on the original of the paid receipt documents. These subvouchers will support the cashier's claim for reimbursement of the imprest fund. The imprest fund cashier will not request duplicate receipt documents, or retain such documents if provided. When total charges stated on the sales document are paid, without deduction of discounts offered and earned, or without correction of minor billing errors, action will be taken to obtain a refund from the supplier. Collection action may be waived for refunds of one dollar or less.

F. Payments

1. C.O.D. Upon presentation of an authorized document with the necessary certification of receipt for supplies or services, the imprest fund cashier or other authorized individual shall pay the supplier or supplier's agent and obtain the certification of cash payment as set forth above.

2. Receipt From Common Carrier or Post Office. When C.O.D. shipments are received or picked up from a common carrier or post office, the certification of cash payment may be accomplished on a list of the packages provided by the post office or common carrier. Such receipt will be supported by copies of the applicable sales documents, if available.

3. Periodic Payments. When a blanket purchase agreement is not suitable and it is administratively convenient and agreeable to the supplier, periodic payments from the imprest fund may be made for supplies delivered on a repetitive basis, provided that the accumulated amount of the deliveries for the specified period does not exceed the dollar limitation imposed on the imprest fund method by paragraph 020903, above.

★ 4. Failure to Ship C.O.D. When material is ordered C.O.D. but is shipped by the supplier subject to payment by check, an SF 1034 (Public Voucher for Purchases and Services Other than Personal) shall be used to make payment. Under these circumstances, the receiver shall prepare the necessary certification of receipt and forward the receipted document through the imprest fund cashier, for attachment of the supporting documents which authorized the shipment and submission to the DO for payment.

5. Money Orders. Cashiers may purchase money orders using imprest funds, when necessary, to do the following:

- a. Transmit collections for deposit.
- b. Deposit part of the fund when the fund is to be reduced or liquidated.
- c. Make approved cost-effective mail order purchases for one-time acquisition of reference manuals, singular publications or pamphlets, catalog-type items, and fees for the inter-library loan of professional books. This procedure shall not be used to circumvent controls on the procurement of periodic subscriptions.

In implementing this authority, DoD Components shall establish and maintain internal controls which shall include attaching a legible copy of the money order (that shows purchasing activity, payee, and amount) to the requisition file, together with annotation of the date mailed. The original money order receipt shall be retained by the imprest fund cashier to substantiate disbursement of the money order fee.

★ G. Reimbursement of Imprest Funds. The imprest fund shall be reimbursed by use of OF 1129 (Cashier Reimbursement Voucher and/or Accountability Report) supported by the cashier's subvouchers. The imprest fund cashier shall prepare and submit OF 1129 in triplicate to the DO as frequently as necessary, but not less often than monthly. At the close of the fiscal year, an OF 1129 covering all remaining subvouchers through September 30 shall be submitted before the closing of the allotment accounts for the month. When required, subvouchers shall be summarized by account to complete the accounting classification block of OF 1129 and submitted to the DO for reimbursement of the imprest fund. One copy of the OF 1129 shall be retained by the imprest fund cashier pending the return of the "paid" copy of the form with the reimbursement checks or currency in the amounts requested by the cashier. When the imprest fund is reimbursed by mail, or when long delays in the reimbursement are encountered, the imprest fund cashier may retain copies of subvouchers until reimbursement is accomplished. When copies are retained, they shall be placed in a sealed envelope identified to the reimbursement voucher involved. When reimbursement is received, the sealed envelope will be presented to the official who signed the Administrative Certificate on the OF 1129 for destruction. When a supplier refunds cash prior to the submission of OF 1129 covering such payment, the imprest fund cashier shall accept the refund, return the money to the imprest fund, and enter the amount of the refund on the original of the supplier's receipt. When the refund is

made subsequent to the submission of the applicable OF 1129, the imprest fund cashier shall enter the amount of the refund on the retained copy of the reimbursement voucher, promptly submit the refund and a properly prepared DD Form 1131 to the DO, and obtain a receipt.

H. Accounting. Recordkeeping for the imprest fund shall be as simple as possible consistent with the maintenance of adequate controls. A file of supplier's receipts for amounts paid and not yet vouchered for reimbursement, and copies of paid reimbursement vouchers ordinarily will suffice for the record of the imprest fund cashier.

★ I. Review. The imprest fund cashier shall be required to account for the established fund at any time, by cash on hand, paid supplier's receipts, unpaid reimbursement vouchers, and interim receipts for cash. Unannounced inspections, including cash counts are required to be made of each imprest fund at least quarterly by the cash verification team appointed by the commander who established the fund and appointed the imprest fund cashier. See Chapter 3 of this volume. Reports of discrepancies and investigations, as appropriate, shall be made as prescribed in chapter 6 of this volume.

★ 020907. Imprest Fund Depository Demand Withdrawal Account. An imprest fund depository demand withdrawal account may be established for cash withdrawals only when large sums of cash must be secured for investigative accounts or locally available financial institutions refuse to cash replenishment checks, even for a fee, when an account is not maintained with them. A demand withdrawal account shall be established only upon request to, and approval by, the Director for Financial Commerce, Office of the Deputy Chief Financial Officer, via the Deputy Director for Finance, DFAS. The approval shall be retained by the imprest fund cashier as part of the official records. Procedures on depository accounts are as follows:

A. Financial institutions selected to maintain an imprest fund cashier's account must meet the eligibility requirements of 31 CFR, Part 202 (reference (p)).

B. Signature cards for access to the account must be signed by both the principal cashier and the DoD Component Head, or other authorized official (not lower than the comptroller or chief fiscal officer of the installation) as designated by the DoD Component Head.

C. A letter signed by the DoD Component Head, or designee, must be sent to the financial institution advising that the funds deposited to the account are official funds of the U.S. Government and are in no way subject to claim by a surviving relative of any individual who is designated to sign on the account.

D. Checks must be made payable to cash for withdrawal by the cashier only; i.e., checks may not be made payable to fellow employees, vendors, etc. Withdrawal by automated teller machine is not authorized. Specific internal controls must be used to prevent such check issuances or withdrawals.

E. Accounts may be interest bearing or noninterest bearing. However, balances held in the account shall be limited to immediate disbursing needs. Any interest earned from the account must be deposited to the applicable DoD Component miscellaneous receipt account.

F. A minimum balance should be maintained to preclude service charges, unless payment of the service charge is more advantageous to the U.S. Government. Service charges or any other fees related to the account, or for cashing U.S. Treasury checks, must be paid by the DoD Component.

G. DoD Components may not enter into any arrangement with a financial institution for overdraft protection.

H. Replenishment checks shall not be deposited to the account until the funds are needed for issuance.

I. Maximum size of the account is left to the discretion of the DoD Component Head, or designee, but under no circumstances may the amount exceed \$10,000.

★ J. A monthly reconciliation of any depositary demand account, using an SF 1149 (Statement of Designated Depositary Account) must be performed by the cashier. The cashier shall submit the SF 1149 to the official who approved the establishing of the imprest fund together with the OF 1129. A copy of the completed SF 1149 and OF 1129 shall be retained by the cashier as part of the official records. Reconciliation, audit trails, verification, and accountability shall be in accordance with I TFM, Part 4, chapter 8000 and Chapter 14 of this volume.

★ 020908. Requests for Deviations. Requests for deviations to the imprest fund policies and procedures prescribed in this section shall be submitted in writing through channels to Under Secretary of Defense (Comptroller), Director for Financial Commerce, Office of Deputy Chief Financial Officer, Room 3E831, Pentagon, Washington DC 20301-1100, via the Deputy Director for Finance, DFAS, for approval. Items requiring approval to deviate include, but are not limited to, the following:

A. Temporary or permanent exceptions or waiver of imprest fund amount or payment limitations.

B. Placement of imprest funds in depositary accounts or use of third party payment drafts.

Copies of approvals must be retained for post review by representatives of the Treasury Department or the DoD Component audit organizations.

★0210 ACCOMMODATION CHECKS

★ 021001. General. The prescribed method for all payments within the United States is Electronic Funds Transfer (EFT) and shall be used to the maximum extent possible. When EFT is not practical, the preferred method for purchases will be the use of the government purchase card. If a vendor refuses to accept the government purchase card, or other restrictions make the use of the card impractical, accommodation checks may be used.

A. Payment flexibility. Accommodation checks give issuing DoD activities the flexibility to issue low volume and low dollar value payments on site.

B. Availability. Accommodation checks shall be available at those DoD activities that identify a need to issue accommodation checks, in lieu of cash, where purchase and travel cards have proven ineffective.

C. Minimum requirements. The minimum requirements to establish a local check-writing capability are as follows. (Note: Specific conditions for establishing accommodation checks are detailed below, in Section F, "Procedures.")

1. All organizations authorized to maintain accommodation checks must hold an active (in good standing) purchase card before approval of an accommodation check account. An accommodation check cashier may hold a government purchase card as long as policies and procedures established herein are observed.

2. The use of accommodation checks must be considered advantageous to the DoD activity, after evaluating all alternatives to accomplish the same purpose.

★ 3. Before any accommodation check is issued the paying agency must make every effort to use the government purchase or travel card to make necessary purchases. Maximum efforts shall be made to find and use vendors that accept the purchase card as the primary payment vehicle; e.g., the use of electronic or telephone catalog ordering services coupled with overnight delivery.

4. The authority to maintain a check-writing system (checkbook) shall be justified on an individual organization basis, and controlled and monitored by the DoD activity. Automated reports from the check providers are available to provide oversight.

★ 5. The number of checkbooks shall be limited to as few as feasible, not to exceed one per major DoD tenant activity or autonomous location.

★ 6. Appropriate internal controls, to include one level of approval above the check writer (i.e., an approving official) shall be maintained by each using DoD activity.

★ 7. Each accommodation checking account shall be audited yearly, on an unannounced basis, by an officer or equivalent DoD civilian employee who is independent of the office maintaining the account.

★ D. Additional Features. Accommodation check providers offer “stop payment” and retrieval capabilities to using DoD Activities, as well as an audit trail that permits the tracing of transactions. Also, these check providers offer “help desk” assistance and reporting capabilities with a variety of reporting media and frequencies.

★ E. Purchase Card Convenience Check. Upon appropriate justification and approval, a DoD activity may adopt the purchase card convenience check.

★ 1. Purchase card convenience checks shall not be issued for more than \$2,500.

★ 2. Purchase card convenience checks currently are provided through the GSA contract for the government-wide purchase card by the issuing banks (US Bank or Citibank). The contract requires that the card providers operate a convenience check writing system that allows DoD activities, including overseas locations, to make selected minor purchases and payments using checks in lieu of cash.

★ 3. This product offers an alternative to cash for official expenses of DoD activities previously using imprest funds--after card products and other alternatives have been determined unusable.

★ 4. Purchase card issuing bank requirements

a. The purchase card issuing bank will provide a supply of checks to the designated convenience check account holder.

b. The bank will process and pay the checks as they are presented through the bank check clearing system for payment within established maximums and authorization parameters established by the sponsoring activity agency program coordinator (APC) for each individual account holder.

c. The bank will provide a listing of the checks cleared on each account holder’s billing statement (invoice) and provide for storage of cleared checks for audit and retrieval purposes.

5. The checks will contain standard preprinted information: United States Government seal, the statements “For Official Use Only,” and “U.S. Government Tax Exempt.” The checks will include the maximum dollar limitation per check (i.e., \$2,500), as well as space for the date and the amount of the check. In addition, other standard preprinted information is

carried on the check specific to the parent DoD activity's name and address and the account holder's name. Thus, only the named individual may issue these checks.

★ 6. The checks are sequentially prenumbered, multiple-copy documents (with a minimum of at least one copy for the account holder's records).

★ 7. The convenience check account holder shall reconcile cleared checks and the resulting billing statement (invoice) against his or her retained records of issuance in accordance with standard payment practices established for the purchase card by "Purchase Card Reengineering Implementation Memorandum #3: Streamlined Financial Management Procedures."

★ F. FedSelect. A second accommodation check product currently used in the DoD, the FedSelect checks (available from the Chicago Financial Center, Financial Management Service, Department of the Treasury), will be discontinued March 31, 2000. DoD users are not authorized to establish new accounts. Active accounts must be closed not later than December 31, 1999. These users are encouraged to open a purchase card convenience check account.

021002. PROCEDURES

★ A. Authorization for Accommodation Check Account. Requests to establish accommodation checks first shall be justified (in writing) to the resource manager or commander/director of the installation or tenant activity. Delegations of authority to maintain and use accommodation checks shall be issued in writing specifically to the activity approving/certifying official, check custodian, and cashier by the activity commander/director as directed below.

B. Conditions for Establishing Accommodation Check Account

1. Designation of Activity Approving/Certifying Official

a. The activity approving certifying official may be any individual (i.e., officer, enlisted member, or civilian employee) who is appointed by the head of the issuing DoD activity to authorize and certify the issuance of accommodation checks by cashiers.

b. In order to maintain effective internal controls, the activity approving/certifying officials may not perform functions of accommodation check custodian or cashier.

c. The activity approving/certifying official shall be held accountable and pecuniary liable for the accuracy of the payments. (See "Purchase Card Reengineering Implementation Memorandum #3: Streamlined Financial Management

Procedures” for details of the “Payment Certification” and “Delayed Dispute Procedures” processes.)

★ d. In the case of purchase card convenience checks, the purchase card approving official (AO) is the same as the activity approving/certifying official.

(1) The activity approving official/certifying official shall be designated as the billing (invoicing) official and shall receive and certify payments of the billing statement (invoice) to the appropriate paying activity (e.g., a DFAS operating location).

★ (2) Convenience check accounts may be established with approving/certifying official accounts separate from approving official accounts for purchase cards.

★ 2. Designation of Accommodation Check Custodian

a. The custodian may be any individual (i.e., officer, enlisted person, or civilian employee) who is appointed by the head of the issuing DoD activity, or the activity’s accommodation check approving/certifying official to order, receive, store, issue, inventory, reconcile and dispose of check stock. (Each DoD Component and/or activity has the discretion of identifying the minimum grade level for its check custodians.)

b. Each accommodation check account shall be under the custody of one individual who is not responsible for originating, approving, and processing the requirement for a check. An alternate custodian may be appointed with the same authorities as the principal custodian; however, the alternate shall act only in the absence of the principal.

c. Both principal and alternate custodians, as applicable, may be held pecuniarily liable for account transactions under their control.

d. The accommodation check custodian may perform the functions of the accommodation check cashier.

3. Designation of Accommodation Check Cashier

a. The cashier may be any individual (i.e., officer, enlisted member, or civilian employee) who is appointed by the head of the issuing DoD activity, or the activity’s accommodation check approving/certifying official to inscribe (print), sign and issue checks.

b. The accommodation check cashier may perform the functions of the accommodation check custodian.

c. In the case of purchase card convenience checks, only one named person shall be designated as the accommodation check cashier and have authority to sign and issue accommodation checks.

★ d. An accommodation check cashier also may be a purchase card holder so long as the policies and procedures established herein are observed.

4. Other Operating Conditions

★ a. Accommodation check accounts shall be “bulk funded” in accordance with “Advance Reservation of Funds” policies delineated by the Under Secretary of Defense (Comptroller) memorandum of June 30, 1998, subject: “Purchase Card Reengineering Implementation Memorandum #3: Streamlined Financial Management Procedures--Change 1.”

★ b. Check amounts shall not exceed \$2,500 per check and shall be issued for the exact payment amount, with a prohibition on splitting purchases, payments or other amounts among more than one check to keep amounts below \$2,500 or other assigned limits (if less than \$2,500).

c. Accommodation checks shall not be issued as an “exchange-for-cash” vehicle to establish cash funds.

d. Accommodation checks may be mailed, as long as internal controls are in place to avoid duplicate payments to payees.

★ e. As appropriate, accommodation checks may be used for payments in overseas transactions up to \$10,000 in support of contingencies declared by the Secretary of Defense.

f. The issuing activity is responsible for all administrative costs associated with the use of accommodation checks. At DoD Component election, the costs associated with the purchase of accommodation checks may be (a) included in the bulk obligation and accounted for as part of the purchase price or (b) treated separately as an administrative cost of the issuing activity.

★ C. Method for Establishing Accommodation Check Accounts: Normal account set-up procedures shall be followed to establish the accommodation check account product. Appropriate application forms shall be completed and submitted through the DoD activity’s existing purchase card hierarchical structure, including approving official and Agency Program Coordinator (APC). The application also shall include a copy of the approval document issued by the DoD installation/activity resource manager or commander/director. A separate check account holder and approving official must be identified for each purchase card check account. The application can be obtained from the APC.

D. Conditions for Using Accommodation Check Accounts

★ 1. For accounts established with the purchase card issuing bank, agencies must maintain a current convenience check account status (i.e., with no delinquencies, except for questioned items or items in dispute). Also, any entity under suspension of purchase card privileges automatically shall be suspended from use of the purchase card convenience check system.

★ 2. Accommodation checks may be used for purposes not related to small purchases when such expenditures are authorized by other DoD or Component regulations.

021003. WAIVER PROCESS

A. The ODCFO may grant waivers to these policies (including higher dollar authority) for contingency operations and for exceptional circumstances.

B. Waiver requests for deviations from, or exceptions to, these policies shall be submitted for evaluation to the Military Department Office of the Assistant Secretary (Financial Management and Comptroller), the Defense Agency Comptroller, or equivalent. Waiver requests should be evaluated and approved or disapproved by the DoD Component Headquarters before submission to the ODCFO for consideration.

C. Waiver requests approved by the DoD Component Headquarters shall be submitted for consideration to the ODCFO. Such requests must contain adequate justification and demonstrate the need for a waiver or exception to the specific policy.

★0211 ALTERNATE AGENTS

When required, one or more individuals may be designated as an alternate agent to serve only during the absence of an imprest fund cashier, disbursing agent, cashier, change fund custodian, or collection agent. Alternate agents are not permitted in the case of deputy DOs. Alternate agents shall be issued letters of appointment as prescribed for the primary agent by the official authorized to appoint the agents. The alternate is an agent of the appointing official and when serving in place of the primary agent is governed by all regulations applicable to the primary agent. Funds received by alternates shall not be merged with those of the primary agent. Separate records shall be maintained to establish the amount for which each agent (or alternate) is responsible. Alternates are prohibited from conducting operations involving the handling of public funds concurrently with the primary agent. Upon written authorization of the appointing official, a primary agent may advance to an alternate agent a specified portion of cash holdings for use only during the absence of the primary agent. A DD Form 1081 (Statement of Agent Officer's Account) shall be signed by the alternate and held by the primary agent as evidence of the advance.

0212 DEATH, INCAPACITY, OR UNAUTHORIZED ABSENCE OF AGENTS

In the event of the death, incapacity, unauthorized absence, arrest, or other emergency absence of an agent, the commander shall take action as prescribed in section 0205 of this chapter for deputies at branch offices except that relieving agents shall be appointed in accordance with the procedures applicable to the position involved. In the case of an imprest fund cashier, the final voucher should be prepared by the relieving imprest fund cashier.

CHAPTER 3

KEEPING AND SAFEGUARDING PUBLIC FUNDS0301 CASH OPERATIONS030101. Appropriated Funds

A. Deposit Funds. Amounts appropriated by the Congress are held in an expenditure account by the Treasury subject to disbursement by DOs of the United States. Disbursements may be made by EFT, Treasury check, or cash. Cash funds are obtained by DOs as described in Chapter 7 of this volume. Every disbursing office authorized to make disbursements is identified by a DSSN. Each disbursement of funds is charged by the Treasury Department to the DSSN making the disbursement. DOs outside the United States are authorized to maintain official checking accounts with banks designated by the Secretary of the Treasury in accordance with regulations outlined in Chapter 14 of this volume. These special accounts outside the United States denominated in local or third country currencies and are known as limited depositary accounts (LDAs).

B. Cash Funds. When it is necessary to make all or some disbursements in cash, upon approval of the commander or other authority, DOs are authorized to maintain on hand, at their own personal risk, currency and coin required for official disbursements and accommodation transactions.

★ C. Selection of Payment Method. Subject to the policies outlined in this volume, payments may be made by EFT, check, or cash. In the United States, EFT is the prescribed method of payment and shall be utilized to the maximum extent possible. When use of EFT is not practical; i.e., for payments going to a foreign country address where EFT is not available, Treasury checks (rather than cash) are the preferred method of payment. Consult section 2402.

030102. Cash Held at Personal Risk. Funds that qualify as cash held at personal risk include U.S. currency and coin on hand; foreign currency and coin on hand; imprest funds; change funds; and cash on deposit in an LDA. Cash held at personal risk is for making miscellaneous cash payments, making change, conducting accommodation exchanges, and other specifically authorized transactions.

★ 030103. Approving Authority. Service commanders of DOs, deputies, agents, and cashiers of the DO within their commands are the approving authority for granting requests to hold cash funds at personal risk. The DFAS Center Directors of DOs, deputies, agents, and cashiers of the DO within their organizational structure, to include defense accounting officers (DAOs), are the approving authority for granting requests to hold cash at personal risk. Cash on hand must be kept to the minimum necessary to meet normal requirements. To ensure that good

cash management procedures are in effect within the Department, the approving authority shall review each request to ensure that it is in line with the total non-payroll requirements.

★ 030104. Requests for Approval. Each DO shall request authority to hold cash at personal risk from the approving authority. Scheduled payday cash requirements, including the amount required to cash payday paychecks, shall not be included in the request. The approving authority is responsible for ensuring the amount of the request is within the guidelines set forth below and that management controls exist to ensure that routine reviews of cash requirements are being conducted. A new request to hold cash at personal risk shall be submitted semiannually (or whenever a review of cash requirements will result in a major change), allowing sufficient approval time for the cash authority to become effective on October 1 and April 1 of each fiscal year. Requests to hold cash at personal risk shall be made in writing and shall include the name, title, and duty station of the accountable requestor; a description of the payments and transactions requiring the use of cash; a statement attesting that adequate facilities are available to safeguard the cash; and a breakdown of where the cash will be held by accountable position. For emergency and extraordinary expense funds security concerns may require omission of the duty station, description of payments, location of facility, or other information that may compromise classified information. However, this information shall be kept on file and available for review by cleared personnel. The request shall include the amount to be held personally by the DO as well as the amounts to be held by all deputies, agents, and cashiers of the DO. The request shall not include the amount held by authorized imprest fund cashiers and authorized change fund custodians. Imprest funds and change funds are approved separately and are not to be included in the DO's cash holding authority. Approval of all requests shall be indicated by an appropriate endorsement and the original request shall be returned to the DO for retention.

030105. Determining Cash Requirements

★ A. General. In considering their cash requirements for disbursing and accommodation transactions, DOs shall consider daily cash collections of all deputies, agents, and cashiers of the DO over a representative period of time and average the results. If daily cash collections exceed disbursement and accommodation needs, no further computation is necessary. Otherwise, compute the cash requirements according to source and availability as shown in table 3-1. The portion of the DO's request to hold foreign currency at personal risk may be stated in foreign currency units to preclude temporary increases due to extreme currency fluctuations. The following types of disbursements which are authorized and/or required should be considered in determining the minimum cash/negotiable instruments a DO must hold at personal risk to meet normal daily cash transaction requirements:

1. Routine cash payments.
2. Emergency cash payments, e.g., emergency leave, etc.
- ★ 3. Commercial contract travelers checks for travel cardholder temporary duty travel advances.

- ★
4. Cash travel advances for non-cardholder temporary duty travelers and permanent change of station travelers.
 5. Foreign currency requirements for accommodation exchanges.
 6. Requirements for personal check cashing accommodation transactions. (See Chapter 4.)
 7. Cash transactions of remote/satellite deputies, cashiers, and agents of the DO.

B. Special Circumstances. When special circumstances require DOs to increase their cash holdings beyond the amounts set forth above, the circumstances and duration of the expected need for increased cash shall be detailed in the request for approval to increase cash held at personal risk. The approving authority may authorize holding amounts temporarily in excess of the limits described above based on the circumstances provided. If the circumstances are more than temporary (over 30 days) or are expected to become permanent, the DO shall recompute the cash requirements based on the addition or deletion of anticipated services and requirements and submit a new request for approval.

C. Cash Collections. Coin and currency received as cash collections may be held for operating cash requirements up to the amount authorized to be held at personal risk. Cash collections that increase cash on hand above the authorized limit shall be deposited immediately.

030106. Payroll Cash. Payroll cash is the cash required to meet mid-month, end-of-month, or special payday requirements. DOs can forecast these requirements using historical data and current personnel assigned figures. It should be ordered and withdrawn from the institution or activity providing cash as close to the actual payday as practical. Any excess amount drawn that results in the DO exceeding the authorized limit for cash held at personal risk should be deposited no later than the next business day following payday.

030107. Obtaining Cash Funds for Disbursing Purposes

A. Procurement by Exchange-for-Cash Checks. DOs are authorized to draw exchange-for-cash checks as described in Chapter 7 of this volume for procurement of cash necessary to meet authorized requirements. Funds can be obtained from other DOs, an FRB, FRB branch, or any commercial bank willing to provide the service. If the DO is unable to go to the bank to take possession of the funds due to excessive workload or location, arrangements can be made with the FRB or bank to ship the funds by registered mail or armored car. The commander shall approve and fund, as required, this type of delivery.

B. Notification to the Bank. As required, DOs shall provide the bank with advance notice of their cash requirements. At the time of notification, the DO should ascertain and provide any other additional requirements of the financial institution such as date currency required; identification required; denominations required; fees charged; and any policies or procedures peculiar to the particular institution (e.g., letter of introduction).

C. Immediate Credit Procedures

1. Requirement. A few banks have negotiated agreements with the Treasury Department that permit them to receive immediate credit when cashing an exchange-for-cash check for DOs to obtain payroll cash (referred to as military payroll check by the Treasury Department). DOs who obtain their payroll cash from one of the banks so designated shall notify the Treasury by Telecopy-FAX or by message or telegram addressed to: U.S. Treasury Department, Financial Management Service, General Ledger Branch, (ATTN:MTAS), Washington, DC. There are two Telecopy-FAX lines available for this purpose: (202) 566-3020 and (202) 633-7728.

2. Notification. Notification should arrive at the Treasury Department at least 2 days before the transaction is to take place and should include the name and location of the disbursing office; the name and address of the bank; the amount of the check; the date the check will be presented to the bank (shall be same day cash is picked up); a statement that the bank will be requesting immediate credit; and the disbursing office point of contact and commercial telephone number. Do not use DSN numbers. If an error is detected, a correction shall be transmitted immediately. In the event that the check is not exchanged for cash, the DO immediately shall notify the Treasury Department.

D. Protection of Currency in Transit

1. Notification to Commander. When a DO or any other person leaves the disbursing activity with official cash funds in excess of \$10,000, or for the purpose of picking up official cash funds in excess of \$10,000, the installation commander and the security police shall be notified. Such notice may be made through the command duty officer or other duty officer by reporting the time of departure, destination, estimated time of return, amount, and the source or disposition of the cash funds, as appropriate, for entry in the ship or station log.

2. Transporting Cash. Cash shall be secured at all times. Safeguarding of such funds is a command responsibility. Specifically, the responsibility for providing security rests with the commander of the activity who requested such funds be made available. In this regard, the decision whether to have an armed escort, how many, or the type of transportation to be used is all part of the command's responsibility. The command should consider such things as amount of funds to be protected, the distance and terrain to be covered, type of transportation available, and local security forces which may be called upon.

3. Liability. The deputy, agent, or cashier who has signed for the funds is pecuniarily liable for such funds until their return to the DO. If a deputy, agent, or cashier feels that adequate security has not been provided by the command, then the agent may refuse to disburse such funds and return the funds to the DO.

E. Verification of Money. The DO shall verify all cash received prior to acceptance. Non-sealed money shall be verified by actual count prior to acceptance or immediately upon receipt of shipment. Sealed new money bricks (presented with the FRB's packaging intact) can be verified by bundle count at the DO's risk. When the bundle is needed, the bundle should be verified immediately upon opening with individuals standing by to witness both the breaking of the seal and the count verification. Discrepancies shall be reported immediately by issuing a claim to the Treasury Department via the bank from which the money was obtained. Claims shall identify the bundle/brick in question and include a signed statement from the witnesses. The Treasury Department normally does not approve these claims. If the claim is not approved, apply the regular request for relief procedures. Receipts by shipment shall be accepted and verified in front of the witnesses immediately upon receipt in accordance with the above procedures, depending upon how the money is packaged.

F. Expenses. Bank charges and shipping costs that may be incurred when procuring U.S. currency shall be charged to the operation and maintenance funds available to the disbursing activity.

G. Registered Mail Shipments of Currency. This method of obtaining funds is highly discouraged. If no other sources of cash are available and cash must be obtained using this method, it shall be accomplished by sending an exchange-for-cash check to an FRB via registered mail. Also, the DO shall make arrangements with the FRB to pay the registered mail costs. As provided in the previous subparagraph, costs incurred in procuring U.S. currency shall be charged to the operation and maintenance funds of the disbursing activity. Upon notification that the shipment has been made, the DO shall take action to alert the shipper to trace the funds if they have not been received within a reasonable period of time; maintain a copy of the exchange-for-cash check and report the check as funds in transit on the SF 1219 until the cash is received from the FRB; and if the cash or any portion of the order is not received in a reasonable time, initiate diligent action as described in Chapter 5 of this volume.

H. Obtaining Cash by Transfer from Officer Relieved. The obtaining of cash funds by transfer from another DO without the issuance of an exchange-for-cash check is authorized only upon the relief of a DO and only from the DO being relieved.

0302 CASH REVIEW REQUIREMENTS

030201. Quarterly Cash Verification

A. Purpose. The quarterly cash verification is the physical count of the cash, negotiable instruments, and other assets that comprise a DO's total accountability (including cash, negotiable instruments, and other assets in the custody of all deputies and agents). It is a management control that, along with other controls, can be used to gauge the overall health of a disbursing operation. It is not meant to alleviate management's responsibility to direct and monitor all facets of a disbursing operation.

B. Appointing the Cash Verification Team. The verification shall be conducted by a team of disinterested persons appointed by the commander. The appointment shall be made in writing and include at least two qualified personnel. At least one of the personnel must have accounting or disbursing experience. It is in a command's best interest to use the most competent personnel available. In the case where the DO also is the commander, the next higher commander in the administrative chain of command shall appoint the team. At small or remote locations, it may be desirable to limit the team to one member or have members appointed and provided from serviced or associated commands. Cash verification team members shall not be in the DO's chain of command. If possible, one member should be equal or senior in rank to the accountable individual. For imprest and change funds, especially those held at installations or activities other than the installation or activity of the DO, the commander who authorized the establishment of the fund and appointed the imprest fund cashier or change fund custodian is responsible for appointing the cash verification team. In all cases, the appointing commander shall require the cash verification team (or individual) to perform a verification of all funds held by deputies, branch office cashiers, disbursing agents, paying agents, collection agents, imprest fund cashiers, or change fund custodians, at least once each quarter. Cleared personnel will be appointed for the verification of emergency and extraordinary expense funds.

C. Cash Verification Procedures. Except as modified by this paragraph, the requirements of this volume shall be met by the cash verification team in conducting cash verifications. When desired by the commander appointing verifying officials, the DO shall conduct training for the verifying officials and/or provide written instructions with check-off lists. The specific procedures for conducting the verification are contained in appendix A. The team and the commander jointly are responsible to ensure that the verification is conducted randomly throughout a quarter. Verifications that are continuously held at or near the end of a quarter are counter productive. The quarterly cash verification may be omitted for any quarter in which a cash verification is made by representatives of an area audit office, a disbursing on-site examination team, or transfer of accountability has occurred.

D. Report of Verification

★ 1. General. A written report of the results of each verification shall be made. The original report shall be provided to the commander, a copy to the DO, and a copy retained by the cash verification team. If funds are found to be in excess of that authorized to be

held at personal risk in accordance with paragraph 030105 of this chapter, the report shall be expanded to so state. Any shortage or overage in the DO's account-ability shall be reported as prescribed in Chapter 6 of this volume. The verifying official(s) shall make an entry on the face of the DO's daily statement of accountability, setting forth the result of the verification in substance as follows:

"On (date) at (time) , the undersigned verified by actual count, cash in the amount of \$_____, together with all documents supporting collections and disbursements, which (is)/(is not) in agreement with this daily statement of accountability.

Signature and Rank of Verifying Official"

2. Limitations. Each report to the commander shall begin with the statement: "The quarterly cash verification is meant only to verify that cash and other assets for which the DO is accountable agrees with the total accountability amount recorded as on-hand on the DO's daily statement of accountability. It does not attest to the system of management controls or overall fiscal operation of the disbursing office. Strong management controls exercised by the appropriate members within the chain of command are mandatory and necessary to prevent and preclude major loss or fraud."

0303 SAFEGUARDING FUNDS AND RELATED DOCUMENTS

030301. General. This section sets forth the responsibilities of commanders and DOs for safeguarding public funds and the related instruments and documents. Its provisions are equally applicable to deputies, agents, cashiers, and other custodians of public funds. DOs should hold the number of accountable positions that require the storing of public funds to a minimum. The most secure container that is available to a DO (vault, safe, etc.) shall first be used for safeguarding currency; undelivered checks and bonds; negotiable instruments; public vouchers; storing of blank U.S. Treasury checks, limited depositary checks, and U.S. savings bonds; signature plates; safekeeping of valuables; and other records in that order. The command security program should be written to take into account the maximum amount of each of these items that would normally be on hand at any given time. Public funds and documents shall not be stored in the same containers as classified material and documents.

030302. Responsibilities

A. Commander. The commander is responsible for:

1. Ensuring that every individual entrusted with public funds is provided a vault, safe or other adequate secure facility (e.g., a strong box) for exclusive use and accessible only to that individual. If it is not possible to provide separate safes, separate locked compartments in one safe or strong boxes stored in one safe or vault shall be provided. To assure

the fixing of accountability, control over a discreet amount of public funds shall not be entrusted to two or more individuals. Public funds shall never be merged with any other funds.

2. Developing a security program and promulgating the program in the form of a command instruction or notice. The program shall provide adequate protection for the maximum amount of public funds and related documents and instruments that will be on hand at any given time.

3. Ensuring that personnel protection is included in the overall disbursing security program. The program shall include requirements for periodic review of the adequacy of the security measures being used and for testing security equipment for proper operation on a semiannual basis.

4. As required, ensuring armed guards are made available for escort of government funds to and from the disbursing office when funds are being transported.

5. Providing fire protection of government facilities and funds.

B. Disbursing Officer. The DO is responsible for properly safeguarding all government funds with which entrusted and is held pecuniarily liable for the loss of such funds. When DOs, deputies, agents, cashiers, and/or custodians have custody of government funds, each shall be provided with a separate secure container as described above. Although any of the appointed or assigned personnel are liable for any losses of government funds in their custody, the DO also continues to hold overall responsibility and is jointly (or even singularly) liable for any losses associated with these personnel. For this reason, DOs shall make sure that all deputies, agents, cashiers, imprest fund cashiers, and other custodians are fully aware of their responsibilities for properly handling and protecting government funds. At least semiannually, the DO or designee shall make a personal inspection (and maintain a record of such inspections) of office security measures to ensure that:

1. Vaults and safes are not accessible to unauthorized persons. Access to vaults may be limited by vault day gates to which only authorized personnel have the keys.

2. Cash in excess of the amount required and authorized for official purposes is promptly deposited.

★ 3. Windows and doors are limited and barred and/or locked at all times after business hours.

4. Access to the working area is conspicuously marked "AUTHORIZED PERSONNEL ONLY." Transactions should be conducted from a cage, room, or counter enclosure, constructed in a manner which will provide a physical barrier to normal traffic and a minimum of interference by other activities and personnel of the office.

5. Security devices for the check signing machines, meters, and plates are kept in the custody of the DO or authorized deputy at all times.

6. Internal office procedures are established to provide adequate controls on all undelivered and returned checks. Responsibility for receipt, holding, and final distribution of checks shall be assigned in writing.

7. The commander is advised of any security shortfalls or breaches.

8. The servicing DFAS Center is informed of any request for adequate safeguarding facilities that has been denied.

9. Written and oral instructions are provided to all deputies, agents, cashiers, and custodians regarding the proper care and handling of cash and other accountable documents. The DO is advised to maintain an affidavit from each accountable individual attesting to receipt of such instructions.

10. All cash, blank Treasury checks, blank U.S. savings bonds, blank depositary checks, and related items to which this section refers are kept in a vault, safe or security container that meets the minimum security standards prescribed in this section.

11. All fund containers aboard ships and fund containers ashore that are either on rollers or weigh less than 750 pounds are stored in a vault or secured in such a way as to prevent movement.

12. If the vault, safe, or container is visible to the exterior of the office where security patrols pass, the container is illuminated. This requirement is mandatory in all cases aboard ships.

13. The combination of all vaults, safes, and fund containers is changed at least once every 6 months and upon relief, transfer, separation, or discharge of the accountable individual. Except for vaults containing only bulk stock of blank checks and bonds or several safes or strong boxes (wherein funds are stored) stored inside the vault, the responsible individual shall not divulge the combination or key to anyone. At the discretion of the DO, the combination of each safe and duplicate key of each strong box may be placed in a sealed, signed, and dated envelope. The envelope shall be sealed and signed by the accountable individual in such a manner that unauthorized opening of the envelope can be detected. The sealed envelopes of all accountable individuals other than the DO shall be kept in the DO's safe. The sealed envelope containing the combination and/or keys to the DO's safe or vault shall be delivered to the commander, security officer, or other designated official for retention. The combination or key sealed in the envelope shall be used only in the event of an emergency which requires opening of the safe or vault. Refer to Chapter 2 of this volume for emergency procedures.

14. A record of combination changes is kept inside each vault, safe, or container. The record shall be dated and signed by the accountable individual.

15. The dial to the vault, safe, or container concealed by a shield made of cardboard or other suitable material to limit the possibility of the combination being observed.

16. The name and phone number of the accountable individual is posted on the inside of the vault, safe, or container. DOs may use an SF 700 (Security Container Information), SF 701 (Activity Security Checklist), or SF 702 (Security Container Check Sheet), as appropriate, to assist in the control and proper safeguarding of public funds and the vaults, safes, and/or containers. Alternatively, a unique container number along with a 24-hour duty number may be posted on the outside of the vault, safe, or container provided the duty personnel have access to the accountable individual.

17. Keys to the work space or disbursing office are strictly controlled. A record shall be maintained that identifies who has keys, when they were issued, and when they were surrendered.

18. All security equipment is tested at least every 6 months for proper operation and a record of the tests maintained.

C. Other Custodians of Public Funds. Protective action shall be taken by all custodians (including alternate custodians) entrusted with public funds.

030303. Intrusion Detection Systems

A. General. An Intrusion Detection System (IDS) is a vital part of any protection system designed to provide in-depth protection for a resource or other important area. The DoD supports a policy on the use of IDS for resource protection purposes. The first consideration shall be given to components of the DoD Joint-Services Interior Intrusion Detection System (J-SIIDS). In certain special cases, components of the Base and Installation Security System (BISS) (generally used for security applications) also may be available for resource protection requirements.

B. Alarms. Alarms should be considered for use to deter entry to the general disbursing area or to the actual storage container. There are three levels of alarm protection: penetration; motion; and point detection. In-depth protection can best be achieved by equipping an area with a minimum of two levels of detection capability. The existence of alarms should be well publicized to gain the full benefit of psychological deterrence, and should be identified by conspicuous warnings.

C. Maintenance. To ensure the alarm system operates properly, the installation shall have an effective maintenance program and shall test the system regularly. The alarm system shall be protected against bypassing and spoofing consistent with DoD requirements.

D. Alarm Monitor's Responsibilities. Alarm monitors shall be trained to understand the systems they are monitoring to include operation and basic fault isolation. They shall work closely with the security police and unit personnel and act as a liaison in this special role.

★ 030304. Categories of Storage Containers

A. Security Containers. General Services Administration approved security containers are manufactured under the following Federal specifications. The Class 1 and Class 5 cabinets have been rated to provide the greatest protection against forced entry.

1. Class 1 or Class 2 cabinet. AA-F-357 (GSA-FSS).
2. Class 4 or Class 5 cabinet. AA-F-358 (GSA-FSS).
3. Class 5 or Class 6 Map and Plan File. AA-F-363 (GSA-FSS) or Class 6 Drawer File - AA-F-358 (GSA-FSS).

B. Burglary Resistant Safes. Commercial burglary resistant safes are certified by Underwriters' Laboratories, according to the following classifications. These containers are designed to protect the contents against forced entry. The numerical value utilized in the classifications represents the time in minutes which the safe should resist forced entry. These safes provide a greater degree of protection than the General Services Administration rated security containers.

1. Tool-Resistant Safe - TL-15.
2. Tool-Resistant Safe - TL-30.
3. Torch and Tool-Resistant Safe - TRTL-30.
4. Torch and Tool-Resistant Safe - TRTL-60.

★ 030305. Storage Container Requirements

A. Currency and Negotiable Instruments. The following subparagraphs prescribe the minimum requirements for storage of currency and negotiable instruments. DoD Component security and resource protection programs should ensure compliance with these minimum requirements. Previously approved storage containers currently in use may continue to be used.

1. Under \$7,500. The commander shall establish fund container requirements. Any of the security containers or burglary resistant safes listed in paragraph

030304 of this section may be used. Additionally, the Naval Sea Systems Command may designate specific containers which may be used onboard Navy ships.

2. \$7,500 - \$50,000. A security container that carries a Class 1 or Class 5 rating or a burglary resistant safe carrying at least an Underwriters' Laboratories classification of Tool-Resistant Safe, TL-15, and having a Group 1R combination lock, should be used.

3. \$50,000 - or more. A burglary resistant safe or vault carrying at least an Underwriters' Laboratories classification of Tool-Resistant Safe, TL-30, and having a Group 1R combination lock, should be used.

★ B. Other Than Currency and Negotiable Instruments. Blank checks and bonds, signature plates, paid vouchers representing cash (collection or disbursement vouchers which have been processed but have not been included as a net disbursement in the daily or monthly, as appropriate, financial reports to the servicing DFAS center), other disbursing records and documents, and personal valuables as defined in paragraph 270102 held for safekeeping shall be stored in a security container carrying at least a Class 1 or Class 5 rating or a burglary resistant safe or vault. Additionally, the naval sea systems command may designate specific containers which may be used on board navy ships.

0304 ADVANCING FUNDS TO AGENTS

030401. Deputies, Agents, and Cashiers of the DO

A. Procedure. DOs may entrust funds for official use to the custody of their deputies, agents, and cashiers as prescribed in this section. All funds that are advanced to deputies, agents, and cashiers shall be documented by DD Form 1081. Funds may be provided by furnishing the deputies, agents, or cashiers with currency or by issuing exchange-for-cash checks, as required, payable to the deputy, agent or cashier. The DO shall instruct the individual to negotiate exchange-for-cash checks only as funds are needed, since an unnegotiated Treasury check does not represent an interest burden on the Treasury, and, accordingly, is not considered a part of the individual's (or the DO's) approved cash authority (even though the DO reports the unnegotiated check as "Funds with Agents" and the deputy, agent, or cashier reports the unnegotiated checks as "Cash on Hand"). Funds in the custody of deputies, agents, and cashiers in the main disbursing office shall be reported on the SF 1219 as cash on hand and funds in the custody of deputies, agents, and cashiers outside the main disbursing office shall be reported on the SF 1219 as cash in the custody of government cashiers. See figure 3-1 for an example of a properly executed DD Form 1081 showing an advance of funds to deputies, agents, or cashiers.

B. Limitation of Amount. Under normal conditions, the amount of funds advanced to a deputy, agent, or cashier shall not exceed their cash holding authority. However, during the authorized absence of the DO, on paydays, and at such other times as is required for efficient operation, funds may be entrusted to the custody of deputies, agents, or cashiers in such

amounts as are required, provided the total amount held by the DO and the deputies, agents, and cashiers does not exceed the amount authorized to be held by the DO.

C. Custody. Each deputy, agent, or cashier shall store the funds entrusted to him or her in a safe or adequate container which is assigned exclusively for his or her use as specified in section 0303 of this chapter. The combination of the safe or container shall be known only to the deputy, agent, or cashier and may be placed in a sealed, signed, and dated envelope for retention in the DO's safe or vault. The combination of the safe or container shall be changed at least once every 6 months. If it becomes necessary, in the opinion of the commander, to gain access to the safe or container, it shall be opened and the contents verified following the procedures outlined in Chapter 2 of this volume.

D. Balancing. All deputies, agents, and cashiers entrusted with official funds shall balance the funds in their custody following the balancing requirements for DOs as outlined in Chapter 19 of this volume. The permanent record of balancing for deputies, agents, and cashiers shall always be kept on the DD Form 2665 (Daily Agent Accountability Summary). The DO shall instruct each deputy, agent, or cashier with respect to the frequency of balancing and submission of DD Form 1081 as a summary of cash transactions and receipt for cash and vouchers on hand. In any event, DD Form 1081 turn-ins shall be made not less frequently than once each month. When it is known that a deputy, agent, or cashier will be absent in excess of 5 workdays, all funds and accountable documents in the deputy's, agent's, or cashier's custody shall be returned to the DO with properly executed DD Forms 2665 and 1081 prior to departure. Any shortage or overage of funds shall be reported immediately as prescribed in Chapter 6 of this volume. See figure 3-2 for an example of a properly executed DD Form 1081 showing return of funds and/or vouchers to the DO.

E. Collections and Disbursements

1. Deputies, Agents, and Cashiers in the Main Disbursing Office. All negotiable instruments, collection and disbursement vouchers, and other accountable documents shall be accounted for on DD Form 2665 and turned in to the DO daily with a covering DD Form 1081. Currency collected over and above the currency disbursed may be retained when authorized by the DO provided the total funds held are within the limitations specified above. The DD Form 1081 also serves as a new receipt for the funds which remain in the custody of the deputy, agent, or cashier. When additional funds are required, due to disbursements greater than collections or other authorized transactions, the DO may replenish the funds in the net amount of acceptable vouchers and negotiable instruments delivered with the DD Forms 2665 and 1081. The DO shall prepare a new DD Form 1081 for the amount of funds advanced. DD Forms 1081 shall be prepared as described in Chapter 19 of this volume.

2. Deputies, Agents, and Cashiers at Branch Disbursing Offices. When deputies, agents, and cashiers are performing duties in branch offices located at such distances from the main disbursing office that reporting of transactions in person is considered impracticable, the DO may authorize transmittal of the transactions by mail or messenger,

accounted for on DD Form 2665 with a covering DD Form 1081. The original DD Form 1081, signed by the deputy, agent, or cashier and duplicate of the report shall be forwarded with the DD Form 2665 and substantiating vouchers, negotiable instruments, and documents to the DO who, after examination and acceptance, shall acknowledge receipt on the duplicate copy of the DD Form 1081 and return the duplicate to the deputy, agent, or cashier. Replenishment of funds may be accomplished by furnishing the deputies, agents, or cashiers with currency or by issuing exchange-for-cash checks payable to the deputy, agent, or cashier and a new DD Form 1081 as provided in the previous subparagraph. DD Forms 1081 shall be prepared as described in Chapter 19 of this volume.

3. Deputies, Agents, and Cashiers Under Other Commands.

Deputies, agents, or cashiers who are not under the same command as the DO, such as the investigative service, investigative support center, intelligence command, and U.S. Defense Attache Offices, shall deposit negotiable instruments whenever possible. Deposit tickets, collection and disbursement vouchers, and other accountable documents shall be transmitted by mail or messenger, accounted for on DD Form 2665 with a covering DD Form 1081. The DD Form 1081 shall be prepared as described in Chapter 19 of this Volume, except that, on the determination of the DO, the volume of transactions may be so few as to permit the submission of a single DD Form 1081 for each month.

4. Deputies, Agents, and Cashiers Aboard Navy Vessels.

Deputies, agents, and cashiers aboard Navy vessels shall account for all negotiable instruments, collection and disbursement vouchers, and other accountable documents (including documents prepared in conjunction with the automated teller machine system, if installed on the vessel) using the DD Forms 2665 and 1081 as prescribed in the preceding subparagraphs. However, turn-in shall be accomplished no less frequently than: once each week; immediately before and after each payday; the last day of each month; and, at any other time when the DO suspects that an irregularity has occurred. Whenever workload and staffing conditions permit, DOs aboard Navy vessels are encouraged to require all deputies, agents, and cashiers to turn in vouchers and negotiable instruments more frequently than the standards prescribed by this subparagraph.

F. Records. All transactions by other than the DO shall be identified by name of the paying deputy, agent, or cashier. The method used to accomplish the identification shall be as determined by the DO. Negotiable instruments cashed by other than the DO shall be identified as prescribed in Chapter 4 of this volume.

030402. Paying Agents. Funds entrusted to authorized paying agents for the purpose of making specific payments, currency conversions, or check-cashing transactions shall be documented with a DD Form 1081. The amount of the advance shall not exceed the amount required for the specific payments, check cashing, or currency conversions to be made by the paying agent. The DO shall furnish written instructions to the paying agent to ensure that all pertinent disbursing procedures are properly observed by the paying agent, including requirements for the safeguarding of funds; identification of payees; signature of payees; required vouchers, documents, and certifications; and the return of funds and vouchers. Funds advanced

to the paying agent shall neither be commingled with any other funds nor advanced to any other person. Normally, the paying agent shall not retain advanced funds overnight. Promptly upon completion of authorized payments, the paid vouchers, negotiable instruments, and any balance of funds shall be returned to the DO with a properly completed DD Form 1081. When circumstances require retention of funds overnight by the paying agent, the custody requirements in section 0303 of this chapter shall be followed, and the paid vouchers, negotiable instruments, and balance of funds shall be returned as soon as possible after completion of the authorized payments, normally within 24 hours. The DO shall notify his or her commander and the commander of the paying agent if the paying agent fails to make prompt return of paid vouchers, negotiable instruments, and funds or if loss of funds or vouchers occurs.

030403. Imprest Fund Cashiers

A. Authority. The DO serving the base, camp, post, station, installation, activity or ship is authorized to advance official funds not to exceed the \$10,000 limitation and authorization as prescribed in Chapter 2 of this volume. When an imprest fund initially is established, the DO shall make the advance of funds only after receiving a copy of the authorization to establish the fund from the commander or designee. When the commander or designee authorizes an increase in the amount of an existing imprest fund, the DO shall make the additional advance in order to bring the amount of the fund up to the newly established level only after receiving a copy of the authorization to increase the amount of the fund.

B. Form of Advance of Funds. The advance shall be made by cash or by check payable to the order of the imprest fund cashier. If desired by the imprest fund cashier, a series of checks in the desired denominations (round figures or specific amounts) may be issued. The DO shall prepare a DD Form 1081 for the amount of funds advanced and the original shall be signed and returned to the DO by the imprest fund cashier. All DD Forms 1081 for imprest fund advances shall include a statement that the imprest fund cashier will immediately inform the DO who advanced the funds of any loss of or shortage.

C. Accounting. All imprest fund advances shall be reported on the SF 1219 as cash in the custody of government cashiers.

D. Reimbursement and Liquidation. The amount of the imprest fund shall remain constant at all times. The imprest fund cashier shall prepare and submit an OF 1129 (Cashier Reimbursement Voucher and/or Accountability Report) to the DO as often as necessary but no less frequently than once per month for replenishment of the fund. The DO shall reimburse the imprest fund cashier for the amounts expended and properly documented as prescribed in Chapter 2 of this volume. Upon reduction in the authorized amount of the imprest fund, funds may be transmitted to the DO by money order(s). The cost of the money order(s) shall be deducted from the amount transmitted and accounted for as prescribed in Chapter 2 of this volume. The imprest fund cashier shall prepare a DD Form 1081 to document the return of the funds. The DO shall sign the duplicate of the DD Form 1081 and return it to the imprest fund cashier. Upon relief of the imprest fund cashier or upon the disestablishment of the fund for any

reason, all unreimbursed transactions shall be accounted for on an OF 1129. Immediately upon reimbursement for the final OF 1129, the imprest fund cashier shall prepare a DD Form 1081 and return the total amount of the imprest fund to the DO. When the imprest fund advance is fully accounted for, the DO shall sign the duplicate copy of the DD Form 1081 and return it to the imprest fund cashier. Upon relief of the DO, the DD Form 1081 receipting the amount held by the imprest fund cashier in the imprest fund shall be transferred to the relieving DO.

E. Shortage or Overage of Imprest Fund. In the event of a shortage or overage in an imprest fund, action shall be taken as prescribed in Chapter 6 of this volume.

030404. Establishing Change Funds

A. Authorization

1. When the efficient and economical operation of a government laundry, clothing sales store, or other appropriated fund activity (other than a Defense Commissary Agency (DeCA) commissary) engaged in selling property or services requires cash for making change, the officer in charge of the activity shall request the commander to establish a change fund. After approval, the commander (or designee) shall appoint a change fund custodian and the appointment document shall specify the amount of funds to be advanced by the DO or an agent of the DO to the custodian. The DO (or an agent of the DO) providing disbursing service to the installation or activity where the sales activity is located shall provide the authorized change fund advance and record the advance in his or her accountability as cash in the custody of Government cashiers. This requirement applies whether the sales activity deposits the proceeds of sales to the DSSN of the local DO or to the DSSN of a regional DO.

2. For DeCA commissaries, the change fund for each commissary store is authorized by the Director, DeCA. Except in specific overseas areas, DeCA commissary change funds are provided by the DFAS-Columbus Center. In all cases, these change funds are issued by U.S. Treasury check using an SF 1034 that charges the DeCA Resale Account and are not carried in the issuing DO's accountability as cash in the custody of government cashiers.

B. Fund Limit. The amount of the change fund shall not exceed \$250 for each cash register machine operated in the activity. When a cash register has more than one drawer, each drawer may be considered as a register. The commander may authorize additional amounts as indicated below. These increases shall be consistent with good cash management principles. Upon approval of the commander, cash may be advanced to authorized collecting agents for making change.

C. Fund Increases

1. The commander may authorize an additional \$50 for each cash register and an amount not to exceed \$500 for each accountable medical services custodian.

2. When extended operating hours exist (for example, Sunday operations), the commander may approve an additional amount of up to \$50 per cash register when there is limited or no banking support.

★ D. Documentation

1. For all change fund advances, other than DeCA commissaries, the DD Form 1081 shall be prepared by the DO or agent, as applicable, and the original signed and returned to the DO or agent by the change fund custodians for the amount of funds advanced. All DD Forms 1081 for change fund advances shall include a statement that the change fund custodian immediately will inform the officer who advanced the funds of any loss of or shortage in the funds. Change fund custodians shall be provided written instructions covering their responsibility for safeguarding the funds at the time of receiving the advance. The funds shall be returned when the appointment as change fund custodian is terminated. The change fund custodian shall prepare a DD Form 1081 to document the return of the fund. The DO or agent shall acknowledge receipt of the fund by signature on the duplicate copy of the DD Form 1081 which shall be returned to the custodian. Change funds may also be recalled when it is necessary to verify the cash in the possession of the DO or agent, as applicable. On completion of such verification, the funds shall be advanced again to the change fund custodian. In addition, unannounced inspections, including cash counts are required to be made of each change fund at least quarterly by the cash verification team.

2. For DeCA commissaries, when a change fund is no longer necessary (e.g., closure of a commissary) the commissary officer shall prepare a DD Form 1131 with credit to the DeCA Resale Account and deposit the fund using a SF 215 in the same manner as the proceeds of sale are deposited.

0305 ADVANCING FUNDS TO FRIENDLY FOREIGN NATIONS

030501. Authority

A. Basic Agreement. DOs of the Department are authorized by 10 U.S.C. 2396(b) (reference (b)) to advance funds to cashiers, other DOs, or individual members of an armed force of a friendly foreign nation for the purpose of paying pay and allowances to those members or enabling that armed force to purchase necessary supplies and services. Funds shall be advanced by law and under a basic intergovernmental agreement that has been negotiated between the governments of the friendly foreign nation and the United States. Any agreement proposed to implement the statutory authority shall be negotiated in accordance with DoD Directive 5530.3, International Agreements (reference (q)), to include coordination with the cognizant Combatant Commander and the U.S. Chief of Diplomatic Mission or U.S. Embassy. See model agreement at figure 3-3.

B. Supplemental Agreement. A supplemental agreement shall establish the following:

1. Type of personal identification that shall be shown by a DO or by an individual Service member when drawing an advance of funds.
2. Maximum amount that may be advanced to an individual Service member.
3. The lender nation shall be protected against loss due to fluctuating exchange rates.
4. The address of the respective settlement offices to whom the lender nation's DO shall forward receipts for fund advances with requests for reimbursement.
5. Settlements shall be made locally, whenever feasible, or when that is not feasible, between the signatory nation's representatives in Washington, DC, or other designated location.
6. Settlement may be made in cash, or by check, and in the type of currency used to make the advance. Whenever possible, settlement should be made in the lender nation's own medium of exchange.
7. Such other provisions that local conditions may make necessary.

C. Conditions. Funds shall be advanced only against the signed receipt of the DO or individual members of the armed force receiving the advance for the following purposes and under the following conditions:

1. To a DO of an armed force of a friendly foreign nation on presentation of proper personal identification for paying pay and allowances of troops, or for purchase of necessary supplies and services, when the unit is serving in an area where personnel temporarily are unable to obtain funds from their own nation.
2. To individual members of an armed force of a friendly foreign nation, who are serving in an area where a DO of that force is not available to make payments because the personnel are: temporarily separated from their units; in need of funds; and able to identify themselves satisfactorily as members of an armed force of a friendly foreign nation with which an intergovernmental agreement for advances has been negotiated.
3. The receipt minimally shall contain: the name, rank, Service number, title, organization, and country of the individual who receives the advance; the purpose for which the advance is needed; the type and amount of currency advanced; the prevailing rate of

exchange to one U.S. dollar at the time the advance is made, if applicable; and the name, rank, organization, and address of the DO making the advance.

★0306 TRAVELERS CHECK PROGRAM

030601. Overview. This section prescribes policy, procedures, and assigns responsibility for ordering, receiving, controlling, safeguarding, disbursing, refunding, and accounting for travelers checks. Provisions of this chapter prevail where conflict or differences exist in the issuer's user's guide.

030602. Travelers Checks in Lieu of Cash. Travelers checks may be disbursed to employees and members as travel advances in lieu of cash travel advances. Commanders or their specifically designated representatives may disburse travelers checks to employees and members.

030603. Misuse of Travelers Checks. Immediate cashing or depositing of travelers checks into financial institutions should be discouraged. Employees and members should be advised to use travelers checks as intended, that is, for the purchase of goods and services while in a travel status. Commanders should use available media to advise and periodically reemphasize the intent of travelers checks to all employees and members.

030604. Appointment of Designated Representative. Each DoD activity participating in the travelers check program shall designate one or more individuals as the activity's travelers check representative(s). The individual(s) shall be appointed in writing as a cashier by the activity commander using the procedures described in paragraph 020603 of this volume. The letter of appointment shall be issued in the original and two copies and shall include the specific duties and limitations, effective date, duration of the appointment, and the name of the individual being relieved, if any. The appointed individual(s) shall acknowledge appointment and acceptance of the position on the original and all copies of the letter of appointment and shall include the statement "I agree to hold myself accountable to the United States for all public funds received." If for any reason the individual ceases to serve in the position (i.e., termination of the program or change of cashiers), the appointment shall be terminated in writing. The original of letter of appointment or termination shall be delivered to the cashier, a copy shall be retained by the appointing commander, and a copy shall be furnished to Disbursing and Cash Management Office, Director, Procedures and Guidance Division, DFAS-DCMO/DB, 1500 E. 95th Street, Kansas City, MO 64197-0030. Letters of appointment and/or termination shall be maintained in a permanent file at the activity to show the successive holders of each position and shall be retained for a period of not less than 6 months after the individual ceases to serve in the position.

030605. Safeguarding and Controlling Travelers Checks

A. General. Travelers checks in the custody of the U.S. Government (i.e., the activity's designated cashier) are considered to be public funds and shall be safeguarded as prescribed in this chapter. The individual appointed as cashier to maintain custody of, disburse

to employees and members, and account for s checks shall be held pecuniarily liable under the same principles and procedures as DOs and their deputies, agents, and cashiers. However, travelers checks shall not be included in the DO's cash accountability or authority to hold cash at personal risk. Accordingly, the value of the travelers checks in the custody of the cashier shall not be included on the DO's DD Form 2657 (Daily Statement of Accountability) or SF 1219 (Statement of Accountability).

B. Control Record. The receipt of shipments and records of disbursement of travelers checks shall be recorded either on DD Form 2667 (Subsidiary Accountability Record) or the automated inventory system provided by the travelers check issuing company. The DD Form 2667 is easily adaptable for use as an inventory, receipt, and disbursement record. A separate DD Form 2667 shall be used for each denomination of travelers checks to enable recording the travelers checks by denomination in serial number sequence. Should travelers checks be maintained in more than one currency (i.e., U.S. dollars and one or more foreign currencies), separate DD Forms 2667 shall be used for each currency as well as each denomination of the checks. Travelers checks shall be disbursed in package and serial number sequence.

030606. Establishing Accounts

A. New Accounts. The DoD activity initially establishes the travelers check program by contacting one of the participating travelers check providers.

B. Automatic Reporting. The travelers check provider will furnish DoD activities with an automated personal computer software system and a point-of-sale (POS) terminal to manage and report travelers check sales, inventory, and settlement. The DoD activity must provide the personal computer, modem and telephone line for this system. This on-line system will fulfill the requirement to track, add, tally, and report travelers check sales.

C. Obtaining Travelers Checks. The DoD activity's designated cashier authorizes issuance of the initial order of travelers checks. The cashier determines the amount of checks to be received as a standard order and makes any subsequent changes to this amount. Standard order travelers checks are packaged in a manner determined by the travelers check provider. Prepare and forward an enrollment form as directed by the provider. If travelers checks are to be disbursed in other than U.S. currency, the cashier must provide this information to the provider.

030607. Receipt of Travelers Checks

A. Receipt. The cashier shall inventory and document receipt for each book of travelers checks and for single (loose) travelers checks received in shipment. The inventory shall include:

1. counting the number of books and/or loose checks,

2. verifying the denomination and serial numbers of all travelers checks in each shipment,
3. sorting the books or loose checks by denomination (and currency, if applicable).

B. Discrepancies. Contact the travelers check provider immediately if travelers checks received in shipment do not coincide with the agreement or shipment forms. Do not disburse any travelers checks contained in a discrepant shipment until the provider acknowledges and agrees in writing to correct or adjust the discrepancies.

030608. Reordering Travelers Checks. There are two resupply options under the program: automatic and on request. The Department has chosen the automatic resupply option for all DoD Components. The automatic resupply system will monitor stock-on-hand based on sales data reported to them. Each cashier shall initially establish a "percentage of sales" limit or dollar limit (maximum level). This limit becomes the automatic resupply level for the cashier. A minimum level ("trigger point") shall also be established. The "trigger point" generates a new supply of checks needed to bring stock level back to the maximum level.

030609. Change of Cashiers (Representatives). Both the outgoing and incoming DoD activity cashier shall perform a complete, joint inventory and document all travelers checks on hand. The completed inventory shall be signed by both representatives and a letter transferring the account will be prepared and signed by the activity commander. The original inventory and transfer letter shall be retained by the DoD activity. Advise the travelers check provider by letter each time there is a change of designated cashiers. The letter shall include the cashier's agent code number and the names of persons authorized to order and receive travelers checks. Signature specimens are not required.

030610. Disbursement (Sale) of Travelers Checks

A. General. Travelers checks shall be disbursed to employees and members as a travel advance. The travelers check advance is in lieu of a cash travel advance. Fees for the issuance of travelers checks are based on the method of payment to the travelers check provider under this program. Participating DoD activities may use payment option B or option C, as described below. The preferred payment option for all DoD activities is option C.

1. Payment Option B. Under payment option B, payment to the provider for the value of travelers checks disbursed plus the related fees must be made within 5 calendar days of the date the travelers checks are disbursed. The paying disbursing office is the disbursing office providing disbursing support to the DoD Component activity participating in the program. Payment option B shall be used only for disbursement of travelers checks to members and employees who are not participants in the U.S. Government Travel Card Program and in those instances when the DoD activity does not participate in the central billing process described below under payment option C. Refer to subparagraphs 030610.B and 030611.A,

below, for specific procedures for reporting disbursement of travelers checks and payment for the checks and related fees.

2. Payment Option C. Within payment option C, there are two distinctly different methods of payment: a centrally billed account method and an individual charge card account method. Payment option C is the preferred payment method for use by all DoD Component activities.

a. Centrally Billed Accounts. The centrally billed account method of payment operates under a concept similar to the central billing procedures for purchase of and payment for airline tickets. Under this method, the participating DoD Component activity must obtain an activity travel charge card account. The activity charge card account is charged for all travelers checks disbursed to individuals who are not participants in the U.S. Government Travel Card Program. Monthly, the travelers check provider will bill the DoD activity for all travelers checks disbursed as well as the related fees.

b. Individual Charge Card Accounts. The individually billed account method is applicable to all individuals participating in the U.S. Government Travel Card Program. Under this method, travelers checks are charged to the individual cardholder's travel card. The individual card holder is billed monthly by the provider for the travelers checks as well as the related fees. This method is identical to the individual billing procedure currently in effect for using the government travel card at automated teller machines (ATMs) to obtain cash.

B. Disbursing Travelers Checks Under Option B. Cashiers shall disburse travelers checks to employees and members only upon presentation of approved travel orders and appropriate identification. In all instances, the maximum amount of travelers checks disbursed shall be limited to the amount of travel advance authorized in the travel order. A Purchaser Application Form (PAF) must be completed for each travelers check disbursement. The cashier should refer to the travelers check provider user's guide for disbursing travelers checks and completion of the PAF. Under this payment option the cashier shall:

1. select the appropriate travelers check amount.
2. complete a PAF for each pack of travelers checks disbursed and a separate PAF for each loose travelers check disbursed.
3. ensure the individual inserts his/her name, address, and signature on each PAF.
4. give the travelers checks, refund information, and customer copy of each PAF to the individual.
5. advise the individual to sign each of the travelers checks in the upper left hand corner immediately. Note: Customers who do not sign travelers checks immedi-

ately upon receipt forfeit their right to refund. If lost or stolen, travelers checks must have the customer's signature in the upper left hand corner to qualify for refund.

6. retain three copies of each individual's travel orders and the original and remaining copies of the PAF for preparation of the voucher for payment.

Note: Travelers checks disbursed under this method constitute an advance of travel funds as defined in the Joint Travel Regulations (JTR) and the Joint Federal Travel Regulations (JFTR). as such, each individual receiving travelers checks under this method must report receipt of the total face value of the travelers checks on the travel claim as a partial payment. At the time the travel claim is settled, the value of the travelers checks must be deducted from the total travel entitlement due the traveler. In addition, since the fee for the travelers checks has been paid to the provider, the traveler is not authorized or entitled to claim reimbursement for the travelers check fee. Failure to report receipt of an advance (by travelers checks) on the travel claim results in duplicate payment of travel allowances and can be considered an attempt to defraud the U.S. Government.

C. Disbursing Travelers Checks Under Option C. As explained above there are two methods of payment under option C, the centrally billed account method and the individually billed account method. The centrally billed account method is for use to disburse travelers checks to individuals who are not participants in the U.S. Government Travel Card Program. The individually billed account method is for use to disburse travelers checks to individuals who are participants in the U.S. Government Travel Card Program. Under either of these options, cashiers shall disburse travelers checks to individuals only upon presentation of approved travel orders and appropriate identification. In all instances, the maximum amount of travelers checks disbursed shall be limited to the amount of travel advance authorized in the travel orders.

1. Centrally Billed Account. The cashier shall:

a. select the appropriate travelers check amounts required to make up the amount of travel advance authorized in the travel orders.

b. obtain authorization to charge the travelers checks to the DoD Component activity charge card account. The cashier should refer to the provider user's guide for disbursing travelers checks and completion of the required documents. Key or swipe the travel card (DoD Component activity credit card) into the point-of-sale (POS) terminal to obtain an approval code.

c. complete a PAF for each pack of travelers checks disbursed and a separate PAF for each loose travelers check disbursed.

d. ensure the individual inserts his/her name, address, and signature on each PAF.

- e. imprint the Record of Charge (ROC).
- f. complete the ROC by recording the approval code; the face value of the travelers checks; the fee amount (compute appropriate amount based on the rates shown above); the sum of face value of the travelers checks and fee amount; and, ensure the agency account number is recorded in the area for card member account number. The member or employee (customer) shall then sign the ROC.
- g. give the travelers checks, refund information, the customer copy of each PAF, and the top copy of the ROC to the individual.
- h. advise the individual to sign each of the travelers checks in the upper left hand corner immediately. Note: Customers who do not sign travelers checks immediately upon receipt forfeit their right to refund. If lost or stolen, travelers checks must have the customer's signature in the upper left hand corner to qualify for refund.
- i. retain three copies of each individual's travel orders and the original and remaining copies of the PAF and ROC for reporting disbursement of the travelers checks and preparation of the voucher for payment upon receipt of the monthly billing.

Note: The same caution identified under subparagraph 030610.B.6, above, applies to this subparagraph.

2. Individually Billed Account. The cashier shall:

- a. select the appropriate travelers check amounts required to make up the amount of travel advance authorized in the travel orders.
- b. obtain authorization to charge the travelers checks to the individual's government travel card account. The cashier should refer to the provider user's guide for disbursing travelers checks and completion of the required documents. Key or swipe the individual's travel card into the POS terminal to obtain an approval code.
- c. complete a PAF for each pack of travelers checks disbursed and a separate PAF for each loose travelers check disbursed.
- d. ensure the individual inserts his/her name, address, and signature on each PAF.
- e. imprint the ROC.
- f. complete the ROC by recording the approval code; the face value of the travelers checks; the fee amount (compute appropriate amount based on the rates

shown above); the sum of face value of the travelers checks and fee amount; and, ensure the individual's account number is recorded in the area for card member account number. The member or employee (customer) shall then sign the ROC.

g. give the travelers checks, refund information, the customer copy of each PAF, and the top copy of the ROC to the individual.

h. advise the individual to sign each of the travelers checks in the upper left hand corner immediately. Note: Customers who do not sign travelers checks immediately upon receipt forfeit their right to refund. If lost or stolen, travelers checks must have the customer's signature in the upper left hand corner to qualify for refund.

i. retain two copies of each individual's travel orders and the original and remaining copies of the PAF and ROC for reporting disbursement of the travelers checks.

Note: Travelers checks disbursed under this method do not constitute an advance of travel funds as defined in the Joint Travel Regulations (JTR) and the Joint Federal Travel Regulations (JFTR). Individuals receiving travelers checks under this method should not report receipt of travelers checks on the travel claim as a partial payment. Since the fee for the travelers checks must be paid to the travelers check provider by the individual card holder in settlement of the travel card account, the traveler is authorized and entitled to claim reimbursement for the travelers check fee on the travel claim.

030611. Reporting Travelers Check Disbursements and Remitting Payment to the Travelers Check Provider

A. Payment Option B. The report of disbursement and payment documentation for packaged travelers checks is prepared differently than the documentation for loose travelers checks. At the end of each day the cashier shall follow the appropriate instructions below.

1. Packaged Travelers Check Disbursements

- a. Sort PAFs by denomination.
- b. Run an adding machine tape total of each denomination.
- c. Total the denomination tapes.
- d. Complete a Daily Sales Summary Form (DSF) (refer to the provider user's guide for instructions on completion of this form).

e. Combine the forms into package sets (do not staple forms together) as follows:

- (1) completed DSF,
- (2) PAFs,
- (3) authorization (travel orders), and
- (4) tape listings.

f. Prepare and certify an SF 1034 for the total amount due the travelers check provider (including the fee for the travelers checks disbursed). The SF 1034 shall contain a separate line of accounting data for each travel order involved. The amount charged to each line of accounting data (travel order) shall be the amount of travelers checks plus the applicable fee for the value of travelers checks disbursed to the individual named in the travel order.

g. Forward the SF 1034 and two of the package sets of forms combined above to the activity's supporting disbursing office on the same business day, if possible, but not later than the morning of the next business day. Note: The package set of forms containing the original DSF and PAFs must be forwarded to the provider with the Treasury check issued in payment of the travelers checks and related fees. The additional package set of forms is for retention by the disbursing office.

h. Retain a complete package set of the forms and a copy of the SF 1034 for reconciliation of travelers check inventory and payment documentation. To complete the cashier's retained records, the cashier should obtain a copy of the SF 1034 from the disbursing office (after payment) which indicates the disbursing office voucher number, date of payment, and check number (or obtain this information and transcribe it to the retained copy of the SF 1034).

2. Loose Travelers Check Disbursements

a. Sort PAFs by denomination.

b. Total amounts on an adding machine tape listing. Note: No DSF is required for loose travelers check disbursements.

c. Combine the forms into package sets (do not staple forms together) as follows:

- (1) PAFs,

(2) authorization (travel orders), and

(3) tape listings.

d. Prepare and certify an SF 1034 for the total amount due the travelers check provider (including the fee for the travelers checks disbursed). The SF 1034 shall contain a separate line of accounting data for each travel order involved. The amount charged to each line of accounting data (travel order) shall be the amount of travelers checks plus the applicable fee for the value of travelers checks disbursed to the individual named in the travel order.

e. Forward the SF 1034 and two of the package sets of forms combined above to the activity's supporting disbursing office on the same business day, if possible, but not later than the morning of the next business day. Note: The package set of forms containing the original PAFs must be forwarded to the travelers check provider with the Treasury check issued in payment of the travelers checks and related fees. The additional package set of forms is for retention by the disbursing office.

f. Retain a complete package set of the forms and a copy of the SF 1034 for reconciliation of travelers check inventory and payment documentation. To complete the cashier's retained records, the cashier should obtain a copy of the SF 1034 from the disbursing office (after payment) which indicates the disbursing office voucher number, date of payment, and check number (or obtain this information and transcribe it to the retained copy of the SF 1034).

B. Payment Option C. Under payment option C, the travelers check provider will bill the DoD activity account (centrally billed account) or the individual cardholder's account (individually billed account) for travelers checks disbursed plus the related fees. The monthly billing is based on the daily report of travelers checks disbursed which is submitted to the provider by the cashier. The cashier should refer to the provider user's guide for complete details on preparing and submitting the daily travelers check disbursement (sales) report. The cashier shall also comply with the minimum requirements as described in the following subparagraphs.

1. Centrally Billed Account. At the conclusion of each individual travelers check disbursement, the cashier shall segregate the documentation (by individual transaction) into package sets as shown below. Each individual package set shall be fastened together to provide a complete record of travelers check issuance. At the end of each business day, the cashier shall forward that day's packages as directed by the travelers check provider. The cashier and disbursing office copy of each package set shall be retained by the cashier for use in reconciliation of the monthly billing and for preparation and certification of the voucher for payment.

a. Package Set for the Travelers Check Provider

- (1) Original (top copy) of the PAF,
 - (2) bottom copy of the ROC, and
 - (3) copy of the travel orders.
- b. Package Set for Cashier Files
 - (1) Center copy (yellow tissue copy) of the PAF,
 - (2) center copy (Service Establishment copy) of the ROC, and
 - (3) copy of the travel orders.
- c. Package Set for the Disbursing Office
 - (1) Center copy (green tissue copy) of the PAF, and
 - (2) copy of the travel orders.

Upon receipt of the billing (statement of charges), the cashier shall reconcile all items appearing on the billing with the cashier's and disbursing office copies of the retained package sets. After reconciliation, the cashier shall prepare and certify an SF 1034 for the total amount due the travelers check provider (including the fee for the travelers checks disbursed). The SF 1034 shall contain a separate line of accounting data for each travel order involved. The amount charged to each line of accounting data (travel order) shall be the amount of travelers checks plus the applicable fee for the value of travelers checks disbursed to the individual named in the travel order. The cashier shall forward the completed and certified SF 1034, the original and copies of the billing, and the disbursing office package sets of forms included on the billing to the activity's supporting disbursing office on the same business day received, if possible, but not later than the morning of the next business day. The cashier shall retain a copy of the billing with the cashier's package set of the forms and a copy of the SF 1034 for reconciliation and payment documentation. To complete the cashier's retained records, the cashier should obtain a copy of the SF 1034 from the disbursing office (after payment) which indicates the disbursing office voucher number, date of payment, and check number (or obtain this information and transcribe it to the retained copy of the SF 1034).

2. Individually Billed Account. Individual government travel cardholders will be billed for all travelers checks disbursed to them in the same manner as they are billed for ATM cash advances. Direct payment to the provider for the amount of the travelers checks plus the related fee is the direct personal responsibility of the individual cardholders. However, as with the centrally billed account, the monthly billing is based on the daily report of travelers checks disbursed which is submitted to the provider by the cashier. The cashier should refer to the provider user's guide for complete details on preparing and submitting the daily

travelers check disbursement (sales) report. The cashier also shall comply with the minimum requirements as described herein. At the conclusion of each individual travelers check disbursement, the cashier shall segregate the documentation (by individual transaction) into package sets as shown below. Each individual package set shall be fastened together to provide a complete record of travelers check issuance. At the end of each business day, the cashier shall forward that day's packages as directed by the travelers check provider. The cashier copy of each package set shall be retained by the cashier for use in reconciliation of travelers check disbursements, as necessary.

Note that under the individually billed method, payment data is not processed through the disbursing office because payment for travelers checks disbursed is the personal responsibility of the travel card holder.

a. Package Set for the Travelers Check Provider

- (1) Original (top copy) of the PAF,
- (2) bottom copy of the ROC, and
- (3) copy of the travel orders.

b. Package Set for Cashier Files

- (1) Center copies (yellow and green tissue copies) of the PAF,
- (2) center copy (Service Establishment copy) of the ROC, and
- (3) copy of the travel orders.

C. Remitting Payment by the DO. Upon receipt of the SF 1034 and supporting documentation described above, the DO shall take appropriate action to process the SF 1034 and effect issuance of a Treasury check in payment for travelers checks and fees disbursed under option B and option C (centrally billed account). Under option B, payment for travelers checks disbursed plus related fees is due within 5 days of travelers check issuance. Under option C (centrally billed account), payment for travelers checks disbursed plus related fees is due within 5 days of receipt of the monthly billing.

030612. Refunds for Individual Cardholders. An individual will not be responsible for the amount of lost or stolen checks provided that the individual has satisfied all of the requirements set forth in the Recipient Agreement. The provider will clear their account to eliminate responsibility for the amount of lost or stolen checks replaced in the form of cash or traditional travelers checks (traditional checks). The provider will bill the individual card

account upon issuance of the traditional checks or cash. As an alternative, the provider can resupply Government Travelers Checks which can be ordered through the DoD Components cashier.

030613. Termination of Agreement

A. DoD Activities. Upon termination of the contract between General Services Administration and the travelers check provider, DoD activity cashiers shall, within fifteen 15 calendar days, destroy all travelers checks on hand by cremating or shredding. The cashier shall prepare a DD Form 2669 (Destruction Certificate), that describes the travelers checks by serial number, currency (U.S. or other), denomination, quantity, and total value. The original DD Form 2669 shall be forwarded to the provider, and a copy shall be retained for the DoD activity's records. In addition, the cashier shall return any equipment, display material or other property furnished.

B. Individual Cardholder. Either the DoD activity or the travel card provider may suspend or terminate an individual's participation in the U.S. Government Travel Card Program in accordance with the terms of the cardholder agreement. In the event of termination the individual agrees:

1. not to cash the remaining travelers checks,
2. to cut out the lower right corner where the chairman's signature appears or write "VOID" across the face of each travelers check in nonerasable ink,
3. to return all uncashed travelers checks to the provider or the DoD activity cashier. The provider will bill the individual credit card account for the amount of travelers checks not returned within 15 calendar days after participation in the program has been terminated. The credit card account statement must be settled upon receipt.

030614. Loss of Travelers Checks

A. DoD Activities. In case of loss of any proceeds of sale or travelers checks, whether by theft, burglary, holdup, fire, dishonesty of employees or members, mysterious disappearance, or any other cause, the DoD activity shall notify the travelers check provider immediately and shall report the loss of funds as prescribed in Chapter 6 of this volume. In the event of any such loss, the DoD activity shall pay all monies due in accordance with the established agreement with the provider.

B. DoD Activity Cashier. The loss of travelers checks or proceeds of sale while in the custody of the DoD activity's cashier constitutes a physical loss of government funds. Required actions to be taken to report and investigate the loss of funds are addressed in chapter 6 of this volume.

0307 WEAPONS FOR CASH PROGRAM

030701. Authority. Upon approval of the Secretary of Defense to establish a weapons for cash program, the following procedures shall be utilized to execute the program.

A. Funding Authorization. The senior operational commander shall provide funding authorization for weapons procurement based upon approval to establish a weapons for cash program. The total amount advanced to the paying agents plus the amount disbursed for weapons under this program cannot exceed the funding authorization established by the commander. In the event additional funds are required, the commander first must adjust the funding authorization.

B. Paying agents. Paying agents should be utilized as necessary to successfully operate the program. All paying agents for this program shall be appointed as directed in Chapter 2, paragraph 020604 of this volume. Funds shall be advanced (subject to the limitations above) by the disbursing officer supporting the mission to the paying agents as prescribed in paragraph 030402 of this chapter. The advances will be provided in the currency of the country involved. Disbursing officers should refer to Chapter 12 of this volume for procedures to obtain foreign currency to meet mission requirements.

C. Weapons Purchases. There must be a proper accounting for each disbursement related to a weapon purchase. This shall be accomplished utilizing SF 44A (Purchase Order-Invoice-Voucher) or other available chain of custody type receipt. General preparation and distribution of these forms are as follows:

1. Each disbursement document (receipt from seller) must contain the seller's name and (if possible) identification number, weapon description and serial number, and amount disbursed. Make sure to obtain the seller's signature on the receipt.

2. The original and one copy of the disbursement document (receipt from seller) shall be turned in to the DO, one copy attached to the weapon (for inventory control), and one copy provided to the seller.

D. Clearing or Replenishment of the Paying Agent's Account. To clear the paying agent's account, the paying agent shall prepare an OF 1129 (Cashier Reimbursement Voucher and/or Accountability Report). The OF 1129 shall be for the total amount of all disbursement documents (receipts) turned in and must be accompanied by the original and one copy of each document (receipt) and any remaining balance of the cash advanced. Additionally, a copy of the approval to establish a weapons for cash program shall be attached to the OF 1129. If replenishment of the paying agent's account is necessary, the paying agent shall prepare the OF 1129 as prescribed above and submit the completed document to the supporting disbursing officer. Subject to the funding limitations described in the previous subparagraphs, the disbursing officer will issue payment of the OF 1129 to the paying agent for the approved amount of the OF 1129.

MODEL INTERGOVERNMENTAL AGREEMENT (FOR DIRECT QUOTATION)AGREEMENT BETWEEN THE UNITED STATES OF AMERICA
AND _____ FOR THE
RECIPROCAL ADVANCE OF FUNDS TO UNITS
OR PERSONNEL OF THEIR ARMED FORCES

The Governments of the United States of America and _____, each realizing that units or personnel of their respective armed forces may find themselves isolated from their parent units without financial means for support while in an area in which the other Government's armed force is present, and desiring to facilitate the financial support of such units and personnel in a situation of that nature, have agreed as follows:

Article I

When units or personnel of the armed forces of one of the parties to this agreement find themselves separated from their parent unit without adequate financial support in an area in which the armed forces of the other party are present, then cashiers, disbursing officers, or an individual member of the separated force may request funds from the appropriate area commander of the armed forces of the other party, or his or her designated representative, to pay wages and allowances or purchase necessary supplies and services.

Article II

The responsible authorities of a party receiving a request for funds, as in Article I, above, after satisfying themselves that resources or services of the requesting forces are unavailable or inadequate, shall honor such request. Requests shall be approved on a case-by-case basis. Where circumstances permit, this agreement shall be verified. Regardless of whether such verification is obtained, the Government of the units or personnel to whom the funds are advanced shall be responsible for effecting reimbursement.

Article III

The funds may be advanced in the currency of the lending State, of the State to which funds are advanced, or of the third State in which the forces may be located, or in any other available currency acceptable to the receiving force.

Article IV

The cashier, the disbursing officer, or the personnel of the force who receive funds shall give the authorities of the force who provided the funds a receipt for the funds received. Such receipts shall be substantially in the form prescribed in the annex to this agreement.

Figure 3-3. Model Intergovernmental Agreement

Article V

The authorities of the force providing the funds shall present the receipts to the designated settlement officer of the State to which funds were advanced for reimbursement. Normally, reimbursement shall be made in the currency that was advanced at a rate of exchange to the currency of the country seeking reimbursement that is not less favorable to the lender than that existing at the time of the advance. Where mutually acceptable, reimbursement may be made in another currency, if that settlement is made at a rate of exchange that is not less favorable to the country seeking reimbursement than that existing at the time of the advance. Settlement of accounts shall be made within 30 days of the advance.

Article VI

This agreement shall apply during both peace and war without limitation as to geographical area.

Article VII

This agreement shall continue in force until 3 months after the receipt by either party of written notice of the intention of the other party to terminate it.

IN WITNESS WHEREOF the undersigned representatives have signed the present agreement.

Done at _____ this _____ day of _____, 19__, in the English
and _____ languages, both texts being equally authoritative.

CHAPTER 4

CHECK CASHING SERVICE (ACCOMMODATION EXCHANGE)0401 EXCHANGE OF CASH FOR NEGOTIABLE INSTRUMENTS040101. Policy

A. General. As provided in 31 U.S.C. 3342 (reference (e)), DOs are authorized to provide check cashing and accommodation exchange service to military and civilian personnel of the U.S. Government, veterans hospitalized or domiciled in Veteran Administration facilities or other U.S. Government institutions, contractors engaged in U.S. Government projects (including contractor personnel), and personnel of authorized non-governmental agencies operating with agencies of the United States. It is DoD policy that these services shall be provided only when satisfactory banking facilities do not exist.

B. United States. If commercial banks, on-base banking facilities, exchanges, or other financial institutions are not available to provide check-cashing service, the commander may request the Deputy Director for Finance, DFAS Headquarters, to authorize the DO to cash the negotiable instruments listed in paragraph 040102 of this section. Such a request, with complete justification, should be submitted through the Director, Procedures and Guidance Division, Disbursing and Cash Management Office, 1500 E. 95th Street, Kansas City, MO 64197-0030, via the servicing DFAS Center. If approved, the provisions of section 0402, below, will apply. Only the individuals listed in paragraph 040104, below are eligible to receive check-cashing service.

C. Overseas Areas and Ships Afloat. If military banking facilities, commercial banks, exchanges, or other financial institutions are not available or adequate to provide check-cashing service, the commander may authorize the DO to cash the negotiable instruments listed in paragraph 040102 of this section. Only the individuals listed in paragraph 040104 of this section are eligible to receive check-cashing service provided that:

1. The DO's check cashing policy is in writing and approved by the theater component commander. It shall identify specifically the scope of the services to be provided and the personnel eligible to receive this service.

2. Adequate resources are available to provide these services without impacting on levels of service and the primary disbursing and pay functions.

3. The DO has the right to deny check cashing privileges to anyone based on availability of cash or personnel resources. The component commander's written authorization shall emphasize this right.

★ 040102. Negotiable Instruments. The negotiable instruments that a DO may be authorized to cash are: U.S. Treasury checks; U.S. postal money orders; traveler's checks; bank money orders; certified and cashier's checks drawn on U.S. banks; checks from reputable companies; and other checks and instruments drawn on U.S. banks or credit unions in U.S. currency, that the DO can justify honoring (i.e., guaranteed by the government or a financial institution).

040103. Eligibility. Eligibility for check-cashing services normally shall extend to all personnel permanently assigned to units in the area served by the DO. Units desiring personal check-cashing privileges from DOs of another activity or Component shall designate a point-of-contact (POC) to work with the DO. The DO may require the POC to furnish a list of personnel on TDY/TAD when approved by the DO's commander. TDY/TAD personnel shall furnish the DO with a copy of the TDY/TAD orders in addition to any other items of identification required by the DO. An authorized agent, usually a dependent, who is authorized pursuant to a properly executed power of attorney, may be granted check-cashing privileges for personal checks drawn on the account of the member, personal checks drawn on joint accounts to which the member is a party, and any other check which is drawn in favor of the member. The agent shall present valid identification in the course of all transactions. All restrictions which apply to benefiting members shall apply to agents of members under the terms of the executed DD Form 2761 (Personal Check Cashing Agreement), which serves as a power of attorney. This form may be obtained from the servicing DFAS Center for local reproduction.

040104. Eligible Individuals. Individuals who may be authorized to receive check cashing services are as follows:

- A. Members of the U.S. Armed Forces.
- B. Civilian employees of the U.S. Government who are U.S. citizens.
- C. U.S. military retirees. This authorization is contingent upon the requirement that the theater commander determines that provision of these services is not prohibited by the Status of Forces Agreement (SOFA) of the country involved and that other check cashing facilities (banks, exchanges, etc.) are not available or adequate.
- D. Hospitalized veterans of the U.S. Armed Forces.
- E. Contractors and their employees engaged in U.S. Government projects provided that the contractor is a U.S. firm and the employee is a U.S. citizen.
- F. U.S. citizens who are employees of authorized non-government agencies such as the National Science Foundation operating with U.S. Government agencies.
- G. Dependents of all the above ordered to safehaven posts due to emergency evacuation. See Chapter 12, subparagraph 120304.F, for accommodation restrictions.

H. Dependents of the personnel named in subparagraphs 040104.A through 040104.C, above, holding powers of attorney and possessing valid DoD identification cards.

I. Dependents of the personnel named in subparagraphs 040104.D through 040104.F, above, holding proper identification and powers of attorney.

J. Third-country nationals employed as civilian employees or under contract to the U.S. Government, or contractors or subcontractors that are U.S. firms engaged in U.S. Government projects in foreign countries, provided the checks presented by the third-country nationals are U.S. Treasury dollar checks or U.S. dollar checks issued by the contractors to third-country nationals presenting the check to be cashed.

K. Federal credit unions operating on United States military installations in foreign countries, but only in those countries that do not permit contractor-operated DoD military banking facilities to operate on such installations.

040105. Internal Controls. Commanders and other individuals in the chain of command shall ensure that internal controls are adequate to preclude the fraudulent issuance and cashing of negotiable instruments. At a minimum, the following procedures shall be followed:

A. All instruments are endorsed "Pay to the order of the Disbursing Officer, _____ (name of ship, station, activity, or unit)".

★ B. The payee/payees shall sign or endorse each instrument in the presence of the DO, deputy, agent, or cashier.

C. The identity of the deputy, agent, or cashier providing the cash shall be clearly identifiable on the negotiated instrument. In the event that the instrument has been altered or forged, the deputy, agent, or cashier that cashed the instrument may be held liable. If the instrument becomes non-negotiable and the identity of the deputy, agent, or cashier cashing the instrument is not apparent on the instrument, the DO may be held accountable.

★ D. The deputy, agent, or cashier cashing the negotiable instrument shall properly verify the identity of the person/persons presenting the negotiable instrument for payment. There are virtually no acceptable grounds for granting relief to an deputy, agent, or cashier who cashes a forged instrument.

★ E. Adequate identification of the payee(s) or endorser(s) is recorded on the negotiable instrument in order that recovery can be made in the event that the instrument is dishonored (e.g., legible name, SSN, duty station/organization, duty phone, and I.D. card number).

0402 CASHING PERSONAL CHECKS

040201. Procedures for Cashing Personal Checks Overseas, Aboard Ships, and, by Exception, Within the United States

A. General. If military banking facilities, commercial banks, exchanges, or other financial institutions are not available or adequate to provide check-cashing services, the theater commander may authorize the DO to cash personal checks overseas or afloat. These DOs often do not receive notification of dishonored checks prior to the individuals moving from the deployed location. In order to expedite collection on dishonored checks, standard overseas and afloat check-cashing procedures applicable to appropriated fund civilians and military personnel throughout overseas and afloat DoD Components are prescribed in this chapter. Overseas and afloat disbursing offices, all appropriated civilian payroll offices, and, when individually approved by DFAS Headquarters, all DOs within the United States that provide accommodation exchange check-cashing services must implement these procedures subject to the following:

1. A commander may authorize the DO to cash personal checks for certain authorized individuals, as prescribed in section 0401, above.

2. The term "commander" as used in these procedures refers to a commander-in-chief, base or installation commander, commanding officer or officer-in-charge, director of the servicing DFAS Center, or equivalent civilian head in the chain of command of the DO who is at least grade O6 or GS-15.

3. The commanders and other individuals in the chain of command shall ensure that internal controls are adequate to preclude the fraudulent cashing of negotiable instruments.

B. Exceptions. DOs of Navy vessels may cash personal checks for crew members when the vessel is in a U.S. port and check cashing facilities are not available for non-residents of the area. A non-tactical disbursing activity in the United States may provide check cashing service when a unit, squadron, or detachment, without a DO or disbursing capability, is performing temporary duty away from its permanent station or homeport in an area where check cashing facilities are not available for non-residents of the area. This authority also applies when units, squadrons, or detachments are engaged in training or exercises which preclude use of available check cashing facilities. For any situations not described above, the commander may request authority to provide check cashing service from the Deputy Director for Finance, DFAS Headquarters. The request, with complete justification, should be submitted as prescribed in paragraph 040101.B, above.

★ C. Limitations. Commanders shall establish maximum amounts for personal checks that may be cashed by authorized personnel and/or their agents. In overseas areas in which the personnel at two or more Military Services are operating, the senior commander shall ensure a uniform policy. Although check cashing privileges are required for authorized personnel and/or their agents in many overseas areas, such service must be provided within sound financial management practices. Command policy and applicable limits, based on the dictates of the local economy and cost-of-living, must be published in writing. Deviations from

established command maximum limits must be provided by the servicing DO, in writing, for each exception. Disbursing officers must provide a copy of the authorization to exceed the established limit when requesting removal of deficiencies involving uncollectible insufficient fund checks and any insufficient fund charges that may be assessed by financial institutions for personal checks they have cashed. See section 0404, below. Checks shall be made payable in multiples of \$5 unless local conditions make that increment impractical. However, Treasury checks or checks issued by insurance companies, banks or credit unions, or other institutions of similar financial standing may be cashed without regard to dollar amount. All checks shall be drawn on U.S. financial institutions, overseas branches of U.S. banks or credit unions, or overseas military banking facilities operated by U.S. contractors; shall be payable through U.S. banks or credit unions; and shall be denominated and payable in U.S. currency. The DO shall establish the days and hours during which the service will be provided and shall make appropriate notification of any changes. Suspension of check-cashing privileges for writers of dishonored checks shall be governed by this section.

D. Check Cashing Procedures

1. All authorized military and appropriated fund civilian personnel who request check cashing privileges must consent, in writing, to immediate collection against their pay for the total of all dishonored checks. With this procedure, dishonored checks will not become a delinquent debt; therefore, there is no authority to assess a service charge (penalty). However, the recovery of any insufficient fund charges assessed on the DO by financial institutions are allowed. Depending on the circumstances, this practice will allow the DO two options:

a. OPTION 1: The DD Form 2761 (Personal Check Cashing Agreement)

(1) If the individual's payroll office is not known or if the DO or his/her deputies, agents, or cashiers are cashing a check for a civilian employee or an authorized agent of a civilian employee or military member, the DO should use the DD Form 2761.

(2) The term "authorized agent" as used on the DD Form 2761 pertains to an individual, usually a dependent, who is authorized pursuant to a power of attorney to cash personal checks on behalf of a member or civilian employee as prescribed in this chapter.

(3) With the proper use of this form, a separate power of attorney on behalf of the individual requesting check cashing service is not required. The member/employee must appoint an agent by providing a name(s) in the block titled "Authorized Agent" of the DD Form 2761. The form must be signed by the member/employee. The agent's signature would be verified against a valid form of identification at the time the check is presented.

b. OPTION 2. An authorized statement stamped on the front of the personal check may be used only for military members and civilian appropriated fund employees, but not for their agents or other classes of individuals authorized check-cashing privileges.

(1) If the individual's payroll office is known, the DO can order a rubber stamp in small type to be placed on the front of the check along the top margin or above the bank's name and address as shown in figure 4-1.

★

(2) The stamp shall include the following statement:

"I consent to immediate collection from my pay the amount of this check plus bank charges, if this check is dishonored ____."

(3) The DO or his/her deputies, agents, or cashiers must place this statement on the front of the check in the presence of the individual and must ensure the individual's initials are provided at the end of the statement to validate immediate collection from the individual's pay account for dishonored personal checks.

(4) If the stamp is used, adequate identification of the payee must be recorded on the negotiable instrument in order that recovery can be made in the event that the instrument is dishonored (e.g., full legible name, DoD Component, social security number, duty station/organization, duty phone, and I.D. number). This information must be verified against a valid identification card.

2. The following are the responsibilities of disbursing officers and their deputies, agents, and/or cashiers when pay account collection for dishonored personal checks becomes necessary:

a. When a military member is in the same component and the DO maintains the member's account:

(1) Immediate pay account checkage, is authorized for the face value of the dishonored check(s), plus any charges assessed against the DO by a financial institution for processing dishonored checks.

(2) As a part of the DFAS consolidation effort, "partial/casual payments" are limited to emergency situations. Therefore, DO's shall not use "partial/casual payments" as a means of resolving a dishonored check.

b. When a military member is from a different Military Service, or from the same Component but subparagraph 040201.D.2.a, above, does not apply (e.g., retirees, members on PCS orders, TDY, or in any other transitory status) the following procedures will be applied:

(1) When the DD Form 2761 is used. The DO must make copies of the form (front and back), certify on the reverse side of the form that the individual consented to voluntary collection, and send it to the appropriate supporting DFAS Center, as listed in subparagraph 040201.E, below, to effect the pay account checkage and make restitution to the negotiating DO. The payroll office should annotate the reverse side of the DD Form 2761 specifying the action taken for each dishonored check listed.

(2) When the stamp is used on the face of a check, the DO will prepare the DD Form 139 (Pay Adjustment Authorization) by Component as follows:

(a) Attach a listing showing each military member's name, DoD Component, social security number, unit or duty station, and check amount(s), along with copies of the checks (front and back). In cases where the depositary adds a fee to the amount of the dishonored check, a copy of the SF Form 5515 should be included to substantiate its inclusion in the total amount of the checkage. Send all to the appropriate supporting DFAS Center, at the mailing address provided in subparagraph 040201.E, below, for execution of a pay account deduction.

(b) Certify that the military members consented to voluntary collection by typing the following certification statement on the DD Form 139 in the block titled "Explanation and/or Reason for Adjustment":

"I certify that these collections are the result of dishonored personal checks cashed by the cited individuals for the amounts stated. Each individual has consented, in writing, that in consideration for cashing the individual's personal check(s), the amount of any check returned unpaid, plus any charges assessed against the DO by a financial institution, for any reason may be collected from the individual's pay."

c. Dishonored personal checks for authorized appropriated fund civilian employees whose payroll office is known will be processed as follows:

(1) Immediate pay account checkages are authorized for the face value of dishonored checks plus any charges assessed against the DO by financial institutions.

(2) The DO must make copies of the DD Form 2761 (front and back), certify on the reverse side of the form that the individual consented to voluntary collection, and send the form, along with copies (front and back) of the checks. In cases where the depositary adds a fee to the amount of the dishonored check, a copy of the SF Form 5515 should be attached to substantiate its inclusion in the amount of the pay account checkage. Send all to the appropriate supporting DFAS Center payroll office listed in subparagraph 040201.E, below, for pay account checkage(s).

d. Dishonored personal checks for authorized appropriated fund civilian employees whose payroll office is unknown:

(1) If the DO or his/her deputies, agents, or cashiers cannot locate the individual's payroll office, a copy of the DD Form 2761 (front and back) must be sent to their supporting DFAS Center listed in paragraph 040201.E, below, requesting the Center to facsimile (FAX) the individual's name and social security number to the Defense Manpower Data Center to locate the individual's personnel office.

(2) When the supporting DFAS Center receives a copy of the DD Form 2761 (front and back) requesting assistance in locating the individual and/or payroll office, that DFAS Center will be responsible for the following:

(a) If known, provide the DO the name, address, and phone number of the individual's payroll office.

(b) If the individual's payroll office is not known, FAX the individual's name and social security number to the Defense Manpower Data Center on (408) 656-2087 requesting the location of the individual's personnel office.

(c) Once the location of the individual's personnel office is known, the DFAS Center will forward the information to the DO for action.

(d) The DO will contact the personnel office to locate the individual's payroll office.

(e) Once the payroll office is known, the DO will follow the procedures prescribed in subparagraph 040201.D.2.c.(2), above.

3. When collection action becomes necessary and the payroll office receives the DD Form 139 or DD Form 2761 from the DO, the payroll office will be responsible for the following:

a. Processing the pay account checkage following normal payroll procedures.

b. When possible, the payroll office should include a statement similar to the following in the remarks column of the leave and earnings statement (LES):

"Consensual collection action for a dishonored check."

c. The DD Form 139 or DD Form 2761 will be annotated by the applicable payroll office with the action taken for the dishonored check(s) and returned to the submitting DO to support the SF 1219 (Statement of Accountability).

d. The applicable DFAS Center/payroll office will enter the collections and centrally issue checks, after the debt has been collected, payable to the DO holding the dishonored check(s) for the amount(s) that has been collected each pay period until the total debt is satisfied.

Note: The DoD activity receiving the check shall ensure that the check is made payable and forwarded to the DO holding the dishonored check(s). The payment must be made in full. A check is necessary to remove the dishonored check(s) from the DO's SF 1219 for the situations described in this procedure.

4. When a military member or civilian employee is separated or cannot be located to make restitution (e.g., when a military member or civilian employee separates or resigns), the DO will process dishonored checks following the procedures otherwise prescribed in this chapter.

5. The writing of checks in advance of the availability of funds and floating a check cannot be condoned or tolerated. Therefore, individuals who abuse this privilege by continuing to write checks against insufficient funds should be denied future check-cashing privileges.

6. Retention of Documents

a. For all honored checks, the DO that permits personnel to cash personal checks must retain the original signed DD Form 2761 until six months after the individual transfers to a new duty station/installation or separates.

b. For all dishonored checks, the original DD Form 2761 must stay with the dishonored check file until resolved. If the statement above is stamped on the front of the check and the check is dishonored, the DO or his/her deputies, agents, or cashiers must make a copy of the front and back of the check that must stay with the dishonored check file until resolved.

E. DFAS Center Payroll Office Addresses. The DFAS Center Payroll Office addresses listed below are provided to help expedite collection on dishonored checks. These addresses are to be used when mailing DD Forms 139 and the DD Forms 2761 when used as a pay adjustment authorization. The DO should use the following addresses when mailing these forms to another DoD Component payroll office and the DO should ensure that the office codes provided are included in the address:

1. DFAS-Cleveland Center (For Navy personnel)

a. Active Duty

Defense Finance and Accounting Service -
Cleveland Center

★0403 ACCOUNTABILITY OF DISHONORED CHECKS

★ 040301. General. A loss resulting from an uncollectible dishonored check may be considered as an improper payment or a physical loss of funds, depending on the circumstances as described in the following paragraphs.

★ 040302. Checks Accepted in Satisfaction of an Obligation. Checks accepted in satisfaction of an obligation due the United States (rather than for collection only), or for the sale or transfer of something of value that later are returned unpaid by the depositary constitute a physical loss of funds. See Comp. Gen. B-201672/3, B-200520, B-193673, September 23, 1982. Such dishonored checks shall be processed as prescribed in this paragraph. For checks received from collecting officers (e.g., commissary officer or sales officer), the DO shall prepare a reverse collection voucher charging the appropriation credited for the collection. Record the SF 5515 on the DD Form 2657 (Daily Statement of Accountability) as a reduction of deposits (line 4.2A) and the reverse collection voucher as a reduction of reimbursements (line 4.1E). A copy of the voucher and the dishonored check shall be provided to the collecting officer. Upon receipt, the collecting officer shall consider the dishonored check as a physical loss of funds in accordance with the regulations of the sales organization (e.g., commissary) if the dishonored check becomes uncollectible. The collecting officer is responsible for collection of the debt under the provisions of Chapter 29 of this volume or requesting relief of liability as prescribed in the regulations of the sales organization.

★ 040303. Checks Received as Accommodation Exchange Transactions. A loss from an authorized check cashing transaction, such as the "accommodation exchanges" authorized by 31 U.S.C. 3342, is an improper payment because government funds were disbursed in an authorized transaction. See 70 Comp. Gen. 616 (1991). Checks received by a DO in an accommodation exchange transaction that later are returned unpaid by the depositary shall be processed as prescribed in section 0402, above. The SF 5515 is recorded on the DD Form 2657 as a decrease to deposits (line 4.2A) and as an increase to dishonored checks receivable (line 7.4). For checks accepted by the disbursing office in satisfaction of an obligation due the government (i.e., the disbursing officer is the collecting officer for items such as an overadvance of travel funds, instead of an exchange), the dishonored check shall be considered as an illegal, incorrect, or improper payment if it becomes uncollectible. If a dishonored check becomes uncollectible and the servicing DFAS Center declines to authorize removal of the deficiency as provided in the following section, the disbursing officer shall report the loss and request relief of liability for the loss as prescribed in Chapter 6 of this volume for illegal, incorrect, or improper payments.

0404 REMOVAL OF DEFICIENCIES

★ 040401. Request for Removal. Appropriate collection action shall start immediately on receipt of notification that a check has been dishonored and shall be pursued vigorously until recovery has been made. If the debtor is no longer employed or in the military service and all methods and attempts of collection have been exhausted and any further attempts at collection become impractical, the DO shall submit a written request for removal of the deficiency to the servicing DFAS Center. The request shall be addressed via the DO's commander and shall include: the original uncollectible check; a copy of the related SF 5515; copies of the documents presented in section 0402, above, to include the latest available information regarding the debtor's whereabouts; a copy of the commander's check cashing policy/authority and, if applicable, a copy of the one-time authority to exceed the commander's normal monetary check amount; and a request that the DFAS Center pursue collection action against the delinquent debtor to the fullest extent that the law will allow. Removal normally will be authorized under 31 U.S.C. 3342 (reference (e)) and 70 Comptroller General Decision 616 (reference (r)) if the DO complied with the check-cashing policy and collection requirements prescribed in this chapter. If the DFAS Center authorizes removal of the deficiency, that center shall provide a memorandum to the requesting DO authorizing a charge to ***6763.XXXX, Gains and Deficiencies on Exchange Transactions. DOs shall provide a copy of the memorandum to the activity to which financial reports are submitted. The DFAS Center shall continue attempts to recover the debt, and if successful, will arrange for credit to the appropriation charged when the deficiency was removed. Removal of the deficiency can only be authorized and charged to ***6763.XXXX, Gains and Deficiencies on Exchange Transactions within the same fiscal year in which the check became dishonored. The request must be submitted so that the DFAS Center has enough time remaining in the fiscal year to authorize removal and charge to ***6763.XXXX. For example, if the DO receives a debit voucher for a dishonored check on September 10, 1997, there will not be enough time to pursue required collection actions and request removal of the deficiency prior to October 1, 1997 (beginning of the new fiscal year). If the DFAS Center declines to authorize removal of the deficiency or there is not enough time remaining in the fiscal year to authorize removal, it cannot be charged to ***6763.XXXX. The deficiency must be treated as an erroneous payment. The DO shall then either repay the loss or request relief of liability under the procedures for relief of liability for illegal, improper, or incorrect payments as prescribed in Chapter 6 of this volume.

040402. Lost Dishonored Check. If a dishonored check held in the disbursing office becomes lost, it shall be considered and handled as a physical loss of funds.

040403. Forgeries and Other Unusual Cases. If investigative action does not determine the identity of the person who committed the forgery, or if recovery from this person cannot be accomplished, the DO, deputy, agent, or cashier who cashed the instrument shall be liable for the deficit. There is virtually no excuse for forgery to take place if the check-cashing procedures in this chapter are properly followed. However, if the DO, deputy, agent, or cashier is of the opinion that the circumstances justify relief of liability for the illegal, improper, or incorrect payment, a memorandum requesting relief of the liability may be submitted to the servicing DFAS Center. The request shall include a summary or a copy of the investigative

results and shall describe the procedures used to preclude forgery. Each endorser to the basic correspondence shall express a recommendation as to whether relief of liability is considered appropriate.

CHAPTER 5

DEPOSIT AND TRANSFER OF PUBLIC FUNDS0501 DEPOSIT OF FUNDS

050101. General. As prescribed in 31 U.S.C. 3302 (reference (e)), DOs who have funds in excess of current requirements shall deposit them for credit to the Treasury Department without delay. An exception to the general rule is authorized for those instruments which shall be returned to the remitter in the form in which received, an example being deposits of unsuccessful bidders for the sale of government property.

050102. Depositories

A. Federal Reserve Bank (FRB). DOs who use an FRB or branch as a depository may do so without prior approval from the servicing DFAS Center. FRBs or branches shall be used whenever possible. Appendix B provides a list of FRBs and branches. All deposits to an FRB or branch shall include a Ca\$h-Link Identification Number (CIN) in Block 3 of the SF 215 (Deposit Ticket). The CIN also is required as a part of the endorsement on negotiable instruments included in such deposits. The CIN is derived by adding four leading zeroes to the DSSN and calculating a check-digit for the ninth position. The CIN is calculated as shown in table 5-1. When preparing the SF 215 (and endorsements), the eight-digit CIN and the ninth digit are separated by a dash.

★ B. General Depositories. As prescribed by the Department of the Treasury Financial Manual for Guidance of Departments and Agencies (reference (m)), these are commercial banks or other financial institutions which have been specifically authorized by the Treasury Department to maintain a demand account in the name of Treasury for the purpose of accepting deposits to the Treasury's General Account (TGA). These depositories will be designated only at locations where they are needed to receive deposits of public funds for credit to the TGA or to furnish cash to DOs for official disbursements. Making deposits to a TGA eliminates processing floats. If more than one bank or a bank and credit union have been authorized at a base, station, installation, or command, the local commander, if asked, should give equal recognition when recommending designation as a TGA. After approval by the Treasury Department, the commander should also make an effort to reasonably distribute official financial transactions among the approved depositories. Public funds shall not be deposited in a financial institution that has not been approved as a TGA except as provided in subparagraph 050102.E, below. Deposits shall not be mailed to a TGA unless specifically authorized by the Treasury Department.

C. Requests to Deposit With or Change General Depository. DOs who want either to get initial authorization to deposit collections with a general depository or to change from one depository to another shall send a request through the servicing DFAS Center to the Financial Management Service, Department of the Treasury, Chief Depository Review Section, Banking Operations Branch, 3700 East-West Highway, Hyattsville, MD 20782. A copy of the request shall be furnished to the Director for Financial Commerce, OUSD(C), Room 3E831 Pentagon,

Washington, DC 20301-1100. The request should be sent at least 90 calendar days prior to the requested effective date to allow the Treasury Department enough time to make the necessary arrangements and issue appropriate instructions to the depository. The request shall contain the following information:

1. Name and location of the depository currently used.
2. Time and manner in which deposits are made with the current depository.
3. Name and location of the proposed depository (specify the name and location of the particular branch office, if applicable).
4. Time and manner in which deposits will be made with the proposed depository.
5. Total dollar amount deposited monthly.
6. Total number of checks (including Treasury checks) deposited monthly.
7. Dollar amount and number of Treasury checks deposited monthly.
8. Amount of cash deposited monthly.
9. Number of returned checks per month.
10. Number of SFs 215 per month.
11. A brief justification statement outlining distances involved and savings in time and money to be gained by approval of the request.

D. Need for General Depository Ceases to Exist. Should the need for a general depository cease to exist, the DO shall notify the servicing DFAS Center of the date on which the need will terminate and the reason.

E. Limited Depositories. Limited depositories are designated only to receive deposits made by or on behalf of DOs for credit to their official non-symbol checking accounts maintained with such depositories. Limited depositories are not authorized to accept deposits for credit to the Treasury Department..

0502 DEPOSIT REQUIREMENTS

050201. Frequency. The deposit of all funds received for credit to the account of the Treasury Department shall be made without delay.

A. Deposits shall be made at a time of day before the depository's specified cutoff time, but as late as possible to maximize daily deposit amounts. Receipts of \$5,000 or more shall be deposited on the same day received before the depository cutoff time. In those instances where the disbursing office business day has been advanced due to volume of transactions and balancing requirements, deposits shall be made on the disbursing office business day on which the receipts are processed into the DO's account. For example, today's calendar date is September 7 but the disbursing office business date is September 8. If receipts for the DO's business date of September 8 equal or exceed \$5,000, the receipts must be deposited prior to the end of the depository's business date of September 8.

B. Where same-day deposit is not cost effective, next-day deposit shall be achieved. It may be necessary, therefore, for DOs to set a cutoff time in connection with the preparation of deposits, and deposit on the following day all receipts after that time. If daily deposits of receipts of less than \$5,000 are impractical, they may be accumulated and deposited when the total reaches \$5,000. However, deposits shall be made by Thursday of each week, regardless of the amount accumulated. DOs should limit their transmittals of deposits to one per day.

C. DOs shall separate cash from checks and prepare a separate SF 215 for each when depositing with an FRB. A cash deposit and a check deposit on the same day constitute one deposit per day. For Navy vessels in U.S. ports, deposits shall be prepared and either delivered in person or mailed via registered mail to the nearest FRB when receipts accumulate to \$5,000 as prescribed above.

D. For Navy vessels at sea, when daily mail service is not available, receipts (consisting only of personal checks, money orders and other non-Treasury negotiable instruments) may be accumulated up to \$5,000 before they must be deposited, provided that a deposit of all receipts on hand is made at least once each week. This exception does not apply to U.S. Treasury checks. The DO shall prepare the deposits for mailing via registered mail and deliver them to the Military Post Office onboard. Negotiable instruments to be deposited shall not be held in the DO's accountability pending arrival at the next scheduled port of call. Regardless of the total amount, the time interval since the last deposit, and the type of checks and negotiable instruments on hand, DOs onboard Naval vessels shall make a deposit on the last regular business day before leaving port and the first regular business day after returning to port for any at-sea period in excess of one week.

050202. U.S. Dollar Deposits

A. Negotiable Instruments. Negotiable instruments (e.g., Treasury checks, personal checks, travelers checks, money orders, etc.) payable in U.S. dollars shall be deposited for credit to the account of the Treasury Department with the nearest FRB or branch or an approved general depository.

1. All DOs in the United States (and activities authorized to deposit to

the account of a DO in the United States) shall deposit Treasury checks in the sum of \$5,000 or more with the nearest FRB or branch. For example: if the deposit includes one Treasury check for \$5,000 or more, the deposit must be made to an FRB or branch; or, if the deposit contains several Treasury checks, the total of which is \$5,000 or more, the deposit must be made to an FRB or branch. When an FRB or branch is used, separate SFs 215 shall be prepared for each of the following deposits: (1) cash; (2) checks (e.g., Treasury checks, personal checks, money orders, travelers checks, etc.); and (3) food stamp coupon redemptions. Check endorsements, SFs 215 and debit or credit vouchers presented for deposit to an FRB or branch shall include the nine-digit CIN in Block 3 of the SF 215. Check endorsements, SFs 215 and debit or credit vouchers presented directly to a general depository shall include the four-digit DSSN as the DO identification number in Block 3 of the SF 215.

2. DOs located outside the continental United States may deposit all Treasury checks with an established general depository. Treasury checks (or cash, or other negotiable instruments) cannot be mailed to a general depository without the expressed permission of the Treasury Department. (Note: Air Force bases in Europe, without local contract military banking facilities, currently have Treasury Department authority to mail deposits to the contract banking facility at Frankfurt, Germany.) Canceled Treasury checks shall be deposited as prescribed in chapter 08 of this Volume.

B. Checks Drawn on Foreign Banks in U.S. Dollars Payable Through a Bank in the U.S.. Checks drawn on foreign banks in U.S. dollars, which are payable through a bank in the U.S., will have an American Bankers Association (ABA) routing and transit number printed on the item and may be magnetic ink character recognition (MICR) encoded with the U.S. bank's ABA routing and transit number at the bottom left side of the check. These checks shall be grouped on a single SF 215 and deposited as prescribed in subparagraph 050202.A, above.

C. Manner of Deposit

1. Deposit by DO. Deposits shall be made in person by the DO or designated representative at an FRB or branch or an approved general depository. If deposit of checks, drafts, or money orders in person is impracticable, deposits of these instruments may be made by registered mail or courier; however, deposits of checks, drafts, or money orders by mail are normally authorized only to a FRB or branch. Cash deposits by mail shall be made only to an FRB or branch. If a deposit of cash in person is impracticable, the next most preferred method is by armored car. The least preferred method of depositing cash is by registered mail. The cash should be double wrapped or placed in an inner and outer container. If an error is discovered after an SF 215 has been released to a depository, that document shall not be recalled or corrected; nor will a corrected SF 215 be prepared and submitted to the depository. The DO shall contact the depository and provide information on the error and request the depository to prepare: an additional SF 215 for the difference if the deposit amount is to be increased; or an SF 5515 (Debit Voucher) for the difference if the amount is to be decreased. Upon receipt of the additional SFs 215 or 5515, the DO shall record and report the document as prescribed in this chapter. Deposits of damaged or mutilated currency shall be made as provided in section 0505 of this chapter.

2. Deposit by Other than DO. When more time is required to

personally turn in funds to the DO than is justifiable from a cost perspective (e.g., taking into account the length of journey and other factors), agent officers or any other officers authorized to make collections of public funds may dispose of collected funds as shown in the following subparagraphs:

a. Approved Designated Depositary Available. Agent officers or any authorized collection officer may make deposits (in person) on behalf of the DO when an approved designated depositary is available. Individuals making such deposits shall follow the procedures in paragraph 050301 of this chapter for preparation of the SF 215. The confirmed copy of the SF 215 shall be submitted to the DO on the day the deposit is made with the appropriate collection vouchers and memorandum copy of SF 215.

b. Approved Designated Depositary Not Available. When an approved designated depositary is not available, agent officers or any authorized collecting officers may transmit cash to the DO by postal money order, bank money order, or cashier's check. The fee for purchase of the cashier's check or postal/bank money order shall be paid in cash at the time of purchase and the receipt shall be attached to the DD Form 1131. The amount of the cashier's check or postal/bank money order shall be deducted from the total amount collected. The body of the DD Form 1131 will be prepared to show the total amount collected, the fee for cashier's check or postal/bank money order, the net collection, and the bank and date of the money order. Figure 5-11 is an example of a completed DD Form 1131.

050203. U.S. Department of Agriculture (USDA) Food Stamps

A. General. Food stamps shall be deposited with the nearest FRB or branch thereof on a daily basis. In those instances where the commissary officer makes the deposit, an agreement with the DO should be made to define that responsibility.

B. Deposits. Food stamp deposits shall be accomplished using a separate SF 215 and shall be mailed registered (uninsured) mail. In addition, a properly prepared FNS Form 278 (Food Stamp Redemption Certificate) shall accompany the SF 215. Food stamps are exempted from the requirement to maintain a record of negotiable instruments. The separation of redeemed food stamps from other negotiable instruments is necessary due to differences in the audit and reconciliation process. See I TFM 5-2050.20d, Department of the Treasury Financial Manual for Guidance of Departments and Agencies (reference (m)).

C. Lost, Stolen, or Destroyed Food Stamps

1. Food Stamps Lost, Stolen, or Destroyed While in the Custody of a Commissary Officer. Food stamps represent cash, and all security procedures for cash handling shall be observed. Food stamps are accounted for by the USDA while other negotiable instruments are accounted for by the Treasury Department. The USDA Food and Nutrition Service (FNS) is not liable for the value of any coupons lost, stolen, or destroyed while in the custody of an insured financial institution or for the value of coupons lost, stolen, or destroyed while in transit from an insured financial institution to an FRB. USDA has interpreted that DoD DOs (including deputies, agents, cashiers and custodians) fall within the definition of an insured financial institution. Food

stamps in the custody of the commissary officer that are lost, stolen, or destroyed shall be treated as a physical loss of funds on the part of the commissary officer in accordance with Chapter 6 of this volume. Also, if an FRB determines that one or more coupons are missing from a deposit received by the FRB, the FRB shall issue an SF 5515. The SF 5515 shall be recorded in the DO's accountable records in the normal manner and treated as a physical loss of funds on the part of the commissary officer in accordance with Chapter 6 of this volume.

2. Food Stamp Deposits Lost, Stolen, or Destroyed Before Arrival at the FRB. There may be instances where an entire deposit of coupons is lost, stolen, or destroyed before arrival at the FRB. Evidence of this should be detected through non-receipt of the confirmed copy of the SF 215. If the lost transaction cannot be resolved, the DO shall prepare a descriptive OF 1017-G (Journal Voucher) shall be prepared and recorded in the DO's accountable records in the same manner as an SF 5515 would be recorded. If the commissary officer has assumed the deposit responsibility as a custodian for the DO, the deficit can only be cleared by treating the lost food stamp(s) as a loss of funds on the part of the commissary officer in accordance with chapter 06 of this Volume. The commissary officer must either recover the lost food stamps, request relief of liability, or consider the lost stamp(s) a loss of commissary receipts (operating funds). The DO shall prepare a reverse DD Form 1131, Collection Voucher, citing the same accounting classification as the stamps were originally collected into. Include on the DD Form 1131 an explanation to the effect that: the FRB has claimed one or more of the food stamps were not included in the deposited package and that there was no evidence the package had been tampered with; or food stamps were not received by the FRB. A copy of the DD Form 1131 shall be given to the commissary officer. The reverse DD Form 1131 shall be used to clear the deficit from the DO's accountability only after the loss of funds has been properly reconciled according to chapter 06 of this Volume. If the DO has assumed the deposit responsibility, the deficit can only be cleared by treating the lost food stamp(s) as a loss of funds on the part of the DO. Lost food stamps are considered a physical loss and shall be processed as prescribed in chapter 06 of this Volume.

050204. Foreign Currency Deposits. See Chapter 13 of this volume.

★ 050205. Reporting Large Deposits and Fedwire Deposits System (FDS) Deposits. To permit the Treasury Department's Financial Management Service (FMS) to manage the government's cash position at each Federal Reserve Bank, disbursing officers depositing a single check totaling \$50 million or more, or several checks of a similar nature (e.g., 25 checks from vendors totaling \$50 million or more), shall notify the FMS a minimum of two business days before the deposit is made. If a deposit of \$500 million or more is anticipated, a minimum of five business days advance notice is required. When specific deposit information has not been finalized, inform FMS daily (by 9:30 a.m. eastern time) of approximate amount(s) and approximate deposit date(s). Information on large deposits should be reported by facsimile transmission (FAX) to FMS at (202) 874-9945 or (202) 874-9984 using FMS Form 187 (Advance Notice of Large Deposits or Payments of \$50 Million or More). If the report is provided to FMS on other than FMS Form 187, at a minimum, the report shall contain:

- A. Name and address of the Component (e.g., Army);
- B. Name and telephone number of disbursing officer;

- C. Disbursing station symbol number (DSSN);
- D. Appropriation or fund account credited (minimum of six digits, with the first two identifying the department);
- E. Description of transaction;
- F. Transaction settlement date;
- G. Amount of deposit;
- H. Deposit mechanism (wire transfer or check);
- I. Name and location of the depository.

A copy of the report shall be retained with the DO's monthly retained financial records.

★ 050206. Sorting and Listing of Instruments

A. General Depositories. Checks deposited with general depositories need not be sorted, but shall be accompanied by an adding machine tape or other listing, unless other arrangements have been made with the depository. Note: As explained in the subparagraph 050201, above, all DOs in the United States (and activities authorized to deposit to the account of a DO in the United States) shall deposit Treasury checks in the sum of \$5,000 or more with the nearest FRB or branch.

B. Federal Reserve Banks

1. Check Deposits. Checks deposited with an FRB or branch need not be sorted, but shall be accompanied by an adding machine tape or other listing showing the amount of each check and the total amount of the deposit. The checks, with supporting documentation, shall be delivered to the FRB separate from any cash which the DO may also be depositing with the FRB that same day.

2. Cash Deposits. Deposits of cash shall be made on a separate SF 215. All currency shall be sorted by denomination, face and top up, and deposited in full packages (100 notes) of each denomination; \$1, \$2, \$5, \$10, \$20, \$50, and \$100. Partial packages shall be prepared for each denomination that does not contain 100 notes. Each package (full or partial) shall be secured with a currency strap bearing no printed denomination. The DO can obtain these straps from a commercial supplier. The total dollar amount contained in each package of currency and the DSSN shall be legibly indicated on each strap. Coins shall be rolled whenever possible. The SF 215 shall be accompanied by an adding machine tape or other listing reflecting, by denomination, the total of currency and coin being deposited.

★ 050207. Endorsement of Negotiable Instruments

A. Area for Endorsements. With the enactment of the Expedited Funds Availability Act (reference (s)), restrictions were established for placement of payee endorsements. Negotiable instruments shall be endorsed on the back of the instrument in the 1 and 1/2 inch space along the "trailing edge." When viewing the face (front) of a check, the trailing edge is the left hand edge. Normally, the endorsement will consist of the name of the payee and other identifying information required by the activity cashing the check. When the DO is preparing checks made payable to the DoD, a DoD Component, another government agency, or the DO for deposit, the endorsement stamp required by subparagraphs 050207.C or 050507.D, below, shall appear in this space. When multiple endorsements occur (or the space is used by a qualified endorsement such as for checks endorsed over to the DO by the payee) and the DO's endorsement will require space beyond the first 1 1/2 inches from the trailing edge, the DO's endorsement shall use the assigned space for subsequent endorsers (the back of the check in the upper right hand corner, no more than 3 inches from the right hand edge (leading edge) of the check). Do not refuse a check if the area assigned for the bank of first endorsement has been used. Such checks are acceptable but will not be processed by the banking system in the prescribed time frames under reference (s), which could hamper collection action. Blue or black ink is preferable for endorsements.

B. Endorsement Statement. The following endorsements for negotiable instruments are minimum requirements. Activities with stamps containing additional information may use them so long as the endorsement can be contained within the 1 1/2 inch area assigned for payee endorsers. The Treasury Department has expanded the DSSN number for the disbursing or collecting official's endorsement to a Ca\$h-Link Identification Number (CIN) which includes four zeroes, the DSSN, a hyphen, and a check digit when depositing to an FRB or branch. The CIN is calculated as explained in table 5-1. Figures 5-1 through 5-3 are examples of endorsements on negotiable instruments received directly by DOs. To eliminate separate endorsements by collecting officials and DOs, collecting officials shall endorse negotiable instruments as shown in figures 5-4 through 5-6.

C. Endorsements on Negotiable Instruments Deposited With an FRB or Branch. DOs depositing directly with an FRB may function as the bank of first deposit on behalf of the FRB. Prior approval must be obtained from the FRB before this activity is begun. Since little advantage is gained by the DO's assuming this responsibility, DOs shall advise the servicing DFAS Center if an FRB or the Treasury Department requests that they function as a bank of first deposit. All checks, drafts, and money orders in payment of an obligation due the United States, regardless of the payee to which drawn (including the Treasury Department, the Department of Defense, and any officer of the government), shall be endorsed on the back of the instrument in the 1 and 1/2 inch space along the trailing edge (see figures 5-1 and 5-4). The nine-digit number is the disbursing office's CIN. Agencies may use a stamp, or insert the CIN by hand. The date may be filled in either manually or mechanically with the date on which the deposit is made. This date shall correspond with the bank's business day as explained in paragraph 050201 of this section.

D. Endorsements on Negotiable Instruments Deposited With a General Depository. All negotiable instruments in payment of an obligation due the United States, regardless of the payee to which drawn shall be endorsed on the back of the instrument in the 1-1/2 inch space along the trailing edge (see figures 5-2 and 5-5). The blank following "U.S." shall contain the Component

name (e.g., Army, Navy, Air Force, Marine Corps). The blank following "DSSN" shall contain the four-digit disbursing activity DSSN which may be entered manually, mechanically, or be included as a part of the stamp itself. The blank following "Date" may be filled in either manually or mechanically with the date on which the deposit is made. This date shall correspond with the bank's business day as explained in paragraph 050201 of this section.

E. Conditional Endorsements. Do not accept checks with conditional endorsements such as payment in full notations, when less than the total amount due the United States is paid. Return these checks to the drawers and advise them that the DoD cannot legally accept them.

★ 050208. Record of Negotiable Instruments Deposited. DOs shall keep a complete descriptive record of all negotiable instruments mailed or presented to depositaries. This record may be photocopy or microfilm records of both sides of the instruments if the source of the instrument is shown. Where photocopying or microfilming facilities are not available, the record shall be a typed or written list containing the: source of the instrument; name of the financial institution on which drawn; type of instrument; serial number; payee; maker; endorser (name of person from whom received if other than drawer); date drawn; and amount. Copies of collection vouchers or other documents that show the same data aforementioned may be used as the record of instruments. If an item is lost in banking channels, the DO may be held pecuniarily liable if the maker of the check cannot be identified in order to contact that person for a replacement. Therefore, photocopied, microfilmed, or prepared lists of instruments deposited shall be kept in active files until receipt of the deposit is acknowledged. They may then be filed as supporting documents to the retained copy of the SF 215 and the SF 1219 which covers the period in which the deposits were made.

★ 050209. Lost Negotiable Instruments. When a negotiable instrument is lost, whether before or after deposit, the DO shall adjust the affected accounts and immediately request that the maker of the instrument stop payment and replace it with a new check or other form of payment.

★ 050210. Disposition of Funds on Transfer or Reassignment Without Relief. Funds in the possession of a DO transferred or reassigned without being relieved by another DO shall be deposited prior to transfer or reassignment. All receipts for cash funds held by deputies, agents, and/or cashiers, including imprest funds and change funds, shall be redeemed and the funds included in the final deposit. Each deposit made during the period, including the final deposit, shall be reported on the SF 1219 whether or not an acknowledged copy of the SF 215 is received prior to transfer or reassignment.

0503 DEPOSIT TRANSACTIONS

050301. SF 215, Deposit Ticket

★ A. General. Deposits shall be accompanied by an SF 215 prepared in quintuplicate. The SF 215 is designed to be processed on optical character recognition equipment; therefore, it is essential that the preparer strictly follows these requirements. The SF 215 shall be typed with American National Standards Institute Optical Character Recognition

A font (ANSI OCR-A) 10-pitch type. If an ANSI OCR-A is not available, Pica, 10-pitch should be used. An undesirable, but acceptable type font is Elite, 12-pitch. Specialty type fonts such as Adjutant, Advocate, Artisan, Courier, Delegate, Gothic, Italic, Scribe, Script, etc., are not acceptable. Typing in blocks two, three, four, and five (memorandum copy) must be single spaced horizontally and typed with the prescribed font. Typeovers, erasures, and other corrections cannot be made to entries in these blocks. The Treasury Department does not permit DOs or depositaries to make changes to data on the SF 215. Any violation of this rule by a depositary shall be reported to the DFAS Disbursing and Cash Management Office, 1500 East 95th Street, Kansas City, MO 64197-0030, for further reporting to the Treasury Department. An example of an SF 215 is shown as figure 5-7. The SF 215 shall be prepared as described below:

1. Deposit Number - Block (1). Each SF 215 contains a preprinted six-digit deposit number used by the Treasury Department's central accounting and reporting systems as the basis for generating audit and reconciliation reports for depositor agencies. The preprinted number shall not be altered, typed over, or changed in any manner. Although prenumbered, it is not necessary to account for voided or spoiled forms.

2. Date Presented or Mailed to Bank - Block (2). Type the date that the document is either mailed to an FRB or branch or, if delivered to a general depositary, the banking business date of the depositary at time of presentation. The date shall consist of 2-digit single spaced groups in month, day, and year order; separated by hyphens and zero-filled for single digit dates.

3. Eight-Digit Agency Accounting Station Code or Four-Digit Disbursing Office Symbol - Block (3). Type the nine-digit CIN for deposits to an FRB or branch, or the four-digit DSSN for deposits to general depositaries. Entries shall be left justified and single spaced.

4. Amount - Block (4). Type the total amount of the deposit, including cents. Normal punctuation of commas and decimal points shall be used, however, dollar and cent signs shall be omitted.

5. Date Confirmed by Bank - Block (5) (Memorandum Copy). Leave blank. To be completed after confirmed copy is received from the depositary.

6. Agency Use - Block (6). Block 6 may be used to enter descriptive date regarding the deposit such as: "Prepared by "; "Verified by "; and "Deposited by "; with the applicable initials of the person who performed these tasks. (If a commissary deposit, the commissary store number and location shall be entered in this block. Also, if the deposit is made with a branch bank, the name and location of the branch shall be entered in this block.)

7. Name and Address of Depositary - Block (7). Type the name and address of the depositary to which the SF 215 is mailed or presented.

8. Depositary Certification - Block (8). Leave blank. The depositary will complete this block.

9. Depositors Title, Department or Agency and Address - Block (9).

Type the complete mailing address of the disbursing activity in this block.

B. Distribution and Disposition. The original, depositary, and confirmed copies of the SF 215 shall be delivered or submitted to the depositary with the funds and or negotiable instruments to be deposited. The DO shall retain the memorandum and agency copies in a suspense file to assure that all deposits are in fact confirmed by the depositary. The DO shall take follow-up action on unconfirmed deposits as prescribed in paragraph 050403, below. When the confirmed copy is received from the depositary, the date confirmed shall be transcribed to the agency copy. Based on the specific requirements of the servicing DFAS Center or OPLOC, the confirmed copy shall be submitted as part of the financial reports for that month. In those instances where a deposit is not confirmed in the same month as mailed, the servicing DFAS Center or OPLOC may require the DO to submit the memorandum copy in support of the reported deposit activity for that month and to submit the confirmed copy with the financial reports for the month in which the confirmed copy is received. Note: When a deposit is presented or mailed to a depositary and the DO receives the confirmed copy of the SF 215 in the same month (as presented or mailed), only the confirmed copy is required to be submitted with the monthly financial reports. The agency copy is always retained by the DO as part of the retained financial records. The sum of all deposits presented or mailed to a depositary shall be reported in Column (2), Section II, Part B of the SF 1219 for the month in which the deposit was presented or mailed.

C. Accounting for Deposits. After netting out all the SFs 5515 (except for EFT SFs 5515) to be accounted for in the current business day, enter the total of all the deposits to be accounted for during the business day (including SFs 215 received from a depositary to adjust a deposit) on line 4.2A of the DD Form 2657. At the end of the accounting period (month), the memorandum or confirmed copies of each SF 215 (and SFs 5515, including EFT SFs 5515) applicable to the current accounting period (only) are used to prepare the detailed deposit activity report to support of the SF 1219. The total of the detailed deposit activity report must agree with the total reported on line 4.2 on the face of the SF 1219 and with the total reported in Column (5), Section II, Part B, on the reverse of the SF 1219.

050302. SF 5515 (Debit Voucher)

A. General. When a check is returned unpaid to the depositary with which the check was originally deposited, the depositary may prepare and execute an SF 5515 to charge the depositing DSSN. The depositary may also prepare an SF 5515 charging the depositing DSSN whenever a check is lost after deposit. SFs 5515 may also be issued by depositaries and by the Treasury Department to establish other valid charges against a DO's account. Such charges include exchange fees and other collection charges assessed in connection with foreign instruments deposited. The DO immediately shall record all SFs 5515 received in the DD Form 2657. The SFs 5515 shall be included in the SF 1219 for the month in which received.

B. Action by the DO

1. Non-tactical Disbursing Activities. For SFs 5515 received in connection with returned unpaid checks, the DO shall take action as prescribed in Chapter 4 of this volume for dishonored checks. For SFs 5515 received in connection with checks lost after deposit, the DO shall take action as indicated in paragraph 050209 of this chapter. New checks received pursuant to action taken by the DO shall be processed as a new deposit. Charges for handling foreign checks shall be processed as prescribed in Chapter 13 of this volume.

2. Tactical Disbursing Activities. DOs receiving SFs 5515 shall comply with the above provisions whenever any one of the following conditions exist: the deposit (which included the lost or dishonored check) was made during the incumbency of the current DO; the deposit (which included the lost or dishonored check) was made during the incumbency of a DO whose account is being subjected to the 90-day local retention period; or, the maker or endorser of the lost or dishonored check is locally available for collection action. If none of the foregoing conditions apply, the current DO shall forward the SF 5515 by cover letter to the activity designated to settle the former DO's account. A copy of the cover letter shall be sent to the issuing depository. In addition to the SF 5515, the letter shall contain either the original dishonored check as returned by the depository or in the case of lost checks, a copy of the relevant abstract from the listing of instruments deposited. In all cases, the cover letter shall contain the most recent information concerning the present location and status of the maker or endorser of the check in question.

C. Special Arrangement With Depository. The DO and the depository may enter into a special arrangement whereby unpaid checks automatically will be returned directly to the DO to be replaced by new checks. Under such an arrangement, the depository would not issue an SF 5515 unless the unpaid checks were not replaced within an agreed period of time.

D. Distribution. The SF 5515 is a four-part document. Two copies are retained by the depository. The memorandum and the confirmed copies are forwarded to the DO. The DO shall forward the confirmed copy in support of the monthly financial reports. The memorandum copy shall be retained with the DO's retained financial records. An example of an SF 5515 is shown as figure 5-8.

E. Accounting. SFs 5515 are accounted for as negative deposits. As noted in subparagraph 050301.C, above, all SFs 5515 (except for EFT SFs 5515) to be accounted for in the current business day are netted against all deposits to be accounted for during the business day, and the total recorded on line 4.2A of the DD Form 2657. EFT SFs 5515 are recorded on line 4.2B. At the end of the accounting period (month), the memorandum or confirmed copies of each SF 5515 (including EFT SFs 5515) and each SF 215 applicable to the current accounting period (only) are used to prepare the detailed deposit activity report to support Section II, Part B of the SF 1219. The total of the detailed deposit activity report must agree with the total reported on line 4.2 on the face of the SF 1219 and with the total reported in Column (5) Section II, Part B, on the reverse of the SF 1219.

★0504 DEPOSIT RECONCILIATION

050401. General

★ A. All DOs are required to report deposit activity in connection with their financial reports. Note: Until a standard deposit reporting and reconciliation system is implemented, each disbursing office shall continue to prepare and submit the detailed deposit activity report formerly required by the respective Component. Army disbursing offices shall continue to report SF 215 and SF 5515 information in the Data Element/Accounting Reporting System. Air Force disbursing offices shall continue to use the Deposits in Transit System (6J record). Marine Corps disbursing offices shall continue to report detailed deposit activity using the Marine Corps Expenditure/Reimbursement Reporting System. Navy disbursing offices shall continue to use the Uniform Microcomputer Disbursing System, other approved automated format, or prepare and submit the monthly Schedule of Deposit Activity as prescribed in paragraph 050411, below. The net dollar value of these inputs ultimately is provided to the Treasury Department, which also receives detailed reports from each depository of all SFs 215 and SFs 5515 received from DOs and issued by depositories.

★ B. Monthly, the Treasury Department compares the value of deposits and debit vouchers reported by DOs on SFs 1219 (Statements of Accountability), and detailed deposit activity reports to the value of deposits and debit vouchers reported through the banking system. When the Treasury Department is unable to reconcile the information contained in the two reporting systems, an FMS Form 6652 (Statement of Differences, Deposit Transactions), with supporting detail of deposits and debit vouchers reported by the depositories, will be forwarded to the applicable DFAS Center for redistribution to the applicable disbursing office for reconciliation. Any deposit discrepancy appearing on an FMS Form 6652 will appear on every subsequent FMS Form 6652 until the difference is resolved. All deposit differences that have not been reconciled after six months from the date of the initial transaction shall be considered as a loss or overage of funds as prescribed in Chapter 6 of this volume.

★ C. It is imperative that DOs strictly adhere to the preparation requirements for the SFs 215 and SFs 5515 as prescribed in section 0503, above, and exercise particular care to ensure that these forms are prepared accurately. It is also imperative that DOs promptly and properly report all SFs 215 and SFs 5515. Instructions for reporting SFs 215 and SFs 5515 using the systems noted in subparagraph 050401.A, above, are contained in the user's guides for those systems. Instructions for manual preparation of the detailed deposit activity report are provided in paragraph 050411, below. Paragraphs 050402 through 050410, below, contain detailed instructions for clearing deposit differences from the FMS Form 6652. The following subparagraphs list the most common causes of deposit differences.

★ 1. The DO or a depository inserts an incorrect date, DSSN or amount on an SF 215 or SF 5515.

★ 2. The DO or a depository fails to report an SF 215 or SF 5515. For example, documentation for a remote deposit was not provided to the DO or a deposit that was mailed was not received by the depository.

★ 3. The DO reports an SF 215 or SF 5515 number, date, DSSN, or amount incorrectly on the detailed deposit activity report or the depository reports an SF 215 or SF 5515 number, date, DSSN, or amount incorrectly to Treasury Department.

★ D. Once SFs 215 or SFs 5515 have been released to a depository, the documents cannot be recalled, corrected or resubmitted. In addition, the Treasury Department prescribes specific instructions to all approved depositories regarding adjustment of errors discovered subsequent to the day of deposit. Any error discovered subsequent to release of a deposit to a depository or differences reported on the FMS Form 6652 shall be corrected through the reconciliation process. All DOs must take aggressive action to clear all differences as rapidly as possible. As prescribed in subparagraph 050401.B, above, an unreconciled difference shall be considered as a DO loss or overage of funds with the associated pecuniary liability six months after the deposit transaction. To maintain control, the DO shall monitor deposit activity on a daily basis using the Ca\$h-Link Agency Access System and maintain either a manual or mechanized subsidiary record of all deposit differences. The DO or primary deputy shall review the record of differences at least once each week to assure all necessary actions are being taken to clear these differences. Also, each time there is a change of DOs, unreconciled differences shall be validated by the incoming DO. If the departing DO cannot provide the incumbent DO with documentation supporting the unreconciled items, the departing DO shall process all unsupported items as a loss or overage of funds as prescribed in Chapter 6 of this volume.

★ E. Ca\$h-Link Agency Access System. The Ca\$h-Link Agency Access System was developed by the Treasury Department to assist agencies in reconciling deposit transactions. Use of the system allows early access to deposit transaction information and gives the DO the opportunity to take immediate action to correct a deposit difference (regardless of dollar value) before the transaction appears on the FMS Form 6652. Deposit transactions reported by financial institutions and Federal Reserve Banks are available in the Ca\$h-Link Agency Access System within one or two days after reporting by the depository. Use of the Ca\$h-Link Agency Access System as a tool for deposit reconciliation is mandatory for all disbursing offices within the Department. Information and application forms for the Ca\$h-Link Agency Access System can be obtained from the servicing DFAS Center or the DFAS Disbursing and Cash Management Office (DCMO), 1500 East 95th Street, Kansas City, MO 64197-0030. Any DoD Component disbursing activity that determines use of the Ca\$h-Link Agency Access System is not feasible must submit written documentation and justification for non-use through the chain of command to the DCMO.

★050402. Deposit Tickets and Debit Vouchers Prepared Improperly. Deposit differences can be the result of preparation errors on the part of the preparing disbursing office or the depository, depending on where the SF 215 or SF 5515 involved is prepared. Specific areas of these documents where proper preparation is most critical are the date, DSSN and amount blocks. Errors in any one or more of these blocks will always result in a deposit difference.

★ A. Incorrect Date Inserted on Deposit Tickets and Debit Vouchers. If a DO inserts an erroneous date on an SF 215 or SF 5515, the depository should either process the transaction using the date on the form or prepare a new SF 215 or SF 5515 with the correct date. Treasury Department regulations do not permit depositories to make changes to the date on these forms. If the depository prepares a new SF 215 or SF 5515 or changes the date on the SF 215 or SF 5515 prepared by the DO, a deposit difference will occur. Daily monitoring of deposit activity through the Ca\$h-Link Agency Access System should alert the DO to this difference and

allow correction of the transaction before it is reported on the FMS Form 6652. If a depository consistently changes the date entered on the SF 215 or SF 5515, the DO shall report this condition to the as prescribed in paragraph 050301, above. This report must include a copy of the SF(s) 215 or SF(s) 5515, FMS Form(s) 6652 and supporting detail, and a printout of the data from the Ca\$h-Link Agency Access System.

★ 1. When the DO discovers that the depository prepared a new SF 215 or SF 5515 for the transaction or changed the date, the DO shall report the transaction on the detailed deposit activity report exactly as reported by the depository. The DO can discover this information through daily monitoring of the Ca\$h-Link Agency Access System, receipt of the confirmed copy of the document (prepared by the DO), and receipt of the confirmed copy of the document prepared by the depository. Note that this corrective action can be taken only if the error is discovered in the same month the transaction is presented or mailed to the depository.

★ 2. If the error is not discovered until after the month the SF 215 or SF 5515 was presented or mailed to the depository, it will be reported on the FMS Form 6652 by the Treasury Department. To clear this discrepancy from the FMS Form 6652, the DO shall reverse the transaction as originally reported from the current month detailed deposit activity report. It is critical that the DO reverse an SF 215 transaction exactly as originally reported. If the reported amount was positive, the reversal amount must be negative or bracketed. If the reported amount was negative or bracketed, the reversal amount must be positive. It is also critical that the DO reenter the SF 215 exactly as reported by the depository. The deposit reversal and reentry shall also be included in Section II, Part B on the reverse side of the SF 1219. The reversal transaction must show the month and year of the original transaction as well as reverse the original amount reported. For an SF 5515 transaction, it is critical that the DO reverse the transaction exactly as originally reported. If the reported amount was negative or bracketed, the reversal amount must be positive. If the reported amount was positive, the reversal amount must be negative or bracketed. The DO must reenter the SF 5515 exactly as reported by the depository. The debit voucher reversal and reentry shall also be included in Section II, Part B on the reverse side of the SF 1219. The reversal transaction must show the month and year of the original debit voucher transaction as well as reverse the original amount reported. Reversal and reentry of an SF 215 or SF 5515 transaction to correct the date will net to a zero value and will have no impact on the DO's pecuniary liability. Processing these corrections is mandatory to remove the differences from the FMS Form 6652.

★ B. Incorrect DSSN Inserted on Deposit Ticket or Debit Voucher

★ 1. Incorrect Deposit Ticket DSSN. If a DO inserts an incorrect DSSN on an SF 215, two differences will occur at the Treasury Department. The depositing (preparing) DO will report the correct DSSN on the SF 1219 and detailed deposit activity report, but the depository will report the DSSN as shown on the SF 215. These reported deposits will not match and the transaction will appear on the FMS Form 6652 for each of the DSSNs. If this type of deposit difference occurs, neither DO is authorized to process a transaction to correct the error. Each DO shall take the appropriate actions as prescribed below.

★ a. The depositing DO should receive the confirmed copy of

the SF 215 from the depository since the address on the SF 215 should be that of the depositing DO. However, the deposit will not appear in the Ca\$h-Link Agency Access System under the depositing DO's DSSN and the DO will receive an FMS Form 6652 indicating a deposit reported by the DO but not by the depository. The DO shall compare the agency and confirmed copies of the SF 215 and the data reported on the detailed deposit activity report to the data reported in the Ca\$h-Link Agency Access System and the FMS Form 6652. Upon determining the exact nature of the error, the DO shall immediately contact the Financial Analysis Branch, Financial Management Service, Department of the Treasury, Room 500E, 3700 East-West Highway, Hyattsville, MD 20782, provide a description of the error and request the Treasury Department to initiate corrective action. Initial contact to the Treasury Department may be by telephone at (202) 874-7980. After investigation of the error and contact with the depository and both DOs involved, the Treasury Department will administratively correct the deposit error and clear the item(s) from the FMS Form 6652.

★ b. The DO of the DSSN that is reported by the depositary should not receive a confirmed copy of the SF 215 from the depositary since the address on the SF 215 should be that of the DO who prepared the SF 215. However, the DO will discover a deposit in the Ca\$h-Link Agency Access System for which there is no record at that DSSN. The DO also will receive an FMS Form 6652 that indicates a deposit reported by the depositary and not by the DO. Unless the DO receives the confirmed copy of the SF 215 which is an indication that the depositary prepared the SF 215 to correct an understated deposit or overstated debit voucher, the DO shall not record this deposit transaction on the DD Form 2657, SF 1219 or detailed deposit activity report. The DO shall contact the Treasury Department at the above address and phone number to report the error and request assistance in resolving the deposit difference.

★ 2. Incorrect Debit Voucher DSSN. Generally, a DO only prepares SFs 5515 in conjunction with EFT payments. If a DO inserts an incorrect DSSN on an SF 5515, two differences will occur at the Treasury Department. The preparing DO will report the correct DSSN on the SF 1219 and detailed deposit activity report, but the depository will report the DSSN as shown on the SF 5515. These reported debit vouchers will not match and the transaction will appear on the FMS Form 6652 for each of the DSSNs. If this type of debit voucher difference occurs, neither DO is authorized to process a transaction to correct the error. Each DO shall take the appropriate actions as prescribed below.

★ a. The preparing DO should receive the confirmed copy of the SF 5515 from the depository since the address on the SF 5515 should be that of the preparing DO. However, the debit voucher will not appear in the Ca\$h-Link Agency Access System under the DSSN of the preparing DO and the DO will receive an FMS Form 6652 indicating a debit voucher reported by the DO but not by the depository. The DO shall compare the confirmed copy of the SF 5515 and the data reported on the detailed deposit activity report to the data reported in the Ca\$h-Link Agency Access System and the FMS Form 6652. Upon determining the exact nature of the error, the DO immediately shall contact the Financial Analysis Branch, Financial Management Service, Department of the Treasury, Room 500E, 3700 East-West Highway, Hyattsville, MD 20782, provide a description of the error and request the Treasury Department to initiate corrective action. Initial contact to the Treasury Department may be by

telephone at (202) 874-7980. After investigation of the error and contact with the depository and both DOs involved, the Treasury Department will administratively correct the debit voucher error and clear the item(s) from the FMS Form 6652.

★ b. The DO of the DSSN that is reported by the depository should not receive a confirmed copy of the SF 5515 from the depository since the address on the SF 5515 should be that of the DO who prepared the SF 5515. However, the DO will discover a debit voucher in the Ca\$h-Link Agency Access System for which there is no record at that DSSN. The DO also will receive an FMS Form 6652 that indicates a debit voucher reported by the depository and not by the DO. Unless the DO receives the confirmed copy of the SF 5515 which is an indication that the depository prepared the SF 5515 to correct an overstated deposit or understated debit voucher, the DO shall not record this debit voucher transaction on the DD Form 2657, SF 1219 or detailed deposit activity report. The DO shall contact the Treasury Department at the above address and phone number to report the error and request assistance in resolving the deposit difference.

★ C. Over or Understated Deposit Tickets and Debit Vouchers. A difference will occur when an SF 215 or SF 5515 amount is over or understated. An overstated SF 215, exists when the amount entered on the SF 215 is more than the amount of cash or negotiable instruments accompanying the SF 215. An understated SF 215 exists when the amount entered on the SF 215 is less than the amount of cash or negotiable instruments accompanying the SF 215. An overstated SF 5515 exists when the amount entered on the SF 5515 is more than the value of the EFT payments covered by the SF 5515. An understated SF 5515 exists when the amount entered on the SF 5515 is less than the value of EFT payments covered by the SF 5515. Treasury Department regulations for depositories do not permit changing the amount indicated on an SF 215 or SF 5515. These regulations require the depository to confirm a deposit as presented and immediately issue an SF 5515 for the amount of the overage or an additional SF 215 for the amount of the shortage. In either of these situations, the DO should have discovered an overage of funds for an overstated deposit or a loss of funds for an understated deposit, upon the first balancing after the deposit was presented or mailed to the depository and recorded on the DD Form 2657. Treasury Department regulations also require the depository to confirm a debit voucher as presented and immediately issue an SF 215 for the amount of the overage or an additional SF 5515 for the amount of the shortage. In either of these situations, the DO should have discovered an overage of funds for an overstated debit voucher or a loss of funds for an understated debit voucher, upon the first balancing after the debit voucher was presented or mailed to the depository and recorded on the DD Form 2657. Daily monitoring of deposit activity using the Ca\$h-Link Agency Access System also will enable early detection of these differences. Upon receipt of the confirmed copy of an adjusting SF 215 or SF 5515, the DO shall record the document on the DD Form 2657.

★ 1. If actions required by Chapter 6 of this volume were taken to record the overage or shortage of funds upon discovery, receipt of the adjusting SF 215 or SF 5515 from the depository will enable a more rapid settlement of the overage or shortage in the DO's accountability.

★ 2. If an overage or shortage of funds was not discovered prior to

receipt of the adjusting SF 215 or SF 5515, recording the document will create an overage or shortage, in which case action shall be taken to process the overage or shortage as prescribed in Chapter 6 of this volume.

★ 3. Even though not authorized by the Treasury Department, some depositaries will change the amount of an SF 215 or SF 5515 rather than issuing an adjusting document as described above. The DO will be able to discover such action through daily monitoring of deposit activity through the Ca\$h-Link Agency Access System, upon receipt of the confirmed copy of the original SF 215 or SF 5515, or upon receipt of the FMS Form 6652. If the amount of the document (as prepared and submitted by the DO) was incorrect, the DO should also have detected a loss or overage of funds condition upon recording the transaction on the DD Form 2657. If a depositary consistently changes the amount entered on an SF 215 or SF 5515, the DO shall report this condition to the DCMO as prescribed in paragraph 050301, above. This report must include a copy of the SF(s) 215 or SF(s) 5515, FMS Form(s) 6652 and supporting detail, and a printout of the data from the Ca\$h-Link Agency Access System.

★ 050403. Deposits Not Reported by DOs. Failure to include a deposit transaction on the DD Form 2657, SF 1219 and the detailed deposit activity report will create an out of balance condition on the DD Form 2657 and SF 1219, unless the DO also failed to record collection of a receivable. For example: if a DO processes and includes a collection voucher on the DD Form 2657 and SF 1219, prepares and submits an SF 215 to the depositary but does not include the SF 215 on the DD Form 2657, SF 1219 and detailed deposit activity report, a loss of funds condition will exist. The DD Form 2657 and SF 1219 will indicate cash or negotiable instruments as on hand but the DO will not have custody of the cash or negotiable instruments. The SF 215 will appear in the Ca\$h-Link Agency Access System and on the FMS Form 6652 as a deposit reported by the depositary but not by the DO. Proper balancing procedures will not allow this situation to occur. In another example, a remote agent makes a collection and deposit on behalf of a DO, but the documentation is not provided to the DO in time for inclusion on the DD Form 2657, SF 1219 and detailed deposit activity report for the month of the transaction. In this example the deposit will be reported to the Treasury Department by the depositary, will appear in the Ca\$h-Link Agency Access System and on the FMS Form 6652 as a deposit reported by the depositary and not by the DO. See subparagraphs 050403.A and 050403.B, below, for the actions necessary to reconcile this type of deposit difference.

★ A. To prevent this difference from appearing on the FMS Form 6652, the DO must obtain the collection and deposit documentation from the agent and process both the collection and the deposit on the DD Form 2657, SF 1219, and the detailed deposit activity report for the month of the transaction.

★ B. If the deposit transaction occurred near the end of the month and the DO cannot process the collection and deposit within the month of the transaction, the deposit difference will appear on the FMS Form 6652. To correct this difference, the DO must obtain the collection and deposit documentation from the agent and process both the collection and the deposit on the DD Form 2657, SF 1219, and detailed deposit activity report during the current month. The DO must ensure the deposit is reported using the month and year the deposit was actually made (as reported by the depositary in the Ca\$h-Link Agency Access System), not the

current month and year in which the deposit is being reported. Section II, Part B, column (3) of the SF 1219 must indicate the actual month and year of the deposit as reported by the depository.

The deposit must also be included in the detailed deposit activity report and must be reported using the actual month and year of the deposit as reported by the depository.

★ 050404. Deposits Not Reported by Depositories. SFs 215 that have been reported by DOs but not by the depository will not appear in the Ca\$h-Link Agency Access System. Such deposits will appear on the FMS Form 6652. Daily monitoring of the Ca\$h-Link Agency Access System will alert the DO to possible deposit differences when a deposit does not appear in the system after a reasonable period of time based on whether the deposit was presented to the depository in person or by mail.

★ A. For deposits presented to a depository by mail, if no confirmation copy is received from the depository within a reasonable period of time, the DO shall initiate follow-up action with the depository to determine the status of the deposit. A reasonable period of time is considered to be the normal mailing time from the date mailed to the depository until the date a confirmation copy is received based on past experience. For tactical DOs, consideration should also be given to unit's movement schedule and location when the deposit was mailed. In any event, follow-up action shall be initiated within 30 days from the date the deposit was mailed.

★ B. A follow-up request to the depository should include a copy of the applicable SF(s) 215 and a description or copies of the instruments included in the deposit. The depository should provide a confirmation copy or confirmation information to the DO in response to the follow-up request. A depository response acknowledging receipt of the deposit may be used as the confirmation copy if the actual confirmation copy cannot be provided. If the depository had neglected to report the deposit and reports it to the Treasury Department, the deposit will appear in the Ca\$h-Link Agency Access System and no further action by the DO should be required since this action will clear the difference from the FMS Form 6652. If the depository acknowledges receipt of the deposit but refuses to report the transaction to the Treasury Department, the DO shall provide written notification, with copies of all correspondence and documents involved, to the DCMO. The DCMO will pursue resolution of the issue through the Treasury Department and provide the DO written instructions on additional actions to be taken.

★ C. If the follow-up action does not result in confirmation of the deposit or the depository notifies the DO that the deposit was not received, the deposit transaction shall be reversed in the DO's current month's business. The DO shall prepare and process an OF 1017-G (Journal Voucher) to document reversal of the deposit transaction. The OF 1017-G shall be recorded on the DD Form 2657, line 4.2A as a negative deposit and on line 7.3 as a loss of funds, and included on the corresponding lines of the SF 1219 at the end of the month. The deposit reversal must be included Section II, Part B, column (3) of the SF 1219, and must indicate the month and year the deposit was initially reported to the Treasury Department. The amount of the deposit being reversed must be shown as negative or bracketed. The deposit must also be reversed in the current month's detailed deposit activity report and must be reversed using the actual deposit number, month and year of the deposit (as initially reported to the Treasury Department). The amount must be shown as negative or bracketed. These actions will remove

the deposit from the detailed deposit activity report, clear the FMS Form 6652 and record the deposit as a loss of funds. A copy of the follow-up memorandum to the depository, the depository's response and the FMS Form 6652 which initially included the deposit difference shall be attached as supporting documents to the OF 1017-G. The resulting loss of funds shall be reported and processed as prescribed in chapter 6 of this volume. If negotiable instruments were included in the lost deposit, the action prescribed in paragraph 050209 of this chapter shall be taken for those instruments.

★ 050405. Deposit Number, Date or Amount Reported Incorrectly. A deposit difference will result from incorrect reporting of an SF 215 serial number, date or amount by either a DO or a depository. These differences should be detected through daily monitoring of the Ca\$h-Link Agency Access System. If such an error is not corrected in the month that the deposit is made, a deposit difference will appear on the FMS Form 6652. The supporting detail provided with the FMS Form 6652 will show a specific deposit reported by the depository, but this detail will not match the data in the DO's detailed deposit activity report. DOs shall compare the memorandum, agency and, upon receipt from the depository, confirmed copies of the SF 215 and the detailed deposit activity report with the deposit data in the Ca\$h-Link Agency Access System and detail data supporting the FMS Form 6652. This comparison is required to determine the exact nature of the error, whether caused by the DO or the depository, and the specific corrective action necessary to resolve the difference. The following subparagraphs describe examples of typical deposit number, date and amount reporting errors and the corrective action required for resolving these differences.

★ A. Each SF 215 has a preprinted number that cannot be changed or altered in any manner. If a DO or depository changes or enters this number incorrectly on the reports to the Treasury Department, a difference will occur.

★ B. If a DO reports a deposit date incorrectly or a depository changes and reports a deposit date based on the date of receipt (e.g., a deposit that was mailed) rather than the date shown on the SF 215, a difference will occur. If a depository consistently reports deposits in the month received and processed rather than the date entered on the SF 215, the DO shall report this condition to the DCMO as prescribed in paragraph 050301, above. This report must include a copy of the SF(s) 215, FMS Form(s) 6652 and supporting detail, and a printout of the data from the Ca\$h-Link Agency Access System.

★ C. If a DO or depository reports the amount of a deposit incorrectly to the Treasury Department, a difference will occur. If this type of error is made by the DO, the total deposits reported on line 4.2 and the reverse of the SF 1219 will not agree with the total of deposits on the detailed deposit activity report. Proper balancing procedures will not allow this error to occur. If a depository reports the amount of a deposit incorrectly to the Treasury Department, the amount reported by the depository in the Ca\$h-Link Agency Access System will not agree with the amount shown on the confirmed copy of the SF 215.

★ D. If the DO made the errors described in subparagraphs 050405.A and 050405.B, above, the DO shall reverse the deposit as originally reported from the current month's detailed deposit activity report and reenter the deposit with the correct data. The deposit

reversal and reentry shall also be included in Section II, Part B on the reverse side of the SF 1219. The reversal entry must show the month and year of the original deposit transaction. Since reversal and reentry of a deposit to correct the deposit number or date will net to a zero value, there will be no impact on the DO's pecuniary liability. However, such corrections are mandatory to remove the differences from the FMS Form 6652.

★ E. If the depository made the errors described in subparagraphs 050405.A and 050405.B, above, the DO should first contact the depository and request the depository to correct its deposit report to the Treasury Department. Such a correction by the depository will clear the deposit difference from the FMS Form 6652. If the depository refuses to make the correction, the DO is authorized to make the correction as described in subparagraph 050405.D, above, provided the documentation for the deposit clearly indicates the error to be a deposit number or date reporting error. The documentation necessary is the confirmed and agency copies of the SF 215; detailed deposit activity report; FMS Form 6652 and supporting detail; and, printout of data from the Ca\$h-Link Agency Access System. When a DO makes the corrections under these conditions, a complete report of the facts shall be made to the DCMO as prescribed in paragraph 050301 above. This report must include a copy of all documentation and correspondence regarding the deposit.

★ F. Per subparagraph 050405.C, above, if the DO reports the deposit amount incorrectly, the detailed deposit activity report will not balance with the SF 1219. In the event such a circumstance arises, the DO shall correct the error following the correction procedures described in subparagraph 050405.D, above. Use of this correction procedure is authorized only if the amount of the deposit was recorded correctly on line 4.2 of the SF 1219 and in Section II, Part B on the reverse side of the SF 1219. If the deposit amount was not recorded correctly on the SF 1219, refer to paragraph 050402.C, above, for corrective actions required.

★ G. If the depository made the amount error described in subparagraph 050405.C, above, the DO shall contact the depository and request the depository to correct its deposit report to the Treasury Department. Such a correction by the depository will clear the deposit difference from the FMS Form 6652. If the depository refuses to make the correction, the DO shall make a complete report of the facts to the DCMO as prescribed in paragraph 050301, above. This report must include a copy of all documentation and correspondence regarding the deposit. The DO must not attempt to correct an erroneous amount reported by a depository. To make such a correction would create a loss or overage of funds condition on the SF 1219.

★ 050406. Deposit Ticket DSSN Reported Incorrectly

★ A. DSSN Reported Incorrectly by the DO. Although a rare situation, if the DSSN is entered correctly on the SF 215 and reported correctly by the depository, but the DO reports the assigned DSSN incorrectly on the detailed deposit activity report to the Treasury Department, two deposit differences will occur. These reported deposits will not match and the transaction will appear on the FMS Form 6652 for each of the DSSNs. If this type of deposit difference occurs, neither DO is authorized to process a transaction to correct the error. Each DO shall take the appropriate actions as prescribed below.

★ 1. The depositing DO should receive the confirmed copy of the SF 215 from the depository since the address on the SF 215 will be that of the depositing DO. The deposit will appear in the Ca\$h-Link Agency Access System under the depositing DO's DSSN, but the DO will receive an FMS Form 6652 indicating a deposit reported by the depository but not by the DO. The DO shall compare the agency and confirmed copies of the SF 215 and the data reported on the detailed deposit activity report with the data reported in the Ca\$h-Link Agency Access System and the supporting detail provided with the FMS Form 6652. Upon determining the exact nature of the error, the DO immediately shall contact the Financial Analysis Branch, Financial Management Service, Department of the Treasury, Room 500E, 3700 East-West Highway, Hyattsville, MD 20782, provide a description of the error and request the Treasury Department to initiate corrective action. Initial contact to the Treasury Department may be by telephone at (202) 874-7980. After investigation of the error and contact with the depository and both DOs involved, the Treasury Department will administratively correct the deposit error and clear the item(s) from the FMS Form 6652.

★ 2. The DO of the DSSN that is erroneously reported by the depositing DO will not receive a confirmed copy of the SF 215 from the depository since the address on the SF 215 will be that of the depositing DO. The deposit will not appear in the Ca\$h-Link Agency Access System under the DSSN erroneously reported by the depositing DO. However, the DO of the DSSN that is reported erroneously will receive an FMS Form 6652 and supporting detail that indicates a deposit reported by the DO but not the depository. The DO will have no record of the deposit. Unless the DO receives the confirmed copy of the SF 215 which is an indication that the depository prepared the SF 215 to correct an understated deposit or overstated debit voucher, the DO shall not record this deposit transaction on the DD Form 2657, SF 1219 or detailed deposit activity report. The DO shall contact the Treasury Department at the above address and phone number to report the error and request assistance in resolving the deposit difference.

★ B. DSSN Reported Incorrectly by the Depository. If a depository reports a DSSN incorrectly to the Treasury Department, two differences will occur. In the event either of these deposit differences occur, neither DO is authorized to process a transaction to correct the error. Each DO shall take the appropriate actions as prescribed below.

★ 1. The deposit involved will not appear in the Ca\$h-Link Agency Access System under the DSSN of the DO that made the deposit, but the DO will receive the confirmed copy of the SF 215. The DO also will receive an FMS Form 6652 and supporting detail indicating a deposit reported by the DO but not by the depository. The DO shall compare the agency and confirmed copies of the SF 215 and the data reported on the detailed deposit activity report with the supporting detail provided with the FMS Form 6652. Upon determining the exact nature of the error, the depositing DO shall immediately contact the Financial Analysis Branch, Financial Management Service, Department of the Treasury, Room 500E, 3700 East-West Highway, Hyattsville, MD 20782, provide a description of the error and request the Treasury Department to initiate corrective action. Initial contact to the Treasury Department may be by telephone at (202) 874-7980. After investigation of the error and contact with the depository and both DOs involved, the Treasury Department will administratively correct the deposit error and clear the item from the FMS Form 6652.

★ 2. The DO of the DSSN that is reported by the depositary will discover a deposit in the Ca\$h-Link Agency Access System for which there is no record at that DSSN. The DO should not receive a confirmed copy of the SF 215 from the depositary since the address on the SF 215 will be that of the DO who made the deposit. The DO will receive an FMS Form 6652 and supporting detail that indicates a deposit reported by the depositary and not by the DO. Unless the DO receives the confirmed copy of the SF 215 which is an indication that the depositary prepared the SF 215 to correct an understated deposit or overstated debit voucher, the DO shall not record this deposit transaction on the DD Form 2657, SF 1219, or detailed deposit activity report. The DO shall contact the Treasury Department at the above address and phone number to report the error and request assistance in resolving the deposit difference.

★ 050407. Debit Vouchers Not Reported by DOs

★ A. Except for payment by electronic fund transfer through the Federal Reserve system, SFs 5515 are generally prepared only by depositaries as adjustments to erroneous amounts on SFs 215 and SFs 5515, to return negotiable instruments that are dishonored, or to adjust SFs 215 for counterfeit currency. All SFs 5515 prepared by depositaries are reported automatically to the Treasury Department through the Ca\$h-Link Agency Access System. The depositary will forward the memorandum and confirmed copies of the SF 5515 and supporting documents to the DO for recording and reporting. Unless the DSSN appearing on the SF 5515 is not the DSSN of the DO receiving the document, the SF 5515 shall be recorded into the DO's accountability upon receipt of the memorandum and confirmed copies and included in the detailed deposit activity report. This requirement for DOs to record and report the SF 5515 upon receipt applies regardless of whether the SF 5515 is deemed erroneous or if the reason given for the charge needs further clarification. If the DO fails to record and report the SF 5515 on the DD Form 2657, SF 1219 and detailed deposit activity report for the month that the SF 5515 is issued, the SF 5515 will appear on the FMS Form 6652. If the SF 5515 is issued near the end of the month and the DO does not receive and process the transaction in the month of issue, the SF 5515 will appear on the FMS Form 6652 as reported by the depositary and not by the DO. Daily monitoring of the Ca\$h-Link Agency Access System will alert the DO that an SF 5515 has been issued by a depositary. If no confirmation copy is received from the depositary within 30 days after appearing in the Ca\$h-Link Agency Access System, the DO shall initiate follow-up action with the depositary to determine the status of the SF 5515. The depositary should provide a confirmation copy or confirmation information to the DO in response to the follow-up memorandum.

★ 1. To clear this difference from the FMS Form 6652, the DO must obtain the memorandum and confirmed copies and include the SF 5515 on the DD Form 2657, SF 1219 and detailed deposit activity report during the month of receipt. The DO must ensure the SF 5515 is reported using the month and year of issue (as reported by the depositary in the Ca\$h-Link Agency Access System), not the current month and year in which the SF 5515 is being recorded and reported. Section II, Part B, column (3) of the SF 1219 must indicate the actual month and year of the SF 5515 as reported by the depositary. The SF 5515 must also be included in the detailed deposit activity report and must be reported using the actual month and year the SF 5515 was issued (as reported by the depositary).

★ 2. If the DSSN cited on the SF 5515 is not the DSSN of the receiving disbursing office, the document shall be forwarded to the disbursing office whose DSSN is on the document or returned to the depositary if the identity and location of the disbursing office cannot be determined.

★ 3. If the SF 5515 should have been charged to a different DSSN, follow the procedures in subparagraph 050402.B.2, above.

★ B. In some instances, SFs 5515 for electronic payments through the Federal Reserve system are prepared by the paying DO and submitted to the depositary with the payment file. In other instances, the Federal Reserve Bank prepares the SFs 5515 in lieu of accepting and processing a paper SF 5515 from the DO. In either instance, these SFs 5515 must be included on the DD Form 2657, SF 1219, and detailed deposit activity report for the month of payment. Failure to include an SF 5515 electronic payment transaction on the DD Form 2657, SF 1219, or the detailed deposit activity report will create an out of balance condition on the DD Form 2657 and SF 1219 unless the DO also failed to record the disbursement. For example: if a DO processes and includes a disbursement voucher on the DD Form 2657 and SF 1219, prepares and submits an SF 5515 to the depositary with the electronic payment file, but does not include the SF 5515 on the DD Form 2657, SF 1219, and detailed deposit activity report, the DD Form 2657 and SF 1219 will not balance. Proper balancing procedures will not allow this situation to occur. If the transaction occurred near the end of the month and the DO cannot process and report the transaction in the transaction month, the deposit difference will appear on the FMS Form 6652. To correct this difference, the DO must obtain the transaction documentation and process both the payment and the SF 5515 on the DD Form 2657, SF 1219 and detailed deposit activity report during the current month. The DO must ensure the SF 5515 is reported using the month and year the payment was actually made (as reported by the depositary in the Ca\$h-Link Agency Access System), not the month and year in which the SF 5515 is being reported. Section II, Part B, column (3) of the SF 1219 also must indicate the actual month and year of the SF 5515 as reported by the depositary. The SF 5515 must also be included in the detailed deposit activity report and must be reported using the actual month and year of the SF 5515 as reported by the depositary.

★ 050408. Debit Vouchers Not Reported by Depositaries. SFs 5515 that have been reported by the DO but not by the depositary will appear on the FMS Form 6652. The most frequent cause of this difference is when a depositary receives an SF 5515 and payment file for payment by electronic fund transfer, but rather than processing and reporting the SF 5515 provided by the DO, prepares a new SF 5515 and reports it to the Treasury Department. The depositary will provide the DO with the memorandum and confirmed copies of the SF 5515 prepared and reported by the depositary. If the DO reports the SF 5515 provided to the depositary and the depositary reports the SF 5515 prepared by the depositary, the transaction will appear on the FMS Form 6662. The supporting detail provided with the FMS Form 6652 will indicate a specific SF 5515 reported by the depositary but this detail will not match the data in the DO's detailed deposit activity report. Daily monitoring of the Ca\$h-Link Agency Access System will alert the DO that a new SF 5515 has been issued by the depositary. DOs using depositaries that routinely process SFs 5515 in this manner shall contact the depositary in writing and request an explanation for the actions and that the depositary process the SFs 5515 provided

by the DO with the payment files. If the depository refuses to process the SFs 5515 provided by the DO, the DO shall provide written notification with copies of all correspondence and documents involved to the DCMO. The DCMO will pursue resolution of the issue through the Treasury Department and provide the DO written instructions on any additional actions to be taken.

★ A. To prevent this type of difference from appearing on the FMS Form 6652, the DO must report the SF 5515 transaction on the detailed deposit activity report as reported by the depository. If the DO receives the confirmed copy of the SF 5515 prepared by the depository prior to the end of the month in which the transaction occurred, the DO must report the SF 5515 prepared by the depository rather than the SF 5515 prepared by the DO. The memorandum and agency copies of the SF 5515 prepared by the DO shall be retained with the confirmed copy of the SF 5515 prepared by the depository. If the depository routinely continues to prepare new SFs 5515, these documents must be provided with the written notification required above.

★ B. To clear this type of difference from the FMS Form 6652, the DO must reverse the DO's SF 5515 transaction from the detailed deposit activity report and reenter the SF 5515 transaction as reported by the depository. The SF 5515 must be reversed in the current month's detailed deposit activity report and must be reversed using the actual SF 5515 number, month and year as initially reported to the Treasury Department. The SF 5515 prepared and reported by the depository must be entered on the detailed deposit activity report exactly as reported by the depository (as shown by the confirmed copy of the SF 5515 and in the Ca\$h-Link Agency Access System). The SF 5515 reversal must also be included in Section II, Part B, column (3) of the SF 1219, and must indicate the month and year the SF 5515 was initially reported to the Treasury Department. The SF 5515 prepared and reported by the depository must also be included in Section II, Part B, column (3) of the SF 1219, and must indicate the month and year the SF 5515 was reported by the depository. Since these actions net to a zero value, there will be no impact on the DO's pecuniary liability.

★ 050409. Debit Voucher Number, Date or Amount Reported Incorrectly. A deposit difference will result from incorrect reporting of the SF 5515 serial number, date or amount by either a DO or a depository. These differences should be detected through daily monitoring of the Ca\$h-Link Agency Access system. If such an error is not corrected in the month that the debit voucher transaction is made, a deposit difference will appear on the FMS Form 6652. The supporting detail provided with the FMS Form 6652 will show a specific debit voucher reported by the depository, but this detail will not match the data on the DO's detailed deposit activity report. DOs shall compare the confirmed copy of the SF 5515 and the detailed deposit activity report with the data in the Ca\$h-Link Agency Access System and the supporting detail of the FMS Form 6652. This comparison is required to determine the exact nature of the error, whether caused by the DO or the depository, and the specific corrective action necessary to resolve the difference. The following subparagraphs describe examples of typical debit voucher number, date and amount reporting errors and the corrective action required for resolving these differences.

★ A. Each SF 5515 has a preprinted serial number that cannot be changed or altered in any manner. If a DO or depository changes or enters this number incorrectly on the

reports to the Treasury Department, a difference will occur.

★ B. If a DO reports a debit voucher date incorrectly or a depository changes and reports a debit voucher date based on the date of receipt (e.g., a debit voucher that was mailed) rather than the date shown on the SF 5515, a difference will occur. If a depository consistently reports debit vouchers in the month received and processed rather than the date entered on the SF 5515, the DO shall report this condition to the DCMO as prescribed in paragraph 050301, above. This report must include a copy of the SF(s) 5515, FMS Form(s) 6652 and supporting detail, and a printout of the data from the Ca\$h-Link Agency Access System.

★ C. If a DO or depository reports the amount of a debit voucher incorrectly to the Treasury Department, a difference will occur. If this type of error is made by the DO, the total deposits reported on line 4.2 and the reverse of the SF 1219 will not agree with the total of deposits on the detailed deposit activity report. Proper balancing procedures will not allow this error to occur. If a depository reports the amount of a debit voucher incorrectly to the Treasury Department, the amount reported by the depository in the Ca\$h-Link Agency Access System will not agree with the amount shown on the confirmed copy of the SF 5515.

★ D. If the DO made the errors described in subparagraphs 050409.A and 050409.B, above, the DO shall reverse the debit voucher as originally reported from the current month's detailed deposit activity report and reenter the debit voucher with the correct data. It is critical that the DO reverse the debit voucher transaction exactly as originally reported. The debit voucher reversal and reentry shall also be included in Section II, Part B on the reverse side of the SF 1219. The reversal entry must show the month and year of the original debit voucher transaction. Since reversal and reentry of a debit voucher to correct the number or date will net to a zero value, there will be no impact on the DO's pecuniary liability. However, such corrections are mandatory to remove the differences from the FMS Form 6652.

★ E. If the depository made the errors described in subparagraphs 050409.A and 050409.B, above, the DO should first contact the depository and request the depository to correct its report to the Treasury Department. Such a correction by the depository will clear the difference from the FMS Form 6652. If the depository refuses to make the correction, the DO is authorized to make the correction as described in subparagraph 050409.D, above, provided the documentation for the debit voucher clearly indicates the error to be a debit voucher number or date reporting error. The documentation necessary is the memorandum and confirmed copies of the SF 5515; detailed deposit activity report; FMS Form 6652 and supporting detail; and, printout of data from the Ca\$h-Link Agency Access System. When a DO makes the corrections under these conditions, a complete report of the facts shall be made to the DCMO as prescribed in paragraph 050301, above. This report must include a copy of all documentation and correspondence regarding the debit voucher.

★ F. Per subparagraph 050409.C, above, if the DO reports the debit voucher amount incorrectly, the detailed deposit activity report will not balance with the SF 1219. In the event such a circumstance arises, the DO shall correct the error following the correction procedures described in subparagraph 050409.D, above. Use of this correction procedure is authorized only if the amount of the debit voucher was recorded correctly on line 4.2 of the SF

1219 and in Section II, Part B on the reverse side of the SF 1219. If the deposit amount was not recorded correctly on the SF 1219, refer to paragraph 050402.C, above, for corrective actions required.

★ G. If the depository made the amount error described in subparagraph 050409.C, above, the DO shall contact the depository and request the depository to correct its report to the Treasury Department. Such a correction by the depository will clear the difference from the FMS Form 6652. If the depository refuses to make the correction, the DO shall make a complete report of the facts to the DCMO as prescribed in paragraph 050301, above. This report must include a copy of all documentation and correspondence regarding the debit voucher. The DO must not attempt to correct an erroneous amount reported by a depository. To make such a correction would create a loss or overage of funds condition on the SF 1219.

★ 050410. Debit Voucher DSSN Reported Incorrectly

★ A. DSSN Reported Incorrectly by the DO. Although a rare situation, if the DSSN is entered correctly on the SF 5515 and reported correctly by the depository, but the DO reports the assigned DSSN incorrectly on the detailed deposit activity report to the Treasury Department, two differences will occur. These reported debit vouchers will not match and the transaction will appear on the FMS Form 6652 for each of the DSSNs. If this type of deposit difference occurs, neither DO is authorized to process a transaction to correct the error. Each DO shall take the appropriate actions as prescribed below.

★ 1. The DO preparing the SF 5515 will receive the confirmed copy of the SF 5515 from the depository since the address on the SF 5515 will be that of the preparing DO. The SF 5515 will appear in the Ca\$h-Link Agency Access System under the DSSN of the preparing DO, but the DO will receive an FMS Form 6652 indicating a debit voucher was reported by the depository but not by the DO. The DO shall compare the confirmed copy of the SF 5515 and the data reported on the detailed deposit activity report with the data reported in the Ca\$h-Link Agency Access System and the supporting data provided with the FMS Form 6652. Upon determining the exact nature of the error, the DO shall immediately contact the Financial Analysis Branch, Financial Management Service, Department of the Treasury, Room 500E, 3700 East-West Highway, Hyattsville, MD 20782, provide a description of the error and request the Treasury Department to initiate corrective action. Initial contact to the Treasury Department may be by telephone at (202) 874-7980. After investigation of the error and contact with the depository and both DOs involved, the Treasury Department will administratively correct the deposit error and clear the item(s) from the FMS Form 6652.

★ 2. The DO of the DSSN that is incorrectly reported by the preparing DO will not receive a confirmed copy of the SF 5515 from the depository since the address on the SF 5515 will be that of the preparing DO. The debit voucher will not appear in the Ca\$h-Link Agency Access System under the DSSN erroneously reported by the depositing DO. However, the DO of the DSSN that is erroneously reported will receive an FMS Form 6652 with supporting detail that indicates a debit voucher was reported by the DO but not the depository. The DO will have no record of the debit voucher. Unless the DO receives the confirmed copy of the SF 5515 which is an indication that the depository prepared the SF 5515 to correct an

overstated deposit or understated debit voucher, the DO shall not record this debit voucher transaction on the DD Form 2657, SF 1219, or detailed deposit activity report. The DO shall contact the Treasury Department at the above address and phone number to report the error and request assistance in resolving the deposit difference.

★ B. DSSN Reported Incorrectly by the Depository. If a depository reports a DSSN incorrectly to the Treasury Department, two differences will occur. In the event either of these differences occur, neither DO is authorized to process a transaction to correct the error. Each DO shall take the appropriate actions as prescribed below.

★ 1. The debit voucher involved will not appear in the Ca\$h-Link Agency Access System under the DSSN of the preparing DO, but the DO will receive the confirmed copy of the SF 5515. The DO also will receive an FMS Form 6652 indicating a debit voucher was reported by the DO but not by the depository. The DO shall compare the confirmed copy of the SF 5515 and the data reported on the detailed deposit activity report with the supporting detail data provided with the FMS Form 6652. Upon determining the exact nature of the error, the preparing DO shall immediately contact the Financial Analysis Branch, Financial Management Service, Department of the Treasury, Room 500E, 3700 East-West Highway, Hyattsville, MD 20782, provide a description of the error and request the Treasury Department to initiate corrective action. Initial contact to the Treasury Department may be by telephone at (202) 874-7980. After investigation of the error and contact with the depository and both DOs involved, the Treasury Department will administratively correct the debit voucher error and clear the item from the FMS Form 6652.

★ 2. The DO of the DSSN that is erroneously reported by the depository will discover a debit voucher in the Ca\$h-Link Agency Access System for which there is no record at that DSSN. The DO will not receive a confirmed copy of the SF 5515 from the depository since the address on the SF 5515 will be that of the DO who prepared the debit voucher. The DO will receive an FMS Form 6652 that indicates a debit voucher reported by the depository and not by the DO. Unless the DO receives the confirmed copy of the SF 5515 which is an indication that the depository prepared the SF 5515 to correct an overstated deposit or understated debit voucher, the DO shall not record this debit voucher transaction on the DD Form 2657, SF 1219 or detailed deposit activity report. The DO shall contact the Treasury Department at the above address and phone number to report the error and request assistance in resolving the deposit difference.

★ 050411. Schedule of Deposit Activity. All Navy and Marine Corps DOs shall prepare and submit a monthly Schedule of Deposit Activity as prescribed in paragraph 050401.A above. The primary purpose of the schedule is to report the detail of all deposit and debit voucher transactions included in line 4.2 of the SF 1219. The schedule also serves as a transmittal for deposit documents and provides a detailed listing of transactions that remain unconfirmed. See figure 5-9.

A. Preparation

★ 1. General. The schedule shall be prepared in an original and two

copies. The original and one copy will be sent to the servicing DFAS Center or designated OPLOC with the SF 1219 and one copy will be retained by the DO. Marine Corps DOs shall forward the original with the financial reports and submit one copy with the advance reports.

2. Header Data

a. Organization. Enter the name of the ship or activity to which the DO is assigned.

b. Location. Naval vessels should show their homeport. Shore activities should show the city and either the state or the foreign country in which they are located.

c. DSSN. Enter the DSSN assigned to the disbursing office.

d. Disbursing Officer. Enter the name of the DO.

e. Period of Report. Enter the month and year for which the accompanying SF 1219 is being submitted.

★ 3. Section 20.0 - Deposits or Debit Vouchers Reported This Month. All transactions affecting the balance reported on line 4.2 of the current month's SF 1219, including corrections described in paragraphs 050402 through 050410, above, shall be listed in this section.

★ a. Deposit Tickets. SFs 215 shall be reported in the month the deposit is presented or mailed to the depositary regardless of the month the deposit is confirmed by the depositary. The data shown must be exactly the same as appears in blocks (1), (2), (4), and (8) of the SF 215 and those data elements may not be changed or altered even if they are erroneous. Dates should be displayed in YYMMDD format. The month and year shown in the date presented or mailed column should normally be the same as the month and year of the report being prepared. If a deposit was presented or mailed to the depositary in a previous month but was not reported in that month, and the deposit was also omitted from the total appearing on line 4.2 of the SF 1219 for that month, the deposit should be reported in the current month. The actual date presented or mailed as shown in block (2) of the SF 215 shall be shown even if the date is that of the previous month. Commissary deposits presented near the end of the month are an example of such an occurrence. Deposits will be shown as positive amounts except when deposit difference corrections are processed as described in paragraphs 050402 through 050410, above.

★ b. Debit Vouchers. SFs 5515 must be reported in the month prepared by the DO and presented to the depositary for payments by electronic fund transfer or in the month they are received if prepared by the depositary. Except as provided in paragraphs 050402, 050406, and 050410, above, an SF 5515 which is charged to a DSSN must be reported by that disbursing office even if the SF 5515 is considered erroneous or relates to the DO's predecessor. Debit vouchers will be shown as negative amounts, except when deposit difference

corrections are processed as described in paragraphs 050402 through 050410, above. A negative amount should be placed within brackets or parentheses. The data shown will be the same as that which appears in blocks (1), (2), and (4) of the SF 5515. Since most SFs 5515 originate from a depository or the Treasury Department (except SFs 5515 prepared by the DO for electronic fund transfer payments), they are already confirmed. As such, SFs 5515 must be reported in section 20.1. The date appearing in block (2) of the SF 5515 will be entered in both the "Date Presented or Mailed" and the "Date Confirmed" columns of the schedule. The date will be shown in YYMMDD format. As an exception to this procedure, DOs afloat should forward SFs 5515 relating to predecessor accounts to the appropriate DFAS OPLOC for inclusion in the predecessor's financial reports.

4. Section 20.1 - Reported This Month and Confirmed This Month or Earlier

a. General. Enter all items included in line 4.2 of the SF 1219 for the current month, for which a confirmation document is included with the schedule. A confirmation document is the green copy (confirmed copy) of the SF 215 which has been authenticated by a representative of the depository or the blue copy (confirmed copy) of the SF 5515. Deposits shall be listed before debit vouchers. Within these two major subdivisions, transactions shall be listed in date presented or mailed sequence.

★ b. Adjustments and Corrections. Adjustments to deposit activity are accomplished by the issuance of separate adjusting documents as described in paragraph 050402, above. For example, if a DO overstated the value of an SF 215, the depository should confirm the original SF 215 in the amount for which issued and issue an SF 5515 for the amount of the overstatement. If the amount of the SF 215 was less than the value of the deposit, the depository should issue an SF 215 for the amount of the understatement. In these examples, both documents must be reported by the DO. Corrections to deposit activity are accomplished as prescribed in paragraphs 050402 through 050410, above. For an unconfirmed deposit that has been determined to be lost in transit, the deposit shall be removed from section 32.0 by reporting the lost deposit in section 31.0 as if it was confirmed. The date confirmed shall be shown as the first day of the month for which the schedule is being prepared. An explanation of the entry must be included with the schedule.

5. Line 20.1 - Net of 20.1 Items. The net of all items included in section 20.1 will be shown on line 20.1.

6. Section 20.2 - Deposits Reported This Month But Unconfirmed. This section will be used to report all items included in line 4.2 of the SF 1219 for the current month, for which no confirmation document is included with the schedule. Normally, this will consist of deposits which have been presented or mailed during the current month, for which the confirmed copy of the SF 215 has not been received as of the date the report is prepared. SFs 5515 shall not be shown in this section. Transactions will be listed in date presented or mailed sequence. Each entry in this section must be supported with the memorandum (white) copy of the SF 215.

7. Line 20.2 - Total of 20.2 Items. Enter the total of all items included in section 20.2.
8. Line 20.0 - Total Reported This Month. Enter the sum of lines 20.1 and 20.2. This amount must equal line 4.2 on the SF 1219. A solid line will be drawn on the schedule between lines 20.0 and 30.0.
9. Line 30.0 - Total Unconfirmed Deposits Brought Forward. Enter the amount shown on line 34.0 of the previous month's schedule.
10. Section 31.0 - Deposits Reported Previous Months. List SFs 215 reported in a previous month in section 20.2 for which the confirmed (green) copies are now enclosed.
11. Line 31.0 - Total of 31.0 Items. Enter the total of all items included in section 31.0.
12. Line 32.0 - Deposits Reported Previous Months Not Yet Confirmed. Enter the difference between lines 30.0 and 31.0.
13. Section 32.0 - Deposits Reported Previous Months Not Yet Confirmed. List all SFs 215 included in sections 20.2 and 32.0 of the previous month's report which have not been listed in section 31.0 for the current month. The total of deposits listed in this section must equal the total entered on line 32.0.
14. Line 33.0 - Deposits Reported This Month Not Confirmed. Enter the amount shown on line 20.2 above.
15. Line 34.0 - Total Deposits Reported Which Remain Unconfirmed. Enter the sum of lines 32.0 and 33.0. This amount will be entered on line 30.0 of the next month's schedule.

0505 SHIPMENT OF PUBLIC FUNDS

050501. General

A. Authority. Title 40, sections 721-726 and 729 (reference (t)) authorizes the shipment of valuables. DOs making shipments of items covered by its provisions shall follow the shipment procedures as described in this section. Shipments are insured under law and no supplementary insurance will be obtained.

B. Authorized Purposes. Shipments of public funds are authorized for the following purposes: deposit of funds to an official checking account; delivery of funds to another DO as an exchange-for-cash check transaction; shipment of damaged or mutilated currency; deposit of food stamps; and obtaining funds from a bank or from another DO by exchange of a check for

cash.

C. Methods of Shipment. Public funds shall be shipped in a manner which will provide the greatest possible protection against risk of loss and destruction of, or damage to, the funds. Public funds may be shipped by certified or registered mail, courier, officer messenger, government conveyance, railway express, contract armored car service, or as cargo via the Military Airlift Command's signature security service depending upon availability of means. However, the normal methods of shipment are by registered mail and Military Airlift Command cargo. Shipment by registered or certified mail is preferred in the case of checks, drafts, money orders, etc. Shipment by courier is preferred in the case of currency and coin. Shipment by government conveyance or railway express shall be used only in the case of currency or coin of excessive weight or bulk. Public funds may also be transferred between DOs afloat using air lift (helicopter) or high-line during underway replenishment at sea. In either of these methods, a buoy or other reliable floatation device shall be attached to the container to aid in recovery.

D. Record of Shipment. In addition to accounting documents required in the case of transfers and deposits of public funds (i.e., SF 215) and in order to provide the record required by the regulations issued by the Treasury Department, each shipment of funds shall be described in detail on the DD Form 165 (Shipment of Funds.)

050502. Preparation and Distribution of DD Form 165

A. General. A DD Form 165 is required for any shipment containing coin or currency regardless of amount. The DD Form 165 is not required for shipments for deposit to the Treasury Department or to a bank provided the shipment consists only of checks and money orders and the record of instruments deposited prescribed by paragraph 050208 of this chapter is otherwise maintained. In addition to the retained copy of the DD Form 165, the shipping DO shall preserve all registry receipts or other carriers' receipts and any other documents incidental to the shipment until assured that shipment has been completed and no claims action will be initiated.

B. Preparation. The DD Form 165 shall be prepared in quadruplicate as described below. A properly prepared DD Form 165 is shown as figure 5-10.

1. The space "To" shall contain the complete mailing address of the consignee (intended recipient). In the case of transfers of funds to another DO, the name of the DO should be included in the mailing address.

2. The space "From" shall contain the complete name and mailing address of the consignor (DO shipping the funds).

3. The space "Purpose of Shipment" shall describe the purpose of the shipment such as "For deposit to Disbursing Station Symbol Number" or "Transfer of funds in exchange for a U.S. Treasury check".

4. The space for "Number of Containers" is self-explanatory.

5. The space for "Shipped Via" shall indicate the method of shipment (i.e., registered mail, courier, messenger, etc.).

6. The space "Mail Receipt No. and Date" shall include the registry number or the lock and rotary numbers, if any, under which shipment is made as well as the number of the registry receipt, or other receipt of the carrier.

7. A complete description of the currency and/or coin being shipped shall be shown in the spaces provided by type, denomination, quantity, monetary unit total, rate of exchange if not U.S. currency/coin, and value in U.S. dollars. Checks and other negotiable instruments shall be listed individually on the reverse of the form.

8. The contents of the shipment shall be personally counted by the DO and one responsible witness and placed in the appropriate shipping container(s). Both the DO and the witness shall date and sign the DD Form 165 in the spaces provided under the certification: "We have counted, verified and sealed this shipment." The DO shall be personally responsible for delivery of the shipment to the carrier.

9. The spaces: "This shipment was received from shipper and delivered to" and "Delivery date and hour" shall be completed on the copy to be mailed directly to the consignee and the copy retained by the shipping officer at the time of release to the carrier.

10. The portions pertaining to receipt of the shipment shall be left blank by the shipping DO. The consignee shall complete this portion of the DD Form 165 upon receipt and verification of the shipment.

C. Distribution. The DD Form 165 shall be distributed as follows.

1. The original and duplicate shall be included with the shipment.

2. A copy shall be forwarded by mail direct to the consignee as a notice of shipment when the amount is equal to or greater than \$10,000.

3. A copy shall be retained by the shipping officer. This copy shall bear the original signatures of the DO and verifying witness and shall be used if necessary to substantiate a claim for loss in shipment.

D. Shipment by Registered Mail or as Cargo via the Military Airlift Command.

When shipment is made by registered mail or as cargo via the Military Airlift Command, the copy of DD Form 165 forwarded by mail to the consignee and the copy retained by the shipping officer shall show the registry number and the date the shipment was delivered to the post office or terminal. Whenever feasible, single shipments shall be limited to a maximum of \$250,000. Registered mail and Military Airlift Command shipments shall be properly packaged to prevent breakage in transit. Advice as to adequate packaging can be obtained from military post offices. The copy of the DD Form 165 retained by the officer shipping the funds shall be signed by the appropriate postal official in the space beneath the block "Delivery Date and Hour."

E. Shipment by Courier or Officer Messenger. When shipment is made by courier or officer messenger, the DO making the shipment shall enclose the funds in a securely sealed envelop, money bag, or other suitable container bearing the name and address of the consignee. Any commissioned or warrant officer of the Armed Forces on active duty or any individual serving as a courier for the Department of State is authorized to act as courier for delivery of funds represented by currency, checks, drafts, or money orders. The courier shall take all practicable precautions for the protection of the shipment. The copy of DD Form 165 retained by the officer shipping the funds shall be signed by the courier in the space beneath the block "Delivery Date and Hour" as a receipt for the shipment. When arrangements for the shipment are made through a message center, the registry number shall be inserted on the copy of the DD Form 165 to be retained by the shipping officer and the space below "Delivery Date and Hour" shall be signed by an authorized official of the message center. Upon receipt of the shipment, the consignee shall sign the original of the DD Form 165 in the last signature block after verification of the contents of the shipment and return it to the shipper as a receipt. The copy shall be signed by the consignee in the space beneath "Delivery Date and Hour" and shall be given to the courier as receipt for the shipment. The advance copy providing notice of shipment shall be annotated to indicate date of receipt and shall be retained by the consignee. If the services of an office messenger are obtained, the messenger shall sign the DD Form 165 in the block for delivery date and hour.

F. Shipment by Government Conveyance. When the shipment is of such weight or bulk as to make other methods of shipment impracticable, shipment may be made by government conveyance. The DO shall make the necessary arrangements for the shipment and receive the bill of lading for the delivery with the shipment. In all cases, the DO shall be designated as the shipper and the consignee shall be the officer responsible for executing the receipt for the funds. The DO shall be responsible for direct delivery to the carrier and obtaining receipt on a copy of the bill of lading.

G. Shipments by Armored Car Service

1. General. Shipment of funds by commercial armored car service is authorized when such service is cost effective and offers the greatest protection against loss. The cost shall be charged to the operations and maintenance funds available to the DO.

2. Obtaining Funds From Banks. When funds are obtained from a bank other than an FRB or branch, the DO shall accept custody of the funds at the bank and then personally turn the funds over to the armored car carrier for transporting. Since FRBs comply with Treasury Department regulations in making shipments of money, funds may be obtained from an FRB or branch by forwarding an exchange-for-cash check to the bank with instructions for delivery of the funds to the armored car carrier in the desired denominations.

050503. Action by Consignee. Upon receipt of a copy of DD Form 165 as notice of shipment, the consignee (intended recipient or authorized official designated by activity receiving shipment) shall make arrangements to receive the shipment. Upon receipt of the shipment, the consignee shall ensure that the shipment is opened and inspected by one or more responsible

employees. The consignee shall sign the original DD Form 165 and return it to the shipping officer as a receipt. If shipment was made by courier, the consignee shall sign and deliver to the courier a copy of the DD Form 165 as an acknowledgment of receipt of the shipment. When the shipment represents funds for deposit, the consignee shall complete the SF 215 and return the required copies to the DO. The consignee immediately shall advise the shipping officer of any difference between the amount or quantity indicated on the copy of the DD Form 165 and in the actual shipment at the time of opening. If the shipment fails to arrive in due course, the consignee shall immediately notify the shipping officer, the post office, or office of other carrier through which delivery would be made. The consignee also shall immediately notify the shipping officer of any damage to the shipment. All findings of the consignee in such cases shall be a matter of record, subject to inspection in connection with any necessary investigation.

050504. Action by Consignor The consignor (the bank or the DO shipping the money) shall ensure that prompt action is taken to trace a shipment of funds for which a receipted DD Form 165 is not received within a reasonable time. Telephone or message contact with the consignee shall be initiated in order to insure the consignee's compliance with the provisions of paragraph 050503, above.

★ 050505. Losses in Shipment. Accountability for public funds rests with the consignor until the consignee has received and verified all funds listed on the DD Form 165. If funds shipped as prescribed in this section are lost, destroyed, or damaged, the shipping officer shall forward an immediate written report to the Bureau of the Public Debt, Division of Financial Management, Room 201, P. O. Box 1328, Parkersburg, WV 26106-1328. A copy of the report shall be provided to the consignee and to the servicing DFAS Center. If the loss, destruction, or damage represents a value equal to or in excess of \$10,000, or if delay in reporting is likely to delay the government in recovering the value of the shipment, the report shall be transmitted by message or telegram and promptly confirmed in writing. The report shall state the: date of shipment; amount and character of the valuables lost, destroyed, or damaged; name and address of the consignee; method of transportation, the name of the carrier, and the location of the office of the carrier from which shipment was made; registry or other receipt number; and cause of the loss, destruction, or damage, if known. The consignor immediately shall notify the agent in charge of the nearest U.S. Secret Service office, the appropriate investigative service, the local post office, or local office of other carrier. The shipping officer shall also place a tracer on the shipment and take such other action as may be necessary to facilitate recovery.

050506. Recovery Action

A. General. Recovery action primarily is the responsibility of the officer who is accountable for the lost or damaged funds. In the case of funds for which an exchange-for-cash check has been issued, responsibility and accountability rests with the bank or DO who shipped the funds (consignor). However, accountability for the check still rests with the DO who issued the check (consignee) and its value shall continue to be reported in the SF 1219 as funds in transit. The consignee should determine what action was taken by the shipping officer and should monitor the course of investigative action taken. In the case of coin or currency lost en route to a depository, accountability rests with the DO who made the shipment for deposit. It shall be the DO's responsibility to take the reporting and recovery actions required. In either case, action to report the

loss of funds shall be taken as prescribed in Chapter 6 of this volume. The DO who shipped the funds shall record the value of the lost shipment on line 7.3 of the SF 1219 as a loss of funds. If the DO is reassigned before recovery can be effected, the relieving DO shall not receipt for the loss. However, the relieving officer shall be responsible, in conjunction with the designated settlement office, for ensuring that necessary claims are properly filed and that the proceeds from the claims are properly applied in liquidation of the loss.

B. Checks and Money Orders. The DO shall take action to recover the amount of the lost negotiable instruments following the procedures in paragraph 050209 of this chapter. Since this action should be sufficient to recoup the full amount of the lost deposit, the claims described in subparagraphs 050506.C or 050506.D, below shall not be filed. However, in the event this action does not result in full recovery, the DO may request relief of liability for the uncollectible portion of the lost shipment. Such a request shall be fully supported by copies of all correspondence pertaining to the unsuccessful recovery action.

C. Claim Against U.S. Postal Service. The liability of the U.S. Postal Service in the case of lost currency shipped by registered mail is generally limited to shipments of \$100 or less. A claim for a lost shipment of \$100 or less can be filed only by the consignor (mailer). A claim for damage or partial loss may be filed by the consignor or by the consignee (addressee). The applicable claim form is PS Form 565 (Registered Mail Inquiry for Delivery and/or Application for Indemnity). The accountable DO should obtain a copy of the completed PS 565, and shall ensure that he or she is listed on the form as the claimant. For losses exceeding \$100, the PS 565 shall be filed as a means of tracing the shipment, but the filing will not constitute a claim.

D. Claim Against the Treasury Department. Claims for the value of lost currency shipments in excess of \$100 shall be submitted by the accountable DO to the Secretary of the Treasury via the servicing DFAS Center. The Secretary of the Treasury will require proof of claim in such form, and in such manner, as he deems necessary. Proof of claim will include satisfactory proof of loss, destruction, or damage. The claim shall be supported by the original of the DD Form 165, which will be returned after adjustment of the claim. The consignor (shipping officer) shall submit a statement concerning the loss or destruction of, or damage to, the shipment or any part thereof. If the shipment was received by the consignee with contents not intact, the statement shall set forth all the circumstances relating to the condition in which the shipment was received and the manner of inspection and verification of its contents. Affidavits covering the loss, destruction, or damage to the shipment shall be obtained from the consignee and the carrier. The statement and recommendations of the investigating officers shall also be included. In the case of lost shipments for which an exchange-for-cash check was issued to an FRB or another DO, the issuing DO shall request that the shipping officer take the above actions and provide copies of all documentation. After filing of the claim, all necessary and reasonable steps to recover the lost, destroyed, or damaged shipment shall continue. All recoveries and refunds received following favorable consideration of the claim shall be turned over to the Treasury Department.

E. Restitution and Relief. The Secretary of the Treasury shall grant claims for lost, damaged, or destroyed shipments only if the shipping officer strictly followed the prescribed procedures. In the event of a denial of the claim, the accountable DO may either make restitution of the missing funds or submit a request for relief of liability as prescribed in Chapter 6 of this

volume. Relief will be granted only if the accountable officer is judged to be free of fault or negligence. Therefore, the relief request shall clearly and convincingly justify any departure from prescribed regulations.

050507. Damaged or Mutilated U.S. Currency

A. Fragments of U.S. Currency. Damaged or mutilated U.S. currency recovered from inadvertent wartime destruction or from peacetime catastrophes affecting DoD property and personnel such as aircraft crashes, ship sinkings, building explosions, or chemical spills shall be processed as explained below.

1. Fragments shall be inventoried by at least three disinterested persons and, where a DoD Component has jurisdiction, brought under safekeeping control by the appropriate DO.

2. Fragments shall be packaged following procedures in subparagraph 050507.B, below, and forwarded to the Bureau of Engraving and Printing for determination of value.

3. In the event that fragments are contaminated, the DO or other responsible official shall contact the Office of Currency Standards, Bureau of Engraving and Printing, at (202) 874-2361 to arrange for on site review by Bureau personnel or special disposition instructions.

B. Packaging Mutilated Currency. Mutilated currency examiners normally can determine the value of mutilated currency when it has been carefully packed and boxed as described below.

1. Regardless of the condition of the currency, do not disturb the fragments more than is absolutely necessary.

2. If the currency is brittle, pack it carefully in cotton and box it as found, without disturbing the fragments, if possible.

3. If the currency was in a purse, box, or other container when mutilated, it should be left there, if possible, in order to prevent further deterioration of the fragments or to prevent them from being lost.

4. If it is absolutely necessary to remove the fragments from the container, send the container with the currency and any other contents found, except as noted in subparagraph 050507.B.7, below.

5. If the money was flat when mutilated, do not roll or fold.

6. If the money was in a roll when mutilated, do not attempt to unroll or straighten.

7. If coins or any other metal are mixed with the currency, remove carefully. Do not send coins or other metal in the same package with mutilated currency, as such metal may further damage the currency.

8. Properly packaged currency should be sent to: Department of the Treasury, Bureau of Engraving and Printing, ATTN: OCS, Room 344, BEP Annex, P.O. Box 37048, Washington, DC 20013.

050508. Uncurrent or Mutilated U.S. Coins

A. Worn Coins. U.S. coins that are merely worn or reduced in weight by natural abrasion, yet are readily and clearly recognizable and are machine countable, may be redeemed at face value at any FRB or branch.

B. Mutilated Coins. U.S. coins that are bent, broken, not whole, or fused and melted together are considered "mutilated." Mutilated coins may be redeemed by the U.S. Mint as indicated below.

1. The Mint will not redeem mutilated coins if they are: fused material unrecognizable as U.S. coins; foreign coins; counterfeit coins; slugs; altered coins (i.e., changed to pass as another denomination); or coins or lumps of coins that contain lead, solder, or other substances that would make them unsuitable for use as coinage metal.

2. Whenever possible, loose mutilated coins submitted for redemption should be separated into the following groups: Cents (1 cent, including both copper and copper-plated zinc); Nickels (5 cents); Clad Coins (10 cents, 25 cents, 50 cents and Eisenhower 1 dollar); and Dollars (Susan B. Anthony 1 dollar).

3. The settlement amount will be based on coin weight and whether they have been sorted by denomination categories ("separated") or have been sent mixed together. If coins are not separated, they will be considered "mixed" and redeemed at a lower rate as described below. For separated coins, the Mint will redeem no less than one pound of each denomination category; for mixed or fused coins, the minimum is two pounds.

4. Mixed denominations of coins or lumps of coins that have been fused together will be redeemed by their weight and metal category (i.e., bronze, cupronickel, or clad) based on date of receipt by the Mint and rates that change quarterly as of the 15th day of January, April, July and October.

5. Bent or partial coins separated by denomination groups listed below will be redeemed by their weight and denomination category at the following rates:

<u>Denomination</u>	<u>Rate (per lb.)</u>
Cents	\$1.4585

Nickels	\$4.5359
Clad Coins	\$20.0000
Dollars	\$56.0000

6. The Mint will accept no less than one pound of each denomination of separated coins or 2 pounds of mixed or fused coins.

7. Settlement will be made by check approximately 12 to 14 weeks from the date that mutilated coins are received at the Mint. Coins may be mailed to: United States Mint, P.O. Box 400, Philadelphia, PA 19105; or may be delivered in person or by courier to: United States Mint, Coin Redemption Branch, 5th and Arch Streets, Philadelphia, PA 19106.

8. Questions regarding the disposition of mutilated or contaminated coins may be referred to the Cashier's Office, U.S. Mint, at (215) 597-4982.

0506 TRANSFERS OF PUBLIC FUNDS

050601. Transfers Within the DoD. Transfers of funds between DOs are authorized and should follow the same exchange for cash procedures used to procure cash. Transfers of funds between DOs of different DoD Components or other governmental agencies shall be made by an exchange-for-cash Treasury check, made payable to the purchasing DO for the amount of cash desired.

050602. Transfer of Funds Upon Relief. All funds and accountable documents in the possession of the relieved DO (including currency, coin, and receipts which represent funds in the hands of authorized deputies, agents, cashiers, imprest fund cashiers, advances to contractors, salary payments, and other authorized deferred vouchered payments) which cannot be scheduled immediately, shall be transferred to the relieving officer. Funds in the hands of deputies, agents, cashiers, and imprest fund cashiers may be retained by the individuals if the relieving DO intends to retain these individuals in their current accountable position. Otherwise, the DO being relieved shall recall the funds and terminate the accountable individual's appointment prior to the relief process. The total amount transferred to the relieving DO shall be the amount of total accountability at the close of the accounting period as shown on the final SF 1219 of the DO being relieved. As soon as possible after relief has taken place, the relieving DO shall issue new DD Forms 1081 to all accountable individuals who retained funds as provided in this paragraph. A certificate of transfer shall be furnished on the bottom of the final SF 1219 of the officer relieved. The certificate shall read as follows:

"I have received on (date) by transfer from (officer relieved), (total amount), an analysis of which is included in Sections I-B and I-C above.

(Signature and rank of relieving officer)."

In addition to the regular distribution requirements, 2 extra copies of the SF 1219 shall be prepared. One of the extra copies shall be retained with the disbursing records of the relieving DO, and the other shall be retained by the officer relieved as a receipt for the funds transferred. All deficiencies in the account of the officer relieved shall be processed as prescribed in Chapter 22 of this volume.

When the total accountability of the officer relieved is zero, no certificate of transfer by the relieving officer is required.

050603. Merging of Disbursing Accounts When a DSSN is to be assumed by another DSSN of the same DO, the cash and other assets of the DSSN to be discontinued shall be purchased by a Treasury check drawn on the receiving DSSN. The Treasury check shall be deposited to the credit of the DSSN to be discontinued and shall be reported on the final SF 1219.

0507 COUNTERFEIT OR ALTERED U.S. CURRENCY

050701. Detected Prior to Acceptance. Counterfeit or altered U.S. currency, if detected upon presentation to a DO for exchange or payment of an obligation to the United States, shall be confiscated. A receipt indicating the type, denomination, and amount of the confiscated currency shall be furnished to the individual presenting the currency and information shall be obtained from the individual as to the source of acquisition. The currency shall be delivered with a letter of transmittal, giving all available information, to a representative of the appropriate investigative service, if available, or if not, to the nearest military security agency. A receipt shall be obtained in either case. Because the currency was detected before acceptance by a DO, entries regarding the receipt and transmittal shall not be made in the DO's accounts.

050702. Detected After Acceptance and Reimbursement Is Obtained. Immediately after discovering counterfeit currency, the DO shall request reimbursement from the source from which received. When reimbursement is received, the procedure outlined in the preceding paragraph shall be followed. Because reimbursement is obtained, no loss to the DO accrues, and no entries in the DO's accounts are required.

050703. Detected After Acceptance and Reimbursement Is Not Obtained. If the source of receipt of counterfeit currency is unknown or if the source is known and reimbursement is unobtainable, the currency shall be delivered immediately by the DO, together with a detailed report of all known circumstances, to a representative of the appropriate investigative service, if available, or if not, to the nearest military security agency. A receipt for the currency shall be obtained in either case. The receipt for the currency, with a signed copy of the report made by the DO, shall be forwarded with a memorandum via the commander to the servicing DFAS Center. The memorandum shall include the reason reimbursement was not obtained. This transaction shall be reported on the SF 1219 as a physical loss of funds.

050704. Detected After Depositing by Mail With Bank. When a DO is notified that currency which has been deposited by mail has been determined to be counterfeit and is being held by the bank, the DO shall reimburse the bank for the counterfeit currency and shall obtain a formal receipt giving complete description of the currency and stating that the currency has been found to be counterfeit and has been withdrawn from circulation. The receipt from the bank shall also state whether the currency will be or has been turned over to the U.S. Secret Service. The receipt from the bank and a detailed report of all known circumstances, signed by the DO, shall be forwarded via the commander to the servicing DFAS Center. This transaction shall be reported on the SF 1219 as a physical loss of funds.

★ 050705. Miscellaneous Cases. Any unusual counterfeit currency situation not specifically covered in the preceding paragraphs should be forwarded through the servicing DFAS Center to DFAS-HQ, Deputy Director for Finance, for disposition instructions.

Step 1. Add leading zeroes to the DSSN to make an eight-digit number.	0	0	0	0	8	3	6	8
Step 2. Multiply each digit by the locational factor.	3	7	1	3	7	1	3	7
	0	0	0	0	56	3	18	56
Step 3. Add the last digit of each product.	0	+ 0	+ 0	+ 0	+ 6	+ 3	+ 8	+ 6 = 23
Step 4. Subtract the sum from the next higher multiple of 10. The result is the check-digit.	30	- 23	= 7					
In this example the DSSN is 8368. Following the above steps, the CIN is 00008368-7.

	TOTAL (MUST EQUAL LINE 32.0 ABOVE)			400.00	
33.0	DEPOSITS REPORTED THIS MONTH BUT NOT YET CONFIRMED (LINE 20.2)				0.00
34.0	TOTAL DEPOSITS REPORTED WHICH REMAIN UNCONFIRMED (32.0 - 33.0)				400.00

(Letters in parentheses are keyed to explanations of line entries which follow.)

★Figure 5-9 (Continued). Sample Format for Schedule of Deposit Activity (Closing)

(a)	Routine deposit confirmed during the current month. The deposit was included in line 4.2 of the SF 1219. The confirmed copies of the SFs 215 should be enclosed with this schedule.
(b)	Routine debit voucher. The debit voucher was included in line 4.2 of the SF 1219. The confirmed copy of the SF 5515 should be enclosed.
(c)	Routine deposit--not yet confirmed. The memorandum copy of the SF 215 should be enclosed with this schedule.
(d)	This deposit should have been reported in January and should have been included in the total deposits reported on line 4.2 of the SF 1219 for January. It was not. It is being reported now. The confirmed copy of the SF 215 should be enclosed with this schedule.
(e)	See the description for item (d). The memorandum copy of the SF 215 should be enclosed.
(f)	Routine deposit, confirmed in a month later than the month in which the deposit was presented or mailed. This item had already been reported on line 4.2 of a previous month. The confirmation copy of the SF 215 should be enclosed with this schedule.
(g)	Deposits presented or mailed in a previous month but not yet confirmed. Aggressive followup action should be taken by the disbursing office to obtain confirmation of deposits reported here.
★(h)	A deposit previously reported and still unconfirmed has been determined to be lost. This entry is to remove the lost deposit from the schedule. A corresponding decrease to line 4.2 and increase to line 7.3 of the SF 1219 must be made. An explanatory note should be enclosed with this schedule.
(i)	This is a supplemental SF 215 issued by the bank to acknowledge that the total of the checks included in a particular deposit exceeded the amount shown on the SF 215 under which the checks were deposited. The memorandum copy of the SF 215 should be enclosed with this schedule.
(j)	This is a confirmed foreign currency deposit made in a Treasury General Account (not a limited depositary account). The deposit had been carried on the SF 1219 at the disbursing officer's valuation of those funds, \$950. When the funds were accepted by the Federal Reserve Bank, New York, the U.S. dollar proceeds were credited to the symbol in the amount of \$900. The difference of \$50 was vouchered as a loss by exchange transaction.
(k)	This entry corrects erroneous entry of the deposit number when originally reported. It reverses the original entry and reenters the correct data. There is no impact on the DO's accountability.

CHAPTER 6

IRREGULARITIES IN DISBURSING OFFICER ACCOUNTS0601 IRREGULARITIES

060101. General. Irregularities are categorized as physical losses of funds; illegal, incorrect, or improper payments; or overages of funds. Physical losses of funds are further segregated by major losses and minor losses. A major physical loss of funds is a loss of \$750 or more, or any physical loss where there is evidence of fraud within the accountable function, regardless of dollar amount. A minor physical loss of funds is a loss of less than \$750 without any evidence of fraud internal to the accountable function. Any person who believes that an individual entrusted with public funds is misusing those funds shall notify the commander having jurisdiction over the alleged offender. Action shall then be taken as prescribed in this chapter.

060102. Responsibilities of the DO. If a DO has knowledge of or reason to believe that a deputy DO, or any other person to whom funds have been entrusted, has lost or misused or may be misusing those funds, the DO shall report such information to the commander exercising immediate jurisdiction over the alleged offender. When a DO discovers an irregularity in the disbursing account, the DO shall immediately verify that all transactions have been properly posted and verify the accuracy of all totals on the DD Form 2657 and/or each deputy's, agent's, or cashier's DD Form 2665 (Daily Agent Accountability Summary) since the date of last balancing. The DO then shall verify by actual count that the total of all cash and documents held as cash by the DO and all deputies, agents, and cashiers is in agreement with the amount shown as on hand on the DD Forms 2657 and 2665. If the irregularity is not resolved within 24 hours of discovery, the DO shall report the irregularity to the commander and request that the commander direct an immediate audit of all disbursing assets by the cash verification team to confirm that an irregularity has occurred. In all cases, the report to the commander shall be in writing. The commander shall be advised immediately of the cash verification team's findings. Failure to report an irregularity to the commander may contribute to an unfavorable decision with regard to relief of the DO should the DO later request relief of liability.

060103. Responsibilities of the Commander. Except as provided in paragraphs 060401 for minor physical losses, 060502 for erroneous payments, and 060603 for overages, the commander shall take action to report irregularities through the chain of command to the servicing DFAS Center upon receipt of information from the DO or other individual that an irregularity has occurred. The report, when required, shall not be classified or made in message form unless unusual circumstances exist.

A. Commander's Report of Irregularity. Information furnished in the report shall include:

1. the specific type of irregularity;
 2. all known circumstances (including the date the irregularity occurred or was discovered);
 3. the dollar amount of the irregularity;
 4. the identity of the accountable individual(s) by name, rank or grade, and accountable position;
 5. the type of investigation that has been or will be convened (see section 0607 of this chapter);
 6. the estimated completion date of the investigation, if applicable;
- and,
7. the status of any recovery action in progress or contemplated.

In the case of an irregularity in an imprest fund, the report shall also include the authorized maximum amount of the fund. See figure 6-1 for a summary of actions to be taken when an irregularity caused by a physical loss of funds is discovered. See figure 6-2 for a summary of actions to be taken when an irregularity caused by an illegal, incorrect, or improper payment is discovered.

060104. Reporting Irregularities to the General Accounting Office (GAO). As required by Title 7 of the U.S. General Accounting Office Policy and Procedures Manual (reference (n)) the servicing DFAS Center is responsible for preparing a report to GAO on each irregularity that affects the accounts of disbursing officers. If the irregularity is resolved within two years after the date the accounts are made available to GAO for audit, reporting the irregularity to GAO is not necessary. Reports to GAO required by this paragraph should be addressed to: Assistant Comptroller General, Accounting and Financial Management, ATTENTION: Accounting Systems Audit, U.S. General Accounting Office, 441 G Street, NW, Washington, DC 20548. The report should contain the following information:

- A. A detailed statement of facts of the case, including the type of irregularity, date, amount, and names and positions of the accountable individual(s) involved.
- B. A reference to pertinent supporting documents, such as pay records, contracts, and vouchers.
- C. A description of how the irregularity occurred and how it affected the accountable officer's account.

D. Adequate description of procedural deficiencies, if known, that caused the irregularity and the corrective action taken or to be taken.

E. Information on any recoupment already made or being considered.

0602 ACCOUNTING FOR IRREGULARITIES

060201. General. Specific instructions for recording and clearing irregularities on the SF 1219 are provided in Chapter 19 of this volume. In addition, the DO shall use DD Form 2667 (Subsidiary Accountability Record) to maintain a record of all physical losses and overages of funds discovered in the disbursing officer's account. Separate DD Forms 2667 shall be maintained for physical losses and overages of funds. Physical losses and overages incurred by deputies, agents, cashiers, imprest fund cashiers, and change fund custodians shall be included on the DD Form 2667. The DD Form 2667 maintained for physical losses shall be balanced and reconciled to the DD Form 2657 daily. The DD Forms 2667 shall be kept on file with the DD Form 2657 as a subsidiary record supporting the DD Form 2657. If more than one physical loss or overage occurs during a single business day because more than one deputy, agent, cashier, or change fund custodian is used, each loss or overage shall be accounted for individually as prescribed in this chapter. When a DO is relieved from disbursing duty (with or without a successor), any unresolved irregularity shall be handled as prescribed in Chapter 22 of this volume. Pecuniary liability for an irregularity cannot be transferred to the relieving DO. However, a successor DO may assume responsibility for the value of dishonored personal checks when action to request removal of the irregularity has been taken as required by Chapter 4 of this volume. This assumption of responsibility shall in no way impose any pecuniary responsibility for the irregularity on the successor nor relieve the officer in whose account the irregularity occurred from pecuniary responsibility. Both the former and relieving DOs shall be responsible for taking any necessary actions to resolve the irregularity.

060202. Preparation of DD Form 2667 as a Cumulative Record of Physical Losses. List each physical loss occurring during each day on the DD Form 2667. See figure 6-3 for an example of DD Form 2667 prepared as a cumulative record of physical losses. Complete the form as follows:

- A. Item 1: DSSN. Enter the DSSN.
- B. Item 2: Purpose of Record. Enter "Cumulative Losses of Funds."
- C. Item 3: Name of Disbursing Officer. Enter the DO's name and rank.
- D. Item 4: Address. Enter the DO's organization and address.
- E. Item 5: Date. For each loss of funds, enter the date the loss was picked up in the DO's accountability.

F. Item 6: Reference or Explanation. For each loss, enter a brief description of the loss together with identification of the person responsible for the loss or overage (if known).

G. Item 7: Increase. For each loss, enter the amount of the loss.

H. Item 8: Decrease. This item is used to record recovery or recoupment of physical losses. It is also used to record relief of liability for the losses, if granted.

I. Item 9: Balance. Enter the cumulative total of the losses shown in the record. This balance must be in agreement with DD Form 2657, line 7.3, Losses of Funds at all times.

0603 MAJOR PHYSICAL LOSSES OF FUNDS

060301. General

★ A. Major Physical Losses. A major physical loss is a loss of \$750 or more and includes losses of public funds, records, or papers by fire, flood, earthquake, action by a hostile force, airplane crash, shipwreck, explosion, other losses during shipment not covered by the Government Losses in Shipment Act (see Chapter 5 of this volume), unexplained losses, and other similar occurrences. Losses resulting from wrongful conduct, such as theft, robbery, and burglary, are treated as major physical losses regardless of the amount involved. Additionally, losses resulting from wrongful conduct, such as theft, robbery, burglary, embezzlement, or fraudulent acts of disbursing personnel, acting alone or in collusion with others, are treated as major physical losses regardless of the amount involved. Generally, gains and losses resulting from accommodation exchange transactions are not treated as physical losses or overages of public funds. Refer to Chapter 13 of this volume for procedures to process accommodation transaction gains and losses. Normally, dishonored checks received as an accommodation exchange are treated and processed as accommodation losses per Chapter 4 of this volume. However, if improper disbursing office actions are associated with the dishonored checks (e.g., check cashing for unauthorized personnel), the dishonored checks are treated as illegal, incorrect, or improper payments.

B. Reporting a Major Physical Loss. Immediately upon discovering a major physical loss, the DO shall take the actions prescribed in this chapter to verify all transactions and the accuracy of all totals on the DD Form 2657 and DD Forms 2665 since the last balancing. The DO then shall verify by actual count that the total of all cash and documents held as cash is in agreement with the amounts shown on the DDs 2657 and 2665. If the loss is not resolved within 24 hours of discovery, the DO shall make a written report of the loss to the commander and request the commander to direct an immediate audit of all disbursing assets by the cash verification team.

C. Investigating a Major Physical Loss. Every major physical loss shall be investigated. Normally, the commander shall convene the appropriate type of investigation and appoint the investigating officer(s). In those instances where the commander is not authorized to convene an investigation, the commander shall request an investigation through the chain of command. The officer(s) appointed to conduct the investigation shall make a thorough investigation as prescribed in section 0607 of this chapter.

D. Recording a Major Loss of Funds. All physical losses (whether major or minor) are recorded on the DD Form 2657 by increasing line 7.3 (or 9.3), Loss of Funds, and decreasing the appropriate cash on hand line. For example, if a cash count reveals U.S. currency on hand to be short \$100, decrease line 6.2A and increase line 7.3. To record a loss on the DD Form 2657, it may be necessary to prepare a collection voucher to transfer the amount of a fraudulent payment (where the fraud was perpetrated by someone within the disbursing office) back into the appropriation from which the payment was disbursed. This transaction is recorded as an increase to DD Form 2657 line 4.1B, Refunds, and to line 7.3 Loss of Funds. Support the entry on DD Form 2657 by recording the loss on the DD Form 2667 as prescribed in paragraph 060202 above. Use a separate DD Form 2667 to support line 9.3 (predecessor losses) on the DD Form 2657. Do not offset individual losses and overages unless it is obvious they are related and the loss is recorded before the overage is recorded. Continue to show all losses on the DD Form 2657 and the SF 1219 until recovery or recoupment is made, or until relief of liability for the loss is granted.

060302. Major Change Fund Physical Losses. The DO (or authorized agent) advances change funds to a change fund custodian by authority of the commander. After the advance, the change fund custodian is liable for any losses of funds. However, though the funds are no longer under the direct control of the DO (or agent), the DO (or agent) remains accountable for the fund and could be held jointly and severally liable for any loss.

A. Classification of Change Fund Losses. A cash shortage occurring in a change fund usually is considered to be a loss of sales receipts (property) to the extent sales receipts are large enough to absorb the loss. Such a loss is not considered a DO loss of funds. When a change fund is made whole from sales receipts (property), no loss from the change fund is considered to have occurred. If a change fund can only be made partially whole from sales receipts (property), the balance of the shortage is considered to be a loss from the change fund. A loss of all activity funds must be considered a loss of both sales receipts and the change fund. A loss of the change fund alone can occur; however, if an after-hours theft of a change fund occurs (and sales receipts have already been deposited or turned over to the DO or authorized agent). A written justification is required when a cash shortage is reported as a change fund loss rather than a loss of sales receipts. If a loss to the change fund itself has occurred, report and process the loss according to the procedures in this section.

B. Sales Receipt Losses. Generally, a report of survey is initiated for the loss of sales receipts. Specific actions required for sales receipt losses are contained in the regulations governing the sales activity operation.

C. Combined Change Fund and Sales Receipt Losses. If the loss includes all or a portion of the change fund (\$750 or more) and sales receipts, the commander shall take the actions specified in paragraph 060103, above, to report the loss and convene or request the appropriate investigation. Information to the effect that investigation will proceed in conjunction with report of survey procedures should be included in the report. The commander shall initiate a report of survey for the loss of sales receipts. The report of survey investigation, plus any other investigations (e.g., FBI), must cover the facts and circumstances surrounding the entire loss (change fund and sales receipts). The report of survey determines liability for the loss of sales receipts only. Since the same set of facts and circumstances relates to both the loss of sales receipts and change funds, no separate investigation is required for the loss of the change fund. The commander shall send a summary report of the above investigation to the servicing DFAS Center. The report shall also include:

1. A certification that the DO (or authorized agent) advanced the change fund per this volume.
2. A statement of whether the safeguarding requirements prescribed in this Volume were met; if not, the reason.
3. A determination by the commander, concerning the change fund, that satisfactory evidence exists to support a recommendation for relief of the DO or any other person involved, or a finding of pecuniary liability against the DO or any other person involved.
4. A copy of the report of survey (and all attachments).

D. Recording a Change Fund Loss. Upon discovery of a physical loss of all or a portion of the change fund, the change fund custodian shall make a return (on paper only) of the amount of the loss using the DD Form 1081. Upon receipt of the DD Form 1081, the DO shall record the loss of the change fund on the DD Form 2667. The DO shall also record the loss on the DD Form 2657 as a decrease to line 6.5, Funds with Agents, and increase line 7.3. This bookkeeping entry does not relieve the change fund custodian of liability for the amount of the loss.

060303. Major Physical Losses by Deputies, Disbursing Agents, Paying Agents, Cashiers, and Collection Agents. Agents are pecuniarily liable for all funds entrusted to them. However, the DO maintains overall responsibility for the funds and may be held jointly and severally liable for any agent losses. Since agent losses are essentially DO losses, the agent shall report losses to his or her principal immediately upon discovery. The agent shall not delegate or reassign this responsibility. Agents operating on another installation shall report losses to the principal DO through his or her immediate commander. A subagent losing funds advanced by another agent shall report losses to the principal DO through his or her immediate commander and the agent who advanced the funds. The agent who advanced the funds shall notify his or her own immediate commander and the principal DO. In all cases, the DO shall notify his or her

own commander of the loss. If the loss is \$750 or more, the agent's commander shall take the actions specified in paragraph 060103 above to report the loss and convene or request the appropriate investigation. The agent incurring the loss of funds shall record the loss on the DD Form 2665 and prepare a turn-in to the principal using the DD Form 1081 (which includes the loss of funds) as required by Chapter 19 of this volume. The requirement to make an immediate turn-in to the principal applies in all cases including those instances where the agent has been authorized to make turn-ins on other than a daily basis. Upon receipt of the turn-in, the DO shall record the loss on the DD Form 2667 and decrease the appropriate cash on hand line of the DD Form 2657 and increase line 7.3. This bookkeeping entry does not relieve the agent of liability for the amount of the loss. Investigatory procedures included in this chapter are applicable to agent losses.

060304. Major Physical Losses by Imprest Fund Cashiers. As with other agents of the DO, imprest fund cashiers are pecuniarily liable for the loss of funds entrusted to them. Also, the DO still maintains overall responsibility for the funds and may be held jointly and severally liable for any imprest fund losses. Immediately upon discovery of a loss in an imprest fund, the imprest fund cashier shall report the loss to the DO (or authorized agent) who advanced the funds through the commander who approved establishment of the fund. If the loss is \$750 or more, the commander shall take the actions specified in paragraph 060103, above, to report the loss and convene or request the appropriate investigation. Based on the information contained in the imprest fund cashier's report of loss, the commander shall determine if (based on the amount of the loss, volume of imprest fund transactions, and frequency of replenishment) it is necessary for the DO to provide an additional advance in the amount of the loss to restore the imprest fund to its full operational level.

A. If the commander determines the additional advance is necessary, he or she shall notify the DO of the requirement in writing. The notification shall include information as to whether the imprest fund has been (or will be) turned over to the alternate imprest fund cashier pending completion of the required investigation(s) and instructions to provide the additional advance to the primary or the alternate imprest fund cashier, as appropriate. Restoring the imprest fund to its full operational level does not increase the value of the imprest fund. For example, if the amount of the fund is \$10,000 and a loss of \$1,000 occurs, advancing the \$1,000 to restore the fund to its full operational level does not increase the fund to \$11,000. The DO shall make the advance under the same guidelines as provided in Chapter 2 of this volume except that the amount of the additional advance shall not be recorded as an increase to DD Form 2657 line 6.5, Funds with Agents. In this case, the DO shall record the loss on the DD Form 2667 and shall record the additional advance on line 7.3, Loss of Funds. As with a routine imprest fund advance, the imprest fund cashier (or alternate) shall provide the DO with a signed DD Form 1081 upon receipt of the additional advance. Restoration of the imprest fund to its full operational level does not relieve the imprest fund cashier of liability for the loss of funds.

B. If the commander determines that it is not necessary to restore the imprest fund to its full operational level, the imprest fund cashier shall prepare a return (on paper only) of the amount of the loss using the DD Form 1081. Upon receipt of the DD Form 1081, the DO

shall record the loss on the DD Form 2667 and decrease DD Form 2657 line 6.5, Funds with Agents, and increase line 7.3, Loss of Funds. In addition, the imprest fund cashier shall account for the loss on the OF 1129 (the first OF 1129 submitted after the loss is discovered and all subsequent OFs 1129 submitted until the loss is recovered, recouped, or relief of liability is granted). On the OF 1129, the loss of funds shall be entered on the line titled "Difference" in the Status of Funds section. A notation similar to the following shall be typed on the face of the OF 1129 to identify the entry: Loss of funds reported (enter date), not restored. These actions do not reduce the authorized operational level of the imprest fund. They are bookkeeping transactions to properly account for and track the loss of funds. When the loss is recovered or recouped, or when relief of liability is granted, the DO shall clear the loss of funds from the DD Form 2667 and the DD Form 2657 line 7.3, Loss of Funds, based on the instructions provided by the servicing DFAS Center and then provide an advance (to restore the funds to its full operational level) to the imprest fund cashier under normal procedures described in chapter 2 of this Volume. The imprest fund cashier shall give the DO a DD Form 1081 upon receipt of the additional advance.

060305. Major Counterfeit Currency Physical Losses. Counterfeit currency or coinage accepted in conjunction with official disbursing office business transactions (as differentiated from accommodation transactions) are processed as physical losses of funds. The DO shall record the loss amount on the DD Form 2667 and DD Form 2657, line 6.2A, U.S. Cash on Hand (or 6.2B, Foreign Cash on Hand) by the amount of the counterfeit currency and increase line 7.3, Loss of Funds. Generally, most counterfeit currency losses will be minor rather than major losses, but major losses are possible. If \$750 or more of counterfeit currency is received during a single business day, or evidence of fraud in the disbursing office is associated with the receipt of any amount of counterfeit currency, the loss shall be processed as a major physical loss of funds.

060306. Major Loss of Original Vouchers. The DO is pecuniarily liable for the amount of the payment when a payment voucher becomes lost. However, the original and all copies of the voucher would have to be lost. If the original voucher is lost, and the DO's retained copy (and the retained supporting documents) is available, the copy may be stamped as a certified copy of the original voucher. There are times, however, when only the original voucher may suffice to support a payment. For example, the absence of a signature acknowledging receipt of a cash payment may negate the validity of the certified copy. For example, if a payee denies receipt of a cash payment and there is no original voucher (with the payee's signature) to prove the payment was properly made. The DO will be unable to prove that a proper payment has taken place and may be required to repay the payee. If the net pay amount of the voucher is \$750 or more, or if internal disbursing office fraud is associated with the loss of the voucher, process the loss as a major loss of funds and record the loss on the DD Form 2667 and DD Form 2657 as prescribed in paragraph 060301.D, above.

★ 060307. Major Loss of Documentation Supporting SF 1219 Receivables and Deposit Fund Account Balances. A physical loss of funds can occur whenever a DO is unable to collect an SF 1219 receivable because of the loss of documentation supporting the receivable. A

physical loss can also occur if open debit items within deposit fund accounts (e.g., **F3880) cannot be cleared because of the loss of supporting documentation. If the amount of the item (for which supporting documentation has been lost) is \$750 or more, or internal disbursing office fraud is associated with the loss of the documentation, process the loss as a major loss of funds.

0604 MINOR PHYSICAL LOSSES OF FUNDS

★ 060401. General. The DO is pecuniarily liable for all minor losses (under \$750, with no fraud involved) that occur in the DO's account. However, the DO may request relief of liability for minor losses by submission of a quarterly minor loss report to the servicing DFAS Center. Unless there is an indication that fraud is involved with the loss, it is not necessary for the commander to report a minor loss of funds through the chain of command to the servicing DFAS Center. However, the DO must notify the commander in writing whenever a minor loss of funds occurs. All minor losses over \$300 included on the quarterly report must be supported by a separate investigative report prepared by someone outside the disbursing office. Investigative comments associated with minor losses of \$300 or less shall be made by the DO and submitted in support of the associated line items on the quarterly report.

060402. Processing the Quarterly Minor Loss Report

A. Documentation of DO Minor Losses. Upon discovery of a physical loss of funds, the DO shall record the loss on the cumulative DD Form 2667 maintained in accordance with paragraph 060202 above and the DD Form 2657 by reducing the applicable cash on hand line and increasing the loss of funds line (7.3 or 9.3, as appropriate). The loss of funds shall also be recorded on a separate DD Form 2667 maintained specifically for minor physical losses of funds. See subparagraph 060402.D, below.

B. Documentation of Agent Minor Losses. Physical losses of funds incurred by deputies, disbursing agents, cashiers, paying agents, collection agents, imprest fund cashiers, or change fund custodians are identified as physical losses within the individual agent's accountability documents. A turn-in of the loss shall be made to the DO (just as if the lost funds were being returned to the DO). The DO shall then reduce the DD Form 2657 line 6.5 for that particular agent and increase line 7.3. The DO shall record the loss on the cumulative DD Form 2667 maintained in accordance with paragraph 060202, above, and also record the loss on the DD Form 2667 being maintained for minor losses of funds in accordance with subparagraph 060402.D, below.

★ C. Investigation of Minor Losses. Written investigatory comments are required for every physical loss of funds regardless of the amount. However, there is a procedural difference in the investigatory requirements for minor losses of \$300 or less and for minor losses over \$300. If fraud (internal to the accountable function) is discovered in conjunction with any physical loss of funds, the loss shall be processed as a major physical loss of funds.

★ 1. Minor Losses of \$300 or Less (No Fraud). For minor losses of \$300 or less, the DO shall conduct the investigation and render the written investigatory report. If the loss is attributable to the DO, the investigation shall be conducted by and the written report prepared by the primary deputy DO. Under no circumstances shall the individual incurring the loss prepare his or her own investigatory report. In all cases, the investigatory report shall be signed by the investigating officer and submitted in support of the quarterly minor loss report. The report may be prepared in letter or memorandum format and shall contain the following information and statements:

a. Name, grade, location, and capacity (e.g., deputy, cashier, disbursing agent) of the individual who incurred the loss.

b. Name, grade, and capacity (e.g., disbursing officer, deputy, disbursing agent) of the person who advanced the funds.

c. Amount of the loss.

d. A description of how the loss occurred.

e. A statement whether the loss is a physical loss (as contrasted with a loss from an illegal, improper, or incorrect payment or a loss from an accommodation transaction).

f. A statement whether there is evidence of fraud, intent to defraud, or other misconduct on the part of the accountable individual.

g. A statement whether, considering the circumstances involved, the accountable individual was functioning in a prudent manner and in accordance with applicable regulations and directives.

h. A statement whether the loss occurred while the accountable individual was acting within the individual's line of duty.

i. A statement whether the presumption of negligence is refuted by the specific facts established by the investigation.

j. The following investigating officer's recommendation, as appropriate: "I do/do not recommend relief from pecuniary liability."

k. The signed certification of the disbursing officer: "I have counseled (name of accountable individual) regarding appropriate corrective measures to prevent recurrence of losses of this nature, and I have reviewed the applicable regulatory procedures regarding small losses of funds."

★ 1. The signed statement of the accountable individual(s): "I have reviewed this investigative report and have/have not attached additional documentation or evidence which I consider pertinent to this loss."

★ 2. Minor Losses Over \$300 (No Fraud). Someone other than the DO or disbursing office personnel (e.g., a member of the cash verification team) shall be appointed by the commander to conduct the investigation of minor losses over \$300. The individual appointed to investigate the loss should have knowledge of disbursing office operations, especially of the required internal controls, pertinent laws, and applicable directives. In all cases, the investigatory report shall be signed by the investigating officer and submitted in support of the quarterly minor loss report. The investigatory report may be prepared in letter or memorandum format and shall contain the following information and statements:

a. Name and location of the DO or other agent where the loss occurred.

b. Name, grade, and capacity (e.g., disbursing officer, deputy, disbursing agent) of the person who advanced the funds.

c. Amount of the loss.

d. Cause of the loss, or whether the cause cannot be explained.

e. Time, date, and place where the loss was discovered.

f. Name, grade, and SSN of the individual directly responsible for custody of the funds at the time of loss.

g. Capacity in which the funds were held (e.g., cashier, change fund custodian, imprest fund cashier).

h. A statement whether the loss occurred in conjunction with valid disbursing operations.

i. Identification of regulatory provisions pertinent to the loss and whether they were complied with.

j. A comment on specific internal controls which might have prevented the loss, and the extent to which they were followed.

k. In general terms, a description of the actions the investigating officer took to be satisfied regarding whether fault was a cause for the loss.

l. A statement as to whether the loss occurred without fault or negligence by the accountable individual.

m. The following investigating officer's recommendation, as appropriate: "I do/do not recommend relief from pecuniary liability."

n. The signed certification of the disbursing officer: "I have counseled (name of accountable individual) regarding appropriate corrective measures to prevent recurrence of losses of this nature, and I have reviewed the applicable regulatory procedures regarding small losses of funds."

★ o. The signed statement of the accountable individual(s): "I have reviewed this investigative report and have/have not attached additional documentation or evidence which I consider pertinent to this case."

D. Preparation of DD Form 2667 as a Quarterly Minor Loss Report. Record all unrecovered minor losses occurring during each calendar quarter on a separate DD Form 2667 from the DD Form 2667 prepared to record and accumulate losses. See figure 6-4. Complete DD Form 2667 for the quarterly minor loss report as follows:

1. Item 1: DSSN. Enter the DSSN.
2. Item 2: Purpose of Record. Enter "Minor Loss of Funds Report" and the calendar quarter (for example, January 1 through March 31, 1993) for which the DD Form 2667 is being prepared.
3. Item 3: Name of Disbursing Officer. Enter the DO's name and rank.
4. Item 4: Address. Enter the DO's organization address.
5. Item 5: Date. For each of the minor losses included, enter the date each loss was picked up in the DO's accountability.
6. Item 6: Reference or Explanation. For each of the minor losses included, enter a brief description of the loss, together with identification of the person responsible for the loss (if known).
7. Item 7: Increase. For each of the minor losses included, enter the amount of the loss.
8. Item 8: Decrease. This item is not used on the quarterly minor loss report.

9. Item 9: Balance. Enter the total of all losses shown in the report.

E. Assembly of the Complete Quarterly Minor Loss Report. The DO shall assemble the report in the following order:

1. A covering transmittal letter similar to the example provided in figure 6-5.
2. The DD Form 2667 itemizing each minor loss included in the report.
3. The written investigatory report for each loss. The investigatory reports should be arranged in the same order as the losses appearing on the DD Form 2667.

F. Submission of the Quarterly Minor Loss Report. Total the minor losses quarterly and when the DO is relieved from disbursing duty. Mail the quarterly report with all required supporting documentation to the servicing DFAS Center not later than the 5th workday following the end of the quarter, or upon the DO's relief from disbursing duty, not later than the 5th workday following the date of relief. When the report is submitted upon a DO's relief from disbursing duty, the transmittal letter must contain the statement, "Submitted due to relief of the DO effective (enter date).\" Provide one copy of the report and supporting documents to the commander and retain one copy. Negative minor loss reports are not required.

★ G. Review of Quarterly Minor Loss Report. Upon receipt, the servicing DFAS Center will review the report package for completeness, validity, acceptance, etc. If the investigatory comments are not considered adequate, further information will be requested from the DO. The report package will then be forwarded to the Center's General Counsel for review and recommendation to the Director of the DFAS Center regarding whether relief of liability should be granted. The Director may request additional information, may deny relief, or may grant relief. If the Director grants relief for one or more of the losses included in the quarterly report, the servicing DFAS Center will provide instructions for removal of the loss(es) from the SF 1219 or will forward a check for the amount of relief granted to the DO. If the Director denies relief of liability for one or more of the losses included in the quarterly minor loss report, the DO will be advised of the adverse determination. Within the adverse determination will be a recommendation that one or more accountable individuals involved with the loss be denied relief, if appropriate. Accountable individuals adversely affected by the decision shall be afforded the right to rebuttal. The time period allowed for rebuttal shall not exceed 30 days. Upon return of the report to the reviewing authority, that authority shall reconsider the decision to deny relief and affirm or reverse the previous decision.

060403. Minor Change Fund Physical Losses. Generally, follow the procedures in paragraph 060302, above. If it has been determined that sales receipts (property) aren't sufficient to absorb all or part of the loss, the balance must be treated as a loss of funds. Include these balances on the quarterly minor loss report if they are less than \$750 and there is no internal

fraud associated with the loss. Reporting and investigatory requirements prescribed in subparagraph 060402.C, above, also apply if the losses are less than \$750 and there is no internal fraud associated with the loss.

060404. Minor Physical Losses by Deputies, Disbursing Agents, Paying Agents, Cashiers, and Collection Agents. Generally, follow the procedures in paragraph 060303, above. Include on the quarterly minor loss report if the losses are less than \$750 and there is no internal fraud associated with the loss. Reporting and investigatory requirements prescribed in subparagraph 060402.C, above, also apply if the losses are less than \$750 and there is no internal fraud associated with the loss.

060405. Minor Physical Losses by Imprest Fund Cashiers. Generally, follow the procedures in paragraph 060304, above. Include on the quarterly minor loss report if the losses are less than \$750 and there is no internal fraud associated with the loss. Reporting and investigatory requirements prescribed in subparagraph 060402.C, above, also apply if the losses are less than \$750 and there is no internal fraud associated with the loss.

060406. Minor Counterfeit Currency Physical Losses. Generally, follow the procedures in paragraph 060305, above. Include on the quarterly minor loss report if the losses are less than \$750 and there is no internal fraud associated with the loss. Reporting and investigatory requirements prescribed in subparagraph 060402.C, above, also apply if the losses are less than \$750 and there is no internal fraud associated with the loss.

060407. Minor Loss of Original Vouchers. Generally, follow the procedures in paragraph 060306, above. Include on the quarterly minor loss report if the losses are less than \$750 and there is no internal fraud associated with the loss. Reporting and investigatory requirements prescribed in subparagraph 060402.C, above, also apply if the losses are less than \$750 and there is no internal fraud associated with the loss.

060408. Minor Loss of Documentation Supporting SF 1219 Receivables and Deposit Fund Account Balances. Generally, follow the procedures in paragraph 060307, above. Include on the quarterly minor loss report if the losses are less than \$750 and there is no internal fraud associated with the loss. Reporting and investigatory requirements prescribed in subparagraph 060402.C, above, also apply if the losses are less than \$750 and there is no internal fraud associated with the loss.

0605 ILLEGAL, INCORRECT, OR IMPROPER PAYMENT LOSSES

060501. General. Illegal, incorrect, or improper (erroneous) payment deficiencies may result from overpayment of a payee; two or more payments to a payee for the same entitlement; payment to the wrong payee; U.S. Treasury check issue overdrafts; negotiation of both the original and a substitute U.S. Treasury check; negotiation of both the original and a recertified U.S. Treasury check; any payment based on fraudulent, forged, or altered documents prepared or presented by individuals who do not work in the disbursing office; or payment in

violation of a regulation. Generally, there is no separate SF 1219 recording of erroneous payments similar to the requirements for recording physical losses of funds on lines 7.3 or 9.3 and they are not included on the DD Form 2667. In most cases an erroneous payment is charged to a valid appropriation via the disbursement voucher and the payment has already been made. If an erroneous payment is recouped (or collected from an individual held liable for the payment), the appropriation initially charged is credited for the amount recouped or collected. If no recoupment or collection is made, or if relief of liability is granted, the appropriation charge remains as if it were valid. All replacement check double-payment and check-issue overdraft losses are reported under the erroneous payment category. Normally, dishonored checks received as an accommodation transaction are treated as an accommodation exchange loss as prescribed in Chapter 4 of this volume. However, if improper disbursing office actions (not fraudulent) are associated with the dishonored checks (e.g., cashing for unauthorized personnel), dishonored checks are treated as illegal, incorrect, or improper payments.

★ 060502. Reporting Erroneous Payments. Upon discovery or receipt of notification that an erroneous payment has occurred, the DO shall report the erroneous payment to the Commander as prescribed in paragraph 060102 above. The Commander shall convene or request an investigation into the circumstances surrounding the erroneous payment as prescribed in paragraph 060503 and section 0607, below. A copy of the report to the Commander shall be provided to the appropriate entitlement functional area and the certifying officer. In addition, the DO is responsible for initiating collection action against the recipient of the payment as prescribed in chapters 29 and 30 of this volume and, in the case of commercial payments, Volume 10, chapter 18 of this Regulation. If the erroneous payment is recouped from the recipient, the proceeds shall be credited to the appropriation or fund charged when the payment was made. If the recipient of the erroneous payment does not voluntarily repay the erroneous payment within the time frames prescribed in the above references, the DO shall institute involuntary collection action as prescribed in chapter 30 of this Volume and Volume 10, chapter 18 of this Regulation. The DO, certifying officer, and/or other accountable officials involved in the erroneous payment may submit a request for relief of pecuniary liability for the payment as provided in section 0610, below and chapter 33 of this Volume. In all cases, documentation supporting attempts to recover the erroneous payment from the recipient must be included with any request for relief of liability.

★ 060503. Investigation of Erroneous Payments. A formal investigation of erroneous payments is not mandatory unless fraud (on the part of the payee, disbursing office personnel, certifying officer or accountable official(s)) is suspected in connection with the payment. However, the commander (or convening authority) may determine that a formal investigation is necessary. If so, the convening authority shall appoint the Investigation Board of Officers or Investigating Officer to gather additional information and determine responsibility. If no formal investigation is to be conducted, investigatory comments similar to those required in subparagraph 060402.C, above, for minor physical losses over \$300 are required. The memorandum or letter type investigatory report must outline the facts concerning the payment, the reason(s) no formal investigation is considered necessary, whether relief of liability is

recommended for the DO (and/or any other accountable individual(s)), and whether a request for relief is being submitted by the DO and/or other accountable individual(s).

0606 OVERAGES OF PUBLIC FUNDS

★ 060601. Recording Overages of Funds. Unless they obviously relate (and the relationship can be documented), do not offset any overage of funds against a physical loss of funds. An obvious relationship usually can be determined if foreign currency on hand is short and U.S. currency on hand is over by equal U.S.-equivalent amounts (for example, an overage of \$431.18 against a loss of \$431.18). Do not offset apparently related overages against shortages if the shortage and overage occur on different business days. Generally, an overage of funds shall be collected into the Budget Clearing Account **F3875 pending a determination of where the overage properly belongs. Subsequently, if no proper location for the overage is determined, the overage shall be transferred from **F3875 to the Treasury Department's receipt account, Forfeiture of Unclaimed Money and Property, **R1060. Track overages by recording on a separate DD Form 2667 maintained specifically for overages. Note: Unlike the cumulative DD Form 2667 maintained per paragraph 060202, above, to support specific lines on the DD Form 2657 and SF 1219, the DD Form 2667 for overages is a stand-alone document for tracking overages. Start a new DD Form 2667 for overages at the beginning of each quarter. When proper disposition of the overage is determined, be certain to record the disposition on the DD Form 2667. Forward a copy of the DD Form 2667 under a covering transmittal letter (similar to that shown in figure 6-5) to the servicing DFAS Center not later than the 5th workday following the end of each calendar quarter and upon the DO's relief from disbursing duty, not later than the 5th workday following the date of relief. If the report is being submitted because of relief from disbursing duty, the transmittal letter must contain the statement: "Submitted due to relief of the DO effective (enter date relieved)."

060602. Preparation of DD Form 2667 as a Record of Overages Losses. List each overage occurring during each day on the DD Form 2667. See figure 6-6 for an example of DD Form 2667 prepared as a record of overages. Complete the form as follows:

- A. Item 1: DSSN. Enter the DSSN.
- B. Item 2: Purpose of Record. Enter "Overage of Funds."
- C. Item 3: Name of Disbursing Officer. Enter the DO's name and rank.
- D. Item 4: Address. Enter the DO's organization and address.
- E. Item 5: Date. For each overage of funds, enter the date the overage was collected into a deposit fund account or miscellaneous receipt account, as appropriate.

★ F. Item 6: Reference or Explanation. For each overage, enter a brief description of the overage together with identification of the person responsible for the overage (if known). When disposition is determined, give a brief description.

G. Item 7: Increase. For each overage, enter the amount of the overage.

H. Item 8: Decrease. This item is not used on the DD Form 2667 maintained for overages.

I. Item 9: Balance. Enter the cumulative total of the overages shown in the record.

060603. Reporting Overages of Funds. The report and investigation requirements of paragraph 060103, above, are not required for overages of funds when there is no indication of fraud or other criminal act.

0607 INVESTIGATION OF IRREGULARITIES

★ 060701. Appointment of Investigating Officer. The appointment of an investigating officer shall be made by the appropriate commander (or in the case of DFAS Centers and OPLOCs, the Center or OPLOC Director) citing this paragraph as authority. In those instances where the commander is not authorized to convene an investigation, the commander shall request an investigation through the chain of command. A thorough investigation shall be made by the investigating officer pursuant to this section. The investigating officer shall not be in the chain of command of the DO, certifying officer or accountable officials involved in the irregularity. Only those individuals who are familiar with investigative techniques and who have a knowledge of the required internal controls, pertinent laws, and directives will normally be appointed as investigating officers. If the appointed officer does not fully meet these requirements, technical guidance should be requested from the activity comptroller or staff judge advocate.

060702. Investigating Officer's Procedures

A. Information to be Developed

1. The investigating officer shall be instructed to develop all factual information in connection with the irregularity so that proper action may be taken by higher authority. This should include information regarding the procedures followed by all individuals involved in the irregularity, as well as safeguards and controls instituted for the entire period in which the irregularity occurred. Investigations of irregularities that involved travelers checks shall include serial numbers and photocopies (front and back) of the travelers checks. Appendix C of this Volume is provided as a guide for investigating officers.

2. If possible, the investigating officer personally shall interview and obtain sworn statements from all persons who may have knowledge of the facts. Verbal

testimony need not be reported verbatim but may be summarized by the investigating officer, sworn to and signed by the individual concerned. When sworn statements cannot be obtained, the investigating officer shall submit a statement giving the substance of the expected testimony and the reason for not obtaining a sworn statement. The investigating officer shall make an effort to resolve or clarify all apparent discrepancies or contradictions disclosed by the statements secured. The investigating officer shall also procure such documents, photographs, and affidavits from persons having knowledge of the facts as will fully show the circumstances surrounding the irregularity in question. Particular use should be made of previous investigations already conducted in the area by the DoD Component's investigative service (e.g., Criminal Investigation Division (CID) or Naval Investigative Service (NIS)), Inspector General (IG), and Federal Bureau of Investigation (FBI) reports. The investigating officer may also use statements made by concerned parties in the previous investigations without the necessity of re-interviewing such persons.

★ 3. DOs, certifying officers and all accountable officials whose possible responsibility for the irregularity becomes an issue, shall be made parties in interest. Whenever it is recommended that an individual be held pecuniarily liable, the person shall be afforded an opportunity to examine all evidence and to present in writing his or her rebuttal regarding the irregularity.

B. Findings. The investigating officer shall make the following findings:

1. Physical Loss

a. That there (was) (was not) a loss to the United States in the amount of (include amount of loss).

b. The loss was not the result of an illegal, incorrect, or improper payment. A finding shall be made as to a deputy, agent, or cashier when either or all have responsibility for the funds involved in the loss.

★ c. The loss was not the result of fault or negligence on the part of the accountable individual (i.e., DO, deputy, agent, or cashier).

d. When the loss occurs in the internal account of a deputy, agent, or cashier, funds of the imprest fund cashier, custodian of change fund, or other individuals who are entrusted with funds, a finding shall be made that the loss in the amount of (include amount of loss) (was) (was not) (proximately caused by the negligence of) (the result of larceny committed by) (insert name of individual).

e. The investigating officer shall make any other findings that are considered necessary and appropriate. It is essential that all the above findings be supported by documentation. After each finding, reference shall be made by tab or page number to the supporting documentation.

f. That the accountable individual (i.e., DO, deputy, agent, or cashier) (was) (was not) carrying out official duties when the loss or deficiency occurred.

2. Illegal, Incorrect, or Improper Payment

a. That there (was) (was not) a loss to the United States in the amount of (include amount of loss).

b. That the loss was due to an illegal, incorrect, or improper payment.

c. That the payment (was) (was not) the result of bad faith or lack of reasonable care on the part of the DO or other accountable individual.

d. That the DO (has) (has not) diligently pursued collection action against the payee, beneficiary, or recipient of the illegal, incorrect, or improper payment.

e. The investigating officer shall make any other findings that are considered necessary and appropriate. It is essential that all of the above findings be supported by documentation. After each finding, reference shall be made by tab or page number to the supporting documentation.

★ f. That the accountable individual (i.e., DO, deputy, agent, cashier, certifying officer, or other accountable official) (was) (was not) carrying out official duties when the loss or deficiency occurred.

C. Recommendations. The investigating officer shall make recommendations for use by the reviewing authorities. These recommendations shall include the following, when appropriate:

★ 1. Whether the DO, deputy, agent, cashier, certifying officer, or other accountable official (should) (should not) be relieved of pecuniary liability for the loss in the amount involved.

2. Whether any other person or persons (should) (should not) be held pecuniarily liable for the loss, in whole or in part.

3. Necessary corrective action that should be taken to effect improvement in procedures or internal controls.

4. Any other recommendations considered necessary and appropriate in view of facts developed during the course of the investigation.

★ D. Adverse Findings. If the investigating officer recommends that the DO, certifying officer, or any other accountable official(s) be held pecuniarily liable for the loss, a copy of the report shall be provided to these individuals for the purpose of filing a written rebuttal if so desired. Refer to section 3307 of this volume for limitations on the pecuniary liability of an accountable official. This rebuttal may be in the form of a brief and/or additional witness statements. The rebuttal shall be in writing and attached as an exhibit to the report. Military counsel, if reasonably available, shall be furnished to those individuals desiring legal advice. A reasonable time not to exceed 30 days shall be allowed for the filing of the rebuttal.

E. Review and Disposition of Report

1. The reviewing authority shall be the commander (i.e., appointing authority). This may be delegated to the deputy commander, chief of staff, or comptroller. The reviewing authority may make such additional findings and recommendations as deemed pertinent to the investigation. In the event the reviewing authority recommends that relief from liability for the loss be denied and the individual has not been given the opportunity to make a rebuttal, the reviewing authority shall set forth the reasons for his or her action. Also the individuals adversely affected by his or her decision shall be afforded the right to rebuttal. The time period allowed for rebuttal shall not exceed 30 days. Upon return of the report to the reviewing authority, he or she shall reconsider his or her actions if a rebuttal has been submitted and then affirm or reverse his or her position.

2. The original and one copy of the report, including complete copies of all testimony and other exhibits, shall be forwarded through the reviewing authority's chain of command to the Director of the servicing DFAS Center, within 90 calendar days after the loss has been discovered. In the case of a loss at a DFAS Center, the report shall be forwarded to DFAS Headquarters, Deputy Director for Finance within 90 calendar days after the loss has been discovered. When there is evidence of fraudulent or wrongful conduct and the matter is under investigation by the military police, DoD Component investigative service, and/or FBI, the report should be held until the investigation is completed. Copies of the investigative reports should be added as exhibits before forwarding the report through the chain of command to the servicing DFAS Center (or DFAS Headquarters, Deputy Director for Finance). If it appears that the statute of limitations (three years) will expire prior to the completion of the DoD Component investigative service or FBI investigation, the report immediately shall be forwarded to the DFAS Center (or DFAS Headquarters, Deputy Director for Finance). In all cases, the 90 calendar day suspense shall be met or an extension requested from the Director of the servicing DFAS Center (or DFAS Headquarters, Deputy Director for Finance, if appropriate).

3. The reviewing authority shall furnish through the chain of command to the servicing DFAS Center (or DFAS Headquarters, Deputy Director for Finance, if appropriate), any information that becomes available after the report of investigation has been forwarded.

★ 4. The Director of the servicing DFAS Center (or DFAS Headquarters, Director for Finance, when appropriate) shall review the report. In all cases, the report shall be forwarded to the appropriate DFAS Office of General Counsel for review and recommendation. If the report lacks sufficient information (e.g., in the event the provisions for the findings and recommendations have not been complied with), it shall be returned for further investigation and fulfillment of the provisions listed above. If the servicing DFAS Center returns the report directly to the individuals for the purpose of review and for the filing of a written rebuttal, the period allowed for response shall not exceed 30 days. If the report is complete, the Director of the servicing DFAS Center (or DFAS Headquarters, Director for Finance for losses at a DFAS Center) shall make a final determination relevant to the question of relief or pecuniary liability of the DO and/or other individuals involved in the loss. If the Director of the servicing DFAS Center (or DFAS Headquarters, Director for Finance) determines that the DO and/or any other individual should be held pecuniarily liable for a loss, it shall also be determined if the right of rebuttal provisions above have been complied with. If not, the report shall either be returned to the reviewing authority or sent directly to the individuals concerned, setting forth the reasons for the adverse determination. If sent to the reviewing authority, the reviewing authority shall then afford the individuals adversely affected with the opportunity to file rebuttals. The time period allowed to file rebuttals shall not exceed 30 days. Upon receipt of the report by the reviewing authority with such additional information as may be submitted, he or she shall return it to the Director of the servicing DFAS Center (or DFAS Headquarters, Director for Finance) with his or her comments.

0608 STATUTE OF LIMITATIONS ON ILLEGAL, INCORRECT, OR IMPROPER PAYMENTS

★ 060801. General. The Comptroller General of the United States is required by 31 U.S.C. 3526 (reference (e)), to settle the accounts of disbursing officials within three years from the date of receipt of substantially complete accounts. As prescribed in Title 7 of the U. S. General Accounting Office Policy and Procedures Manual for Guidance of Federal Agencies (reference (n)), the beginning of the three-year statute period is generally considered to be the end of the period covered by the applicable SF 1219. Therefore, except in cases of unresolved Notices of Exception, settlement will occur, by operation of law, three years after the date that the SF 1219 is certified. However, in certain cases as shown in paragraph 060802 below, the three-year period begins after notice of the loss is received by the DoD Component from the Treasury Department. If the loss is due to embezzlement, fraud, or other criminal activity, the three-year period does not begin until the loss has been discovered and reported to the appropriate DoD Component officials. Liability of an accountable individual is extinguished if all required actions are not completed within the prescribed three-year time limit. This includes both raising a charge against the individual as well as granting or denying relief.

060802. Application. The following subparagraphs are examples of illegal, incorrect, or improper payments and when the three-year statute of limitations begins.

A. Overpayments, Payments to the Wrong Payee, and Payments in Violation of a Regulation. Date the SF 1219, which includes the applicable paid vouchers, is certified.

B. Double Payments (Original and Substitute or Original and Recertified Treasury Checks - Both Negotiated). Date on which notice is received from the Treasury Department (SF 5515 or Daily Advice of Status) that the original check has been negotiated. In cases where the Treasury Department has provided credit for an outstanding check and the check is later negotiated, the three-year statute starts on the date of receipt of the chargeback from the Treasury Department.

C. Alteration or Forgery of Treasury Checks. Date on which the SF 5515 or other notice of alteration or forgery is received from the Treasury Department.

D. Check Issue Overdraft. Date on which the FMS Form 5206 is received from the Treasury Department.

E. Payments Resulting from Embezzlement, Fraud, or Other Criminal Activity of the Payee. Date the loss is discovered and reported to the appropriate DoD Component officials.

★ 060803. Extending the Statute of Limitations. If it appears that the three-year statute of limitations will expire before an illegal, incorrect, or improper payment can be submitted for relief, a request to extend the statute of limitations shall be initiated by the DO at least six months prior to the expiration of the three-year time limit. This request shall be addressed to the servicing DFAS Center and routed through the chain of command. The request shall contain the following information:

A. The name and rank or rate of accountable individual(s) involved.

B. An explanation as to why the illegal, incorrect, or improper payment documentation cannot be processed within the three-year statute of limitations.

C. A description of how the illegal, incorrect, or improper payment occurred and, if appropriate, when it was shown in the DO's accounts.

D. A statement regarding the illegal, incorrect, or improper payment to include the voucher or check number, date paid or issued, name of individual(s) involved, amount paid on the voucher or check, and the amount of the improper payment.

0609 RELIEF OF LIABILITY FOR IRREGULARITIES

★ 060901. General. This section amplifies the general information provided in Chapter 1 of this volume. When an accountable individual incurs an irregularity as a result of a physical loss of funds or an illegal, incorrect, or improper payment, that individual may be

granted relief of liability for the irregularity under the provisions of 31 U.S.C. 3527 (reference (e)) or this volume, as applicable.

★ 060902. Physical Loss of Funds. In Comptroller General Decision B-151156 (reference (u)), the Comptroller General of the United States ruled that the term "disbursing official" applies to all personnel in the DoD, whether military or civilian, to whom public funds are entrusted for the purpose of making disbursements. This application includes not only the DO, but also deputy DOs, disbursing agents, cashiers, agent cashiers, collection agents, paying agents, imprest fund cashiers, and change fund custodians. As provided in 31 U.S.C. 3527 (reference (e)), the Comptroller General shall relieve an official of the armed forces of liability for a physical loss of funds, vouchers, or records, or shall authorize reimbursement, from an appropriation or fund available for that purpose, of the amount paid by or on behalf of such official as restitution when:

- A. the Secretary of Defense determines that the official was carrying out official duties when the loss occurred;
 - B. the loss was not the result of an illegal, incorrect, or improper payment;
- and
- C. the loss was not the result of fault or negligence by the official.

The finding of the Secretary of Defense is conclusive on the Comptroller General. In all cases of physical loss by disbursing officials, the Secretary of Defense is the relief authority, regardless of the amount of the loss. The Secretary of Defense has delegated authority to the Director, DFAS to act for the Secretary of Defense to make the required determinations and grant or deny relief on all requests for relief of liability for physical losses submitted under the provisions of this volume. The Director, DFAS has delegated this authority to the Directors of the DFAS Centers unless the disbursing official is physically located at the DFAS Center, in which case the DFAS Deputy Director for Finance shall grant or deny relief.

★ 060903. Illegal, Incorrect, or Improper Payments. As provided in 31 U.S.C. 3527 and 31 U.S.C. 3528 (reference (e)), the Comptroller General shall relieve DOs and certifying officers of the armed forces of liability for deficiencies upon a finding that the following statutory standards are met. The determination of the Secretary of Defense that relief should be granted is binding on the Comptroller General. The Secretary of Defense has delegated authority to the Director, DFAS to make the required determinations and grant or deny relief on all requests for relief of liability for illegal, incorrect, or improper payments submitted under the provisions of this volume. The Director, DFAS has delegated this authority to the Directors of the DFAS Centers unless the disbursing official is physically located at the DFAS Center, in which case the DFAS Director for Finance shall grant or deny relief.

- A. Statutory Standards for a Disbursing Official

1. The payment was not the result of bad faith or lack of reasonable care; and

2. Diligent collection efforts by the disbursing officials and the agency were made.

B. Statutory Standards for a Certifying Official

1. The certification was based on official records and the official did not know, and by reasonable diligence and inquiry could not have discovered, the correct information ; or

2. That the obligation was incurred in good faith;

3. That no law specifically prohibited the payment; and

4. That the U.S. Government received value for payment.

5. Diligent collection efforts were made to recover the payment.

C. Standards for Accountable Officials. Accountable officials appointed under the provisions of section 3305 of this Volume are responsible for providing accurate information, data or service to a certifying officer to support payment certifications. These officials shall be pecuniarily liable for erroneous payments that result from information, data or service negligently provided to a certifying officer. Refer to section 3307 of this volume for limitations on the pecuniary liability of an accountable official.

0610 REQUESTS FOR RELIEF

★ 061001. General. Except as provided elsewhere in this chapter for minor losses, requests for relief of liability normally will be made by the accountable individual and shall comply with the requirements prescribed in this section and section 3309 of this volume. When the accountable individual is an agent of the DO (i.e., the deputy DO, disbursing agent, cashier, imprest fund cashier, or authorized custodian), that individual shall submit the request for relief through the DO responsible for the account. In addition, the officer designated to settle the accounts of a former DO may be required to request relief of liability on behalf of a former DO. When the accountable individual is an accountable official as defined in chapter 33 of this volume, that individual shall submit the request for relief through the applicable certifying officer. Generally, the accountable individual should submit the request for relief within 30 days after all required investigative and/or, when appropriate, the DO's required collection efforts have been completed and the loss has been referred to the servicing DFAS Center for further collection action. A copy of the investigating officer's report shall be included as an attachment to the request for relief.

★ 061002. Format. Requests for relief of liability shall be in the form of a memorandum from the accountable individual. The memorandum requesting relief shall be addressed to the servicing DFAS Center through the applicable DO or certifying officer and the requestor's chain of command. The memorandum and all forwarding endorsements thereto shall provide the DFAS Center with a complete report of the circumstances resulting in the deficiency and a reference to the findings of any fact finding body, report of investigation, or other proceeding.

★ 061003. Specific Information Required. Specific information is necessary to provide a complete report of the circumstances resulting in the irregularity. When an irregularity occurs, there is a presumption of fault or negligence on the part of the DO and/or certifying officer. It is the responsibility of the individual(s) requesting relief to dispel any doubt that the irregularity was not due to any fault or negligence on their part. A presumption of negligence does not apply to accountable officials appointed under the provisions of chapter 33 of this volume. When not supplied in the findings of any court of inquiry, board of investigation, court-martial, or other proceedings (including endorsements thereto), the following information shall be supplied and considered in the request for relief and/or the forwarding endorsements, as appropriate. Failure to provide all the information required could contribute to an unfavorable consideration of a request for relief.

A. The specific duty assignment of the accountable individual when the irregularity occurred.

B. A statement showing when, how, and by whom the irregularity was discovered.

C. A description of the actions taken to verify the irregularity and establish how the irregularity occurred.

D. A statement of when the last cash count and balancing was effected prior to discovery of the irregularity.

E. The prevailing circumstances when the irregularity occurred, e.g., volume of money handled, volume of transactions, number of personnel handled, complexity of transactions, actual operating conditions, and whether a shortage of disbursing personnel existed.

F. A copy of the appropriate standard operating procedures in effect at the time the irregularity occurred. If no written procedures are available, a statement shall be provided setting forth the known and utilized procedures at the time the irregularity occurred.

G. A statement indicating whether pertinent regulations and instructions were followed or, if not followed, an explanation and justification for any omissions and deviations.

H. A statement of past involvement, if any, by the individual requesting relief in any prior irregularities.

I. A statement indicating whether theft or other criminal act may have been involved.

J. A description of the manner in which the irregularity is being carried in the DO's account and the identity of the DO.

★ 061004. Forwarding Endorsements. Each addressee in the requestor's chain of command (including the DO and certifying officer (see paragraph 061002, above)) shall provide a forwarding endorsement and shall include a specific opinion as to whether the irregularity occurred while the accountable individual was in the line of duty and without fault or negligence. A specific recommendation as to whether relief should be granted shall also be included as a part of the forwarding endorsement.

061005. Review of Request for Relief. Upon receipt, the servicing DFAS Center or DFAS Headquarters, Deputy Director for Finance as appropriate, shall review the request for relief as well as all endorsements and the report of investigation for completeness, validity, acceptance, etc. If the request (or endorsements) are not considered adequate, further information will be requested. Relief of liability shall not be granted or denied without review and coordination of the Office of General Counsel at the servicing DFAS Center or Headquarters, as applicable.

061006. Relief Granted. If relief is granted, the servicing DFAS Center will provide a memorandum of instruction for removal of the deficiency.

061007. Funding for Removal of Irregularities.

A. General. In all cases, the ideal method for resolving an irregularity is recovery from the beneficiary of the irregularity (i.e., recovery of missing cash from the finder or recoupment from the payee in cases of overpayment, double payments, etc.), or in cases where the accountable individual is denied relief of liability, collection from the accountable individual. Prior to establishment of DFAS, each DoD Component with disbursing authority maintained appropriated funds to resolve irregularities. Since establishment of DFAS, some disbursing offices have been capitalized by DFAS and some are under DoD Component authority. In addition, under capitalization, military members and civilian employees of the serviced DoD Components have been or will be appointed to some of the accountable positions at capitalized DFAS disbursing offices. The following subparagraphs establish the funding responsibilities when relief of liability is granted and where the ideal method of recovery is otherwise not possible.

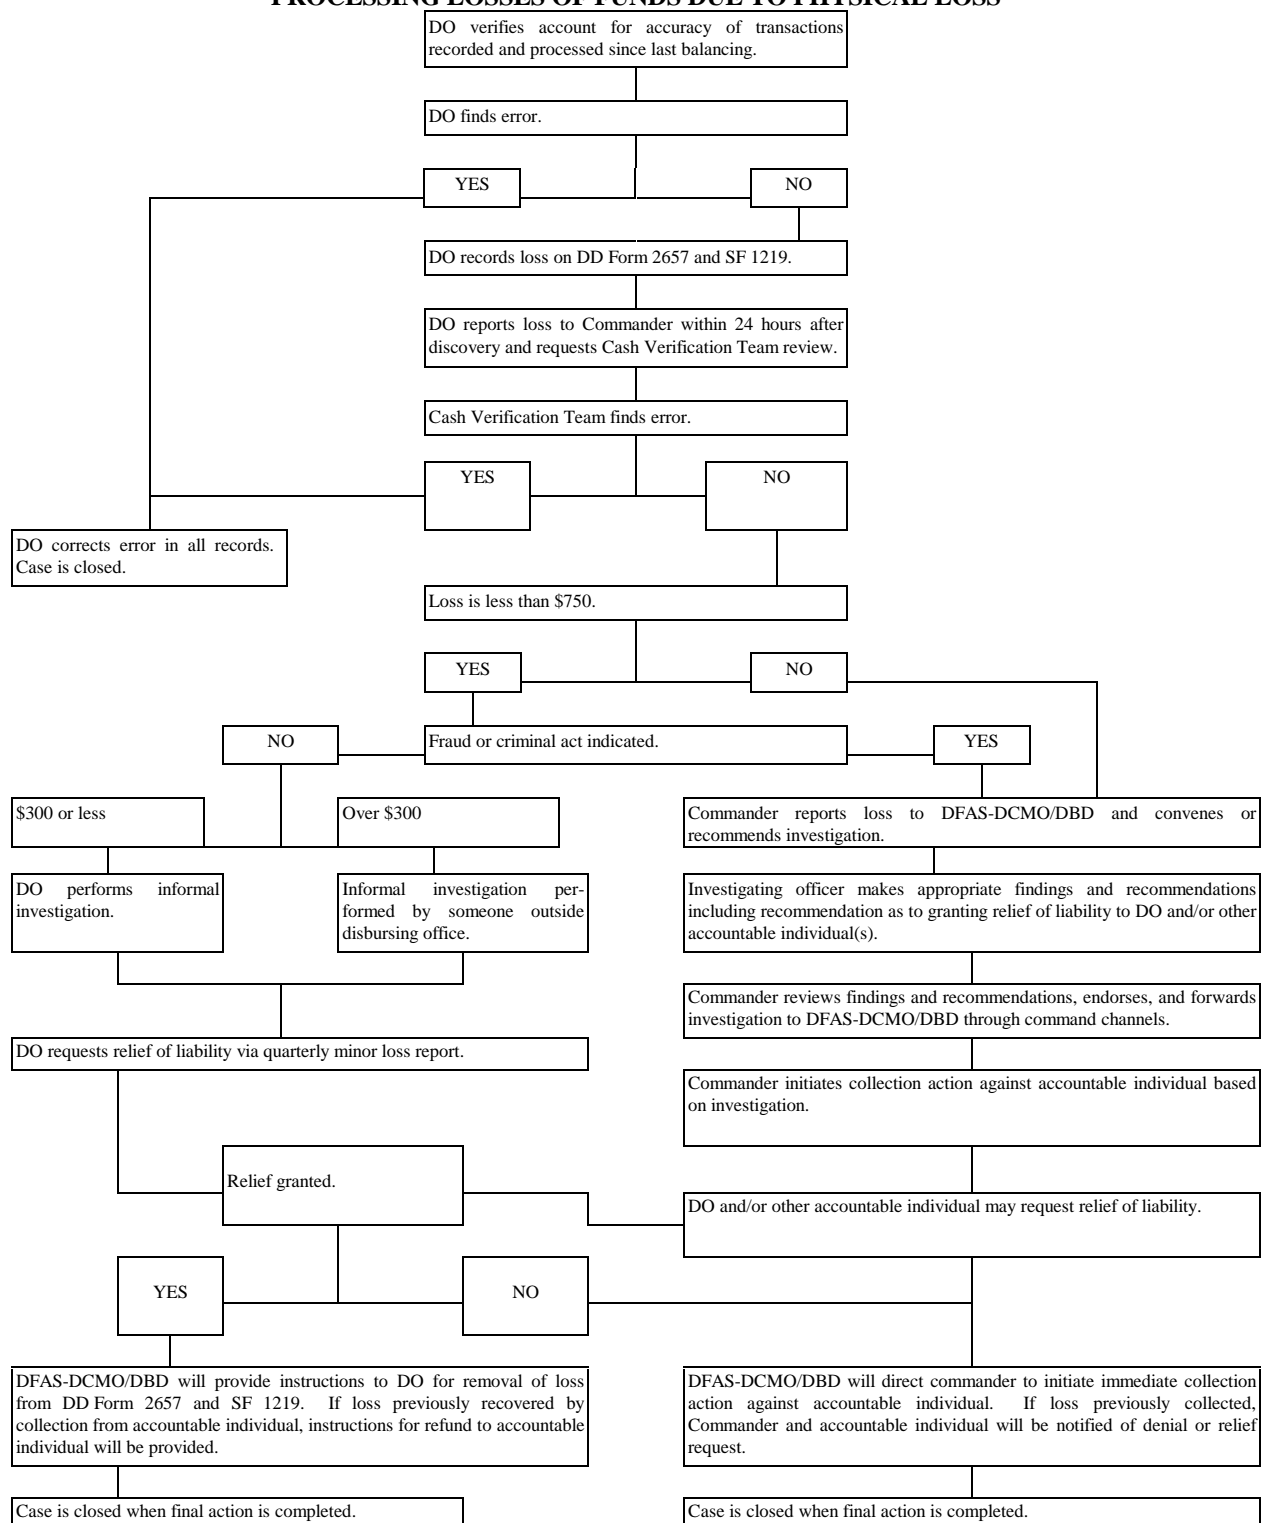

B. Physical Loss of Funds. Physical losses of funds are carried on line 7.3 of the DO's SF 1219. When the losses cannot be recovered (including those instances where relief

of liability has been denied and recoupment cannot be made from the accountable individual) or relief of liability is granted to the accountable individual, appropriated funds must be made available to remove the deficiency from the DO's SF 1219. If the accountable individual (the individual responsible for the loss of funds) was a DFAS employee or a military member assigned to DFAS when the loss occurred, DFAS is responsible for providing the appropriation and funding necessary to resolve the irregularity. If the accountable individual was a member or employee of another DoD Component when the loss occurred, that DoD Component is responsible for providing the appropriation and funding necessary to resolve the irregularity.

★ C. Illegal, Incorrect, or Improper Payments. As a general rule, losses due to illegal, incorrect, or improper payments are not carried on the DO's SF 1219 as a loss of funds since an appropriation was charged when the payment in question was made. However, there are exceptions to this general rule. For example, an exception occurs when the Treasury Department issues check issue overdrafts against a DSSN. If the illegal, incorrect, or improper payment is not or cannot be recovered from the recipient, the DO, certifying officer and/or accountable official(s) responsible for the irregularity must repay the irregularity or request relief of liability. If relief of liability is denied, the loss must be collected from the DO, certifying officer and/or accountable officials involved and the proceeds credited to the appropriation originally charged for the payment. If relief of liability is granted; the loss cannot be recovered from the recipient; and, in some cases, the liability of the accountable individual is extinguished by operation of the three-year statute of limitations; the amount of the illegal, incorrect or improper payment normally remains charged to the appropriation charged when the payment was made. However, if adjustment to the appropriation account to which the payment was charged is determined necessary as provided in Title 7 of the U.S. General Accounting Office Policy and Procedures Manual for Guidance of Federal Agencies (reference (n)), the amount of the illegal, incorrect or improper payment shall be charged as provided in subsection (d)(1) of 31 U.S.C. 3527 (reference (e)).

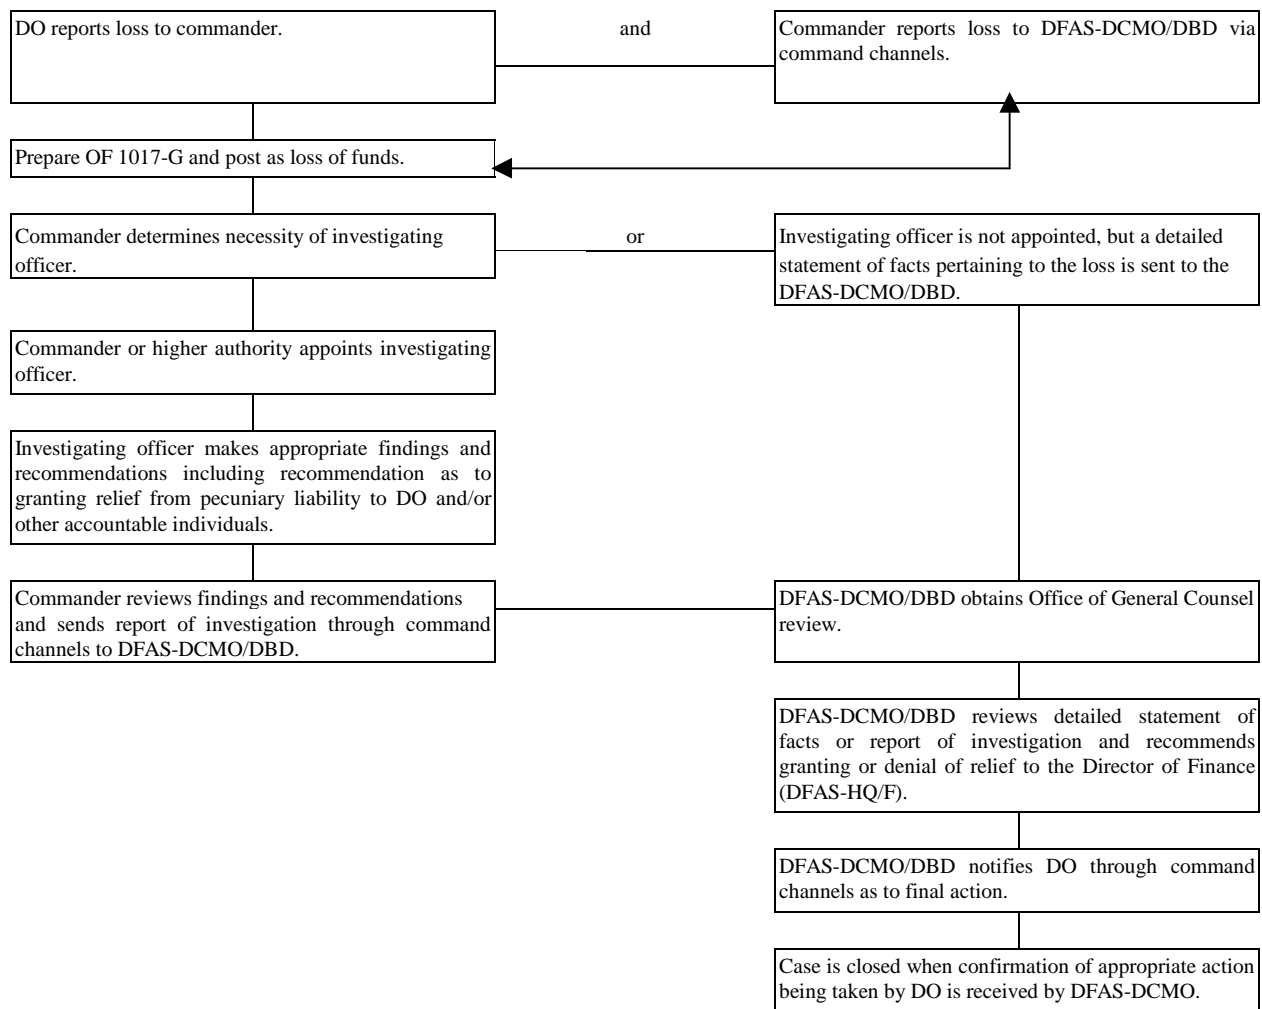

061008. Relief Denied. If relief is denied, the commander will be directed to take immediate collection action against the accountable individual. Procedures for effecting collection of irregularities are prescribed in Part II of this volume. Procedures for processing and accounting for collections of irregularities are prescribed in Chapter 19 of this volume.

SUBJECT Minor Loss of Funds Report, October 1 - December 31, 19XX
TTO DFAS-DE
Denver, CO 80279-5000

1. Attached is a DD Form 2667 detailing minor losses of funds for the quarter ended December 31, 19XX is submitted per DoD Financial Management Regulation, Volume 5, paragraph 060402.F. Investigation of the losses associated with this report disclosed evidence that there has been no fraud, intent to defraud, or other misconduct on the part of myself or other accountable individuals within this organization.

2. As evidenced by the attached investigatory reports, all losses associated with this report are considered to be within the accountable individual's line of duty.

3. Please direct questions, comments, or further discussion of the attached report to Mr. J. Johnson, Deputy, DSN 965-2138.

KEVIN BROWN, Capt, USAF
Disbursing Officer

Figure 7-1. Sample of 1017-G, Journal Voucher

CHAPTER 7

U.S. TREASURY CHECKS

0701 GENERAL

070101. Authorized Purposes. DOs shall issue Treasury checks only in accordance with applicable laws and regulations for the following purposes: military pay and allowances; civilian payrolls; public vouchers for purchases and services; travel claims; authorized advances to travelers and agents; deposits to the credit of the U.S. Treasury; and exchanges for cash. The drawing of any check to an individual payee for the purpose of making payments to non-governmental agencies (such as the American Red Cross) is prohibited.

070102. Negotiability. All U.S. Treasury checks are payable up to 1 year from the date of issue. This limited payability became effective October 1, 1989; checks issued prior to October 1, 1989, were void effective October 1, 1990. Checks presented for payment that are not negotiable due to the above criteria shall be verified for validity and replaced, if appropriate, as prescribed in Chapter 8 of this volume.

070103. Check Types

A. Regular-Issue Checks. Regular-issue checks are standard checks with preprinted check symbol/serial numbers and magnetic ink character recognition (MICR) encoding. Standard checks are the only instruments which DOs are authorized to draw on the account of the Treasury Department.

★ B. Test Grid Checks. Test grid checks provide the format of the check by grid lines for use in testing or aligning automated check writing equipment. They are white with a non-reproducible blue test grid (eight vertical lines per inch and ten horizontal character positions per inch). Test grid checks are printed for Government-wide use. Date and dollar boxes are to be ignored since these boxes are not preprinted on checks. Test grid checks are not for issuance.

★ C. Unnumbered Checks. Unnumbered checks are regular-issue checks without preprinted check symbol/serial numbers and magnetic ink character recognition (MICR) encoding. These checks are for use only by DFAS Centers. Unnumbered checks are controlled by a preprinted Inventory Control Number (ICN). Special check-writing equipment is required to issue unnumbered checks.

★ D. Specimen Checks. Specimen checks are identical to unnumbered checks except that each specimen check is overprinted with the words "SPECIMEN CHECK - NON-NEGOTIABLE" in the signature space. Specimen checks should be safeguarded the same as blank checks although they have "SPECIMEN - NON-NEGOTIABLE" preprinted across them. A

blank check marked "Void - Not Negotiable, No Check Issued Under this Number" should be used if available; otherwise, a piece of paper or card of check size (3 1/4" X 7 3/8") may be used.

★ E. Check Serial Numbers. When all serial numbers of a symbol have been used, FMS will assign a new checking account symbol for the next supply of checks, if necessary. Accordingly, as serial numbers of checks issued approach 99,999,999, the disbursing officer should notify FMS's Check Reconciliation Branch, through the servicing DFAS Center, so a new checking account symbol can be assigned before the next supply of blank checks is ordered. When ordering the new check supply, the disbursing officer should allow additional time for the proof to be changed (in addition to the time normally required to print and deliver the checks).

★ F. Check Numbers. The initial order for serially numbered checks must specify that the numbers begin with 00,00,001. Depending on the quantity of checks ordered, the serial numbers must end in 00,000,999, as appropriate. Subsequent orders must specify serial numbers that follow exactly in sequence as those on preceding orders.

070104. Check Features

A. General. Disbursing activities are authorized to issue only multicolored, standard size checks against the account of the Treasury Department. A standard size check measures 7 3/8 inches in length and 3 1/4 inches in width.

★ B. Pre-encoded Magnetic Ink Characters. Certain information is encoded in magnetic ink along the lower edge of regular-issue checks. The MICR area extends across the width of the check from positions 14 to 54 and from the bottom edge of the check up 5/8". The MICR line will consist of a nine-digit check serial number in positions 23 through 31, a nine-digit transit number in positions 34 through 42, a five-digit check symbol number in positions 49 through 53, and the appropriate MICR symbols denoting preprinted symbol and serial numbers.

070105. Check Dating and Handling

A. Drawing the Check. All checks drawn on the Treasury Department shall be inscribed to the payee by name, or to a financial institution for credit to the account of the named payee, except when the check is drawn as an exchange-for-cash. The rules governing exchange-for-cash checks are in section 0705 of this chapter. Under no circumstances will a check be made payable to "cash."

B. Dating and Mailing of Checks. DOs shall not issue checks in payment of salaries prior to the completion of the service for which the payment is being made or prior to the scheduled payday, unless authorized (e.g., advance pay). However, a DoD Component is authorized to have a policy of mailing checks to payees prior to a military or civilian payday to ensure that the payment is available when due. If it is necessary to mail the check prior to payday, the check shall not be dated prior to the date of the scheduled payday. In the event that

this method of pay delivery is used, the agencies being serviced shall have internal controls that alert the DO when a payee becomes ineligible for scheduled pay (unauthorized absence, separation, etc.) and ensure that pay intercept procedures can be initiated.

C. Legal Representatives

1. Legal Representative of Estate of Decedent. A check may be drawn payable to the order of a legal representative of the estate of a deceased person. The payee on the check shall be named as follows: "John K. Smith, Executor (Administrator, etc.) of the estate of James R. Jones." Under no circumstance shall checks be made payable to "the estate of" a decedent or to a deceased person.

2. Committee or Guardian. A check may be drawn and made payable to the order of a legally appointed committee, guardian, or other legal representative of a mentally incompetent payee when specifically authorized as prescribed in Volumes 7 and 8 of this Regulation.

3. Power of Attorney. The payee of a check may authorize another person to pick up the check by execution of a specific power of attorney that clearly states the holder is entitled to pick up U.S. Treasury checks on the payee's behalf. The person picking up the check shall sign his or her own name on the voucher next to the words "Attorney-in-Fact," followed by the name of the person granting the power of attorney. A copy of the power of attorney shall be retained by the DO. The DO shall verify the identity of the holder. Payments made to the holder of a power of attorney that require "secret or confidential identity" shall be processed using a cover voucher inserted instead of the original. The original voucher with a copy of the power of attorney shall be transmitted to the responsible security office with instructions delineating how long the records shall be maintained.

070106. Signing Blank Checks. The signing of blank checks is prohibited.

070107. Security and Storage. Blank Treasury checks shall be stored in a secure container following the specifications in Chapter 3 of this volume. The checks shall be kept under lock and key or in the safe of the DO or deputy. The DO shall ensure that the conditions of storage prevent any deterioration of the surface tint and design of the check, which is sensitive to moisture, light, and heat. The DO shall accept checks which bear printing of a satisfactory color and strength and, if subsequent deterioration occurs, a replacement supply shall be obtained. Check stock may be stored in safes or vaults to which both the DO and the primary deputy have access. However, only one individual should be given primary responsibility for maintaining the check stock and related control records. Access by others should be limited to those occasions when the principal custodian is absent. Check stock shall be maintained under the control of the DO. In cases of joint custody, the DO shall ensure that no break in accountability occurs. The DO or deputy shall be accountable for the check stock at all times. This provision is intended only to provide for access to the check stock during periods of brief or unexpected absence of the

single individual (either the DO or a deputy) who exercises normal day-to-day responsibility for the check stock.

070108. Blank Check Control Log. Each DO shall maintain a blank check control log for each series of checks used. This log shall be used to maintain a perpetual inventory of checks on hand as well as controlling the release of checks to the check and bond issuing section. At a minimum, the blank check control log shall contain the: date; beginning check number; ending check number; balance of checks on hand; initials of the persons advancing or receiving checks; and initials of persons returning or receiving checks. The DO or designee shall examine the blank check control log daily to ensure that all checks drawn and checks returned unused are accounted for and that no checks have been removed without authority.

★ 070109. Blank Check Issue and Audit. Blank checks shall be issued from the check stock in blocks of appropriate size by serial numbers. The DO shall use a blank check control log as prescribed in paragraph 070108, above, to release blank checks to check-writers and to monitor return of blank, voided, or spoiled checks to the vault. The control log also shall be used to control issuance and return of checks between the DO and sites external to the disbursing office where the checks are prepared. In this case, a receipt shall be obtained for the checks issued, and the person or persons in charge of the working stock shall keep a record of checks issued daily to each clerk for preparation and shall examine daily the record of checks drawn and checks returned unused by the clerks to determine that all checks are accounted for and that no checks have been removed without authority. At least once every 60 days, the DO or designee shall take inventory of the check stock. Any open container shall be inventoried by individual count of the checks contained therein. All damaged cartons, or those bearing evidence of having been tampered with shall be opened and the checks contained therein shall be counted individually. A record of the inventory and total checks on hand shall be retained in the disbursing office and made available to the cash verification team to be attached to the quarterly cash verification report.

070110. Lost or Stolen Blank Checks. When blank checks are lost or stolen, the DO immediately shall notify the commander, the nearest office of the U.S. Secret Service (by message or telephone), as well as the Treasury Department. The notice shall be confirmed by memorandum to the Department of the Treasury, Financial Management Service, Check Reconciliation Branch, PGC-2, Room 500E, 3700 East-West Highway, Hyattsville, MD 20782, telephone (202) 874-8170, with copies to: the U.S. Secret Service; the appropriate DoD Component investigative service; the servicing DFAS Center; and local banks (if appropriate). The notice may be transmitted by electronic means (FAX) to telephone (202) 874-8436 or the most rapid means of communication available and shall include the following: the DSSN; the serial numbers of the checks involved; a statement giving complete information concerning the circumstances of the loss or theft; and the date the loss was referred to the Secret Service for investigation. Note: If the loss involves a range of consecutive serially numbered checks, only the beginning and ending serial numbers of the range is required. Only after the report advising of the loss is sent will the check serial numbers be reported to the Treasury Department as check issues. Checks that are discovered to be missing, lost, or stolen prior to issuance (including any

items missing from blank check shipments received from the contractor), should be treated as voids in accordance with I TFM 4-6045.30 and reported on magnetic tape or hard copy to FMS's Check Claims Branch.

070111. Reporting Check Issues. All check issues, including lost or stolen checks, are required to be reported to the Treasury Department. Detailed check issue reporting procedures are contained in chapter 9 of this Volume. For each lost or stolen blank check, the check-issue detail data shall show the amount as "0" (zero) dollars. If any of the checks are later negotiated, the Treasury Department will issue an FMS Form 5206 (Advice of Check Issue Discrepancy) to the DO. Where the lost checks have been reported by the DO (by both message/phone and memorandum) as required, the FMS Form 5206 is not recorded on the SF 1179 (Month End Check Issue Summary) or the SF 1219. To clear the item, the erroneous FMS Form 5206 shall be returned to the Treasury Department with a copy of the memorandum reporting the lost or stolen checks. Every FMS Form 5206 shall receive an immediate response, either by return to the Treasury Department with an explanation or by entry on the SF 1179 and SF 1219 as prescribed in section 0706 of this chapter.

070112. Evidence of Payment. The issuance and mailing of a check to a creditor of the U.S. does not, of itself, constitute payment of a debt. A debt is not discharged until a creditor has received the amount of the debt in money or its equivalent in law. An acknowledgement of receipt of the check is also not evidence of payment. The endorsement of the payee is evidence provided that the check was negotiated. The endorsed check is the receipt to the government.

0702 PROCUREMENT OF TREASURY CHECKS

★ 070201. General. All orders for U.S. Treasury checks shall be made using Government Printing Office (GPO) Form 2431 (Print Order-Department of the Treasury Checks and Proofs) (nine-part carbon) (R 9-90). No other purchasing documents are required or authorized. Disbursing offices should order a supply of checks to last a year, unless there is a good reason to request a supply for a longer or shorter period. Any such reason should be explained on GPO Form 2431 under "Remarks." The minimum amount of any assembly should be 1,000 checks. Larger quantities should be in even multiples of the quantities shown on GPO Form 2431. The order and shipping time for the checks is 90 days. DOs should maintain a 6-month safety supply level of checks on hand. Therefore, reorder levels should be set for when the check stock falls to the 9-month supply-on-hand level. All check orders shall be prepared and forwarded to the DO's servicing DFAS Center following the detailed guidance provided by that Center. A newly established DSSN should submit the check order at least 4 months prior to the planned commencement of disbursing operations. Cancellation of check orders shall be requested by telephone or message through the servicing DFAS Center. The GPO will charge a fee of \$10 for each order canceled. In addition to the GPO cancellation fee, a separate fee will be charged by the contractor if an order is canceled after check production operations have begun.

Indianapolis, IN 46249-2201

Defense Finance and Accounting Service
Kansas City Center
DFAS-KC/AE
Kansas City, MO 64197-0001

Also, when a print order has been canceled, the disbursing office or its administrative office must notify the Check Reconciliation Branch at the following address:

Check Reconciliation Branch
Financial Management Service
Department of the Treasury
3700 East West Highway
Room 711A
Hyattsville, MD 20782
(Telephone: (202) 874-8150)

A. Designation of Officials Authorized to Sign Check Requisitions. Before any check purchase orders are submitted, the ordering agency must have designated one primary and one alternate official as having authority to sign check purchase orders. Designations for this purpose are accomplished by completion and submission of a FMS Form 5-89 (Signature File - U.S. Treasury Check Orders) to the Financial Management Service, Check Reconciliation Branch. These forms may be obtained by contacting the Check Reconciliation Branch. The FMS Form 5-89 is used to verify the signature on check purchase orders to ensure that only authorized officials requisition checks.

B. Blank Check Assemblies

1. Assembly A, Single check style.
2. Assembly B, Single check and two prenumbered tissue copies assembled in snap-out style interleaved with one-time carbons and 1/2" binding stub on the right end of the check.
3. Assembly C, Single check with one prenumbered tissue copy assembled in snap-out style interleaved with a one-time carbon and a 1/2" binding stub on the right end of the check.
4. Assembly D, Continuous form single checks, 8 1/2" wide (including a 9/16" perforated margin on each side for pinfeed or overplaten feed devices).
5. Assembly E, Continuous form checks with right stub (4000 checks and 4000 stubs per carton), 15 7/8" wide (including a check-sized stub on the right side and a 9/16" perforated margin on each side for pinfeed or overplaten feed devices). The stub may be preprinted with the check serial number and other information desired by disbursing offices.
6. Assembly ER, Continuous form checks with right stub (40,000 checks and 40,000 stubs on a roll), 15 7/8" wide (including a 9/16" margin on each side for pinfeed or overplated feed devices). Checks do not have any preprinted symbol or serial numbers. A consecutive Inventory Control Number (ICN) is printed at the top of the check.
7. Assembly F, Continuous form of two checks in tandem in fanfold (8000 checks per carton), 15 7/8" wide (including a 9/16" perforated margin on each side for pinfeed or overplaten feed devices). Checks with preprinted symbol and serial numbers are numbered with even numbers on the left and odd on the right.
8. Assembly G, Continuous form checks with a check-sized stub on top, 8 1/2" wide (including a 9/16" perforated margin on each side for pinfeed or overplated feed devices). The stub may be preprinted with the check serial number and other information desired by disbursing offices.
9. Assembly H, Continuous form of two checks in tandem (80,000 checks on a roll), 15 7/8" wide (including a 9/16" margin on each side for pinfeed or overplated feed devices). Checks do not have any preprinted symbol or serial numbers. A consecutive Inventory control Number (ICN) is printed at the top of the check. Checks ordered without prenumbered symbols and serial numbers have a consecutive inventory control number printed at the top.

10. Assembly I, Continuous form checks with stub, 15 7/8" wide (including a check sized stub on the left side and a 9/16" perforated margin on each side for pinfeed or overlapped feed devices). The stub may be preprinted with the check serial number and other information desired by disbursing offices.

★ 070202. Emergency Checks

A. Ordering Emergency Checks. An order for emergency checks shall be made to the servicing DFAS Center. The DO's request shall be in writing (by message or memorandum) and include complete justification for the order. The request shall specify the DSSN under which the checks will be issued and the name of the DO. Orders should specify quantities in multiples of 1000 checks and the quantity should be sufficient to last until regular-issue checks are received. When applicable, identify the unfilled check order number and date of that order in the request. Orders for emergency checks shall be kept to an absolute minimum and shall be placed only as a last resort. Emergency checks shall be completely used before any new stock of regular issue checks are issued. Cancellation of emergency check orders shall be requested by telephone or message to the servicing DFAS Center. No fees are charged for canceling emergency check orders.

B. Emergency Check Stock. DFAS Centers with high volume printing equipment using check stock without preprinted check symbol/serial numbers and MICR encoding must have check printing equipment that can print the check symbol/serial numbers and related MICR encoding on the blank check stock. Under emergency situations only, these offices may use their print systems to produce prenumbered and MICR encoded check stock for use by other offices within that agency. An example of an emergency situation is when office "A" has a fire and its entire supply of symbol 1234 check stock is destroyed. The servicing DFAS Center can create a limited supply of emergency symbol 1234 checks for office "A" to last until regular stock is available through normal channels. The emergency check stock created bears symbol 1234 and check serial numbers in the 90-99 million range, in accordance with arrangements with the Department of the Treasury, Financial Management Service, Check Reconciliation Branch, 3700 East West Highway, Room 711A, Hyattsville, MD 20782 (Telephone 202-874-8150). Another example where emergency check stock systems may be used is during unexpected military deployment. Emergency checks will bear the appropriate Check Symbol and Serial Numbers in the 90-99 million range, in accordance with agreements with the Check Reconciliation Branch. The servicing DFAS Center must submit to the Check Reconciliation Branch manual signatures of designated officials authorized to disburse emergency check stock to disbursing activities. The emergency check stock system is not to be used to avoid ordering checks through normal channels. Any emergency check stock must be created under the following conditions: (1) produced on a print system that has a post/print verification feature to ensure the integrity of the printed and MICR encoded check symbol and serial numbers and (2) that internal control procedures are in place to prevent issuing duplicate payments bearing the same check symbol/serial numbers. Note: the Check Reconciliation Branch must be notified of the check symbol and serial number ranges involved prior to the creation and use of emergency checks.

070203. Receipt of U.S. Treasury Checks

★ A. Receipt. Upon receipt of a check shipment, the DO or designee shall verify that all checks have been received and, based on a representative sample, make an examination of the accuracy of the printing and check symbol/serial numbers in the upper right corner of the checks and in the MICR field. Any box which bears evidence of tampering shall be opened and the checks individually counted. An acknowledgment of receipt of the checks to the vendor is not required. However, an "Advice of Shipment" form is mailed by the vendor to the ordering activity after check orders are shipped if shipment is by means other than registered first class. The upper portion of the form describes the checks being shipped. The lower portion of the form is an inspection/receipt report. This form is to be signed and forwarded to the servicing DFAS Center after receipt and verification of the order.

B. Warranty. The vendor provides a 120-day warranty on the checks it produces. The warranty period begins the day the checks are delivered to the user. Therefore, it is the responsibility of the office that receives the checks to determine any obvious defects or missing stock before the warranty period expires. Otherwise, the vendor may not be liable for making replacements.

C. Defective Check Shipments. Note the following:

1. If checks are missing from the shipment or if check stock is defective in some other way and replacement of stock is warranted, contact the servicing DFAS Center.

2. If checks are damaged when received, in addition to the notification above, the DO should contact the trucking company or, if checks were sent by registered mail, the U.S. Postal Service to initiate a claim for damages, if appropriate.

3. If a check shipment is received that contains more than one check with the same check serial number, in addition to the notification to the servicing DFAS Center, the DO shall destroy each check which bears a duplicate serial number. The check serial numbers of the duplicate checks shall not be reported as zero dollar amounts in the check issue report since the remaining checks bearing these serial numbers may be issued in the normal manner. The checks bearing the duplicate numbers shall be marked "VOID - NOT NEGOTIABLE" and destroyed locally within 30 days.

4. If checks are discovered missing in the receipt verification process, or at any time thereafter, the DO shall notify both the servicing DFAS Center and the nearest DoD Component investigative service for referral and liaison with the U.S. Secret Service.

5. If checks are received that are intended for another disbursing office, the DO shall immediately contact the servicing DFAS Center.

070204. Transfers Between DOs. Checks transferred between DOs as a part of the relief from disbursing duty process shall be counted individually when they are not in the original packages.

0703 ISSUANCE OF TREASURY CHECKS

070301. Check Preparation. Checks shall be used and issued in strict numerical sequence within each series. The information essential to a check includes place of issue, date, serial number of check, payee, amount, signature of drawer, and other identifying information such as the symbol number and designation of title. The legends "SALARIES AND EXPENSES" and "DRAWN FOR ABOVE OBJECT" will not be preprinted on the face of the check. Check explanations (e.g., exchange for cash or salary) and other special information unique to each disbursing activity may entered at the bottom of the check to the left of the signature area. Extraneous data shall be kept to a minimum. Spaces allotted on the printed check form for specific information shall be used only for the purposes intended. No spaces will be left unfilled in a manner that would allow or facilitate alterations and additions that could lead to forgery or fraud. The completed check will have an orderly appearance and all parts will have good legibility for accurate reading in rapid handling. Overprinting, intersection and crowding shall be avoided. No check may be issued for more than \$99,999,999.99. In instances when the total payment exceeds that amount, two or more checks shall be issued which total to the payment required. Deviation in the check writing procedures outlined herein is not permitted unless authority first is obtained from the servicing DFAS Center.

★ 070302. Reporting Large Disbursements by Check. Since the Treasury Financial Management Service (FMS) is solely responsible for the management of the government's daily cash position, disbursement transactions by check affecting the cash position shall be made known to the FMS in advance of the time of actual disbursement. DOs disbursing \$50 million or more in a single transaction, or in multiple transactions of a common nature, shall report to FMS the following information at least two business days prior to the payment date. For example, if the DO issues 350 various vendor payments totaling \$50 million or more on the same day or issues a payroll totaling \$50 million or more on one day, a report to the Treasury Department is required. If a disbursement of over \$500 million is anticipated, a minimum of five business days advance notice is required. When specific disbursement information has not been finalized, inform FMS daily (by 9:30 a.m. eastern time) of approximate amount(s) and approximate payment date(s). Information on large disbursements should be reported by facsimile transmission (FAX) to FMS at commercial (202) 874-9945 or (202) 874-9984 using FMS Form 187 (Advance Notice of Large Deposits or Payments of \$50 Million or More). If the report is provided to FMS on other than FMS Form 187, at a minimum, the report shall contain:

- A. Name and address of the DoD Component (e.g., Air Force);
- B. Name and telephone number of disbursing officer;

- C. Disbursing station symbol number (DSSN);
- D. Appropriation or fund account charged (minimum of six digits, with the first two identifying the department);
- E. Description of transaction;
- F. Transaction settlement date;
- G. Amount of the disbursement;
- H. Payment mechanism (wire transfer or check);
- I. Check number for check payments;
- J. Payee name and address.

A copy of the report shall be retained with the DO's monthly retained financial records.

070303. Check Print Requirements

A. General. All data printed or typewritten on the checks should be imprinted in such a manner that the print is permanent and not affected by erasure, smudging, moisture, handling, the passage of time, or by other methods that might intentionally or unintentionally be employed to remove or alter the printing without affecting the check itself. Impact printers may be used. Laser type printers which lay an image on the surface of the paper shall not be used. Correctable ribbons used in manual preparation of checks lack the permanence necessary to protect against undetectable alteration, therefore such ribbons shall not be used under any circumstances. The correct position of the date, amount, payee name, and the signature of the DO is determined by the physical characteristics and layout of the blank check. Deviations from the normal positioning of this information should be avoided. In order to standardize printing and facilitate accuracy verification, words on checks should be inscribed all in upper-case (i.e., capital) letters and punctuation should be omitted, except commas used in addresses and to set off names of more than two payees.

B. Pay to the Order of. The payee's name shall be inscribed on checks in such a manner as to assure positive identification. To ensure correct endorsement and for other reasons that have established the custom, the surname of the payee should appear last; the correct order is first name, middle name or initial, and last name. Where the payee has an often used surname (such as "R T Jones" or "J G Smith") the use of initials only instead of the full given name is inadequate to provide a positive identification of the rightful payee. An initial in lieu of a first name will be used only as follows: in cases where the payee's legal given names consist of initials only in which case the words "Initials Only" should be shown after the initials; the length of the surname would leave insufficient space for the full first name; or where the check writing

system makes the use of a first name impractical, in which case other positive identifying data such as the payee's social security number (SSN) or address shall be shown on the check. While not a violation of the Privacy Act, when a payee's SSN is entered on the check, the SSN should be inscribed in a location where it will not be visible in window envelopes should the check be mailed. When checks are to be mailed, care should be exercised to assure that the full and complete address of the payee is entered on the checks or envelopes, including as necessary; rural route numbers, box numbers, house numbers, zip codes, and any other information essential for correct delivery.

C. Date. The date is to be printed on the right side of the check below the DSSN and check number, or at the top of the check immediately to the right of and on a line with the place of issue with a base line 9/32" from the top of the check. Check signers equipped with date bands may be used as long as the location of the stamped date does not interfere with preprinted data or other data to be printed or typed on the check.

D. Numeric Dollar Amount. The numeric dollar amount is to be printed in the upper right quarter section of the check in the area above the signature of the DO and below the checking account symbol; it should be in horizontal alignment with the name of the payee or the amount in the body. The amount figures should be preceded by a dollar sign followed by asterisks to fill the allotted area completely (e.g. \$*****123.45). No space should be left unfilled which might otherwise be susceptible to use for fraudulent insertion. Zeroes shall not be used for fill-in characters preceding amounts. The money amount shall contain no commas. This helps to avoid easy alteration of the amount.

E. Written Dollar Amount. The printing of the amount in the body of a check in words provides the DO and the Treasury Department greater safety against the alteration of amounts. If it is determined by a disbursing activity that substantial savings in the cost of issuing checks would result or that space is limited, figures only, without any spacing within the amount, may be used in one of the following formats: \$50and75cents; \$50and75/100; or, \$*****123.45.

F. Other Special Information. Special information (e.g., distribution code, computer or typewritten check serial number, SSN, or explanations for check issuance) should be printed at the bottom of the check to the left of the signature area. When checks are drawn for public vouchers or payroll payments, the disbursing office voucher number or, the bureau voucher number if applicable, may be inserted on the check at the option of the DO. When checks are issued by an industrial-commercial activity or on a voucher to various payees and no copy of the invoice or voucher is available for forwarding to the payee, the invoice number or other data necessary for the payee to identify the purpose of the payment shall be shown in the special information area. Activities issuing individual direct deposit (DD) checks to financial institutions, that are not part of the FRB Automatic Clearing House System, shall inscribe the required DD information: routing transit number; CR, C or S, account number, and type of payment; recipient's name and SSN; and local activity information. Note: Local activity information should be inscribed on the check so it will be readable, not interfere with any of the other inscribed or preprinted information, and not appear in the window envelope.

G. Area for Drawer's Signature. Each check issued must bear one of the following: the manual signature of the DO; an approved facsimile signature of the DO; or the manual signature of a deputy DO who has been appointed as prescribed in Chapter 2 of this volume. Manually signed checks shall have a typed signature line and title of the DO or deputy, depending on who signs the check. For example, checks signed manually by a deputy DO shall be signed below the printed, typed or stamped title of the disbursing officer for whom he is acting as follows:

Disbursing Officer

By _____
(Signature of Deputy).

All signatures on checks (whether manual or by facsimile signature plate) shall be of a permanent dark blue, blue-black, or black ink. The ink should not be subject to fading and not readily soluble in water.

070304. Erasures and Alterations. The DO shall not release checks bearing erasures, alterations, overprinting, or imperfect figures or letters. Such checks shall be spoiled or voided and a new check issued.

070305. Record of Checks Issued. DOs shall maintain a record of every check issued by their DSSNs. The record shall contain at least the payee; amount; DSSN; check serial number; and date of the check. Other information as to the purpose for which the check was issued, document numbers, voucher numbers, and local identification codes or numbers are optional and subject to the discretion of the issuing DO. The record may be on paper or in a media designed for data processing use (e.g., diskette, or magnetic tape). Copies of check issue records shall be included in the retained disbursing records.

070306. Supporting Documents. Attach documents and payroll vouchers used to support the record of checks issued to the original vouchers submitted to the servicing DFAS Center. These supporting documents are not transmitted to the Treasury Department with the check issue reports. Diskettes formatted for check-issue reporting and submitted to an OPLOC for consolidation, or tapes sent directly to the Treasury Department, contain all necessary data for Treasury Department reporting purposes. Requirements for submission of the SF 1179 are contained in Chapter 9 of this volume.

0704 CHECK SIGNING MACHINES

070401. Machine Specifications. Machines to be used for signing checks shall be selected on the basis of their ability to perform in agreement with Treasury Department regulations and standards. The machines should have the following mechanical features:

A. A dating device capable of placing the date either immediately above or immediately to the right of the words UNITED STATES . It is preferable to have the signature and date imprinted in a single operation; if the check-writing equipment also imprints the date, the check-signing equipment does not need to have this capability.

B. A counting device that will assure full protection against unauthorized use of the DO's signature and provide an accurate record of the number of times the signature die has been used. Disbursing offices currently using check-signing machines that do not have counting devices are authorized to continue use of these machines.

C. A signature die assembly that is removable. The signature die assembly shall be kept in a locked safe or vault or under other equally effective safeguards when not in use.

D. A mechanism capable of processing paper checks. Those offices issuing checks with detachable stubs shall ensure that the feeding device is capable of handling this type of check.

070402. Signature Plates

A. Requisition

1. General. Immediately upon receipt of orders to disbursing duty, the prospective DO shall contact the disbursing activity to determine if check-signing equipment is available and obtain all necessary information such as type of equipment, model and serial number, number of plates required, etc. If the prospective DO already has plates compatible with the equipment, the servicing DFAS Center shall be contacted and requested to forward the plates to the new location. If plates are not available, the prospective DO shall forward three specimen official signatures to the new duty station for use in procuring a new signature plate. The signatures shall be in black ink on blank, unlined, 3 by 5-inch white cards and a statement designating the number to be shown on the plate as explained in subparagraph 070402.A.2, below. Upon receipt of the specimen signatures, the DO to be relieved immediately shall prepare and forward a request for procurement to the office regularly providing procurement service. The purchase order for signature plates shall be forwarded to the servicing DFAS Center for approval and forwarding to the contractor. The Center will ensure that plates are ordered in sequential numbering. The purchase order shall include the following information:

- a. The type, manufacturer's name, model, and serial number of the check-signing machine.
- b. Whether the signature plate is for a machine currently in use.

c. If the plate is to be used on a new and undelivered machine, reference to the procurement papers for the machine including the manufacturer, type, and model.

d. The plate number and the name of the DO.

2. Numbering of Signature Plates. Treasury Department regulations require that the signature plates of each DO be numbered in sequence in the lower left corner of the border beginning with the number 1. Each order for signature plates shall include the next sequential number for the ordering DO.

3. Multiple Plates. Normally, only one signature plate will be used by the DO and authorized deputies. An additional plate may be obtained only upon approval of the servicing DFAS Center. Requests for additional plates shall contain complete justification of the need for more than one plate. If the check-signing machine uses one set of two plates for the signing process, approval for multiple plates is required for more than one set of plates.

B. Format and Quality of Impression. The servicing DFAS Center will not accept facsimile signatures which do not meet the required standards. Facsimile signature plates shall be designed such that the frame or border, which encloses the facsimile signature, shall contain no identifying characteristics. The frame or border shall be a single wavy line. The impression of the signature plate shall be characterized by sharpness of lines, a continuous and homogeneous deposit of ink, absence of filling, and absence of pronounced ribbon pattern.

C. Approval of Plates. When the plates are received, the DO whose signature is reproduced on the plates shall run 14 specimen copies of each facsimile signature. The DO shall certify 2 of the copies as true facsimile signatures. All 14 copies shall be mailed to the servicing DFAS Center with a memorandum requesting approval of the facsimile for signing checks. The reply of approval from the DFAS Center shall be the authority to use the check-signing machine. In the case of Cummins check signing machines, the contractor (Cummins) runs 14 specimen copies of each plate. The plates are mailed to the applicable DFAS Center, where the specimen copies are compared to the original signatures on the purchase order, and approval is forwarded to the disbursing office. If the specimen copies do not match or the plate does not meet required standards, the DFAS Center notifies the contractor and requests correction.

Note: Checks shall not be signed by facsimile signatures prior to receipt of the DFAS Center's approval.

D. Custody of Signature Plates. DOs shall establish necessary procedures to ensure control and prevent unauthorized use of signature plates. Custody receipts shall be maintained for all signature plates held by authorized deputies. A record of each run of checks through the check-signer shall be maintained and shall be reconciled with the report of checks issued. When not in use, signature plates shall be kept in an approved safe or vault. If the

signature dies are not removable from the check-signing machine, the keys to the machine (or the check-signing machine) shall be kept in an approved safe or vault.

E. Use of Signature Plates. Check-signing by signature plate should be performed by the DO or designated deputies. When considered necessary for efficient operation of the disbursing office, the DO may authorize the holder of a specified position other than a deputy to perform the check-signing function. This authorization shall be made in writing. Individuals shall not be appointed as deputies solely to sign checks by signature plate.

F. Disposition of Plates. When a signature plate is expected to be used again at a new duty station, the plate shall be forwarded to the servicing DFAS Center for safekeeping. If the plate is to be withdrawn from service and is not to be used again, it shall be forwarded to the servicing DFAS Center for destruction. When the plate has been destroyed, a properly executed certificate identifying the specific plate and date of destruction shall be furnished the former DO.

0705 EXCHANGE-FOR-CASH CHECKS

070501. General. Accommodation exchange-for-cash checks are only permitted when satisfactory banking facilities do not exist, and typically only overseas. Personnel eligible to receive accommodation exchange-for-cash checks are listed in Chapter 4 of this volume. Exchange-for-cash checks may be prepared and issued by DoD DOs for official purposes to a deputy, agent, or cashier as an advance of funds; to the Postmaster of the United States for remitting collections for the sale of postal money orders; or to Western Union for remitting collections for personal messages of military personnel transmitted over DoD communications facilities to points inside CONUS. When exchange-for-cash checks are issued as advances, the deputy, agent, or cashier shall give the DO a signed DD Form 1081 as prescribed in Chapter 3 of this volume. Exchange-for-cash checks issued as advances of funds shall be endorsed to the order of the bank or other institution furnishing the cash or, when cashed by another DO, to such officer by title and activity rather than by name as "Pay to the order of the Disbursing Officer (name of ship, station, activity, or unit)." When exchange-for-cash checks are issued for remitting collections for the sale of postal money orders or personal messages, the checks shall be made payable to the Postmaster of the United States or Western Union, as appropriate.

070502. Preparation and Handling. When required by security regulations, the name of the remitter and identifying references to invoices will not be shown on exchange-for-cash checks. Exchange-for-cash checks to payees within the U.S. shall be drawn on the U.S. Treasury. Exchange-for-cash checks for payees outside the U.S. shall be drawn on a limited depository checking account if such an account is maintained by the DO. DOs may inscribe exchange-for-cash checks to themselves, a deputy, or an agent for purposes of obtaining operating or accommodation cash. When authorized in writing by the DO, deputy DOs may inscribe exchange-for-cash checks to themselves for purposes of obtaining operating or accommodation cash. Support the exchange-for-cash check by a memorandum OF 1017-G

(Journal Voucher). Number OF 1017-G with a separate series of voucher numbers peculiar to the functional area where the voucher is prepared.

070503. Funds of Deceased or Missing Persons. Funds found in the personal effects of persons who are dead or missing or whose whereabouts are unknown (including absentees and deserters) shall be exchanged for a Treasury check. The check shall be made payable to the payee designated by the officer having custody of the personal effects. The object for which drawn shall be "Exchange-for-cash--Remittance; personal effects of (name, rank or rate, file or service number)." A separate exchange-for-cash check shall be drawn for safekeeping deposits of such persons and the object for which drawn shall include the safekeeping deposit number in addition to the information noted above.

070504. Exchange-for-Cash Checks Returned as Not Required. Exchange-for-cash checks issued as advances to deputies, agents, and/or cashiers which are returned to the DO as not required shall not be canceled. The deputy, agent, or cashier shall provide the DO with a completed DD Form 1081 indicating return of the check as prescribed in Chapter 3 of this volume. No endorsement on the check by the payee is required. The check shall be endorsed by the DO and deposited as prescribed in Chapter 5 of this volume. DOs shall not accept the return of exchange-for-cash checks from any payee other than a deputy, agent, or cashier. Other exchange-for-cash checks are issued payable to the purchaser and shall be negotiated by the payee.

070505. Exchange-for-Cash Checks Lost, Stolen, or Destroyed

A. When Issued to an Individual. When the payee of an exchange-for-cash check reports that the check has been lost, stolen, or destroyed, the DO shall follow the procedures in Chapter 8 of this volume for unavailable check cancellations except that under no circumstances will the DO issue a recertified check to the payee prior to receipt of credit for the original check from the Treasury Department. This prohibition is required since the original check was issued in exchange for cash and was not based on any entitlement chargeable to an appropriation.

B. When Issued as an Advance of Funds to a Deputy, Agent, or Cashier. In the case of lost, stolen, or destroyed exchange-for-cash checks which were issued as an advance of funds, the deputy, agent, or cashier shall remain accountable for the funds. The deputy, agent, or cashier shall account for the check as a loss of funds on the DD Form 1081. The procedures for reporting and accounting for a physical loss of funds in Chapter 6 of this volume shall be followed. If considered necessary by the DO due to operational requirements, the lost check may be replaced by a recertified check (or a new advance provided in cash). The recertified check or the new advance shall be documented on a DD Form 1081 signed by the deputy, agent, or cashier. A copy of the SF 1184 shall be attached to the DD Form 1081 to document the status of the lost check and the accountability of the deputy, agent, or cashier. When credit for the lost check is received, the DO shall prepare an SF 1034 to transfer the credit from Unavailable Check Cancellations and Overpayments, Suspense, **F3880, to offset the loss of funds in the DO's

accountability. A copy of the SF 1034 shall be provided to the deputy, agent, or cashier to document Treasury Department's cancellation of the lost check and use of the credit to offset the loss of funds. A copy of the DD Form 1081 should be filed with the unavailable check cancellation documentation. In cases where the lost check is subsequently negotiated after cancellation by the Treasury Department (the Treasury Department will reverse the previous credit), the deputy, agent, or cashier accountable for the original lost check shall be held accountable and the loss of funds shall be re-established. Normal loss of funds and relief of liability procedures shall apply.

0706 ACCOUNTING FOR CHECK ISSUE DISCREPANCIES

070601. Advice of Check Issue Discrepancy. The Treasury Department uses the FMS Form 5206 to notify DOs of check issue discrepancies of \$1.01 or more detected during the audit and reconciliation process. The FMS Form 5206 is a computer-generated form which contains a complete description of the discrepancy. The Treasury Department furnishes three copies of the FMS Form 5206 and a copy of the check referenced on the form to the DO for making the required adjustment. The FMS Form 5206 is a correcting entry and changes the amount reported on the magnetic tape check issue report to the actual amount on the face of the check. Upon receipt of the FMS Form 5206 the DO shall research the check issue data to determine if a payee has been overpaid or underpaid and collect or disburse the adjustment amount if the check was issued for the wrong amount. If the payee has not been overpaid or underpaid, but incorrect check issue information has been reported to the Treasury Department, the FMS Form 5206 shall be processed on the DO's SF 1179 and SF 1219, even though the documents net to zero. If offsetting FMS Forms 5206 have not been received, the DO shall identify the offsetting error(s) to make the transaction net to zero, and prepare an OF 1017-G to advise the Treasury Department of the discrepancy. The DO shall make the necessary adjustment following the procedures described in this section. For Navy DOs aboard ships, if the FMS Form 5206 affects the accountability of a previous DO, the current DO shall forward the form with a covering memorandum to the office where the monthly financial reports are submitted for processing. If the FMS Form 5206 is received during the 90-day record retention period, a copy of the applicable check issue record, SF 1179, and disbursement voucher shall be reproduced from the former DO's retained records and forwarded with the FMS Form 5206. In the event an FMS Form 5206 is received which cites a DSSN other than that of the receiving disbursing station, the form shall be forwarded with a memorandum to the correct disbursing station, if identifiable. If the receiving DO is unable to identify the disbursing station indicated on the FMS Form 5206, the form shall be returned to the Treasury Department with a memorandum stating the reason for returning the form without action. If an FMS Form 5206 is received citing a discrepancy, which was discovered and reported by use of an OF 1017-G, a copy of the OF 1017-G shall be attached to the FMS Form 5206 and the documents returned to the Treasury Department without further action.

070602. Differences of \$1 or Less

A. Check Issue Discrepancies of \$1 or Less. Discrepancies of \$1 or less between the amount of a check as reported issued in the level 8 magnetic tape and the actual amount of the check paid by the Treasury Department will be adjusted by Treasury Department.

B. Claims for Underpayments of \$1 or Less. A supplemental check shall be issued and reported as a regular check issue if a disbursing office receives a claim from a payee for an underpayment of \$1 or less. The check shall be included as a regular check issue in Section II, Part A, Column 2 on the reverse of the SF 1219, and a minus adjustment of prior month's issues in Section II, Part A, Column 4 on the reverse of the SF 1219. The amount of the check shall also be reported as a minus adjustment on line 2(b) of the SF 1179 and shall be included as a check issue (in the proper sequence) on the appropriate magnetic tape issue report.

070603. Check Issue Discrepancies of \$1.01 or More. The DO shall prepare an OF 1017-G, as prescribed in this section, to account for a check issue discrepancy of \$1.01 or more for any prior month or current month's check issue errors that are detected by the disbursing office. No OF 1017-G shall be prepared for check issue errors detected over 1 year from the issue month of the check. The OF 1017-G shall be prepared as soon as the DO becomes aware of a discrepancy. All OFs 1017-G shall reference the voucher number and date on which the error occurred as well as any other documents affected. The DO shall not wait to receive an FMS Form 5206 from the Treasury Department.

070604. Adjustment of Duplicate Checks. The Treasury Department will charge the disbursing office, using an SF 5515, for the second check received for payment with the same DSSN and check serial number. When the DO receives an SF 5515 for a duplicate check to which the payee is entitled, it normally is presumed that the wrong original check number was entered on a control check. The DO shall submit an SF 1184 for the correct original check serial number in order to receive credit. The DO should cross reference the SF 1184 with the memorandum copy of the SF 5515 in the event that the disbursing office may, in the future, need a copy of the duplicate check for claim purposes.

070605. Overdrafts

A. Advice of Check Issue Discrepancy. Adjustments of discrepancies of \$1.01 or more for overdrafts require collection of the overpayment or, in infrequent cases, a supplemental charge to an appropriation or fund. Upon receipt of the FMS Form 5206, the DO shall review the retained records of checks issued, applicable payment vouchers, SF 1179, and SF 1219 to determine where and how the discrepancy cited on the document occurred. This requirement is to validate that a discrepancy has in fact occurred and to determine the corrective action required to resolve the discrepancy. Unless the FMS Form 5206 is erroneous (and this can be supported with copies of the documents listed above), the FMS Form 5206 shall be recorded on the DD Form 2657.

B. Distribution of FMS Form 5206. Distribute FMS Form 5206 as follows:

1. The first copy of the FMS Form 5206 shall be completed by the DO and attached to the current month's SF 1179 in support of line 2(a) "Net Dollar Adjustments to Prior Months."

2. The second copy shall be used to support the adjusting entry on the SF 1219.

3. If the discrepancy is still unresolved at the end of the month, file a copy in the unclaimed differences file pending final resolution of the discrepancy and preparation of the end of month financial reports (additional copies of the form may be reproduced as required).

4. The original shall be retained by the disbursing office.

C. Recording Check Issue Overdrafts. At the end of the month, the FMS Form 5206 shall be recorded on the SF 1179 (line 2(a) of the Summary portion) and included in the amount recorded on line 3. The FMS Form 5206 shall also be recorded on the reverse of the SF 1219. If the discrepancy is still unresolved at the end of the month, the overdraft shall also be included on line 7.2 (Receivables - Check-Issue Overdraft) of the SF 1219. Two copies of all executed FMS Forms 5206 and OF 1017-G (with supporting documents) shall be kept in an unclaimed differences file pending resolution of the discrepancy.

D. Adjustment Prior to Submission of Financial Reports. In some instances, overdrafts may be discovered prior to submission of the financial reports (SF 1219 and supporting documents) and check issue report (SF 1179) covering the period during which the check was issued. In this event, preparation of the OF 1017-G is not required provided: the check is recovered and voided prior to submission of the check-issue report (the check shall not have been negotiated); and, when the check is correct but the payment voucher is incorrect, the voucher is corrected to reflect the proper amount prior to submission with the SF 1219. Normally, these exceptions will apply only to Navy DOs aboard ships and those DOs who do not submit daily reports to another disbursing office for processing.

E. Adjustment After Submission of Financial Reports. When a check issue overdraft is discovered after the financial reports (covering the period in which the discrepancy occurred) have been submitted, the DO or deputy shall make the following adjustments to financial records and prepare the necessary documents as required below. An OF 1017-G for a check issue overdraft shall be prepared as shown in figure 7-1. The DD Form 2657 shall be posted to reflect the amount of the overdraft as an increase to Checks Issued and an increase to Receivables - Check Issue Overdrafts. At the end of the current reporting period, the OF 1017-G shall be recorded on the SF 1179 (line 2(b) of the Summary portion) and included in the amount recorded on line 3. The OF 1017-G shall also be recorded on the reverse of the SF 1219. The original of the OF 1017-G shall be attached to the SF 1219 and a copy attached to the SF 1179 for the current reporting period to support the entries thereon. If the discrepancy is still unresolved at the end of the current reporting period, the overdraft shall also be included on line

7.2 (Receivables - Check-Issue Overdraft) of the SF 1219 and the remaining copies of the OF 1017-G shall be retained in the uncleared differences file (additional copies of the form may be reproduced as required).

F. Resolving Check-Issue Overdrafts

1. Overdrafts are resolved by collection or a supplemental charge to an appropriation. Collection is appropriate when the check was issued in an amount greater than the payee was actually entitled to receive. Supplemental charges to an appropriation are required when the amount of the check is correct but the payment voucher is for a lesser (and incorrect) amount. The three ways to clear the overdraft are described below. No additional entries are made in the summary section of the SF 1179 or on the reverse of the SF 1219 to indicate that the overdraft has been cleared.

2. By Collection. Upon receipt of a collection (in cash or by check, money order, or other negotiable instrument), the DO shall prepare an OF 1017-G to document the transaction and the DD Form 2657 shall be posted to reflect an increase in Cash (or Deposits Presented or Mailed to Bank) and a decrease in Receivables - Check Issue Overdrafts. For this transaction, only the DO's accountability is affected and no credit to an appropriation is involved.

3. By Supplemental Charge to Appropriation. When it is determined that the overdraft was caused by undercharging the appropriation or fund against which the original check was drawn, an SF 1034 (or a one-sided SF 1081 if preferred by the DO) shall be prepared and recorded against the undercharged appropriation or fund. The DD Form 2657 shall be posted to reflect a Disbursement and a decrease in Receivables - Check Issue Overdrafts. A check is not issued in this transaction.

4. By Supplemental Charge to Military Pay Appropriation and Pay Account Checkage. Overdrafts caused by under-charging the appropriation for military pay and allowances shall be cleared by actions described in Volume 7 of this Regulation to ensure proper charges are entered in the member's master military pay account. An SF 1034 (or one-sided SF 1081) shall be prepared to describe the transaction in complete detail, charging the accounting data shown on the original payment voucher. No check will be issued in this transaction. The DD Form 2657 shall be posted to show a Disbursement and a decrease in Receivables - Check Issue Overdrafts.

070606. Underdrafts

A. Advice of Check Issue Discrepancy. Adjustments of discrepancies of \$1.01 or more require a supplemental check issue to the payee or in infrequent cases, a credit to an appropriation or fund. Upon receipt of the FMS Form 5206, the DO shall review the retained records of checks issued, applicable payment vouchers, SF 1179, and SF 1219 to determine where and how the discrepancy cited on the form occurred. This requirement is to validate that a discrepancy has in fact occurred and to determine the corrective action required to resolve the

discrepancy. Unless the FMS Form 5206 is erroneous (and this can be supported with copies of the documents listed above), the DO shall prepare a DD Form 1131 giving credit for the value of the underdraft to deposit fund Accounts Payable, Check Issue Underdrafts, **X6999. The DD Form 1131 and the FMS Form 5206 shall be recorded on the DD Form 2657 as a decrease to Checks Issued and an increase to Collections. The DO's total accountability will remain unchanged. At the end of the current reporting period, the FMS Form 5206 shall be recorded on the SF 1179 (line 2(a) of the Summary portion) and on the reverse of the SF 1219.

B. Distribution of the FMS Form 5206. Distribute the FMS Form 5206 as follows:

1. The first copy of the FMS Form 5206 shall be completed and attached to the current reporting period's SF 1179 in support of line 2(a) titled "Net Dollar Adjustments to Prior Months" and included in the amount recorded on line 3.

2. The second copy shall be used to support the adjusting entry on the reverse of the SF 1219.

3. Two additional copies and at least 2 copies of the DD Form 1131 shall be filed in the uncleared differences file pending final resolution of the discrepancy and preparation of the end of month financial reports.

4. The original shall be retained by the disbursing office.

C. Adjustment Prior to Submission of Financial Reports. In some instances, underdrafts may be discovered prior to submission of the financial reports (SF 1219 and supporting documents) and check issue report (SF 1179) covering the period during which the check was issued. In this event, preparation of the DD Form 1131 is not required provided: the check is recovered and voided prior to submission of the check-issue report (the check shall not have been negotiated); and, when the check is correct but the payment voucher is incorrect, the voucher is corrected to reflect the proper amount prior to submission with the SF 1219. Normally, these exceptions will apply only to Navy DOs aboard ships and those DOs who do not submit daily reports to another disbursing office for processing.

D. Adjustment After Submission of Financial Reports. When a check issue underdraft is discovered after the financial reports (covering the period in which the discrepancy occurred) have been submitted, the DO, deputy, or agent shall make the following adjustments to financial records and prepare the necessary documents as required below. A DD Form 1131 shall be prepared crediting deposit fund Accounts Payable, Check Issue Underdrafts, **X6999. The DD Form 2657 shall be posted to record a decrease to Checks Issued and a Collection. The DO's total accountability is unchanged. At the end of the accounting period, the DD Form 1131 shall be recorded on the SF 1179 (line 2b of the Summary portion) and included in the amount recorded on line 3. The DD Form 1131 shall also be recorded on the reverse of the SF 1219. A copy of the DD Form 1131 shall be attached to the SF 1179 submitted with check issue reports.

Two copies of the DD Form 1131 shall be retained in the uncleared differences file until the discrepancy is cleared.

E. Resolving Check-Issue Underdrafts. The two ways to clear an underdraft discrepancy are described below. No additional entries are made in the summary section of the SF 1179 or on the reverse of the SF 1219 to indicate that the underdraft has been cleared.

1. By Supplemental Check. When the payee is entitled to the amount of the underdraft, an SF 1034 shall be prepared charging Accounts Payable, Check Issue Underdrafts, **X6999. A check shall be drawn in favor of the original payee. The DD Form 2657 shall be posted to record a Check Issue and a Disbursement. Total accountability is unchanged.

2. By Credit to the Appropriation. When the underdraft discrepancy was caused by overcharging the appropriation and credit is due the appropriation, an SF 1081 shall be prepared charging Accounts Payable, Check Issue Underdrafts, **X6999 and crediting the appropriation charged on the original payment voucher. The DD Form 2657 shall be posted to record a Collection and a Disbursement. Total accountability will be unchanged.

070607. Adjustments to Financial Reports Previously Submitted. Upon clearance of a check issue discrepancy (overdraft or underdraft), the file copy of the FMS Form 5206, OF 1017-G, or DD Form 1131 shall be removed from the uncleared differences file and one of the following legends shall be annotated, as appropriate: "See Deposit Ticket No. __, dated __"; "See Check No. __, dated __"; or, "See Adjustment Voucher No. __, dated __". The third copy shall be attached to the document effecting the clearance of the outstanding accountability item in the accounts of the DO for submission with the SF 1219. The fourth copy shall be retained in the disbursing office files as a record of the completed action on adjusting the discrepancy.

070608. Erroneous Information Reported on the FMS Form 5206. If, after review of the FMS Form 5206, the copy of the check, the disbursement voucher, and the check issue report data, the DO determines that the check was paid for a different amount than when issued, the FMS Form 5206 shall be returned to the Treasury Department with a memorandum stating the reason for returning the document without action. The memorandum shall be supported by copies of all the documents used to determine the FMS Form 5206 to be in error. Generally, the situation described above is indicative of a bank processing error or alteration of the check by the payee. In either event, the explanatory memorandum to the Treasury Department that returns the FMS Form 5206 shall be sufficiently clear to enable the Treasury Department to initiate reclamation action through the banking system.

070609. Relief of Liability. Both underdrafts and overdrafts are illegal, incorrect, or improper payment irregularities in the accounts of the DO. The DO has the authority and the means to correct underdrafts. Overdrafts are frequently not within the power of the DO to correct. If the check issue overdrafts resulted in overpayment of a payee, that overpayment is an

erroneous payment debt. When the DO has attempted to contact the payee and failed; or, when the payee has been notified and has neither the ability and/or the inclination to make restitution, the DO shall transfer the debt to the servicing DFAS Center for further collection action. In order to meet GAO required standards for relief of liability, uncollectible overdrafts must be transferred to the servicing DFAS Center within 90 days. After the debt has been transferred, relief of liability for the illegal, incorrect, or improper payment may be requested following the procedures in Chapter 6 of this volume.

CHAPTER 8

CHECK DISTRIBUTION, DISPOSITION, AND CANCELLATION0801 PROMPT DELIVERY OF CHECKS

★ 080101. General. After preparation, checks shall be delivered promptly to the payee. With respect to payroll checks, the Department has mandated participation in the Direct Deposit Program (DD/EFT) for all newly enlisted, reenlisted, appointed, or retired military personnel and all newly hired civilian personnel. All payments shall be converted to DD/EFT by January 1, 1999, in accordance with the Debt Collection Improvement Act of 1996 (reference (aj)).

080102. Delivery of Checks. DoD policy on the delivery of checks is:

A. Checks shall be properly safeguarded and should be handled as few times and by as few people as practical.

B. Controls shall include procedures for ensuring the proper custody, signing, and delivery of checks. If checks are handed to the payees, identification is required.

C. Checks not delivered within the time specified by the DO shall be returned to the DO promptly.

D. Checks shall be kept in a safe, vault, or locked fireproof cabinet, pending distribution or return to the DO.

E. Personnel engaged in pay delivery activities shall be designated in writing and adequately supervised in order to help prevent any unauthorized, fraudulent, or other irregular activities.

080103. Delivery by Mail. The normal method of check delivery is by mail through the U.S. Postal Service. Delivery shall be made to the payee's residential mailing address or post office box. At overseas activities, where personal mail is received through the organizational address, the organizational address shall be considered as the payee's residential mailing address. In all other cases, an organizational address is not considered a valid mailing address. Where commanders or their designee find that, in individual cases, it is not practical to mail checks, each commander may provide a specific location where the payees may obtain their paychecks, with proper identification. If checks are mailed to a specific location for delivery, the DO shall make a written appointment of the person at the specific location who will deliver the checks as a designated third party (see paragraph 080105, below).

080104. Outside the United States

A. Restrictions. The Secretary of the Treasury has determined that agencies shall not issue checks intended for delivery in the following prohibited areas: People's Republic of Albania; Republic of Cuba (except checks sent to the Naval Base, Guantanamo Bay for delivery to payees at the base); Democratic Kampuchea (Cambodia); North Korea; or Socialist Republic of Vietnam. (See Treasury Department Circular 655 (reference (w))) In lieu of issuing a check to payees in these countries, the DoD Component shall withhold payment and establish the liability on its books.

B. Exceptions. The restrictions outlined in subparagraph 080104.A, above, are not applicable to checks payable to foreign governments, or to checks issued in payment of salaries or wages, or for goods or services purchased by the U.S. Government.

C. Claims for the Proceeds of Withheld Payments. Claims for the proceeds of checks which were drawn, and subsequently forwarded to the Treasury Department for deposit in deposit fund account Proceeds of Withheld Foreign Checks, 20X6048, pursuant to previously existing procedures, should be submitted with a recommendation on such payment to: Department of the Treasury, Financial Management Service, Finance Division, Liberty Center, Room 257, Washington, DC 20227. If a valid claim is received and no check previously has been prepared due to the restrictions outlined in subparagraph 080104.A, above, the DoD Component that withheld the payment will arrange for the issuance of a check and will decrease the respective liability on its books.

080105. Delivery of Checks by Designated Third Parties. Delivering multiple checks personally may be impractical for the DO or it may not be expedient to mail them to addresses of record. Under such circumstances, and with the guidance for delivery of checks noted in paragraph 080102, above, the DO may deliver or mail checks to a designated third party for distribution. A third party is any individual authorized to distribute a quantity or bulk shipment of checks to payees. A person who maintains pay accounts or prepares checks is not authorized to distribute checks.

A. Appointment of Designated Third Parties. The DO shall appoint in writing those individuals (by title and organization only) who will serve as a designated third party for delivery of bulk checks using SF 1195 (Recommendation for Designation and Revocation of Agents to Receive and Deliver Checks and Savings Bonds). A record of each individual so authorized shall be maintained. One or more alternates should be appointed to prevent distribution delays in the absence of the principal designee. Alternates may also assist in the check distribution when conditions warrant.

B. Transport of Checks to Designated Third Parties. Bulk shipments of prepared checks shall be packaged separately from correspondence and shall be mailed by registered mail. Bulk shipments of checks for a unit or group of units should be dispatched to a third party for distribution or delivery to payees or for reshipment to another third party for delivery where the military unit is located. Such shipments shall include only the checks,

transmittal letter, and documentation needed for the specific payment. These shipments are not subject to the provisions of the Government Losses in Shipment Act (reference (t)).

C. Release of Checks to Other than Payee. Designated third parties shall not release checks to anyone other than the payee. See subparagraph 080105.E, below, for appropriate action if a payee is absent at the time of delivery.

D. Judge Advocate or Investigative Agent Third Parties. In cases where advance payments are issued for witnesses subpoenaed for trial, delivery of the check shall be performed either by a representative from a DoD Component investigative agency or a judge advocate charged with serving the subpoena.

E. Third Party Disposition of Undelivered Checks. Unless otherwise provided, checks for payees not present at the time a third party attempts delivery shall be returned to the DO before the close of business that day. Payees who were absent, or who for other reasons did not get their checks, should be advised to call at the disbursing office or other stated place to pick up their checks. If locked fireproof file cabinets or safes are available, the DO may authorize the designated third party to hold undelivered checks for a specified, short period. When payees are on extended periods of leave or absences, checks shall be returned to the DO for disposition. Checks which are found to be in error shall be returned to the DO. After appropriate corrective action has been taken, a new check will be issued to the payee.

★0802. DISPOSITION OF SPOILED AND VOIDED CHECKS

080201. Spoiled Checks

A. General. A check may be classified as spoiled and replaced with a recertified check when it: (1) has been reported as issued to the Treasury Department; (2) is in the possession of the DO; (3) represented a valid payment; (4) has been returned by the payee as uncashable due to mutilation or a defect in the check itself; and (5) is less than one year old. All spoiled checks shall be rendered non-negotiable by typing or stamping on the face of the check the words: SPOILED - NON NEGOTIABLE: RECERTIFIED CHECK ISSUED UNDER CHECK NUMBER _____. Spoiled checks in the possession of the DO shall be replaced under the provisions of paragraph 080506 by a recertified check using stop code "A" on the SF 1184. In the case of mutilated checks the DO must receive a large enough portion of the check to positively identify the issuing DSSN, check number, date and amount. If a sufficient portion of a check is not provided for the DO to make a positive identification, an SF 1184 shall be processed using stop code "A" or "D" (at the discretion of the DO based on the facts available) and a recertified check issued in accordance with the recertification provisions applicable to the stop code used on the SF 1184."

★ B. Disposition. DOs shall maintain DD Form 2662 (Recertified Check Register) for all spoiled checks as prescribed in paragraph 080503. This record may be maintained in a mechanized or manual format. At a minimum, this record must show the original spoiled check number and date; original voucher number; recertified check number and

date; new voucher number; payee; amount of payment; and SF 1184 information. The DD Form 2662 shall be retained as a permanent part of the DO's retained records; i.e. 6 years, 3 months from the check issue date, after which time it shall be destroyed. At least once each quarter, spoiled checks shall be destroyed locally by the DO by shredding or incinerating. If destroyed by shredding, fragments shall be no larger than 1 inch in width and 1/4 inches in length. If destroyed by burning, the checks shall be completely burned. A certificate of destruction shall be prepared in an original and one copy and shall include the: complete mailing address of the disbursing station; date and method of destruction; DSSN; serial number of each check; typed name, title, grade or rank, and signature of at least one witness; and, typed name, title, grade or rank, and signature of the DO. Each check shall be listed in numerical sequence. An example of a certificate of destruction is shown at figure 8-1. DOs shall destroy all spoiled checks using the procedures in the following subparagraphs.

★ 1. Prepare a Certificate of Destruction. The certificate shall be prepared in an original and one copy and shall include the: complete mailing address of the disbursing station; date and method of destruction; DSSN; serial number of each check; typed name, title, grade or rank, and signature of the witness(es); and, typed name, title, grade or rank, and signature of the DO. When blocks of checks are destroyed, the beginning and ending serial numbers of the block may be shown. Otherwise, each check shall be listed in numerical sequence. An example of a Certificate of Destruction is shown at figure 8-1.

★ 2. Verification. The DO and at least one witness shall: examine the checks to verify they are the actual checks to be destroyed; verify the check numbers and DSSN with information on the certificate of destruction; and, sign the certificate of destruction only after witnessing the actual destruction of the checks.

★ 3. Distribution of the Certificate of Destruction. The original certificate shall be included and forwarded with the monthly disbursing financial reports. A copy shall be retained in the DO's blank check inventory control records.

★ C. Certification of Payroll Officer. If the payee of a civilian payroll check requests that a recertified check be issued in a name different from the name as stated on the original check, a signed statement authorizing the change in name shall be obtained from the payroll officer who certified the original payroll prior to issuance of the recertified check. The statement shall be retained by the DO and attached to the retained copy of the payroll.

080202. Replacement Checks. A replacement check is used to replace a check that: (1) has been classified as voided; (2) has not been reported to the Treasury Department as a valid check issue; and (3) is uncashable due to misprint or mutilation during the issue process. A replacement check should be the next available check in the series and format used for the voided check.

080203. Voided Checks

★ A. General. A check that is misprinted or mutilated during the issue process must be voided and replaced with a replacement check if the payment involved is otherwise proper. Unused blank checks that are to be destroyed shall be reported as voids. Lost or stolen blank checks shall be reported as voids. Checks voided by the DO shall be rendered non-negotiable by typing or stamping the words “VOID - NOT NEGOTIABLE: NO CHECK ISSUED UNDER THIS NUMBER” or “VOID - NOT NEGOTIABLE: REPLACEMENT CHECK ISSUED UNDER CHECK NUMBER _____” as appropriate. Once a check has been reported to the Treasury Department under check-issue reporting procedures, it cannot be voided under any circumstances. The check shall be processed as a spoiled check, an available check cancellation, or an unavailable check cancellation as appropriate to the circumstances in each case.

B. Reporting Voided Check Issues. Voided checks shall be reported as a check issue having a zero (0) dollar value. When hard copy check-issue reports are forwarded to another disbursing office for conversion to magnetic tape, the DO forwarding the reports shall stamp or mark the listing of checks issued to indicate that the check is voided and the dollar amount is zero. Do not obliterate the serial number of the voided check from the check listing. DOs submitting check-issue reports on diskettes to another disbursing officer for conversion to magnetic tape shall ensure that the serial number and date of the voided checks are included on the diskette. If a voided check has not been dated, a date shall be reported for the check to facilitate check-issue reporting. DOs submitting check issue reports by magnetic tape shall ensure that the serial number and date of the voided check are included on the tape.

★ C. Disposition of Voided Checks. Voided checks shall be stored in the vault or safe segregated from all other checks until destroyed. The voided checks shall be destroyed locally by the DO at least once each quarter by either burning or shredding. If destroyed by burning, the checks shall be completely burned. If destroyed by shredding, fragments shall be no larger than 1 inch in width and 1/4 inch in length. In either event, a certificate of destruction similar to figure 8-1 shall be prepared listing the serial numbers and method of destruction and shall be signed by the DO and at least one witness. DOs shall destroy all voided checks using the procedures in subparagraphs 080201.B.1. through 080201.B.3.

0803 CHECK CANCELLATION

A cancellation is accomplished in one of the ways described below.

080301. Available Check Cancellation. The DO holds the check and processes an SF 1098 (Schedule of Canceled or Undelivered Checks). The SF 1098 credits the proceeds to the appropriation originally charged when the check was issued. See section 0804, below.

★ 080302. Unavailable Check Cancellation. The DO requests cancellation by submission of an SF 1184 to the Treasury Department via the Defense Check Reconciliation Module (DCRM) on-line Unavailable Check Cancellation (UCC) subsystem. Depending on the status of the check (outstanding or paid), the cancellation credit may or may not be provided by the Treasury Department. See section 0805, below.

080303. Limited Payability Check Cancellation. The Treasury Department automatically cancels checks issued on or after October 1, 1989, that have not been negotiated to a financial institution within 12 months of the date of issue. This cancellation occurs in the 14th month after the date of the check. See section 0806, below.

080304. Pre-effective Date Limited Payability Cancellation. The Treasury Department automatically canceled all checks issued before October 1, 1989, that were not negotiated by October 1, 1990.

0804 CANCELLATION OF AVAILABLE CHECKS

080401. General. As provided in Public Law 100-86, Competitive Equality Banking Act of 1987 (reference (x)), and Department of the Treasury Financial Manual, Bulletin 90-03 (reference (y)), the time limit for negotiation of Treasury checks is one year from the date of issue. DOs may cancel checks within this one year period when the check is drawn under the DO's own DSSN, under the account of a predecessor DO of the same activity and DSSN, or under an account being settled by the DO. Checks may be canceled when: the disbursing account is closed or current; or, the proceeds of the check are for repayment to an appropriation or fund account which is current or expired. Treasury checks in the possession of the DO shall be canceled when it is determined that the payee or estate is no longer entitled to the proceeds of the check or the check is undeliverable for 60 days after the month of issue. Under no circumstances shall a DO cancel a check using the procedures in this section if the check is over one year old.

080402. Exceptions

A. Checks drawn for cash or for advances to cashiers that later are found not to be required shall not be processed for cancellation in the DO's accounts. Instead, they shall be endorsed by the DO or cashier (as applicable) and deposited as prescribed in Chapter 5 of this volume.

B. An original check, that is returned to or recovered by the DO after it is more than one year old (from date of issue) or has been canceled by submission of an SF 1184, shall not be canceled on an SF 1098. However, the check shall be marked "VOID - NOT NEGOTIABLE" on the front and held in the DO's safe or vault until the Daily Advice of Status (DAS) is received from the Treasury Department and then the marked check shall be destroyed locally by burning or shredding. No report of destruction is made to the Treasury Department. The date of destruction and supporting documentation shall be noted in DD Form 2662 (Recertified Check Register).

080403. Undeliverable Treasury Checks. All undeliverable checks shall be kept in a safe or vault. The checks shall be filed in an order best suited for ready identification when claimed or for mailing when a proper address is ascertained. The DO shall maintain a record of undeliverable checks using DD Form 2658 (Returned and Undeliverable Check/Bond Record) that indicates: date the check is returned, check number, check date, amount, payee, voucher

number, disposition, and date of disposition. An example of DD Form 2658 is shown at figure 8-2. The DO shall provide a copy of DD Form 2658 to rollkeepers, agents, cashiers, and the appropriate entitlement office for their use. Undelivered checks shall not be removed from the safe or vault, or held by the DO's deputies, agents, or cashiers except for immediate delivery to payees, or for cancellation and deposit.

A. Time Limit for Holding Undeliverable Checks. The DO shall attempt to make delivery of checks to the proper payees. If delivery is not effected within 60 days after the month of issue, undeliverable checks being held by the DO shall be disposed of as provided in the subparagraphs below. Checks payable to deceased payees should be held no longer than 5 days.

1. Undelivered checks held by the issuing DSSN shall be collected to the credit of the issuing appropriation or to a suspense account and deposited as prescribed in paragraph 080405, below.

★ 2. Undelivered checks held by other than the issuing DO shall be returned to the issuing DO by registered mail or by another method of delivery with the ability to track the shipment. The checks must be mailed within two weeks together with a reason for non-delivery. If the address of the issuing DSSN is unknown, contact the servicing DFAS Center.

3. An undeliverable check returned to the DO after the 45th day of the time limit prescribed above shall be recorded on the DD Form 2658. Research shall be conducted to determine if the check has been canceled using an SF 1184 (Unavailable Check Cancellation), and whether a replacement check has been issued. If an SF 1184 has been submitted to the Treasury Department, dispose of the original check as prescribed in subparagraph 080513.D, below. If an SF 1184 has not been submitted to the Treasury Department, cancel the original check as prescribed above within 15 days of the date of receipt.

B. Undeliverable Due to Death of Payee

1. Deceased Military Members. Checks drawn to deceased military members shall be canceled by the issuing DSSN. The check shall be promptly canceled and credited to the individual's pay account pending payment to a properly designated beneficiary.

2. Deceased Civilian Employee Checks. For special instructions on the handling of checks drawn to deceased civilian employees, see Volume 8 of this Regulation.

3. Other Payees. Checks drawn to other deceased individuals shall be taken up and deposited as undeliverable checks. An SF 1055 (Claim Against the United States for Amounts Due in the Case of a Deceased Creditor) shall be obtained and processed as prescribed in Volumes 8 and 10 of this Regulation. The accounting data chargeable and references required on the voucher shall be as prescribed in paragraph 080406, below.

C. Checks Undelivered at Time of Relief. When a DO is relieved by another DO or the DSSN is deactivated and disbursing for that activity is assumed by another activity or ship as a result of consolidation, transfer of function, or other reason, the relieving DO or gaining activity shall assume custody of the undelivered checks for processing as provided in this section. However, when a DO is transferred from disbursing duty without a relief or the disbursing function is not assumed by another activity, the undelivered checks shall be taken up as a collection on an SF 1098 and deposited whether or not the 60-day holding period has elapsed. The DD Form 2658 shall be turned over to the office designated to settle the accounts of the DO.

D. Special Actions on Canceled Checks Held by the Disbursing Office

1. Military Payrolls. When a check in payment of military pay and allowances is canceled, the DO shall take the action prescribed in Volume 7A of this Regulation for the appropriate adjustment to the Master Military Pay Account to be made.

2. Civilian Payrolls. When a check in payment of a civilian payroll is canceled, the DO shall notify the payroll preparing office in order for the appropriate payroll adjustment to be made.

080404. SF 1098 (Schedule of Canceled or Undelivered Checks)

A. General. A check that is undelivered within 60 days after the month of issue shall be credited to the appropriation originally charged by use of an SF 1098 prepared in triplicate. The following data shall be shown for each check in the spaces provided in the body of the form: month and year of issue; check serial number (and DSSN if other than DSSN shown in heading of the form); name of payee; amount of check; and, accounting data credited. See figure 8-3.

B. Lack of Accounting Data. If the proper appropriation to be credited cannot be determined immediately, collect the amount of the check into the budget clearing account (suspense) **F3875. The SF 1098 should include all information available as to the identity and location of the payee of the check. If, after one year the appropriation still is not determinable, process an SF 1081 to transfer the funds to the Treasury Department's miscellaneous receipt account **R1060.

080405. Disposition of Canceled Available Checks

A. General. Canceled check transactions authorized by this section shall be processed in a manner similar to that for collections. Upon receipt of a check to be canceled, prepare an SF 1098 as the collection voucher with credit to the appropriation charged when the payment was made. Note: All lines of accounting data charged and credited on the original disbursement voucher shall be shown on the SF 1098. Assign a collection voucher number to the SF 1098 and print this number and the date of collection on the reverse of the canceled check. The canceled checks shall be deposited for credit to the DSSN used by the DO making the

cancellation. No payee endorsement on the reverse of the check is necessary; only the DO's endorsement stamp is required.

B. Stamped Legend Placed on Checks for Cancellation. The following legend shall be typed or stamped on the face of each canceled check: "NOT NEGOTIABLE - FOR PAYMENT AND CREDIT IN THE U.S. TREASURY. D.O. SYMBOL _____." The letters of the legend shall be of prominent size to remove all possibility of negotiation. The stamp shall be placed so that the defacement will not interfere with data to be captured by an optical character recognition (OCR) scanner.

C. Deposit Ticket. Canceled checks shall be deposited on an SF 215 separate from any other negotiable instruments. DOs shall make canceled check deposits as prescribed below.

D. Frequency of Deposits. Checks received for cancellation need not be deposited on a daily basis. The canceled checks may be held in the DO's safe or vault for preparation of a consolidated SF 215. Deposits shall be forwarded to the FRB or branch not later than the 25th of the month in which received. Checks received for cancellation during the remainder of the month shall be processed as collections, but may be retained for depositing in the following month. All CONUS DOs shall deposit all canceled Treasury checks with the nearest FRB or branch. DOs located in Alaska, Hawaii, and in foreign countries will deposit with the general depository normally used for making deposits for credit to Treasury Department's General Account. Refer to Chapter 5 of this volume for deposit reconciliation requirements.

080406. Claims for the Proceeds of Canceled Available Checks. When a claim is received for the proceeds of a canceled available check and it is determined that all or a portion of the amount is due the claimant, payment shall be made on a payroll or other voucher prepared and processed in the same manner as a current payment. Claims shall be paid by the disbursing office which made the collection and deposit of the original undeliverable check. This is not to say an undeliverable military pay check cannot be canceled by the issuing DO so that the member may be paid at a new duty station. The disbursement shall be made on an SF 1034 and charged to the accounting data credited on the SF 1098. Reference shall be made to the original undeliverable check by serial number, amount, DSSN, and the month, year, and account in which the undeliverable check was collected. In cases where the undeliverable check was collected to **R1060, the DO should process an SF 1081 to adjust out the funds that were collected into the receipt account in error. A record of the claim and disposition shall be entered on the DD Form 2658.

0805 UNAVAILABLE CHECK CANCELLATIONS

080501. General. Unavailable Treasury checks that are reported to the DO as lost, stolen, mutilated, or not received by the payee shall be canceled using the procedures described in this section if the check is less than 12 months old. The procedures in this section also apply to situations where the payee is not entitled to the proceeds of a check which is unavailable to the DO. These situations include: death of the payee before the check issue date; non-receipt of a

recertified payment check by the payee when the original check has been received and cashed; receipt of a cash payment and a check payment for the same entitlement; and, loss of the check after the payroll is prepared and the payee is a military member already transferred. Payees have 1 year from the date of issue of the check to file a claim of non-receipt with the issuing disbursing office for submission to the Treasury Department. The issuing disbursing office must submit an SF 1184 (Unavailable Check Cancellation) to the Treasury Department within 13 months of the date of issue. The Treasury Department has 18 months from the date a check is paid to reclaim monies from the financial institution if a claim of forgery or unauthorized endorsement is filed by the payee. Checks, which are unavailable to the payee and/or the DO and for which entitlement to the payment exists, may be replaced by a new check called a recertified payment check. A recertified payment check bears a new check serial number and is vouchered and recorded as a new disbursement using the procedures in this section. Original and recertified payment checks shall be controlled, cross-referenced, and tracked indefinitely or until both have been paid, recovered and destroyed, or canceled.

080502. Claims of Non-receipt, Destruction, Loss, or Theft. A claim of non-receipt, destruction, loss, or theft of a Treasury check issued on or after October 1, 1989, will be denied by the Treasury Department unless it is presented by the payee to the issuing disbursing office within 1 year from the date of issuance. The claim will be documented by the disbursing office on an SF 1184. The SF 1184 must be processed through the servicing DFAS Center and received at Treasury Department within 13 months from the date of issue of the check. If a cancellation credit is denied, a Daily Advise of Status will be issued with one of the status codes listed in table 8-4. The DO will advise the payee of the check status. If the check has been negotiated and the payee wishes to continue the claim process, the payee must initiate the FMS Form 1133 (Claim Against the United States for the Proceeds of a Government Check) and the FMS Form 3858 (Claims Document), upon receipt of status from the Treasury Department. The DO shall forward these two forms, the photocopy of the check and any other supporting documentation for the claim to the Treasury Department for processing. If the payee files a claim of forgery or unauthorized endorsement (FMS Form 1133) against the check, no recertified payment check will be issued prior to receipt of an FMS Form 3859 (Claims Disposition Notice) from the Treasury Department. See paragraph 080515, below.

080503. DD Form 2662 (Recertified Check Register). To assure the necessary cross-reference and control over unavailable check cancellations, DD Forms 2662 shall be maintained. As shown in figure 8-4, the DD Form 2662 shall contain information to identify the original check serial number, date, amount, payee, and status of the check as provided by the Treasury Department, as well as identifying information regarding the recertified payment check, payee claims, and collection information.

080504. SF 1184 (Unavailable Check Cancellation). The SF 1184 is required for all cancellations covered by this section. Each individual unavailable check to be canceled shall be reported on an SF 1184 to the servicing DFAS Center either manually or via mechanized input. The DFAS Centers will consolidate the input for submission to the Treasury Department. Bulk losses of original checks will require the preparation of an SF 1184 for each check. Unavailable check cancellation credits or chargebacks resulting from the Treasury Department

receipt and processing of an SF 1184 or the negotiation of a canceled unavailable check will be forwarded by the Treasury Department to the DFAS Centers at Cleveland, Denver, and Indianapolis. These DFAS Centers will forward check credit or chargeback information (including the detail information) applicable to the DFAS-Columbus Center disbursing accounts to the DFAS-Columbus Center. The DFAS-Cleveland Center also will forward the cancellation credit or chargeback information (including the detail information) applicable to the DFAS-Kansas City Center and Marine Corps disbursing offices to the DFAS-Kansas City Center.

080505. DD Form 2660 (Statement of Claimant Requesting Recertified Check)

When a payee reports the loss, theft, mutilation, or non receipt of a Treasury check, the DO shall obtain a statement, in writing, from the payee. The statement is mandatory to substantiate the payee's entitlement to a recertified payment. The DD Form 2660 is the preferred form of the required statement; however, DOs may accept a signed letter from the payee in lieu of the DD Form 2660. An example of the DD Form 2660 is shown at figure 8-5. If the payee negotiates both checks, the statement could be used to establish fraudulent intent. Upon receipt of the signed statement, the DO shall complete the information required to identify the check (issue date, check number, amount, voucher number, etc.), prepare an SF 1184 to cancel the unavailable check, and forward a copy of the statement and a copy of the SF 1184 to the appropriate entitlement area for certification of entitlement and preparation of the appropriate payment voucher.

080506. Authorization to Issue Recertified Checks

A. General. As stipulated in 31 CFR, Parts 245 and 248 (reference (p)), the Treasury Department has delegated to the DoD the authority to issue recertified checks to replace checks originally issued by DoD DOs. That authority includes replacement of checks lost, stolen, or destroyed both in transit and after receipt by applicable payees. The Treasury Department has authorized the DoD to issue a recertified payment at the same time the SF 1184 is prepared if, based on the facts available, the payee should receive immediate replacement and the risk of loss from overpayment to the payee is low. Subject to the restrictions in the following paragraphs, recertified checks may be issued as replacements for original checks at any time commencing with the submission of the SF 1184. The circumstances associated with each unavailable check shall govern when the recertified check is actually issued.

★ B. Limitations. No recertified check will be issued if: the payee of the original check is not entitled to the proceeds of the check, the payee died before the original check-issue date, sufficient mail time (at least 3-mail delivery days after the date the original check was mailed has not lapsed for delivery or return of the original check (see subparagraph 070105); the payee has an outstanding obligation against which the payment can be offset; or, the original check is more than 12 months old. Situations that require the exercise of good judgment in determining when to issue recertified checks are high value unavailable checks, payees involved in adverse actions that could result in early discharge or termination, and non-permanent employees who have no vested retirement benefits or no sustained work history at the issuing activity. The ability of the payee to make restitution in cases of a double negotiation and the possibility of offsetting a double negotiation against money, other than salary, due the payee

shall be considered in the determination. Note for deactivated and closed disbursing offices: Normally the designated settlement office is responsible for issuing recertified payments. However, when circumstances warrant, such as consolidation, the DO servicing the activity that assumed the disbursing and accounting responsibility for the deactivated or closed office is authorized to issue a recertified payment on behalf of the deactivated or closed office. Except as prescribed in subparagraph 080512.A, below, recertified checks may be issued only as a disbursement from the appropriation (or if no longer available, a current appropriation available for the same general purpose subject to limitations on its use) charged when the original check was issued.

C. Issue Before Receipt of Treasury Status. Because of the effect that delays in check issuance have on military and civilian employees' personal financial affairs, DoD relations with private business and other intangible benefits obtained, recertified checks may be issued immediately for some payees. Therefore, DOs are authorized to use stop code "A" on the SF 1184 when recertified checks are to be issued immediately to replace undelivered, lost, stolen, mutilated, or destroyed original checks issued under their DSSN, if less than 31 days have elapsed since the check issue date. This service is limited to the following payees:

1. Military and civilian personnel for payment of pay and allowances.
2. Banks, credit unions and other financial institutions unless it is determined to be in the best interest of the DoD to obtain Treasury Department status before issuing a recertified check.
3. Agencies of the U.S. Government.
4. Foreign governments. (Where doubt exists as to the status of a foreign payee, treat payment as a foreign business and issue a recertified check after receipt of status from Treasury as prescribed below.)
5. Any payment made under protest as described in Chapter 1 of this volume.
6. Any composite/consolidated check regardless of amount.

D. Issue After Receipt of Treasury Department Status. The payees described below are not eligible for immediate payment replacement by recertified check and shall have their unavailable check cancellations submitted under stop codes "D" or "G" and receive a recertified check only when the Treasury Department reports the check status as "outstanding".

1. Foreign businesses and contractors where check payment is made to addresses or financial institutions outside the United States.
2. Payees who have previously negotiated both the original check and the recertified check issued to replace it.

3. Payees who have received more than three recertified check payments in the past 6 months or who have received more than four recertified check payments in a 12-month period.

4. Payees who report non receipt of a recertified check.

5. Payees requesting recertification of an original check more than 30 days old.

6. Payees other than a deputy, agent, or cashier requesting replacement of an exchange for cash check.

E. Issue When the Treasury Department Status Is Paid. Except as provided in paragraph 080515, below, no recertified payment check shall be issued when the DAS from the Treasury Department indicates the check status is paid.

★ 080507. Mechanized Input of the SF 1184. DoD DOs who have access to the DCRM have the capability to mechanically prepare the SF 1184 daily using the UCC subsystem. The SFs 1184 are file transferred to the Treasury Department biweekly. Procedures for accessing the DCRM reporting system to add, change, inquire, or delete an SF 1184 request are found in the User Instructions for Disbursing Offices dated April 17, 1995. Contact your DFAS Center for a copy of this manual.

★ 080508. Preparation of the SF 1184

★ A. General. These procedures apply only to DOs who do not have the capability to electronically produce and transmit SFs 1184. Manually prepared SFs 1184 should be mailed to the supporting DFAS Center or an office designated by the supporting DFAS Center for entry into the DCRM UCC subsystem. Do not mail hardcopy SFs 1184 to the Treasury Department. In addition to the current version of the SF 1184, there is also a perforated version which can be adapted for hardware and software applications. The perforated version can be ordered from GSA Supply Distribution Facilities and GSA Supply Centers. The National Stock Number (NSN) for the perforated form is 7540-01-7777. The SF 1184 is a dual purpose document. If more than one check is to be cancelled, each check shall be processed on a separate SF 1184. In addition, the SF 1184 is used as a transmittal document for the item cancellations submitted. Instructions for preparation of the transmittal document are slightly different from the individual check reporting document. However, instructions for preparing both documents are contained in this paragraph. Transmittals shall be submitted each day for item cancellations prepared that day. If no cancellations are prepared, no transmittal is required. A transmittal cannot include more than 50 item cancellations.

B. Completion of SF 1184 (Item Cancellation). The SF 1184 shall be prepared by typewriter using uppercase letters for all alphabetic characters. Do not submit forms prepared by pen or pencil. The data fields and their contents are described below. See

figure 8-6.

1. CK. SYM. Enter the four-digit DSSN of the disbursing office that issued the original check. Required four-digit numeric field.

2. CK. SERIAL. Enter the check number of the original check that is being canceled and on which "STOP PAYMENT" action is being requested of the Treasury Department. Required eight-digit field. The field is an all numeric field zero-filled from the left. No commas shall be typed to separate the check number digits.

3. CK. AMOUNT. Enter the total amount of the original check. This required field is limited to 10 digits, all numeric. Do not use dollar signs. Use of commas is optional provided the 10-digit requirement is not exceeded. Show the decimal point separating dollars and cents.

4. CK. ISSUE DATE. Enter the date of the original check. This is a required numeric field containing six digits: month (two digits), day (two digits), and year (two digits).

5. AGY/PAYEE ID NO. Enter the identification number assigned to the payee. This is a required alpha-numeric field, maximum of 11 digits. Start from the left and leave unused spaces blank. Activities that do not normally assign specific ID numbers may use vendor contract numbers, DSSN, Social Security numbers, or other reference numbers. For Navy and Marine Corps disbursing offices, the 11-digit field is assigned as follows: positions 1-4, DSSN of the preparing disbursing office; positions 5-7, julian date of preparation; position 8, the unit position of the calendar year of preparation; and, positions 9-11, a 3-digit sequential serial number commencing with 001 on October 01 of each year and continuing through 999 before recycling the sequential numbers. Do not use 000 as a sequential number.

6. LINE CODE. A required numeric digit indicating the total number of lines used for the payee's name and address fields. For Navy and Marine Corps disbursing offices: use "0" for direct deposit checks; use "1" for non-entitlement; and in all other cases, use digits "3" through "6" (as appropriate for the number of lines used in the name and address fields). If the name and address is only two lines, pad the third line with blanks so "3" will be the correct line code.

★ 7. STOP CD. Enter the alpha character code for the appropriate stop reason code based on the definitions listed in table 8-1. The stop code describes the nature of the action required on the original check. The only codes authorized for use are "A," "D," "E," "F," "G," "K," "L," "M," "R," "U," "X," "Y", and, for Navy and Marine Corps disbursing offices only, "P".

8. AGENCY CODE. The agency code is a single alpha character. The following codes shall be used by the respective DoD Components. Defense Agencies shall use the appropriate agency code based on the Military Service that provided the DSSN.

<u>CODE</u>	<u>COMPONENT</u>
A	Department of the Army
F	Department of the Air Force
L	U.S. Marine Corps
N	Department of the Navy

9. PAYEE NAME. Enter the payee's name as it appeared on the original check. This is a required alpha-numeric field limited to 2 lines with a maximum of 30 digits each. The second line is intended to accommodate listing both names when there is a joint payee. If the payee's name is more than 30 characters, use both lines. If there has been a name change, type the NEW name in this field and show the OLD name as it appeared on the original check in the FOR AGENCY USE block.

10. ADDRESS. The address in this alphanumeric field shall be the current address of the payee because the Treasury Department uses this address to prepare claims document address labels. The address is required for STOP REASON CODES "D" and "G". For Navy and Marine Corps disbursing offices, when STOP REASON CODE "F" is used, the disbursing office address will be entered in this field. Each line of the address field is limited to 30 characters.

11. NAME OF DECEDENT. This field is required when the STOP REASON CODE is "E." The field length is 30 characters. Type the deceased payee's name: last name; first name; middle initial(s). Do not use punctuation marks. If the name of the decedent is not provided with a "deceased" STOP REASON CODE "E", the SF 1184 will be rejected by the Treasury Department.

12. DATE OF DEATH. This field is required when the DoD Component has rendered the payee or payee's estate not entitled to the proceeds of the check; therefore, the date of death is required for only STOP REASON CODES "E" or "U."

13. AMT. TO BE RECLAIMED. The "amount to be reclaimed" is a required field for all STOP REASON CODES. This is a required 10-digit field containing the check amount. In some rare cases, the amount to which the payee is no longer entitled (that is the amount to be reclaimed) will be less than the full amount of the original check. In cases where the payment status is "paid", the amount to be reclaimed will be used by the Treasury Department when seeking to recover from the banking system. A lesser amount could occur in the case of non-entitlement, where the payee was entitled to a lesser amount than the original check. In that case, the amount to be reclaimed would be the difference between the amount of the original check and the amount to which the payee is entitled. The field is limited to 10 digits.

Do not use dollar signs. Use of commas is optional provided the 10 digit maximum is not exceeded. Always show the decimal point separating dollars and cents.

14. AGY. LOC. CODE. The Agency Location Code is a four- or eight-digit numeric symbol used by the Treasury Department to identify accounting reports and documents prepared by or for accounting stations and financial offices. The following four- or eight-digit numeric codes shall be entered in this block by the respective DoD Components. Defense Agencies shall use the appropriate agency location code based on the Military Service that provided the DSSN.

1700XXXX Navy and Marine Corps disbursing offices. Note: The XXXX represents the disbursing office DSSN. Insert the assigned DSSN in lieu of "XXXX".

2100XXXX Army disbursing offices. Note: The XXXX represents the disbursing office DSSN. Insert the assigned DSSN in lieu of "XXXX". U.S. Army Corps of Engineers activities that disburse from civilian funds shall enter the DSSN only.

5700XXXX Air Force disbursing offices. Note: The XXXX represents the DSSN. Insert the assigned DSSN in lieu of "XXXX".

15. AGENCY OUTPUT. This code is a required single numeric digit indicating the type of output (hard copy or magnetic tape) to be generated by the agency. Table 8-2 is a list of the output codes and the description of each. Army disbursing offices enter "2" if SF 1184 submission is by paper; enter "4" if SF 1184 submission is by magnetic tape. All Air Force disbursing offices enter "4" in this field. All Navy and Marine Corps disbursing offices enter "3" in this field.

16. AGENCY REFERENCE. This field is optional. DOs may use this 35-character field as necessary to enter information that will assist in identifying this particular SF 1184, identify actions, or explain the reason for the SF 1184.

17. FOR D.O. USE. Enter the DSSN on the D.O. Activity line. The DO or deputy shall sign on the signature line provided.

18. FOR AGENCY USE. For Army and Air Force, enter the DoD Component name on the Agency line. Navy and Marine Corps disbursing offices enter the name of the preparing disbursing office on the Agency line. The DO or deputy shall sign the signature line on every SF 1184 submitted.

C. Completion of Transmittal Document. A transmittal SF 1184 shall be prepared daily for each batch of 50, or fewer, items submitted on any date. A separate SF 1184 shall be used as the transmittal document. Under no circumstances shall a batch contain more than 50 items. The required data fields for the transmittal SF 1184 and their contents are described below. Use of fields other than those listed will result in rejection of the entire batch by the Treasury Department. This form shall be prepared by typewriter. See figure 8-7.

1. ADDRESS. This field accommodates 120 characters. Enter the DO's name and complete disbursing office address.

2. FOR D.O. USE. Type the DSSN of the preparing disbursing office in the space directly above D.O. Activity. The DO or deputy shall sign the SF 1184 transmittal document in the space provided.

3. AGY. LOC. CODE. The following numeric codes shall be used by the respective DoD Components. Defense Agencies shall use the appropriate agency location code based on the Military Service that provided the DSSN.

1700	Navy and Marine Corps
2100	Army
5700	Air Force

4. AGENCY OUTPUT. This code is a required single numeric digit indicating the type of output (hard copy or magnetic tape) to be generated by the agency. Table 8-2 is a list of the output codes and the description of each. Army disbursing offices enter "2" if SF 1184 submission is by paper; enter "4" if SF 1184 submission is by magnetic tape. All Air Force disbursing offices enter "4" in this field. All Navy and Marine Corps disbursing offices enter "3" in this field.

5. FOR AGENCY USE. When the SF 1184 is used as a transmittal document enter in this field the total number of SFs 1184 attached and the batch number of the batch being transmitted. The batch number consists of 13 digits. The batch number shall be composed of the submitting DO's DSSN (four digits); the date (MMDDYY) (six digits), and a three-digit sequential number beginning with 001 each day. The batch sequential number shall also be recorded DD Form 2662. The SF 1184 Total indicates to the Treasury Department and the DFAS Centers the total number of individual cancellation documents being submitted with a transmittal document. Use one numeric digit for batches containing one to nine items. Use two numeric digits for batches containing 10 to 50 items. Enter the DoD Component name (i.e., Army, Air Force, Navy, or Marine Corps) on the Agency line. The DO or deputy shall sign the signature line for each transmittal submitted.

080509. Submission of Unavailable Check Cancellation. All cancellations shall be submitted on the day they are prepared along with a transmittal covering the item cancellations in every batch. Even though only one item cancellation is being submitted, it shall be covered by a transmittal. The DFAS Centers addresses are:

Defense Finance and Accounting Service
Cleveland Center
DFAS-CL/AABA
1240 E. Ninth Street
Cleveland, OH 44199-2056

Defense Finance and Accounting Service
Columbus Center
DFAS-CO/FP
Columbus, OH 43218-2317

Defense Finance and Accounting Service
Denver Center
DFAS-DE/AAC
6760 E. Irvington Place
Denver, CO 80279-8000

Defense Finance and Accounting Service
Indianapolis Center
DFAS-IN/JFP (Mail Stop 101)
8899 East 56th Street
Indianapolis, IN 46249-0833

Defense Finance and Accounting Service
Kansas City Center
DFAS-KC/AE
Kansas City, MO 64197-0001

The agency receipt copy of the batch transmittal will be returned by the servicing DFAS Center to advise the DO that the entire batch has been accepted and processed. If the agency receipt copy has not been returned within 20 days after submission, the DO should contact the appropriate DFAS Center listed above and request assistance. The distribution of the manually prepared SF 1184 is shown in table 8-3.

080510. Daily Advice of Status. With the exception of the transmittal documents, the Treasury Department will return a Daily Advice of Status (DAS) on every SF 1184 received. An essential control technique is for DOs to keep a complete file of SFs 1184 submitted. Periodic review of the file will show, either by copy of the DAS or by copy of the agency receipt copy of batch transmittals, that the Treasury Department has received and processed all submissions. Incomplete file items should be followed-up within 30 days through the servicing DFAS Center by telephone and if necessary, by processing a second SF 1184. The status codes used by the Treasury Department on the DAS are listed in table 8-4. When the Treasury Department has issued a DAS with a status of "Outstanding check canceled, agency credited," future requests to cancel or obtain photocopies of the canceled check will receive a response status code "11" indicating the canceled check has been paid. However, until the original check is presented through the banking system, no photocopy will be available. Therefore, once a

disbursing office has received a DAS with a status code of outstanding, no additional SFs 1184 can be submitted for that check number. If the original check is ever presented through the banking system for payment, the servicing DFAS Center will notify the DO that the credit to Unavailable Check Cancellations and Overpayments, Suspense, **F3880, has been reversed by Treasury Department.. The Treasury Department will, at that time, provide a photocopy of the original check, a claims document, and a claim form (FMS Forms 3858 and 1133).

★ 080511. Automated Recertification Follow-up Procedures. After submitting an SF 1184 on a check, DOs shall use the FMS Form 3864 (Agency Recertification Follow-up) to maintain contact with the Treasury Department regarding previously submitted SFs 1184 when the DAS code has been received but either the 3880 credit, photocopy or claim form is 30 days overdue. Two new stop codes have been approved by the Treasury Department for use in the DCRM UCC subsystem to automate the hardcopy follow-up. If an SF 1184 received a DAS code indicating outstanding status (e.g., DAS 32) but the credit is overdue, use STOP REASON CODE “X” for the follow-up request. A STOP REASON CODE “Y” is used if an SF 1184 received a DAS code indicating paid status (e.g., DAS 11) but the subsequent information is overdue. The Treasury Department has provided additional DAS codes to respond to the new automated stop codes. The DAS codes and their messages are in table 8-4. See table 8-5 for details on when to submit the automated or hardcopy FMS Form 3864 to the Treasury Department.

★ 080512. Manual Preparation of the FMS Form 3864. Use the procedures below for completing a hardcopy FMS Form 3864 (Agency Recertification Follow-up). After submitting an SF 1184 on a check, DOs shall use the FMS Form 3864 to maintain contact with the Treasury Department regarding previously submitted SFs 1184 when the DAS code has been received but either the 3880 credit, photocopy or claim form is 30 days overdue. The DO shall complete parts A and B, as prescribed below. The Treasury Department will complete part C and return the form to the disbursing office. Table 8-5 lists more details on submission of this form.

A. FMS Form 3864, Part A. The DO shall complete this portion from retained records (original SF 1184 submitted, the DAS, and/or claims document). If status code is known, provide it in the proper block. The information entered on this form shall be typed.

B. FMS Form 3864, Part B. The DO shall complete this portion indicating the reason for submitting the FMS Form 3864. See table 8-5 for more details regarding the reasons for follow-up and required follow-up time frames.

C. FMS Form 3864, Part C. The Treasury Department will place a check mark in the appropriate block in reply to the DO's follow-up request, and will enter a further explanation in part C-9, OTHER, when warranted. Part C-8 will be checked only when the Treasury Department cannot furnish an immediate response to a follow-up request. A further response should be provided by the Treasury Department within 30 calendar days.

080513. Accounting for Recertified Checks

A. General. All credits for canceled unavailable checks and charges resulting from negotiation of a previously canceled unavailable check are provided by the Treasury Department through budget clearing account Unavailable Check Cancellations and Overpayments (Suspense), **F3880. The **F3880 account is restricted to unavailable check transactions and shall not be used for any other purpose. The **F3880 account is available to hold credit or chargeback amounts only until the appropriation or fund that was charged when the original check was issued can be identified. All amounts in the **F3880 account must be transferred to the proper appropriation of fund as expeditiously as possible. Note: As indicated in Chapter 7 of this volume, exchange-for-cash checks generally are issued as advances to deputies, agents, or cashiers, or as an accommodation service for the benefit of a payee. These exchange-for-cash transactions are not charged to an appropriation on fund. If a deputy, agent, or cashier loses such a check, the loss will be treated as a physical loss of funds as prescribed in Chapter 6 of this volume. If the Treasury Department determines the check to be outstanding, the unavailable check credit shall be used to offset the loss of funds. If the unavailable check should later be negotiated and the Treasury Department reverses the credit, the physical loss of funds shall be reestablished. If a payee who received an exchange-for-cash check as an accommodation service loses such a check, the unavailable check credit shall be used to reimburse the payee for the loss. However, since there was no entitlement chargeable to an appropriation, reimbursement shall not be made until the period of negotiability for the original check has lapsed (1 year from the date of issue).

1. Credits Resulting from Submission of SFs 1184. If an unavailable check is outstanding (not negotiated), the Treasury Department will issue a DAS indicating that the check is outstanding and that the agency will be credited with the proceeds. The Treasury Department will cancel the check and credit the funds derived from the cancellation to the **F3880 account. The DFAS Centers at Cleveland, Denver and Indianapolis will receive the cancellation credits monthly from the Treasury Department on an SF 1081 (Voucher and Schedule of Withdrawals and Credits), along with a magnetic tape listing of checks canceled. Identifying information for the checks being canceled will be included on the magnetic tape. Where available, the proceeds of these canceled checks will be forwarded to the DFAS Centers through the Government On-line Accounting Link System/On-line Payment and Collection (GOALS/OPAC). Any identifying information provided in the original check issue data submission will be reflected as detail in the credit transmission. The detail also will be provided on microfiche monthly. The DFAS Cleveland, Denver, and Indianapolis Centers will forward check credit information (including the detail information) applicable to the DFAS-Columbus Center disbursing accounts to the DFAS-Columbus Center. The DFAS-Cleveland Center also will forward the cancellation credit information (including the detail information) applicable to the DFAS-Kansas City Center and Marine Corps disbursing offices to the DFAS-Kansas City Center.

2. Reversals of Cancellation Credits. If a canceled unavailable check is negotiated to a financial institution after cancellation by the Treasury Department, the Treasury Department will reverse the cancellation credit and provide a DAS indicating the check has been negotiated and the credit reversed. The Treasury Department will provide a copy of the paid check, and FMS Forms 1133 and 3858. The reversal transactions will be separate from the

monthly cancellation credits described above. The DFAS Centers at Cleveland, Denver and Indianapolis will receive the cancellation credit reversals from the Treasury Department with an SF 1081 and a magnetic tape listing of checks for which credit was reversed. Identifying information for the checks will be included on the magnetic tape. The DFAS Cleveland, Denver, and Indianapolis Centers will forward the credit reversal information (including the detail information) applicable to the DFAS-Columbus Center disbursing accounts to the DFAS-Columbus Center. The DFAS-Cleveland Center also will forward the credit reversal information (including the detail information) applicable to the DFAS-Kansas City Center and Marine Corps disbursing offices to the DFAS-Kansas City Center.

B. DFAS Center. Title 31 U.S.C. 3334(a)(2) (reference (e)) requires that the proceeds from canceled checks be returned to the appropriation from which the check was issued originally and to treat the canceled check as an account payable. Within 15 days of receipt, the DFAS Center should forward the check cancellation and credit detail information both to the disbursing office that issued the check and the accounting office that supports the disbursing office. Any Treasury Department reversal of previous cancellation credits should also be forwarded to the applicable disbursing and accounting offices.

C. Accounting Office. When canceled check credits are received, the accounting office must promptly transfer the individual check credits from **F3880 to the appropriation charged when the check was issued and establish an account payable. If an unavailable check is replaced by a recertified check prior to receipt of credit from the Treasury Department, the accounting office should establish an account receivable in the appropriation or fund charged for the check issue and remove the receivable when the credit is received. Reversal of a previous credit also should be promptly transferred from **F3880 to the appropriation charged when the check was issued.

D. Disbursing Office. Upon receipt of the DAS indicating cancellation credit or reversal information from the servicing DFAS Center, the disbursing officer is responsible for initiating research on the check issue data submitted to the Treasury Department to ensure that the detailed information provided is accurate. That is, the DSSN, check serial number, date of issue, and issue amount provided in the cancellation credit or reversal must agree with the original check issue data reported to the Treasury Department when the check was issued. Any discrepancy in this data must be researched to determine the cause of the discrepancy and appropriate action taken to correct the discrepancy. The disbursing office also must notify the appropriate entitlement or subject matter area (i.e., military pay, civilian pay, travel pay, or commercial accounts payable) that the Treasury Department has returned credit to the activity because the check was not negotiated or reversed a previous credit because the check was negotiated and provide a copy of the DAS.

E. Entitlement Area. When notified that an unavailable check has been canceled and credit provided, the appropriate entitlement or subject matter area must determine whether the liability for payment of the underlying obligation is valid and prepare the appropriate vouchers for payment if the payee was not issued an immediate recertified payment when the SF 1184 was submitted.

F. Recertified Payments. Any recertified payment (including immediate replacements under stop code “A”) must be vouchered and charged to the appropriation or fund charged when the original check was issued. Recertified payments may be issued at the same time that the disbursing office submits the SF 1184 or at any subsequent point in the claims cycle; that is--

1. Before the status of the original check is known, when less than 31 days have elapsed from the date of the original check. See subparagraph 080506.C, above.

2. After the disbursing office has been advised by the DAS that the original is outstanding and credit will be provided.

3. After credit has been received from the Treasury Department through the applicable DFAS Center.

Making a recertified payment under items 1 and 2, above, will require an account receivable to be established in the appropriation or fund for the amount due on cancellation of the original check. A copy of the SF 1184 and/or DAS may be used to support the account receivable.

080514. Preparation and Disposition of Recertified Checks

A. General. Recertified checks shall be prepared and distributed in the same manner as regular checks previously described in Chapter 7 of this volume. If a payee claims non-receipt, loss, or destruction of a recertified check, the unavailable check cancellation procedures in this section also apply to the recertified check.

B. Undeliverable Recertified Checks. An undeliverable recertified check shall be processed in the same manner as any other undeliverable check immediately after it is found to be undeliverable. The 60-day time limit for holding undelivered checks is not applicable to undeliverable recertified checks. The check shall be canceled on an SF 1098 with credit to the appropriation charged when it was issued in accordance with paragraph 080512, above. The check shall then be deposited with the nearest FRB or branch on an SF 215 as prescribed in section 0804 of this chapter.

C. Returned and Recovered Recertified Checks. When a recertified check is returned by the payee after the original check which it replaced has been found and negotiated by the payee, the recertified check shall be canceled on an SF 1098 and credited to the appropriation charged when it was issued. The check shall then be deposited with the nearest FRB or branch on an SF 215 as prescribed in section 0804 of this chapter. The chargeback to the **F3880 account from the Treasury Department for the negotiated original check must be transferred to the appropriation charged when the original check was issued.

D. Returned and Recovered Original Checks. An original check which is returned to or recovered by the DO after it is more than one year old (from date of issue) or has

been canceled by submission of an SF 1184 shall not be canceled on an SF 1098 (Schedule of Canceled or Undelivered Checks). However, the check shall be marked "VOID - NOT NEGOTIABLE" on the front and held in the DO's safe or vault until the Daily Advice of Status (DAS) is received from the Treasury Department and then the marked check shall be destroyed locally by burning or shredding. No report of destruction is made to the Treasury Department. The date of destruction and supporting documentation shall be noted in DD Form 2662 (Recertified Check Register).

080515. Forgery

A. General. A payee may have a valid claim against the Check Forgery Insurance Fund (CFIF) to enforce the government's obligation on account of the check when the Treasury Department has determined the original check to have been paid. When the check status is "Paid", the Treasury Department will provide a photocopy of the original check, an FMS Form 1133 (Claim Against the United States for the Proceeds of a Government Check), and an FMS 3858 (Claims Document). If a photocopy of the check is not available within 60 days, the Treasury Department will provide a modified FMS Form 1133. If the Treasury Department does not provide the modified FMS Form 1133, the DO should request one by using FMS Form 3864. If the payee of the original check is deceased, not entitled to the proceeds of the check, or the check was endorsed before it was lost or stolen, the Treasury Department will take no action on the claim if the photocopy of the paid check is not available within 60 days. The FMS Forms 1133 and 3858 are combined in a four-page form set. The FMS Form 1133 is for the payee's declarations and information concerning the unavailable check. The FMS Form 3858 is the claim reference document that contains the necessary information for Treasury Check Claims Operations to identify the check. A copy of the FMS Form 3858 must be attached to any correspondence with the Treasury Department concerning the unavailable check.

B. Check Forgery Insurance Fund (CFIF). Only the Treasury Department's Division of Check Claims is authorized to adjudicate claims of forgery against Treasury checks. As explained in section 0806, below, a claim against the CFIF is governed by the 1-year statute of limitations provided in the Competitive Equality Banking Act of 1987 (CEBA) (reference (x)), since a claim against the CFIF constitutes a claim on account of a Treasury check. Therefore, a claim of forgery must be presented within 1 year from the date the check was issued. If the claim is not presented within the 1 year statutory period (from the date the check was issued), the claim on the check is barred and the payee is not entitled to payment out of the CFIF. Note: The statutory 1 year limit on the claim against the CFIF has no effect on the underlying obligation of the government for the payment. If the Treasury Department determines a check endorsement was forged and the payee's claim meets the statutory requirements, the Treasury Department will institute reclamation procedures to recover the proceeds of the forged check from the banking system. The CEBA also set a statutory time limit of 18 months from the date a check is negotiated for accomplishment of bank reclamation. As stated in Comptroller General Decision B-242666 of August 31, 1993 (reference z)), if the statutory requirements for the claim have been met and the proceeds of the check cannot be recovered from the banking system through bank reclamation procedures, the Treasury Department is responsible for issuance of the settlement check with the payment charged to the CFIF.

080516. Forgery Claims

A. General. As stated in the previous paragraph, a payee may have a valid claim against the CFIF when the unavailable original check has been determined by the Treasury Department to have been paid. The DO shall deliver the FMS Form 1133 portion of the form set to the payee for completion and return to the disbursing office if the SF 1184 was submitted with stop codes of A, D, F, or G. If the payee claims the endorsement signature is a forgery, the FMS Form 1133 must be completed by the payee and returned to the DO for submission to the Treasury Department. The DO shall inform the payee that only the Treasury Department is authorized to adjudicate claims of forgery against Treasury checks. If a recertified payment check has not yet been issued, no recertified payment check will be issued prior to receipt of an FMS Form 3859 (Claims Disposition Notice) from the Treasury Department. If the Treasury Department determines the check was not forged, the claim will be considered closed and the payee normally will not be authorized to receive a recertified payment. Also, if the Treasury Department determines the original check was not forged and the original check has been replaced by a recertified payment check, the payee shall be liable for the value of the recertified check and must make immediate payment. Note: Checks lost by the payee after they were endorsed by the payee are not forgeries.

B. FMS Form 3859 (Claims Disposition Notice). A payee is entitled to a recertified check only in settlement of a claim of forgery based on an FMS Form 3859 issued by Treasury Department. The FMS Form 3859 is used to advise the payee and the DO of the results of the Treasury Department's investigation of the claim of forgery. The conditions by which the DO is authorized to issue a recertified check to the payee are described below.

1. The Treasury Department has determined that the endorsement on the original check was forged and is in the process of collecting the proceeds through the banking system (bank reclamation), refund pending. In this instance, should the bank reclamation process fail, the settlement to the payee should properly be chargeable to the CFIF. Therefore, the recertified payment check should not be issued until the Treasury Department further advises that the proceeds have been recovered from the banking system and the credit provided to **F3880.

2. The Treasury Department has determined that payee is entitled to the proceeds of the check (the endorsement on the original check was forged but the time period for bank reclamation has expired), settlement authorized. This situation generally does not occur unless the payee failed to file the claim against the original check within the statutory 1-year period from the date the check was issued. As stated in paragraph 080514, above, this 1-year statutory period does not effect the underlying obligation to make payment. In this instance, if the underlying obligation is otherwise determined to be valid (payee entitled to the payment), the recertified check may be issued with the payment charged to the appropriation or fund charged when the original check was issued. If the original appropriation or fund is no longer available, the recertified payment should be charged to a current appropriation available for the same general purpose subject to limitations on its use.

080517. Collections of Double Negotiations

A. General. Negotiation of an original check which has been replaced by a recertified check is considered to be an illegal, incorrect, or improper payment for purposes of pecuniary liability. DOs are responsible for collection from payees to recover illegal, incorrect, or improper payments made by the DOs and/or deputies and agents. In the event that the payee separates from government service, the DO shall continue to be responsible for assuring collection action. Normally, collections for illegal, incorrect, or improper payments are one-time cash refunds or lump-sum collection by pay account checkage or salary offset and do not warrant installment liquidation. A decision to permit repayment in installments is reserved for extreme personal hardship and is left to the discretion of the DO.

B. Procedures

1. Collection Action. When the DO is notified that the Treasury Department has reversed a previous credit to **F3880 from the cancellation of the original check, the DO shall immediately begin collection action. Due process rights of collection specified in Part II of this volume shall be afforded the payee in each case. Normally, the most effective measure of effecting expeditious recovery is to present the payee a photocopy of the paid original check and a copy of the signed statement of the claimant containing the clause acknowledging that the payee was not entitled to both the original and the recertified check, and to enforce the agreement contained therein. Due process rights of collection include the opportunity for the payee to contest the validity of the debt. In cases of double negotiation, this opportunity is provided by the payee's right to complete the FMS Form 1133. If upon presentation of the copy of the negotiated check the payee asserts that the check was negotiated over a forged endorsement, collection should not begin until the Treasury Department's Division of Check Claims adjudicates the payee's claim of forgery. However, if the payee does not provide the properly completed FMS Form 1133 within the time frame allowed for presentation of documentation as to why the debt is not owed, the payee will be deemed to have acknowledged the debt and collection will begin immediately. If the payee provides the properly completed FMS Form 1133 and the Treasury Department determines the check was forged, the payee would not owe the debt. If the Treasury Department denies the payee's claim of forgery (i.e., the Treasury Department determines the check was not forged), the full amount of the check is due and payable immediately. Collection action shall be completed within 90 days of the receipt of the DAS from the Treasury Department indicating the canceled unavailable original check has been paid or within 90 days of receipt of the FMS Form 3859 from the Treasury Department indicating the payee's claim of forgery is denied, as applicable to the circumstances of each individual case as described above. The DO shall document all attempts to collect illegal, incorrect, or improper payments. If all reasonable steps have been taken to make collection and the illegal, incorrect, or improper payment becomes locally uncollectible within the 90-day time limit, the DO shall transfer the debt to the appropriate DFAS Center designated to pursue collection of locally uncollectible debts.

2. Determination of Fraud. Double negotiations could indicate misrepresentation or fraudulent intent. If the DO suspects that the negotiation of the original check is the result of fraudulent activity, the procedures outlined in Chapter 6 of this volume for reporting the event, and for possible investigative and disciplinary action shall be followed. Collection action shall be taken as specified in this Volume.

080518. Relief of Liability for Uncollectible Illegal, Incorrect, or Improper Payments. The DO may request relief of liability for illegal, incorrect, or improper payments following the procedures in Chapter 6 of this volume. As stated in 65 Comptroller General Decision 812 (reference (aa)), the policy of the Comptroller General is to deny relief in cases where the DO does not make all reasonable attempts to collect from the payee and delays more than 3 months before referring the debt to the appropriate activity for further collection. In the case of DoD Components, the appropriate activity to refer debts is the servicing DFAS Center.

080519. Separation of Duties. The payment recertification process is subject to the same management controls as other more routine disbursements. The same individual shall not authorize, process, and review recertified check transactions. Except as provided below, the minimum acceptable separation of duties shall consist of preparation of the SF 1184 by one individual; review and approval of the DD Form 2660 and SF 1184 by a deputy or the DO; preparation of a disbursement voucher by one individual in the appropriate entitlement area; review and approval of the voucher and supporting documentation by a first line supervisor other than the deputy or DO authorizing the transaction; and authorization of the disbursement by the DO or a deputy. At locations where the entitlement and disbursing offices are combined into one unit (as is the case at small activities and most tactical units), whenever possible neither the person preparing the SFs 1184 and disbursement vouchers nor the person reviewing the transaction and supporting documents shall prepare the check.

0806 TREASURY CHECKS CANCELED UNDER LIMITED PAYABILITY

080601. Background. The Competitive Equality Banking Act of 1987, Public Law 100-86 CEBA (reference (x)) amended 31 U.S.C. 3328 (reference (e)), and created a new section 3334 to establish time limits on the payability (negotiability) of Treasury checks. The CEBA affects the time period permitted for negotiation of Treasury checks, initiating and processing claims on those checks, recovering monies from financial institutions, and replacement of Treasury checks. However, the CEBA has no effect on the underlying obligation of the United States for which a Treasury check was issued. Electronic Fund Transfer (EFT) payments and limited depositary checking account payments also are not affected by CEBA.

A. Pre-CEBA. Prior to the effective date of CEBA (October 1, 1989), 31 U.S.C. 3328(a) provided that a Treasury check could be paid (negotiated) at any time and 31 U.S.C. 3328(c) provided that the limitation on claims against the Government in 31 U.S.C. 3702 (Barring Act) did not apply to an unpaid (not negotiated) Treasury check. These principles may be shown with the following hypothetical examples.

1. An individual makes a claim for payment of \$1,000 in December 1978 with an agency and receives a Treasury check in payment in January 1979. The individual does not negotiate the check until 1986. In this example, the underlying obligation is the amount due in satisfaction of the claim. The individual tolled the Barring Act by submitting the claim for payment in December 1978. Upon the issuance of a Treasury check, the individual also has a separate claim on the Treasury check, which was, in 1979, payable in perpetuity (31 U.S.C. 3328(a) (1982)). Thus, prior to CEBA, the individual's right to obtain a replacement check on account of the original unnegotiated Treasury check masked the effect of the Barring Act (31 U.S.C. 3702 (b)) on the underlying obligation.

2. The effect of the Barring Act on the underlying obligation may be shown by modifying slightly this example. In addition to the earlier facts, assume further that the individual discovered that he had failed to claim all that was due in December 1978 and that the agency in fact owed him another \$250. He may obtain payment of the additional amount of the underlying obligation only if he submits a new claim for the additional amount to the agency within the 6-year period following the accrual of the original claim, December 1978. If, in 1986, however, the individual--in addition to negotiating the check--submitted a claim for the additional \$250, the claim for the additional amount would have been barred since more than six years had elapsed from the accrual of the original claim.

B. CEBA. The CEBA established a 1-year limitation on the negotiability of a Treasury check. However, the negotiability of a check does not affect the obligation underlying the check. Effective October 1, 1989, CEBA left the two causes of action separate; that is, one on the underlying obligation and one on the Treasury check. However, CEBA imposed a statutory limitation on the period during which a Treasury check may be paid and on any claim on account of a Treasury check. CEBA requires that Treasury checks must be negotiated within one year of the date of issuance and states that any claim on account of a Treasury check is barred unless the agency which issued the check receives a claim within one year of the issuance date. Following this one-year period, a request for payment based on the Treasury check is forever barred. However, since a claim on the underlying obligation is separate from a claim on the check, payment may still be made on the underlying obligation subject to the six-year statute of limitations in the Barring Act (31 U.S.C. 3702(b)). Accordingly, after the six-year period following the accrual of the claim, a check may be issued only if the claimant has tolled the Barring Act by making a timely claim on the underlying obligation. To make CEBA applicable in the above example, change the years of the hypothetical case. If the individual submitted the claim in December 1989, and the date of issuance of the check was January 1, 1990, a claim on the check expired one year after the issuance date, December 31, 1990. Thus, the individual had to perfect his claim on the Treasury check before the one year period expired in order to obtain a replacement check. This, however, does not affect a claim on the underlying obligation. In this example, because a claim for payment, that is, the claim submitted in December 1989, was timely submitted, the running of the period of limitations in the Barring Act was tolled, and a replacement check may be issued, even if more than 6 years pass. Conversely, if a timely claim on the underlying obligation had not been received, the claim on the underlying obligation is barred and an agency may not issue a replacement check. Therefore, if a claimant has submitted a valid claim to toll the statute of limitations on the underlying obligation, he may obtain a

payment check even if more than 6 years has passed since the claim accrued or the check was issued. However, that is not to say that tolling of the Barring Act on the underlying obligation permits payment in perpetuity. Entitlement to payment is not unlimited; any appropriate defense remains available to the government. For example, where following cancellation of a Treasury check under CEBA, a claimant waits an inordinate period of time to request payment on the underlying obligation, laches may apply (see definitions). Furthermore, Treasury Department records show only that a check has not been presented to the Treasury Department for payment, and not whether it was presented to and paid by an intermediary bank.

080602. Treasury Check Payability. All Treasury checks issued prior to October 1, 1989, have been canceled. All Treasury checks issued on or after October 1, 1989, bear the legend "Void After One Year." The Treasury Department will decline payment of all checks which are not negotiated to a financial institution within 1 year from the check issue date. Financial institutions will advise the payee to contact the agency which issued the check because the check is no longer negotiable. Any physical checks returned to the disbursing office because they are no longer payable (negotiable) shall be stamped "VOID - NOT NEGOTIABLE" and shredded once the disbursing office has confirmed receipt of the Limited Payability cancellation credit. Treasury checks issued prior to October 1, 1989, have already been mass canceled and may be shredded without confirmation of receipt of a Limited Payability cancellation credit.

080603. Treasury Check Claimability. Any claim on account of a Treasury check is barred unless it is presented to the agency that issued the check within 1 year after the date of issuance. Since CEBA established a 1-year statute of limitations for claims against a Treasury check, DOs are not authorized to process any claim for replacement of a check which is over 12 months old (from date of issue). Therefore, under the provisions of CEBA, DOs must reject all claims against Treasury checks as time barred (i.e., claims for replacement of Treasury checks) that are not received prior to the expiration of the 12-month period of negotiability (from the date of issue) of the check. The DOs should notify the claimant that a claim of non-payment of the underlying obligation of the government must be filed with the appropriate entitlement office (contracting officer for vendors or commercial payees, military pay office, civilian pay office, travel office, etc.).

080604. Limited Payability Check Cancellation Process. During the 14th month after issuance, the Treasury Department will identify and cancel all checks that have not been negotiated within 12 months from the date of issue. Where the check issue data is submitted after the limited payability period, the cancellation of checks that are outstanding will occur at the end of the month in which the check issue data is submitted. The Treasury Department credits the funds derived from the cancellation of checks dated on or after October 1, 1989, to Unavailable Check Cancellations and Overpayments (Suspense), **F3880. The DFAS Centers at Cleveland, Denver, and Indianapolis will receive the limited payability cancellation credits monthly from the Treasury Department with an SF 1081 and a magnetic tape listing of checks canceled. Identifying information for the checks being canceled will be included on the magnetic tape. Where available, the proceeds of these canceled checks will be forwarded to the applicable DFAS Centers through the Government Online Accounting Link System/On-line Payment and Collection (GOALS/OPAC). Any identifying information provided in the original check issue

data submission will be reflected as detail in the credit transmission. The detail also will be provided on microfiche monthly. The DFAS Centers in Cleveland, Denver, and Indianapolis will forward check credit information (including the detail information) applicable to the DFAS-Columbus Center disbursing accounts to the DFAS-Columbus Center. The DFAS-Cleveland Center also will forward the cancellation credit information (including the detail information) applicable to the DFAS-Kansas City Center and Marine Corps disbursing offices to the DFAS-Kansas City Center. Note: All checks issued before October 1, 1989, that were not negotiated by October 1, 1990, also were canceled by the Treasury Department (referred to as “mass cancellation”). However, the proceeds of these canceled checks were not returned to the check issuing agency but were applied to the Treasury Department’s uncollectible accounts receivable.

080605. Reversals of Limited Payability Cancellations. In some cases, checks will be negotiated to financial institutions within 1 year from the date of issue, but processing in the Federal Reserve System or in the Treasury Department’s Reconciliation Branch will prevent the payment from being applied to the Check Payment and Reconciliation (CP&R) system before the limited payability cancellation has occurred. In these instances it will be necessary for the Treasury Department to reverse the cancellation credit and provide a copy of the paid check. Reversal transactions will be separate from the monthly cancellation credits described above.

080606. Accounting for Limited Payability Cancellation Credits or Reversals

A. DFAS Center. Title 31 U.S.C. 3334(a)(2) (reference (e)) requires that the proceeds from canceled checks be returned to the appropriation from which the check was issued originally and to treat the canceled check as an account payable. Within 15 days of receipt, the DFAS Center should forward the check cancellation and credit detail information to both the disbursing office that issued the check and the accounting office that supports the disbursing office. Any Treasury Department reversal of previous cancellation credits also should be forwarded to the applicable disbursing and accounting offices.

B. Accounting Office. The accounting office should transfer promptly the individual check credits from **F3880 to the appropriation charged when the check was issued and establish an account payable. Reversal of a previous credit also should be transferred promptly from **F3880 to the appropriation charged when the check was issued and the account payable removed.

C. Disbursing Office. Upon receipt of the detailed limited payability cancellation credit or reversal information from the servicing DFAS Center, the disbursing officer is responsible for initiating research on the check issue data submitted to the Treasury Department to ensure that the detailed information provided is accurate. That is, the DSSN, check serial number, date of issue, and issue amount provided in the cancellation credit or reversal must agree with the original check issue data reported to the Treasury Department when the check was issued. Any discrepancy in this data must be researched to determine the cause of the discrepancy and appropriate action taken to correct the discrepancy. In addition, the disbursing officer shall ensure that disbursing records are researched to determine if a claim of loss, theft, non-receipt, etc., has been filed on the limited payability canceled check. This

includes a determination of whether the check was previously replaced by a control check, recertified check, or other type of replacement check. The disbursing office also should notify the appropriate entitlement or subject matter area (i.e., military pay, civilian pay, travel pay, or commercial accounts payable) that the Treasury Department has returned credit to the activity because the check was not negotiated within the prescribed period. Upon the request of an entitlement area, DOs should accomplish the verifications described at subparagraphs 080608.A through 080608.D, below, and advise the entitlement area whether the original Treasury check was canceled or negotiated, or whether it was previously replaced.

080607. Claims of Non-payment of the Underlying Obligation. Comptroller General Decision B-244431.5, dated August 23, 1995 (reference (ab)), stated that whether a check may be replaced following the limited payability cancellation of a Treasury check depends on whether a timely claim on the underlying obligation has been submitted to toll the applicable statute of limitation, 31 U.S.C. 3702 (b) (1988) (Barring Act). As explained in the following subparagraphs, where documentary evidence of a timely claim on the underlying obligation exists, or other appropriate evidence that a timely claim was received, an agency may issue a new check. As required by paragraph 080603, above, when a Treasury check claim or replacement request is received by a DO more than 1 year after the check issuance, the DO should notify the claimant that a claim on account of the Treasury check is barred, and that any claims on underlying obligations should be filed by the payee with the appropriate entitlement area or agency with jurisdiction over the underlying obligation. In all cases, entitlement to payment on these claims must be determined by the appropriate entitlement area. For approved claims, the source of funding for the recertified payment must be the appropriation charged when the original check was issued, or if no longer available, a current appropriation available for the same general purpose subject to limitations on its use. For checks issued on or after October 1, 1989, which were canceled under limited payability, proceeds were provided as described in the previous paragraph and should have been transferred to the original appropriation charged when the check was issued and an account payable established. For checks issued before October 1, 1989, which were mass canceled and for which the proceeds were not returned to the issuing agency, the source of funding for approved claims should be the appropriation charged when the original payment was made. If no longer available, charge a current appropriation available for the same general purpose as the original appropriation subject to limitations on its use. After determination of a payee's entitlement to a recertified payment, the entitlement area should prepare and certify the payment voucher and forward the voucher and supporting documentation to the disbursing officer for payment.

A. Claim of Individual Payees

1. Military Pay. Claims of non-payment of members of the Armed Forces (to include active duty, reserve, retired, and annuitant) must be submitted to the appropriate military payroll office for determination of entitlement and that a timely claim on the underlying obligation was submitted. Note that Treasury checks issued in payment of obligations relating to military pay and allowance entitlements ordinarily are not issued in response to claims. Therefore, the payee usually will not have tolled the Barring Act by asserting a claim prior to issuance of the original check. It may, however, be necessary for the entitlement area to

consider the extent to which the Barring Act was tolled during periods of active duty performed by the claimant. If it is determined that the payee has submitted a timely claim and that the payee has not been paid, the claim must be certified and forwarded to the appropriate disbursing office for payment See paragraph 080608, below, for payment procedures.

2. Civilian Pay. Claims of nonpayment for wages earned by civilian employees of the U.S. Government must be submitted to the appropriate civilian payroll office for determination of entitlement and that a timely claim on the underlying obligation was submitted. Note that Treasury checks issued in payment of obligations relating to civilian pay entitlements ordinarily are not issued in response to claims. Therefore, the payee usually will not have tolled the Barring Act by asserting a claim prior to issuance of the original check. If it is determined that the payee has submitted a timely claim and that the payee has not been paid, the claim must be certified and forwarded to the appropriate disbursing office for payment. See paragraph 080608, below, for payment procedures.

3. Travel Pay. Claims of non-payment for travel entitlement by members of the Armed Forces or DoD civilian employees must be submitted to the appropriate travel office for determination of entitlement and that a timely claim on the underlying obligation was submitted. Note that Treasury checks issued in payment of obligations relating to travel pay entitlements ordinarily are issued in response to claims asserted by claimant submission of travel vouchers. Unlike military and civilian pay cases, the Barring Act's statute of limitation in travel payment cases usually will have been tolled before issuance of the original check when the claimant submitted the travel voucher. If it is determined that the payee has submitted a timely claim and that the payee has not been paid, the claim must be certified and forwarded to the appropriate disbursing office for payment See paragraph 080608, below, for payment procedures.

4. Residual Claim Categories. Treasury checks also are issued to individuals in satisfaction of miscellaneous Government obligations. For example, legal claims under the Federal Tort Claims Act (28 U.S.C. sections 1346(b), 2671-2680), should be asserted by claimant-payees before the entitlement area within the Military Department with tort claim settlement authority over the claim. Similarly, claims of properly losses incurred incident to government service may be cognizable under the Military Personnel and Civilian Employees' Claims Act (31 U.S.C. 3721), and should be asserted by claimants before entitlement areas with claim settlement authority, such as the Military Department's judge advocate general. Note that Treasury checks issued in payment of these types of obligations are issued in response to claims asserted by the claimants. Unlike military and civilian pay cases, the Barring Act's statute of limitation in these cases usually will have been tolled before issuance of the original check when the claimant submitted the claim. If it is determined that the payee has submitted a timely claim and that the payee has not been paid, the claim must be certified and forwarded to the appropriate disbursing office for payment See paragraph 080608, below, for payment procedures.

B. Claims of Commercial Payees. As used herein, the term "commercial payees" includes vendors, contractors, and any individual under contract for miscellaneous services. Claims of non-payment from commercial payees or their authorized agents must be submitted by the claimant to the contracting officer. If the contracting officer determines that the

commercial payee remains entitled to payment of the contractual obligation, and if a payment voucher is prepared and forwarded with supporting documentation to the disbursing office, the DO must then determine if a replacement check should be issued based on the criteria in paragraph 080608, below.

080608. Claim Processing Procedures. Upon receipt of an approved claim and certified payment voucher from the appropriate entitlement area, along with appropriate supporting documentation, the DO shall take the actions prescribed below.

A. Verify that the original check was canceled under limited payability.

B. Verify that credit for the check was received from the Treasury Department and transferred by the accounting office to the original appropriation charged when the check was issued. If receipt of the credit cannot be verified or no information is available locally, the DO shall prepare and submit to the servicing DFAS Center an SF 1184 for each check using Stop Reason Code “K” (photocopy), “L” (certified photocopy), or “M” (status) and citing “Limited Payability Cancellation Replacement Request” in the “For Agency Use” block. This action is also required to ensure that the check was canceled under mass cancellation before making any recertified payment for an obligation represented by a check dated before October 1, 1989. Stop reason codes, status codes, and message responses are shown in tables 8-1 and 8-4.

C. Verify that the original check was not spoiled or voided and replaced by a control check or a check bearing a different check number.

D. Verify that the original check has not previously been replaced by a recertified check, substitute check, or replacement check (e.g., was not previously the subject of a claim of non-receipt, loss or theft).

★ E. Issue a replacement check upon receipt of an approved claim and certified payment voucher from the entitlement area, provided that the verifications under paragraphs 080608.C and 080608.D confirm that the original check previously has not been replaced. If the above verifications disclose that the original check previously has been replaced, the DO shall reproduce a copy of the payment voucher on which the replacement was issued and obtain a photocopy of the replacement check from the treasury department as prescribed in section 0805, above. The copy of the voucher and replacement check must be forwarded to the entitlement element for use in providing notification to the claimant that the claim previously was settled. In order to assure the necessary cross-reference and control over issuance of replacement checks, DOs shall maintain a DD Form 2662 (Recertified Check Register) as prescribed in subsection 080503, above. Note for deactivated and closed disbursing offices: normally, the designated settlement office is responsible for issuing a recertified payment for an underlying obligation represented by a check canceled under limited payability. However, when circumstances warrant, such as consolidation, the disbursing officer servicing the activity that assumed the disbursing and accounting responsibility for the deactivated or closed office is authorized to issue a recertified payment on behalf of the deactivated or closed office. Under no circumstance is any DO authorized to issue a recertified payment for these claims citing a direct charge to the

**F3880 account. Recertified payments for the underlying obligations represented by a check canceled under limited payability may be made only from the original appropriation or if no longer available, from a current appropriation available for the same general purpose as the original appropriation, subject to limitations on its use.

0807 HOLDERS-IN-DUE-COURSE

080701. General. A holder-in-due-course is a person, financial institution, or business other than the original payee who, in good faith, takes possession of a check through endorsement. A holder-in-due-course may be the second, third, fourth, or later holder to whom the check has been transferred by endorsement. A holder-in-due-course has no direct claim against the issuer (issuing DSSN) of a Treasury check. However, all DOs shall assist the holder-in-due-course in filing claims as provided in this section.

080702. Exceptions. A check sent to a financial institution for credit to the account of a member, employee, or vendor and made payable to the financial institution does not create a holder-in-due-course relationship. When these checks are lost, stolen, or destroyed, apply the recertified check procedures in section 0805, above.

080703. Lost-in-Transit Items. When the holder-in-due-course is a financial institution (commercial bank, credit union, savings and loan, etc.), the DO should advise the institution to submit its claim through the nearest FRB as a lost-in-transit item. However, the DO may accept claims from financial institutions if the holder cannot submit the claim through the FRB.

080704. Processing Claims. Any DO, not just the DO of the DSSN that issued the check, can process a holder-in-due-course claim if all the data needed to complete the SF 1184 is supplied. If all the data is not provided the accepting DO shall submit the holder's claim supported by a signed statement from the payee and/or holder to the disbursing office that issued the check. The issuing disbursing office shall then complete the SF 1184 and forward the completed package to the Treasury Department. The disbursing office processing a valid holder-in-due-course claim shall not issue a recertified check to the holder.

080705. Preparation and Distribution of the SF 1184 for Holder-in-Due-Course

★ A. Preparation. SFs 1184 for holders-in-due-course cannot be submitted via mechanized systems. In addition to the current version of the SF 1184, there is also a perforated version which can be adapted for hardware and software applications. The perforated version can be ordered from GSA Supply Distribution Facilities and GSA Supply Centers. The National Stock Number (NSN) for the perforated form is 7540-01-777. Using a typewriter, or local hardware or software applications, complete the following blocks on the SF 1184 and make no other entries.

1. CK. SYM. Enter the DSSN of the disbursing office that issued the check. (Processing DSSN may be different).

2. CK. SERIAL. Enter the serial number of the lost, stolen, or destroyed check.
3. CK. AMOUNT. Enter the exact amount of lost, stolen, or destroyed check.
4. CK. DATE. Enter the date of lost, stolen, or destroyed check.
5. FOR DO USE
 - a. Enter an "X" in the "Request Processed" block.
 - b. Enter the name and DSSN of the preparing DO's activity, post, station, or unit on "DO Activity" line.
 - c. The DO, deputy, or other authorized person shall sign the "Signature" line.
6. FOR AGENCY USE
 - a. Type the words "Holder-In-Due-Course".
 - b. Type the word "Payee:" and the name and SSN of the payee of the lost, stolen, or destroyed check.
 - c. Type the word "Claimant:" and the name and address of the holder making the claim for the check.
7. AGENCY LINE. Type "U.S. Army", "U.S. Navy", "U.S. Air Force", or "U.S. Marine Corps", as appropriate. Defense agencies other than the Army, Navy, and Air Force shall enter the appropriate agency name based on which Military Service provided the DSSN.
8. SIGNATURE LINE. The DO or a deputy shall sign the SF 1184.

LEAVE ALL OTHER FIELDS OF THE SF 1184 BLANK.

B. Distribution. Attach the statements of the payee and the holder to the SF 1184 original copy. Mail the original SF 1184 and statements to: Department of the Treasury, Financial Management Service, Exception Processing Unit, Operations Division Check Claims, P.O. Box 1849, Hyattsville, MD 20788. File the "Disbursing Office Copy" in the processing DO's retained records. If the processing DSSN is not the DSSN issuing the original check, mail the "Agency Receipt Copy" to the issuing DSSN. Otherwise, destroy the "Agency Receipt

Copy" and the "Administrative Agency Copy". See figure 8-8 for a properly completed SF 1184 (Holder-In-Due-Course).

080706. Payment of Claims. The Treasury Department will determine the payment status of the original check, advise the holder of the status and the action to be taken, and forward copies of paid checks to the holder. The processing DO shall not issue a recertified check for any holder-in-due-course claim received and processed through the Treasury Department. In addition, when an "Agency Receipt Copy" is received by the disbursing office that issued the check, action shall be taken to ensure that the check issue records for the original check identified on the SF 1184 are flagged or blocked by a clear and unmistakable signal to prevent future cancellation and replacement of the original lost or stolen check.

STOP CODE	MEANING	CONDITIONS FOR USE
A	RECERTIFIED CHECK	<ol style="list-style-type: none"> 1. Payee entitled to original check. 2. Payee claims nonreceipt, loss, theft, or mutilation. 3. Check was not endorsed by payee when lost or stolen. 4. DoD is making a second payment by recertified check. 5. Payment was not a direct deposit/electronic funds transfer check.
D	ENTITLEMENT	The same conditions apply as for Code A above except the agency prefers to recertify the payment after it has been advised of the status of the original payment, or after receiving credit from Treasury on the outstanding check. A recertified check is not issued until the status of the original check has been determined.
E	DECEASED	<ol style="list-style-type: none"> 1. Payee died before original check issue date. 2. Payee's estate is not entitled to the proceeds of the original check.
F	NON-ENTITLEMENT	Payee is not entitled to all, or any part of the proceeds of the check.
G	LOST/STOLEN - ENDORSED	<ol style="list-style-type: none"> 1. Payee entitled to proceeds of the check. 2. Check was in payee's possession and had been endorsed before it was lost or stolen.
K	PHOTOCOPY	<ol style="list-style-type: none"> 1. Photocopy needed for administrative purposes. 2. No indication of nonreceipt, loss, theft or that a claim will be involved. 3. This code does not cancel an original check.
L	CERTIFIED PHOTOCOPY	<ol style="list-style-type: none"> 1. Certified photocopy needed to satisfy legal requirements. 2. No indications of nonreceipt, loss, theft, or other evidence that a claim for a check by the payee is involved. 3. This code does not cancel an original check.
M	STATUS	<ol style="list-style-type: none"> 1. Used to determine payment status only, when a photocopy is not required for administrative purposes. 2. This code does not cancel an original check.
P	LIMITED PAYABILITY CANCELLATION REQUEST	This code is for use only by Navy and Marine Corps disbursing offices. It is used to verify credit for limited payability cancellation from the Treasury Department. This code does not cancel an original check.
R	FOLLOW-UP TO PRE-RECERTIFICATION STOP	<ol style="list-style-type: none"> 1. DO needs information on Request for Stop Payment (Standard Form 1180) submitted prior to recertification procedures (prior to July 27, 1984). 2. This code does not cancel an original check.
U	LEGAL INCAPACITATION	Agency determines payee is no longer legally entitled to the proceeds of the check.
X	RECERTIFICATION FOLLOW-UP OUTSTANDING STATUS	Agency received outstanding status on prior submitted SF 1184 but credit is overdue.
Y	RECERTIFICATION FOLLOW-UP PAID STATUS	Agency received paid status on prior submitted SF 1184 but photocopy or claim form is overdue.

Table 8-3. Distribution of Manually Prepared SF 1184 (Unavailable Check Cancellation)

STOP REJECT CODES			
1A	Rejected - symbol missing.	4D	Rejected - UCC/CSI code unauthorized for ALC: Certain stop codes are reserved for special use. If you submit a UCC with a stop code that is not available to the DoD, the UCC will reject.
1B	Rejected - check serial number missing.		
1C	Rejected - check amount missing.		
1D	Rejected - original check date missing.		
1E	Rejected - UCC/CSI reason code missing.	4E	Rejected - invalid agency output indicator.
1F	Rejected - payee ID number missing.	5A	Rejected - check symbol field numeric only.
1H	Rejected - payee name missing.	5B	Rejected - check serial no. field numeric only.
1I	Rejected - address missing.	5C	Rejected - amount field numeric only.
1J	Rejected - decedent name missing.	5D	Rejected - reclaimed amount field numeric only.
1K	Rejected - date of death missing.	5E	Rejected - ALC field numeric only.
1L	Rejected - agency location code missing.	6A	Rejected - invalid check date field.
1N	Rejected - amount to be reclaimed missing.	6B	Rejected - invalid date of death field.
1O	Rejected - agency output indicator missing.	7A	Rejected - no record of check symbol/serial no. (check issue report not submitted, recorded, or rejected).
2A	Rejected - check description error; resubmit corrected stop.		
	Rejected - date of death after check date.	8A	Rejected - ck canceled/agency credited.
3A	Rejected - decedent payee wrong/payee.	8B	Rejected - void check-DO never issued check.
3C	Rejected - invalid UCC/CSI.	9A	Rejected - amount not equal to issue amount.
4A	Rejected - invalid agency location code.		
4C			
PAID STATUS CODES			
11	Paid - photocopy and claim to follow.	15	Paid - certified photocopy to follow.
13	Paid - DCC reclamation; no photocopy to agency.	16	Paid - status. The check has been presented for payment or canceled and only status was re-quested.
14	Paid - photocopy to follow. Subsequently the DO will receive FMS Form 3858 with one of the following messages:	17	Paid - endorsement may prohibit claims action; photocopy and claim to follow.
	1. Check paid - copy enclosed.	18	Paid - statute of limitations expired; no photocopy available. The statute of limitations for making an unavailable check cancellation claim has expired. If status is needed, use stop reason code M.
	2. Check previously canceled by SF 1184 and proceeds made available to agency.		
	3. Check previously canceled by available check cancellation.	20	Paid - declined check; photo/claim to follow.
	4. Check canceled pursuant to limited payability. The proceeds were made available to the agency 14 months after the issuance of the check.	21	Paid - ACC credit by DO - no photo available.
LIMITED PAYABILITY STATUS CODES			
25	Paid - no further information available. A copy of the check has been requested under stop codes K or L. The Treasury Department is not able to provide copies of checks issued prior to November 7, 1986. Copies of checks issued on or after November 7, 1986 are generally available for 78 months.	26	Limited Payability Mass Cancellation. Check was issued prior to October 1, 1989 and was included in the cancellation of all outstanding checks on November 30, 1990. No further assistance available. Check Previously Canceled By Limited Payability. The check was outstanding after 14 months from its issue date and was canceled.
		27	
OUTSTANDING STATUS CODES			
32	Outstanding - check canceled, agency credited.	34	Outstanding - status.
33	Outstanding - no photocopy.		
PAYMENT EXCEPTION STATUS CODES			
40	Payment Exception - DCC to review and advise.	43	Payment Exception - DCC to review and advise.
41	Payment Exception - DCC to review and advise.	44	Payment Exception - DCC to review and advise.
42	Payment Exception - DCC to review and advise.		

★ Table 8-4. Daily Advice of Status Codes and Messages

RECERTIFICATION FOLLOW-UP CODES			
50	No SF 1184 in system.	58	Agency account was credited by Document Number _____
51	Follow-up has been presented too soon.		Dated_____.
52	Check has been archived. DO will be further advised and provided an FMS 3858 with status code of 50, 51, 59, 11, 13, 17, 20, or 90.	59	Previous payment was a UCC cancellation.
55	No outstanding status found.		
57	The cancellation credit has not been processed. Agency will be further advised.		
SUBSEQUENT STOP CODES			
53	Rejected - duplicate stop.	63	Payment Over Cancellation - Reversal of previous agency credit on (date) by SF 1081 (Voucher #). Photocopy and claim attached. Endorsement may prohibit claims action.
54	Check has been previously canceled.		
61	Payment Over Cancellation - Reversal of previous agency credit on (date) by SF 1081 (Voucher #). Photocopy and claim attached.	90	Payment Exception - ODCC to review and advise.
62	Payment Over Cancellation - Reversal of previous agency credit on (date) by SF 1081 (Voucher #). Photocopy used for DCC reclamation on deceased stop.		

**Table 8-4. Daily Advice of Status Codes and Messages
(Continued)**

Reason	Time Frame	Remarks
1. DAS states duplicate stop.	Immediately.	
2. DAS states exception category.	No earlier than 60 days from receipt of DAS.	
3. DAS states check paid. a. Photocopy of check and claim form not received. b. Photocopy of check received, no claim form. c. Received claim form without photocopy of check. d. Photocopy of check has different check symbol and serial number from DAS.	No earlier than 30 days from receipt of DAS. Immediately upon receipt of photocopy of check. Immediately upon receipt of claim form. Immediately upon receipt of photocopy of check.	Check items 4, 4a, and 4b of FMS Form 3864. Check items 4 and 4b of FMS Form 3864. Check items 4 and 4a of FMS Form 3864. Return photocopy of check. Check items 4 and 4c of FMS Form 3864.
4. Standard Form 1081 received with a claim document. a. Without photocopy of check. b. Without claim form (not applicable for stop code E or T when no photocopy of check can be obtained). c. Without a photocopy of check and claim form. d. With wrong photocopy of check.	Immediately upon receipt of Standard Form 1081. Immediately upon receipt of Standard Form 1081. Immediately upon receipt of Standard Form 1081 and claims document. Immediately upon receipt of Standard Form 1081 and claims document.	Check items 5 and 5a of FMS Form 3864. Check items 5 and 5b of FMS Form 3864. Check items 5, 5a, and 5b of FMS Form 3864. Check items 5 and 5c. In item 10, OTHER, state whether the check problem involves a wrong payee or a wrong symbol and serial number. Return the photocopy of the check.
5. The Treasury Department has not responded to a claim form.	No earlier than 30 days from submission of the claim form.	Enter the date claim form submitted on FMS Form 3864.
6. Claims disposition notice (CDN) indicates need for investigation or refund from a financial institution, but final CDN not received.	a. No earlier than 120 days from CDN that states "Pending investigation." b. No earlier than 180 days from CDN that states "Pending refund from bank."	The Treasury Department does not continually follow-up with banks. DO's should follow-up with Treasury Department monthly when credit is anticipated.
7. DAS advised outstanding check canceled, credit not received.	No earlier than 21 days from receipt of DAS.	
8. Credit not received as a result of deceased payee when the Treasury Department is requesting refund from a financial institution.	No earlier than 180 days from receipt of DAS.	The Treasury Department does not continually follow-up with banks. DO's should follow-up with Treasury monthly when credit is anticipated.
9. FMS Form 3864 submitted, no response.	Submit second FMS Form 3864 no earlier than 30 days from date of original FMS Form 3864.	

Table 8-5. Reason and Time Frame for Submitting FMS Form 3864
